SECRETARY (pro tem.)

Mr Joseph Hames, jun., Esq., New walk, Leicester.
Offices—67 Granby street, Leicester.

PROSPECTUS.

This Company is established to purchase and carry on the well-known and extensive hosiery manufactory of Mr Charles Noon, at Leicester, which has been in most successful operation for upwards of 20 years.

The price to be paid for Mr Noon's business and factory is about £65,000, and will include the newly-erected factory and warehouse, land and premises, situate in the best part of Leicester, out-door and in-door machinery, steam plant, stock (to be valued, as on 1st January next, at list price), and good-will. Of the purchase money the vendor will receive £15,000 in cash, on the Company taking possession; £15,000 in debentures of the Company, payable with interest at 5 per cent. in 12, 18, and 24 months; £15,000 in 1,500 fully paid-up shares (and which Mr Noon will agree not to sell for five years), and the remainder in shares with £5 paid up thereon.

The Directors have had the properties valued, and the books and accounts of the business examined, and the following certificate by Messrs Croysdill, Saffery, and Co., of No. 14 Old Jewry chambers, London, public accountants, will show that the Company is acquiring a most profitable trade at a moderate price:—

"No. 14 Old Jewry chambers, Nov. 9, 1865.

"We have investigated the books and accounts of Mr Charles Noon, hosiery manufacturer, of Leicester, and have also satisfied ourselves that the land, buildings, plant, and machinery valued by Messrs J. and T. Holland, Messrs Law and Sons, Messrs Garner and Son, Messrs Death and Ellwood, and Messrs W. Billings and Son (of Leicester), and Messrs Hibbs, Brothers (of Nottingham), respectively, are just and moderate valuations, and we deem the price to be given for the same is a fair one. We also hereby certify that Mr Charles Noon's realised profits amply justifies his guarantee of 10 per cent. on the paid-up capital of the Company.

"CROYSDILL, SAFFERY, and CO."

Mr Noon will covenant in the articles of association that a dividend of 10 per cent. per annum on the paid-up capital of the Company shall be paid for the first three years, from 1st day of January next (the date of taking possession), and will remain with the Company as its Managing Director. All surplus profit, beyond the guaranteed 10 per cent. will be divided among the shareholders at the expiration of the third year.

All shareholders will be entitled to receive dividends in proportion to the amount of capital paid up, or treated as having been paid up, on their respective shares.

The high reputation which Mr Noon's hosiery has in the market has enabled so great a demand for his goods that a large amount of unexecuted orders remains on hand. By the sale of his business to the Company, with the power to issue more shares and increase the capital, which the Directors will have by the articles of association, the business can be very considerably and profitably extended. The Directors, who thoroughly understand the nature and value of the trade and business, confidently recommend the Company as a safe and profitable investment.

A large number of the shares having been already applied for, the Directors will proceed to an allotment of shares, and commence business as soon as a sufficient number has, in their opinion, been subscribed for. If no allotment of shares be made, the deposit will be returned in full. If a less number of shares be allotted than is applied for, the money paid on application will be applied, as far as it will extend, in payment of £2 per share, payable on allotment, the balance, if any, being repaid to the applicant.

Applications for shares in the annexed form should be made on or before the 12th of December next, and sent, together with the amount of deposit, to the bankers of the Company.

No promotion money has been, or will be, paid, and the cost of the establishment of the Company will be limited to the actual and necessary expenditure.

The memorandum and articles of association may be seen at the offices of the Company, and of the solicitors, where also, and at the offices of the bankers and brokers, prospectuses and forms of application for shares may be had.

FORM OF APPLICATION FOR SHARES (to be retained by the bankers).

To the Directors of Charles Noon and Company (Limited).

Gentlemen,—Having paid to your bankers, Messrs , the sum of £ , being the deposit of 10s per share on shares in the above Company, I hereby request that you will allot me that number, and I agree to become a member of the Company in respect of such shares, or in respect of any less number you may allot me, and to execute the articles of association when required; and I request that my name be placed on the register of members for the shares so allotted.

Dated this day of , 1865.

NAPLES PUBLIC WORKS
COMPANY (Limited).

The Subscription List will Close for London and the Country on Tuesday next, the 5th December.

J. F. O'BRIEN, Secretary.

NAPLES PUBLIC WORKS
COMPANY, Limited.

Messrs CLENCH, SMITH, and CO. are instructed to receive Applications for Scrip Certificates in the Naples Public Works Company (Limited).

Incorporated under the Companies Act, 1862, by which the liability of each shareholder is limited to the amount of his shares.

Capital £1,200,000; first issue, £600,000.
With power to increase.

In 6,000 provisional scrip certificates to bearer, of £100 each, of which £5 must be paid on application, and a further sum of £7 on allotment each of such scrip certificates being divisible into five share certificates of £20 each, upon there being called up and paid thereon the proportion of 20 per cent. of the nominal value.

Interest on all calls duly paid by shareholders during the first two years of construction, at the rate of six per cent. per annum; or at seven per cent. if fully paid up. After the first two years, the rentals, then constituting the shareholders' revenue, are estimated to yield ten per cent., irrespectively of bonuses from sales.

The £100 provisional scrip certificates may be exchanged, with the consent of the Company, for debenture bonds, redeemable in five and seven years, to bear eight per cent. interest.

DIRECTORS.

G. A. F. Cavendish Bentinck, Esq., M.P.
Thomas Bradshaw, Esq., Director of the English Joint Stock Bank.
John Brown, Esq. (late Grant, Smith, and Co., Calcutta), Culvers Hadham, Herts.

BROKERS.

Messrs Partridge and Greenfield, 21 Throgmorton street.
Messrs Price and Devot, 54 Threadneedle street.

AUDITORS.

Messrs Johnstone, Cooper, White and Evans, Coleman street buildings.

SECRETARY—J. F. O'Brien, Esq.

Temporary Offices—1 Royal Exchange buildings, London.

This Company is formed for the purpose of executing Public Works in Naples, and will commence operations by constructing a boulevard upwards of a mile in length and 80 feet wide, connecting the centre of the city, the Royal Palace, and the Government buildings with the Chiaja and Corso Vittor Emanuel, the chief carriage drive of the Neapolitan people. The entire project is shown on the accompanying plan, where the portion coloured red indicates the first section of the works, and that coloured blue (for which plans are now being prepared, and arrangements are in progress with the Municipality) is marked out to be subsequently proceeded with.

Naples, the third city in Europe, contains about 600,000 inhabitants, and is rapidly increasing in population and commercial development. It is the port and centre of a population numbering nearly 2,000,000 souls, dwelling within a radius of twenty miles, and is much frequented by foreigners from all parts of the world, both for temporary and permanent residence.

A Tender for this work was made to the municipality of Naples, in accordance with a decree of expropriation, and having been accepted by them, and approved in due form by the Prefect, on behalf of the Government of Italy, the requisite compulsory powers are thus secured for the purchase and expropriation of the necessary land in free simple for the intended object, without the delay of other legal formalities. The municipality of Naples, upon accepting this Tender, require the usual deposit of caution money, which the concessionaire has accordingly paid.

The municipality contributes as a subsidy of 1,800,000f, payable progressively as the work proceeds.

Contractors have undertaken to purchase all the land necessary and to complete the construction of the new thoroughfare in the style of the edifices lately erected on the new boulevards of Paris, including the formation of the road, paving, and works of drainage, &c. The new houses are to be 20 metres high (65 feet), and the total cost of houses, land, &c., amounts to 6 0 francs (£2? 16s) per square metre of the area built upon.

The contractors, relying upon the success of the undertaking, have accepted these terms, and they look for their remuneration out of a portion of the surplus profits after repayment of capital, interests, and all other expenses. There never these has been fixed at one-fourth of the realised profits, the remaining three-fourths being divisible among the shareholders.

From a Report published by the Municipality of Naples, in 1862, on the value of house property there, and from the increase of value since that date, which is estimated by experienced residents at upwards of 30 per cent., the revenue from rentals would be calculated to yield at least 10 per cent. per annum on the cost of construction.

The value of house property in Naples is reported to vary, according to locality, between twenty to twenty-five years' purchase:—Houses in the Via Toledo being valued at twenty-five years', those in the Chiaja district, and in the vicinity of the new street at twenty years' purchase. When the proposed boulevard is opened into the Toledo, it is believed that these houses will command an equal, if not a higher price than those in the Toledo. Taking the value, however, at an average of only twenty years' purchase, each square metre yielding a minimum rental of sixty-five francs, or over ten per cent. on a cost of 620 francs (£24 16s), would attain a selling value of 1,300 francs (£52).

There is a large and increasing demand for house accommodation in Naples, and house property being the favourite investment of the Neapolitan people, immediately houses are completed they find ready purchasers. Indeed, in many cases, contracts for sale can be made in anticipation of their completion.

After a most careful examination of the present project and of all attendant circumstances, it is calculated that a share capital of £600,000, together with the returns from sales taking place during the progress of the works, will be sufficient to work out the entire concession. And the calculation, founded upon the above stated rates, exhibits as a result,—within the term of eight years to be occupied in completing this enterprise,—returns, from the disposal of successive portions of the estate, which promise to furnish at least £500 in the aggregate of bonuses upon every subscription of £100,—exclusively of the entire repayment of the capital:—or, in other words, a capital profit of 500 per cent., with intervening interest at the rates of 5 per cent., 6 per cent, and 10 per cent., as described.

The report of Mr Burges, the architect, of London, who was especially deputed to make investigations on the spot, is referred to in corroboration of the foregoing statements.

A provisional contract has been entered into for the transfer of this Concession to the Company for the sum of £50,000 as the consideration for such transfer.

The Company, under their articles, adopt and confirm the agreements and contracts, and the Directors are enjoined to carry out the same, to repay the caution-moneys, discharge the considerations as agreed, and to pay the various expenses and commissions incurred to constitute the Company. The Company indemnify the first contractors in the usual manner; and the Financial Agency Commission is fixed not to exceed two per cent., to cover and include commissions for acceptance upon bank credits required.

Power is reserved in the memorandum and articles of association, which can be seen at the temporary offices of the Company, for the Board to enter into engagements for other public works, deemed promising by the Directors, as also to purchase or lease premises for improvements or use, and to create and issue redeemable debenture bonds and deposit notes, in proportion to the progress of the works, and to the extent of one-half of the value of works completed from time to time.

The right is reserved to allottees of scrip certificates to pay up the full nominal value thereof, so that they be convertible into fully paid shares.

Deposits, upon which no allotments are made, will be returned in full.

Prospectuses and all information can be obtained from Messrs Clench, Smith, and Co., 1 Royal Exchange buildings, and copies of the articles of association may also be obtained from the brokers and solicitors.

THE NAPLES PUBLIC WORKS COMPANY
(Limited).

Capital £1,200,000. First issue £600,000.

FORM OF APPLICATION.

To the Directors of the Naples Public Works Company (Limited).

Per Messrs Clench, Smith, and Co., 1 Royal Exchange buildings, London.

Gentlemen,—Having paid to the Bankers of your Company the sum of £ for your Company's credit, I request you to allot me scrip certificates of £100 each in the said Company. And I hereby agree to accept such scrip or any less amount that may be allotted to me, and also to pay the further sum of £7 for every such certificate when allotted to me; and I agree also subsequently to accept, in lieu of each such scrip certificate of £100, five share certificates of £20 each, and to hold or transfer such scrip or share certificates, subject to the provisions of the articles of association of your said Company, on the register of which you may inscribe my name as a member in case of allotment.

C., or Oriental place, Southampton.

OVERLAND ROUTE via MARSEILLES. — Services Maritimes des Messageries Imperiales French Mail Steam Packets.

The 19th of every month, at 2 p.m., for Messina, Alexandria, Aden, Point de Galle (Ceylon), Pondicherry, Madras, Calcutta, Singapore Batavia, Saigon, Hongkong, Shanghai, and Japan.

The 9th of every month for Messina, Alexandria, Aden, Seychelles, Réunion, Mauritius.

For passage, freight, and information, apply to B. W. and H. Horne, 4 Moorgate street, London; G. H. Fletcher and Co., Liverpool; at the Offices of the Services Maritimes des Messageries Imperiales in Paris, Lyons, Bordeaux, and Marseilles; or to Smith and Co., Rotterdam.

Passengers, eastward of Suez, securing their berths in London, are entitled to the conveyance of their luggage free to Marseilles.

CUNARD LINE.

BRITISH AND NORTH AMERICAN ROYAL MAIL STEAM SHIPS, appointed by the Admiralty to sail between LIVERPOOL and NEW YORK and between LIVERPOOL and BOSTON, the Boston ships calling at HALIFAX to land and receive passengers and mails. The following or other vessels are appointed to sail from Liverpool, calling at CORK to receive the mails:—

JAVA, for NEW YORK, Saturday, Dec. 2.
CUBA, for BOSTON, Saturday, Dec. 9.
* AUSTRALASIAN, for NEW YORK, Saturday, Dec. 16.

* Taking passengers and goods for Nassau and Havana, to be transferred at New York (subject to the permission of the United States authorities) on board the R.M.S.S. Corsica.

Passage money, including steward's fee and provisions, but without wines or liquors:—To Halifax and Boston, chief cabin, Twenty-two Pounds; second cabin, Sixteen Pounds. To New York, chief cabin, Twenty-six Pounds; second cabin, Eighteen Pounds.—Apply to J. B. Foord, 52 Old Broad street, London; J. M. Currie, Havre, and 12 Place de la Bourse, Paris; G. and J. Burns, Buchanan street, Glasgow; D. and C. MacIver, Queenstown; or D. and C. MacIver, 8 Water street, Liverpool.

DEANE'S TWO-HOLE BLACK PENS which are unequalled for the durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped.

"G. and J. Deane, London bridge,"

and the ox, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed.

"G. and J. DEANE'S Two-Hole Black Pens, 46 King William street, London bridge."

NOTHING IMPOSSIBLE.—The greatest and most useful invention of the day, AGUA AMARELLA.—Messrs JOHN GOSNELL and CO., Three King court, Lombard street, perfumers to Her Majesty, respectfully offer to the public this truly marvellous fluid, which gradually restores the human hair to its pristine hue—no matter at what age. The Agua Amarella has none of the properties of dyes; it, on the contrary, is beneficial to the system, and when the hair is once restored one application per month will keep it in perfect colour. Price one guinea per bottle; half bottles, 10s 6d. Testimonials from artistes of the highest order and from individuals of undoubted respectability may be inspected. Messrs John Gosnell and Co. have been appointed perfumers to H.R.H. the Princess of Wales.

NEW THEATRE ROYAL ADELPHI. Sole Proprietor and Manager, Mr B. Webster.

Great Hit of Mr Jefferson in a new Drama written expressly for him, by Dion Boucicault, Esq., called RIP VAN WINKLE; or, THE SLEEP OF TWENTY YEARS.

On Monday, and during the week, THE MOTHER AND CHILD ARE DOING WELL Mr Felix Rogers. At 8, RIP VAN WINKLE; or, The Sleep of Twenty Years Rip, Mr Jefferson, supported by Messrs P. Bedford, R. Phillips, Billington, Felix Rogers, Athley, Eburne, C. J. Smith, and Mrs Billington. And the WIDOW'S VICTIMS. Mr Felix Rogers, and Miss Jenny Willmore. Commence at 7.

ROYAL POLYTECHNIC.—Professor Pepper on Polarised Light.—New Serio-Comic Ghost Story, "The Poor Author Tested" (J. H. Pepper and Henry Dircks joint inventors).—New Scene, with the wonderful illusion called "Proteus."—Musical Entertainment by Frederick Chatterton, Esq.—Lectures, by J. L. King, Esq., and F. Clifton, Esq.—Open 12 to 5, and 7 to 10.—Admission 1s.

TO ADVERTISERS.—To secure insertion, advertisements for the ECONOMIST must be forwarded to the office by 5 o'clock p.m. on Fridays.

The INVESTOR'S MANUAL *is now sold separately, price 9d stamped, 8d unstamped. If taken as a* SUPPLEMENT *to the* ECONOMIST, *it remains at its former price, 6d. In addition to the information formerly given, it gives a concise summary of the Reports of the Companies for the present year as will enable Investors to judge of their position.*

THE FEASIBLE REFORM BILL.

WE are not unaware of the good-natured but somewhat contemptuous snubs to which amateur legislators, like amateur Chancellors of the Exchequer, expose themselves when they venture to trench upon the province or assume the functions of the official and regular practitioners. Nevertheless, we venture to think that we shall be found to have done good service in encountering this danger by suggesting the measure of Parliamentary Reform which we sketched out a week or two ago. We are strongly of opinion that that scheme, or a scheme based upon similar principles and agreeing with that in its main features, has a better chance than any other of being carried, is more likely than any other to satisfy the desires and to allay the fears of all parties, and ought to be accepted with eagerness by the Radicals and with a deep sense of relief by the Conservatives. To the more advanced advocates of popular rights it concedes at once more than they could have hoped to gain by long years of conflict and contention; it grants everything for which any sort of claim can be said to have been *made good;* it meets and yields to not the vague speculative demands, but all the distinct pleas of Reformers like Mr Baines, Mr Forster, and Earl Russell, inasmuch as it confers the suffrage with a liberal and ungrudging hand upon all those classes for whom it was claimed on the ground of their intelligence and the vivid interest they felt in political questions; and it gives to these classes immediately, directly, unmistakeably, and indefeasibly, a degree of political power—a share in the Legislative Assembly and an amount of influence on its deliberations and decisions—which the ordinary schemes for a moderate or even a marked lowering of the franchise would not have enabled them to obtain for years to come. It gives them the *command* of the elections in several places, instead of a comparatively ineffectual power of *modifying* the elections in many places. It enables them to return forty or fifty members of *their own choice,* instead of enabling them merely, of two men whom they dislike, to return the one whom they dislike the least. The ordinary proposals would give the working men the power of voting in the minority in a hundred boroughs:—our proposal would give them the unquestioned majority in twenty or thirty.

To the Conservatives again—the really conscientious and thoughtful opponents of democracy—it ought to be peculiarly welcome; for it concedes to the operative masses that fair share in the franchise which it is almost universally felt must in prudence and ought in justice to be conceded, without admitting a principle or opening a door which would inevitably sooner or later confer upon those masses that preponderating and overwhelming share which it is almost as universally felt must never be conferred. It solves the great problem of the time—it meets the great enduring difficulty of all time—by securing to the numerical majority the right to be heard and felt in the Legislature, while guarding the Legislature against the supremacy of the mere numerical majority. It admits democratic influence, while steering clear of democratic dangers. It accepts and embraces all that is valuable in democratic raciness and strength, it yields all that is arguable and irresistibly just in democratic claims, while disarming democratic discontent and repelling democratic greed and guarding against democratic oppression. It is, so far as we know, the only simple and practical proposal yet made for granting the just demand of the masses to share in the Government while rejecting their unjust demand to control or monopolise the Government,—for giving to numbers their fair participation in political power, without going one step towards, or incurring any logical risk of—either now, or soon, or ever—giving to *mere* numbers that absolute preponderance of political power which scarcely the wildest demagogue dares *avowedly* to claim for them, and which assuredly the country will never grant.

There is a reason, moreover, and a most weighty reason, why our scheme should be received by the country, as well as by statesmen and politicians, with enthusiasm. Not only would it be ample enough to content all but the intolerant Liberals and safe enough to reassure all but the very nervous Tories;—but it would, we believe, be a final and conclusive settlement of the question. It would take it out of our way for ever:—and how dreadfully it is and has been in our way only those who have been long intent on some one important measure of social or administrative improvement, vital to the welfare of large and suffering classes, can adequately estimate. We do not mean that our measure would absolutely preclude all future and further changes in our franchise or our electioneering machinery. We scarcely think it would: we are by no means certain that it ought. But we feel pretty confident that it would be a settlement of the question of Reform in the sense of ending all *conflict* about it. It would

Digitized by Google

transfer the subject from the category of party questions into that of administrative questions. Reform would become, whenever it came upon the carpet again, a matter to be arranged about, not to be fought about;—and it would be long years, perhaps half a generation, before it did come again upon the carpet. We will endeavour to justify these sanguine expectations.

In the first place, after the enactment of so ample a measure of reform, after such a vast step in the direction of popular claims, it would be universally felt that any attempt to re-open the discussion was out of place, untimely, almost unseemly and unreasonable. All agitation on the subject, whether in Parliament or out of doors, would be frowned upon, would be put down peremptorily, as inconsistent both with good feeling and good sense. Those who are now most earnest and sincere in the matter would join with those who are now most lukewarm and reluctant, in positively refusing to listen to any motion and almost to any speech having reference to it. An orator who persisted in still bringing forward his crotchets before the House or before public meetings, would be treated much as those who bring forward the repeal of the Maynooth grant now are. A Minister or two would remain on the Treasury bench to make a formal reply, and the House would go to dinner or be counted out. In the second place, just in proportion as the number of men and classes within the pale of the Constitution has been increased, and the number of those still unenfranchised had been diminished, would the Conservative elements of Parliament, those inclined to inaction, be strengthened; and the *rémuant* elements, those prone to restlessness and disturbance, be discredited and weakened. The claimants would be incomparably fewer, and the possessors incomparably more numerous. Even Earl Russell might then, without inconsistency, and without being tempted to explain away his phrase, insist that it was time to "rest and be thankful." And, thirdly, what is even more to the purpose, the wind would have been taken out of the sails of the agitators—agitators by temper and profession—since every stock argument they now so effectively employ (the argument from inherent right of voting alone excepted) would have been answered and undermined; the *fit* recipients of the franchise would all have been admitted; the *powerful* claimants would all have been disarmed by having had their claims conceded; the ground of the agitators would have been cut from beneath their feet.

But there would be a further effect even than this:—granting that at some future day, ten, fifteen, or twenty years hence, the question of an extension of our plan came to be seriously mooted, long ere then it could be mooted with perfect temper and with perfect safety. Claimants would make their demands without passion, and Parliament would consider them without prepossession and without fear, and most probably would grant them without reluctance and certainly without danger. Suppose that during the period we have mentioned eight or ten more towns had grown into cities, and, on the ground of the numbers and intelligence of their working population, desired to have a third member and household suffrage, we apprehend there would be no unwillingness to grant their claims at once. For, to begin with, by that time the difference between household suffrage and a ten-pound franchise would almost certainly be far less than now, and the effects consequent on the concession of the claim much less considerable. Then, again, long before that time our measure will have been so effectual for good that any reasonable claims on the part of the working classes would be met with alacrity rather than opposition, and no unreasonable ones would be likely to be made. The operation of the reform we have proposed will probably be something of this sort. The members sent up by the working classes will in the first instance be perhaps extreme men, intelligent and clever but violent, half-educated, and ill-grounded on political questions. The discussions in which they will take part in the House of Commons, the way in which their arguments will be met, the way in which their fallacies will be detected and exposed, the weight which will be conceded to their views when sound, the modifications which will be suggested to them when imperfect, the inevitable effect of daily conference and collision with honourable, earnest, and superior men,—men whose superiority they will feel at once and whose sincerity and goodwill they will soon learn to acknowledge and respect—all these things will produce a wonderful effect in educating, in moderating, in enlightening them. They will go back to their constituents wiser and soberer men—having effected something, having learned much more. Their improvement in political wisdom will react on their constituents, who on their side in the meantime will have been advancing in their political education by the debates which they will have read, and which they will have followed with far opener minds and in a far fairer temper now that their views have been pleaded in the course of those debates by men of their own selection. Accordingly, the next Parliament, and the next after that, the electors will be disposed to choose more moderate members than at first, and the men they did choose will have grown more moderate as well. Year by year, election after election, the *generic* difference between the members returned for cities by household suffrage and those returned for smaller towns by the ten-pound franchise will grow less and less perceptible;—and no one will then object to increase gradually an element which has ceased to be formidable by ceasing to be specific, and by having never been suffered to be preponderant.

But more than this:—the ten, fifteen, or twenty years during which we have ventured to conjecture that the new settlement would remain undisturbed, will not have been unfruitful in wise, beneficent, and conciliatory legislation. On the contrary, we may fairly hope that it will be productive in social and administrative reforms incomparably beyond any previous decade when party conflicts exasperated men's passions and confused the clearness of men's vision. One vexed question after another will have been searched to the bottom and set at rest. One alleged grievance after another will have been investigated, the real distinguished from the fanciful, the fanciful consigned to oblivion, and the real recognised and removed. The reformed Legislature—aided, strengthened, and enlightened by the presence of men who know where the shoe pinches, and who can expound the real *feelings* of the working classes as well as be the mouth-piece of their war-cries,—will have fathomed the wants and needs of the masses and applied themselves earnestly to the task of supplying them. We may fairly look forward to having established cheap law, impartial justice, extended education, a clear field for industry, adequate wages for unskilled labour, and the curtailment if not the extinction of involuntary and faultless pauperism;—and when these things are secured, if any one should then think it worth while to propose a further and extensive measure of Parliamentary Reform, the proposal need excite no uneasiness, for one party will have little to desire and the other nothing to dread.

A settlement such as this would illustrate the close of Earl Russell's course and the advent of Mr Gladstone to his well-earned leadership; it would, we believe, have a prospect of being carried, when either a milder or a wilder measure would be certain to be thrown out; and it would have the inestimable advantage, that if carried, it would not, as almost any other measure must, leave on the minds of one party the disapppointment of an inconclusive compromise, or on the other the bitterness of a humiliating defeat.

THE ATLANTIC AND GREAT WESTERN RAILWAY COMPANY.

THE remarkable nature of this Company, its curious history, the zeal with which it has been praised, the avowed faith of some well-informed persons, the latent but known scepticism of others, make it perhaps desirable that we should give a judgment on the subject. A great deal of eloquence has been spent upon it, but we only propose to show very briefly what is known in the matter and what is not known.

American industrial investments ought to be the best of that sort in the world. For the first time in history, the greatest faculty of man has concurred with the kindest opportunity of Nature. The productive power of the Anglo-Saxon race is the greatest the world has ever seen; the virgin soil and untouched natural advantages of the great Western continent offer to that race a series of productive *tools* far surpassing on the whole any that a similarly gifted race has ever found elsewhere. If American industrial investments do not turn out the best it will not be from a deficiency in paying power: they have an unequalled productive capacity.

American railways ought to share in this benefit. They are free from the curse which has made railways, as a rule, so

Digitized by Google

unprofitable in the Old World. In Europe, as soon as a great trunk line begins to pay, the stationary districts all about it wish to have a branch line too. By well known methods, they have compelled the original Company to make that branch. In France, the Government have induced the Companies to do so at much cost, and upon agreements of some complexity: in England, a peculiar sort of competition has compelled them to do so; but the effect has been the same. The profits of the great trunk line have been reduced by the losses, or the less profits, of the branch through the adjacent stagnant districts. But in a new, wealthy, and incalculably progressive country there are no such things or few such things as stagnant districts, and those there are do not get railways made to them. As fast as you make a new railway, the rising industry of the district makes it as good, or nearly as good, as the old railway. Of course there have been blunders and errors in the railway history of the other side of the Atlantic as well as of this side, but the characteristic defect, the special depressing incident which exists with us, does not exist with them.

The Atlantic and Great Western Railway is a railway with more than 500 miles in actual work, and about a hundred more in actual construction, running South-West from Salamanca to Dayton, roughly parallel to, though at some distance from, the shore of Lake Erie. It was at first designed to connect the Eastern seabord and New York with St Louis and the Far West. It was expected that it would carry a great paying traffic of cereals and provisions between the two, and that there would not be much else, But, as good luck would have it, while it was in the course of construction the oil wells created quite a new trade in the district through which it passes and all around. "Oildom" became a word for a new, a very great, a very curious region, and the local traffic of the Atlantic and Great Western became great. It carried not only the through traffic, which it was at first made to carry, but a way-side traffic which sprung up around it.

"The development," says Mr Forbes, "since 1860 must "have been very great. In Pennsylvania the oil regions were "almost unknown at that period, but within the last four or "five years an energetic and enterprising population has "migrated to the district, and large towns have sprung into "life in the immediate vicinity of this railway. At Corry "5,000, at Franklin 5,000, at Oil City and Pit Hole 10,000, "at Titusville 10,000 people are congregated, besides many "thousands scattered over the whole region. These people, "many of whom are wealthy and all highly paid, consume "and travel much, and are excellent customers to the rail-"way. The investment of capital in the sinking of new "wells is already very great, and is steadily going on, and "the aggregate production of oil increases from day to day. "The quantity forwarded from the stations on the Atlantic "and Great Western Railway in 1863, was 533,000 barrels, "and in 1864, 675,028 barrels. The quantity forwarded in "the present year will, it is expected, show a considerable "increase upon 1864. It is estimated that the entire oil "district of Pennsylvania now yields the astonishing quantity "of 80,000 to 90,000 barrels per week; equal at the lower "figure to say 4,000,000 barrels per annum. The oil will "afford a very heavy rate for transit over the railways, and "as much as 3d and 4d per ton per mile is willingly paid for "its conveyance." These are the sort of windfalls which happen in new countries, which cause their average rate of profit to look far more than in fact it is, which give the fortunate recipient of the windfall so large and sudden a property.

The reports of surveyors, however respectable, must be read between the lines for difficulties. They are, in the best cases, the composition of the best sort of advocate—the convinced advocate; and everything in such documents must be taken with abatement and scrutinised with suspicion. But testing it by what we know of the district, what is certain, what is proved by disinterested and concurrent testimony, we in this case cannot bring ourselves to doubt that the line, about which such statements are made, and to which such luck has occurred, is really and truly a very good line.

But, there is always a "but" in *very* promising money matters. The mode in which the line was made is as singular as the good fortune which has attended it. It has been made mostly with borrowed money, and the securities on which the money was borrowed lie about Lombard street. This is the reason of the zeal with which it has been praised. The shrewd observer knows a peculiar glow which now and then comes over commercial literature. It is the breath of the great capitalist. Occasionally it happens that very great people in Lombard street are deeply interested in getting certain enterprises appreciated by the British public. They are "in," as the phrase goes; they are, in fact, the holders of the security, and they would be glad to get quit of some of it. This is not at all evidence against the ultimate goodness of the security. These great capitalists are often, though not always, very shrewd judges; they have foreseen the profits which they wish others to see; they have anticipated the success which the world at large is but asked to recognise. Still this position of a security is ground for immediate caution. Securities well held are likely to have their full value; securities ill held are likely *not* to have their full value. In the case before us, there is no doubt that the Atlantic and Great Western Railway has been constructed by the enterprise and diligence of Mr McHenry, its financial agent. He has "got" the money for it in Lombard street and elsewhere. The line may have been made all the better for its peculiar position. It would be easy to name great undertakings of a like character which have been ruined by having their hands at large in the London market; they had so much money that they made their railways preposterously elaborate, and out of all suitableness to the rude countries whose traffic they were to convey. In the future it may be the better for the Atlantic and Great Western Railway not to have possessed the same unlimited means. But at this moment it is the worse. Those who buy these securities should do so with the fact fully before them, that a considerable part of the securities which represent the cost of the line are generally understood and believed to hang about the money market, and not to have settled down to the public. The public is so pressed to buy them, because there are a good many on sale. At least such is the understanding and belief of Lombard street. Where securities really are, is not a fact capable of being fully proved at law. But the London money market, as a rule, knows what it is doing, and the belief there is that these securities are still in great numbers floating about it. Whoever buys, therefore, should buy for permanent investment and not for temporary profit; he should look to the nature of the enterprise itself and its great promise of true profit, but he should not look, or he may very likely be disappointed, to a sudden rise in the value of securities of which, unless the monetary world be strangely misinformed, a great many are substantially held by professional lenders and others, who would be ready to dispose of them if they got a chance, and the disposition of the public should come to be favourable.

THE ECONOMIC VALUE OF JUSTICE TO THE DARK RACES.

In all these quarrels between the white and the dark races, of which we have of late years had so many—no year for eight years having been free of them—there is one point which is apt to escape European attention, and that is the economic value of being just. There is probably no one point of politics which involves economic results so wide or so permanent as the relation between the white and the dark races of the world. It is probably the destiny, it is even now the function, it is certainly the interest of the European, and more particularly of the English family of mankind, to guide and urge and control the industrial enterprises of all Asia, of all Africa, and of those portions of America settled by African, Asiatic, or hybrid races. Those enterprises are very large indeed,—very much larger than the majority even of considerate men are at all aware of. It would be very difficult to fix a limit to the industrial enterprises in India—railways, tramroads, works of irrigation, plantations of tea, coffee, indigo, cinchona, and other articles, which would be certain to pay; but the present limit, the amount now before our eyes, is not less than one-fourth our own heavy national debt. It is not certain indeed—in our judgment it is more than doubtful—whether an English guide and director of labour, a captain of labour (so to speak), paid by a per-centage, would not save expense and loss of strength in *every* department of Indian effort, whether it would not for example pay both European and native to cultivate rice in a scientific way in very extensive farms. If it would, of which we have little doubt, the work ready for Europeans in

Digitized by Google

India alone is almost limitless, they being required to direct the cultivation as well as the political progress of two hundred millions of men. The field open in China is even greater, the Chinaman, who is already the most industrious and one of the most ingenious of mankind, needing nothing except a directing brain in which he will confide. The work to be done in that empire alone—we mean the profitable work—in railways and canals of irrigation, and tea planting, and silk growing, and above all in inland steam navigation is wholly beyond any experience we have yet acquired in Europe. Supposing Englishmen and Chinese ready to work together, there is at this moment in existence within that empire a traffic which would supply a system of railways three times as extensive as the Indian, a reproductive expenditure that is of three hundred millions sterling, and a range of inland navigation, open to steamers, as great as that of the United States. Similar conditions exist in Japan, in Indo-China, in Persia, and throughout Asiatic Turkey, while in Africa every form of tropical cultivation remains to be still begun, and almost every form, from sugar growing in Abyssinia to vine growing at the Cape, will be found to pay. There are, in fact, fields of enterprise in tropical regions greater than all those which we have as yet explored or partially exhausted. Of their ultimate pecuniary value we may judge from the single fact that, while in 1813 the trade of India was not three millions sterling, it now exceeds one hundred millions, and is still, in the opinion of many observers, in its infancy. Supposing China and India to take as many English articles head for head as Ceylon does, English exports to those two countries alone would rise to the immense figure of 250,000,000*l* sterling, Ceylon in 1863 taking more than ten shillings' worth for each head of her population.

The one necessity essential to the development of these new sources of prosperity is the arrangement of some industrial system under which very large bodies of dark labourers will work willingly under a very few European supervisors. It is not only individual labour which is required, but organised labour, labour so scientifically arranged that the maximum of result shall be obtained at a minimum of cost, that immense sudden efforts, such as are required in tunnel cutting, cotton picking, and many other operations, shall be possible without strikes or quarrels, and that, above all, there shall be no unnatural addition to the price of labour in the shape of bribes to the workmen to obey orders naturally repulsive to their prejudices. All these ends were secured, it must freely be acknowledged, by slavery. For the mere execution of great works cheaply no organisation could be equal to that which placed the skilled European at the top, and made him despotic master of the half-skilled black or copper-coloured labourer below. The slaves obtained only food, could not strike, and were not liable to those accidental temptations to desert work which so frequently impede great operations both in India and Egypt. The relation was almost as perfect as that of brain and hand, except that the brain will never voluntarily put the hand to torture. Slavery, however, involves besides this organisation which is beneficial, moral and social consequences which are not beneficial, which are so injurious that civilisation, after a protracted struggle with its own interests and prejudices, has resolved to discard slavery from its working system. A new organisation therefore must be commenced, and the only one as yet found to work effectively is, as might have been expected, one based upon perfect freedom and mutual self-interest. Half-slavery, that is slavery minus its immoral incidents, such as the separation of families and denial of education, does not work. It has been tried in every country under the sun in the shape of convict labour, in India in the form of statute, or as it is there called "impressed" labour, and in Egypt upon a splendid scale as "forced" labour under European chiefs, and it does not anywhere pay well. The dislike caused by the sense of compulsion produces too much laziness, too much cheating, too many revolts, and too many deaths to be profitable to the State which employs it, even in the pecuniary sense. To be profitable, the compulsion must be carried out logically to its last point, the labourers being treated in all respects simply as valuable cattle. Short of that demoralising condition there is no half-way position to be occupied by labour in which compulsion does not cost to the nation—of course not necessarily to the individual—more than it is worth.

If, however, complete freedom is to be the principle adopted, it is clear that the dark races must in some way or other be induced to obey white men willingly. Without at all affirming or denying any proposition as to the comparative powers of the two colours—a question which will probably never be settled—it is quite certain that for the next hundred years the average black will not catch up the average white, that for that space of time white leadership will save time, power, and money. Fortunately for the world there is no mental reluctance to accept that leadership. Some dark races, such as the Bengalees, honestly prefer it, as less worrying than their our habit of indecision—others, as the Chinese, recognise its superior efficacy—others, as the Africans, accept it as a sort of natural law. They will follow the white unless deterred by some injustice, or failure in honesty, or conduct which they consider—often very foolishly—to humiliate them. To remove the chance of such deterrents should therefore be the object of all wise legislators, and the easiest mode of removing them is to enforce justice. It need not be justice according to English ideas, which are very lenient, and in respect to some offences are, according to the ideas of coloured men, over lax, but it must be substantial justice. An Asiatic, for example, does not deny the justice of allowing his employer to fine him as an Englishman would, but insists that before he is fined he shall have committed a fault which he previously knew would be so punished. An African is not irritated because larceny is punished with flogging, though an Asiatic is, but he wants a fair hearing first. In fact, he wants to be assured that he is subject to a law, however severe, and not to individual caprice. And, moreover, he insists that the moment work is done and paid for he shall be free of the employer's authority, legal or otherwise, and at liberty to do exactly as he pleases, subject only to the laws of the land. These two points conceded, the dark man will willingly organise labour in great masses under the white man. In India, it is well known that very unpopular persons who happen to have a reputation for justice can always obtain labour, when other men much more easy tempered are baffled, and strict and punctual payment is accepted as the first element in justice. The Indian railways, for example, have had, all circumstances considered, wonderfully little difficulty in obtaining labour. The contractors were generally sensible persons, who resolved that wages should be paid as in England, and half-savage tribes, quite as capricious as negroes and far fiercer, when they found out that fact, came in to work with docile regularity. It is well known there that in one remarkable instance a tribe bore quietly for months a discipline offensively strict without a murmur, but departed in an hour because one of their number had his face slapped against the rules. It is the same among the negroes. This very week a correspondent of the *Times* writing from South Carolina, after a number of statements unfavourable to black labour, makes this remarkable admission:—"A gentleman "who has held a leading commercial position in Wilmington "for 20 years past expressed a different opinion concerning "the negro from any I have yet heard in the South. He had "been the owner of slaves and now had the same negroes about "him as he had before the emancipation. He had no diffi-"culty whatever with them, and believed that any one who "was disposed to pay them properly and treat them fairly "would find in them good and faithful servants. To one "negro whom he pointed out to me on his premises he paid "a dollar and a half a day (equivalent to about 4s 6d in green-"backs). He looked upon the whites as the indolent class in "the country." The truth is that justice is the essential element of concerted and joint action between blacks and whites, and could we once convince the dark races that we meant justice, that while enforcing performance of contract we enforced full pay, that if we flogged dark skins we also flogged white skins for the same fault, and above all that we recognised abuse as punishable on either side, there would be no difficulty about labour *except* so far as it arose from the superior profit of the *petite culture*. Of course if a Bengalee or a black can get more by digging his own plot than by digging his master's plot, he digs his own plot in preference, and so does a Belgian. Every event, therefore, which increases the suspicion of the dark man that he is not to be fairly dealt with disinclines him to enter the organisation of labour, and he can gratify this disinclination more easily than an Englishman. The latter wants meat, and clothes, and some modicum of liquor

Digitized by Google

and is penetrated to the very bone with a wish to get on, to do something his fathers did not do. The former is content with vegetables, does not care about clothes except for adornment—very wealthy men in India, men we mean with capitals of 50,000*l* and upwards, sit at home and in office nearly naked—regards liquor only as a luxury, and rather prefers on the whole not to get on, to be as his father was before him. The possibility of avoiding work being great, it is necessary that the attraction to work should be great too, and to this end good pay, certain pay, and equal justice, are absolutely essential. In Ireland, men were once found to work for sixpence a day, because the choice lay between that and starvation, *but in the tropics Nature has given man the benefit, or the curse, of a perpetual poor law, a prodigality of food which of itself establishes a minimum of wages.* A Bengalee will not take less than customary wages, whatever his need, because he knows that—while the sun shines and the waters flow and the soil steams with its own richness—poverty, however deep, cannot become actual starvation. To make him work he must either be lashed or be treated as to pay, exemption from blows, and language, very much like average Englishmen under decently good employers. It is because events like those in Jamaica arrest the arrangement of the only relations between master and man which can exist without slavery, that we approve the official decision to make a full and searching inquiry into the condition of the island.

THE RIGHT OF METAGE ON CORN IN THE PORT OF LONDON.

THE right of metage on corn now claimed by the Corporation of London which there is no occasion to measure deserves attention, not only because it affects a great and thriving trade, but because it is an instructive instance of the manner in which in England old powers and usages linger on into a state of society very different to that in which they originated, and to which alone they were suited.

The Corporation of London claim to have a prescriptive right of *compulsory* measurement "of all and singular coals, "and grains of every kind, and also of all kinds of salt, "and all kinds of apples, pears, plums, and other fruits whatsoever, and of all eatable roots of every kind, and also of "onions, and of all other merchandises, wares, and things "whatsoever measurable, and the measuring of the same "whatsoever, landing, conveyed, or brought in or to the port "of the said City of London upon the said water of Thames."

And there is no doubt that this claim, which is recognised by charter, and even in some degree by Act of Parliament, is entirely analogous to the institutions of old London, and to the institutions of all the trading cities in Europe in the mediæval period. It is obviously necessary that there should be a proper ascertainer of quantities between buyer and seller—that is, an ascertainer respected both by buyer and seller. In early times the Government (and in trade cities the municipality in the middle ages was the Government) is the best, the most trusted, the attainable ascertainer. According to our modern notions, the use of the Government admeasurement would indeed be optional; we should say, "The municipal metage is the best, "and, therefore, let the municipality mete; but let it be "shown to be the best; let every one else mete who likes, "and, depend on it, the persons with goods to measure "will soon pick out the person who measures them best." But competition, which is now the essence of trade, was as far as possible banished from trade in old times. The aim was to give each branch of our commerce to a select guild or company, who had a monopoly of it, was responsible for it, and could alone carry it on. The object of legislation was then not to abolish monopoly, but to choose the best monopolist. As soon, therefore, as it became clear that the municipality was the best person to possess a given power—it required no proof—it was obvious to the minds of that age that it ought to have that power exclusively. In the 12th century—the time to which these sort of rights go back—as soon as you had proved that in all likelihood the Corporation of London were the persons who would mete onions best, you had proved that they alone ought to mete onions. The notion of testing the superior goodness by permitting an inferior competition did not occur to, and if it had occurred, would have been rejected by, the ruling minds of that age.

But such ancient powers, so suitable to an age of monopoly, assume altogether a different aspect when all other monopolies are gone and they stand alone,—a curious relic of the past in an age of freedom. They must now be tested, as all other mercantile instruments are tested, by their utility. "We won't have anything measured which we do not want "measured, and we will not have a measurer chosen for us by "statute, but we will choose the measurer we like": such is the language, the natural, the inevitable, the ruling language of the 19th century, and it is idle to attempt to answer it by documents and charters derived from an age of monopoly.

This was the view expressly taken by the very remarkable Commission which reported some years since on the Corporation of the City of London. Sir George Lewis, Mr Justice Pattison, and Lord Taunton were men who did not use words lightly, and the two first especially were men of singularly judicial temper, both natural and instinctive, and singular respect for all rights they found established; but they "doubted the expediency" of maintaining the system of metage, howsoever amended, for some improvements were then discussed, "except in *a voluntary form.*"

According to a story given in evidence before the Commissioners, the Corporation, thirteen years ago, doubted the strength of their position. They were a strong body, as all old Corporations are, but there is one thing stronger even than a great Corporation, and that is a great brewery. Messrs Combe, Delafield, and Co. had certain malting houses *of their own* at Yarmouth, and shipped certain malt from thence to London. There was no pretence for the adjudicating intervention of the municipality—no need of authenticated ascertainment by a superior authority; for there was no dispute. There was no buyer and no seller. Messrs Combe and Co. took certain property from their warehouse in the country to their warehouse in town, and they did not want it measured. It was as if the City should assume a compulsory right to count the wine which a resident in London might bring from his cellar in the country to his cellar in town. For years the Corporation pursued this claim, and put the great brewers to an expense which would have ruined poor persons. The case and a collateral claim for official porterage went about the courts of law for years; but in the end the Corporation had to abandon it. They *dared* not contend that they ought to measure what the owners did not wish measured. They knew that they would lose the lucrative monopoly of admeasurement altogether, if they put it in an ugly light—if they pressed it to an extreme case.

The case now at issue with the grain trade is, if possible, a more extreme case still. When the corn is weighed and not measured, what possible right can any one have in measuring it? In the case of Messrs Combe and Co. there was no need of admeasurement, for there was no purchase and no sale; here there is no need of admeasurement, for the admeasurement does not help the sale. The origin of the right is the grant to the municipality of a function convenient to the trade, which at the time of the grant was thought must be a monopoly like everything else. But now the function is *not* convenient to the public, and this ought no longer to be a monopoly because nothing else is so. What more can be said? What more remains to be proved?

It is to be observed that the City claim by charter a great jurisdiction far wider than the modern practice. It extends to all "merchandise, wares and things whatsoever measurable" coming by the river. But the claim of measuring all things measurable has long been relinquished. There are many things continually arriving which no one wants measured. If a French piano were brought to the port of London, would it be endured that the Corporation should set up their prescriptive right of measuring and charging for measuring it? Yet their legal claim would be as good as in the grain trade, and the convenience would be quite the same.

The antiquarian nature of the right is shown by the restriction of it. It extends to all goods arriving by water in London, but to those only. The Thames was in the middle ages the sole inlet of bulky commodities into London; now it is only one of many. What can be more absurd than that there should be a right of ascertainment extending to corn coming by one sort of access, and not extending to that coming by a competing access.

Wherever you take up and however you test a claim so antiquated and so anomalous, it leads to difficulties and ab-

Digitized by Google

surdities which it would be wearisome to follow out. The Corporation have said that they would take proceedings to enforce their right at law. But we would recommend them to be cautious, to act as they acted with Messrs Combe and Co. Even if after litigation they established their right, it would be a fatal gain. It would force the subject under the notice of Parliament, and Parliament would not consent to test the matter except by the criterion of the 19th century—the criterion of expediency.

THE USES OF TORIES.

The Tories do no doubt feel, though they cannot profess to feel, very grateful to Mr Bright for his speech at Blackburn last week. It has, in fact, given quite a new elasticity to their convivial meetings, and we may see in the various speeches at Maldon on Wednesday how great a revival Mr Bright has brought about by his set invective against those useful but humble instruments of political safety, the drag-wheels on any too rapid political advance. But though Mr Bright has set up the Tories in talking materials, at least till Parliament meets —at Maldon all the speakers took up their parable on the same great theme, and without that variety in their modes of dressing it which one would expect in different dishes at the same banquet,—it is perhaps a little unfortunate for them that they cannot, either properly or sincerely, plead the strongest argument in their own defence. It does not lie in Tory mouths to explain the uses of Tories, for Toryism is best justified as a temporary but useful limitation of vision which prevents its adherents from seeing anything but the *obstacles* to change, and so forces upon the whole nation, the Liberals no less than the Tories, the full and complete consideration of these obstacles to change, before any change is made. Now, a Tory cannot say in his own defence that his use lies in the limitation of his nature, in his habitual exaggeration of difficulties, and yet that *is* his great use. The party have always brought a magnifying glass to bear upon every change, so exposing to view every atom of danger it may involve; and of course a magnifying glass means an exaggerating glass, for the mass of the Liberal party will not see small dangers at all till they are forced to look at them in an exaggerated form. Now, that is a very useful function for a political party, and it is one which will endure as long as the English people, for we suppose there will never be a time when the impatience which frets at existing evils will not need the check of that stubborn British prepossession against change which Toryism best expresses. Toryism, in fact, does for politics pretty much what criticism does for literature—it originates nothing, but picks holes in every original suggestion, if there is any capacity for holes in that suggestion.

The final cause of Toryism may be said to be to find difficulties for men like Mr Bright. If the Liberals alone had to contend with Mr Bright, though they would generally have reason on their side, and be able to show that his theories are without foundation and his precedents not to the point, Mr Bright would be a very much more dangerous person than he is. Every reformer must to some extent appeal to the imagination, and the imagination will often be found, especially in times of excitement, to be far stronger than reason. But the Tories come in exactly here, and are very useful. They also appeal to the imagination, the fearful and timid imagination of practical Englishmen, and exaggerate the danger and expatiate on the wholesale destruction which Mr Bright would bring about, with the sincere conviction of seers of visions and dreamers of dreams. Thus, imaginative and Utopian reformers are balanced, probably more than balanced, by imaginative and affrighted Conservatives; and the real casting vote is left in the hands of rational liberalism appealing to English understandings. If there were no agitators with the power to conjure up splendid visions of what England might rise into under bold guidance, we should stand less in need of alarmists with power to conjure up fearful visions of what England might fall into under rash guidance.

But Tories are not only useful for forcing upon England the full consideration of all the objections to any proposed change, they are probably not less useful even in unconsciously promoting the deliberate organisation of wise reform projects. In this world it is opposition which stimulates action. One reason why municipal reforms—the better organisation of our local arrangements, our gas, drainage, and the like—scarcely ever gain a step in England, is that the interested opposition to them is not offered *on principle*, but is merely technical, bringing forward impediments and obstacles which it is very troublesome to get over, and which you cannot invoke the authority of any great principle to help you to surmount. If any one proposing to make a great change in the gas system is met by the objection that it will be so inconvenient to have all the pipes up again, that is clearly not a kind of objection to stimulate the ardour of him or his party. It is quite true; and it is not even supposed by the reformers to be a falsehood against which it would do their souls good to fight. But if any one proposing to give the working classes their just political rights, is met by the objection that they ought to be governed by the wise and rich, and not ask for a power they are not competent to wield, —*that* is an objection against which the soul of a true Radical thirsts to do battle. He wages war upon it with enthusiasm; he is grateful to the Tories for enunciating it, he repeats it to his party; and, as a consequence, his party is more closely welded together than before in the passionate resolve to defeat with ignominy this obnoxious principle. Hence, while mere dead weight of inertia, dead weight of interested resistance, grounding itself on detailed objections which are not objections of principle, seldom provokes reaction in England,—Toryism, which is resistance on something that calls itself political principle, has emphatically that effect, and directly tends to stimulate the organisation of purposes of reform into a practical and powerful force. Without any opposition of *principle* to their views, we should find the Liberals even more languid than they now are; and no doubt one reason why they are so much more languid than formerly is that there is so much less opposition of principle to meet,—indeed so much more concession of their principles by Tories, who now often resist on minor and comparatively technical grounds which have much less effect in irritating their opponents. Just as Mr Bright, by his violence, probably does more to keep up the organisation and cohesion of the Tory party than any depth of faith which they put in their own creed,—so the Tories, by their occasionally cynical enunciations of contempt for the people, do more to stimulate the true Liberals than, perhaps, even the reasonable convictions of the Liberals that they are proposing what is really good for the nation, would do without them. We may admit that the political function of the Tories is humble; that their chief use is, by manning untenable fortresses up to the last moment, to convince everybody that they really were untenable and should never be defended again;—but still such as they are we could ill do without them; for we should have no adequate test of the strength of political truth left, if we had no Tories to force into retracting the errors which it has been their duty to put in a plausible and attractive light.

THE NECESSITY OF A GOVERNMENT CERTIFICATE THAT RAILWAY COMPANIES HAVE NOT EXCEEDED THEIR BORROWING POWERS.

The report of the Committee of Investigation of the Great Eastern Railway states that the borrowing powers of that Company "have been largely exceeded during the past three years, "in fact, to such an extent, that the Committee cannot con- "ceive any condition of circumstances which could justify, or "render even temporarily necessary, so grave a departure from "all commercial principles."

What can be a stronger proof than this of the insufficient nature of the protection which the bondholders of a railway now enjoy? Here is a railway company of great respectability and great importance greatly exceeding its borrowing powers, and in the judgment of its most competent shareholders there has been no "justification" for such excess. We own, looking at the matter from the place of the bondholder, that word justification alarms us more than any other word. What *possible* justification can there be in any case for issuing a debenture purporting to be authorised by law, but in fact *forbidden* by law? The fancied justification must be the interest of the borrower, and so the doctrine comes out that when the directors of a Company see a great advantage they may borrow money which they know they cannot legally borrow, but which the lender, who relies on them, believes they can legally borrow.

The ignorance of the lender is complete and helpless. He cannot go over several Acts of Parliament and ascertain what the borrowing powers are. He cannot go over the books of the Company and see what the debentures issued come to. He must rely on the directors for both terms of the equation,

Digitized by Google

for the number of bonds they have a right to issue, and for the number they have in fact issued.

The evident inference is that for which in the ECONOMIST we have so often contended. The Government ought to certify that the borrowing powers of a company have not been exceeded. Every new debenture at least ought to be on specially stamped paper; and thus in a few years there would be no doubt as to the legality of any debentures. The Government would issue the right number to each company, and that company could therefore use no other, and borrow upon no other.

THE AGRA AND MASTERMAN'S BANK (LIMITED).

WE have received a letter from the above bank contradicting and complaining of the following passage in the letter of our Paris correspondent:—

> The London market has no part in the success of the affair, the Agra and Masterman's Bank, which was charged with it, having I am told only transmitted subscriptions for 4,000 bonds or thereabouts, and even those there is reason to believe were made by the bank itself in order to save appearances by proving that it can do something.

The assertion that the Agra and Masterman's Bank themselves subscribed to the Austrian loan was made, as our correspondent informs us, upon the authority of very well-informed persons in the city of Paris; but as the Agra and Masterman's state that it is incorrect, we hereby contradict it, and regret that it was made.

THE TRADE BETWEEN FRANCE AND ENGLAND.

THE official report on the Commerce of France in 1864 has lately been published, and although the results which it exhibits are very instructive, they are likely to escape attention owing to the voluminous character of the statistics on which the report is founded. We have therefore considered it useful to give the leading results in a condensed form.

To understand the French statistics, it is however necessary to explain at the outset that a distinction is throughout drawn between "General Commerce" and "Special Commerce." In the case of imports *all* foreign and colonial produce arriving in France is classed without reference to origin or destination, whilst under the head of *special* imports are classed only such produce as has been taken for consumption in France. In the case of exports, the *general* commerce in like manner embraces *all* produce exported from France, whilst the special gives the exports only of national and nationalised produce.

Starting with this explanation the following are the returns of the real value of French Commerce in 1864, given in millions of francs:—

GENERAL COMMERCE.

	millions.	Excess over 1863. millions.	Excess over average of previous 5 years. millions.
Total of exports and imports...	7,329	566 or 8 pr ct.	1,394 or 23½ pr ct.
Imports	3,407	171	561
Exports	3,921	395	833

SPECIAL COMMERCE.

	millions.	Excess over 1863. millions.
Total of export and imports	5,452	383
Imports	2,528	102
Exports	2,924	281

These figures do not, however, include foreign produce temporarily admitted to be manufactured or otherwise converted in France, the value of which, for 1864, is given at:—Imports, 89; re-exported, 198 millions of francs; representing a great application of French skill and capital. But taking only the general results it appears, that in 1864 French exports exceeded imports by 514 millions in the general commerce, and by 396 millions in the special commerce.

As regards British trade with France it appears that our trade both in imports and exports stands as the first in magnitude as compared with that of other nations. The figures are:—

I.—IMPORTS INTO FRANCE.

Great Britain.	millions.	Compared with 1863.	Compared with 5 years' average.
(General)	680	2 per cent. less	23 per cent. inc.
(Special)	567	4 — —	32 — —
British India.			
(General)	117	16 per cent. inc.	65 per cent. inc.
(Special)	111	17 — —	58 — —

On which customs dues to the amount of 21,476,230 francs were levied on British imports, and 3,389,477 francs on Indian imports.

The extent to which the position of affairs in the United States affected French industry in 1864 is exhibited by the following figures:—

United States.	Millions.	Compared with 1863.	Compared with 5 years' average.
Imports (general)	75	18 per cent less.	65 per cent. less.
— (special)	69	15 — —	65 — —

II. EXPORTS FROM FRANCE.

Great Britain.	Millions.	Compared with 1863.	Compared with 5 years' average.
(General)	1,145	10 per cent. inc.	40 per cent. inc.
(Special)	891	11 — —	55 — —
British Indies.			
(General)	10	47 per cent. dec.	22 per cent. dec.
(Special)	8	50 — —	27 — —
And in the case of America—			
United States.			
(General)	101	6 per cent. dec.	56 per cent. dec.
(Special)	89	11 — —	51 — —

From these figures it would appear that in 1864 the excess of French exports to England over British exports to France was represented by a real value of 465 millions of francs—and that commerce from France to England increased 10 per cent. as compared with 1863, from England to France decreased 2 per cent. as compared with 1863, results trifling in themselves as compared with the enormous increase of both on the average of the previous five years.

The progress and balance of trade between the two countries will be judged from the following figures, representing real values, in millions of francs:—

	BRITISH IMPORTS INTO FRANCE. General.	Special.	FRENCH IMPORTS INTO ENGLAND. General.	Special.
1859	406.7	278.2	774	391
1860	454.2	308.4	806	598
1861	555.1	438.1	619	456
1862	656.1	525.7	834	619
1863	691.8	592.6	1039	799
1864	679.6	567.2	1145	891

The French Customs revenue for 1864 was raised as follows:—

Imports	133,413,533	Total, 161,866,771 francs.
Exports	333,610	
Navigation	4,203,362	
Other dues	726,445	
Salt tax	23,189,821	

The returns derived from this branch of revenue since 1859 are exhibited as follows:—

	Total. francs.
1859	228,444,955
1860	171,475,403
1861	161,633,420
1862	186,720,371
1863	195,494,224
1864	161,866,771

The report points out that the general result as to 1864 was, considering the circumstances of that year, very encouraging. The civil war in the United States was in progress, a high rate of discount prevailed, and the supply of cotton was deficient. On the other hand, a favourable season reduced the price of grain and of wine.

As regards agricultural produce in France, the report points out that there is a large increase in the demand from England for French fruits, vegetables, &c. On the other hand, whilst France was importing more cattle, and exporting less, the price of meat had experienced an important rise, a result attributed to the increased rate of wages and to a larger consumption of animal food by the labouring classes; and it is gratifying to find the report stating that in this respect France has followed the example of England on a point so important as regards public health and true economy of labour.

The report suggests that it would be for the advantage of French agricultural industry to diminish the extent of land appropriated to the production of corn, and to apply itself more to the breeding of stock; expressing, at the same time, that this course can be adopted without risk, inasmuch as England and France have become in these times the two great markets to which the corn produce of the world must converge.

Digitized by Google

As regards the important question of iron and iron manufactures, the report states that whilst foreign imports into France have diminished and exports from France increased, this branch of industry was depressed, so far as price was concerned. This fact is attributed to the patriotism of the ironfounders, and their determination to remain masters of the market; and we do not read without a smile that "La "position est glorieuse et difficile à défendre, mais l'energie "française ne compte pas avec les obstacles et les sacrifices."

Our limits will not permit of a reference to other details in this interesting report, but we cannot conclude without congratulating our neighbours on the evidence which it affords to the benefits which have resulted from the adoption of a liberal system of commercial legislation.

THE BANK OF ENGLAND.

[COMMUNICATED.]

AMONGST many complaints made against the Bank of England, one is often urged—that she has not sufficient capital to carry on the business of the country.

In passing, it may be remarked that the words "business of "the country" involve an error: the Bank is not a great note manufactory wherein to create capital, nor is she a sort of moral currency-police force to control or guide the capital and business of the country. She has quite enough to do to carry on her own business properly, leaving others to manage their own affairs. At the same time it may be true indirectly; for if the Bank manages her affairs discreetly, she will materially affect "the business of the country," and naturally so, from her position, prestige, and wealth.

But the gist of the complaint is "insufficient capital," and to correct this divers remedies are proposed, such as—

To issue more shares or Bank stock, and so increase the working capital; but as a shareholder I maintain that the capital is too large already; the Bank with difficulty now gives a very poor dividend compared with the London and Westminster, London Joint Stock, and others, who, with perhaps one million capital, have 14 to 18 millions of deposits.

Well, then,—set free her capital, let Government refund at least a portion of their debt of 14 millions.

But amongst other obvious objections to this remedy, it may be asked whether the Chancellor of the Exchequer is ready to pay off the debt; or if he be, what will the opponents of the malt tax and income tax *cum multis aliis* say—if the surplus revenues for the next ten or a dozen years are to be so employed?

Then, says our friend, let the Bank sell some of her securities. But it is for him to prove that she can or ought to hold fewer or less valuable securities than at present consistently with her duty to the public and to her depositors.

Another expedient is then suggested. If the capital is not to be increased by a creation of new shares—nor by a portion of the debt being paid off—nor by a sale of securities—

Then give the Bank of England power to issue more notes unrepresented by gold in her vaults. It is urged that the supply of notes which was sufficient in 1844 is insufficient in 1865; that the note circulation now-a-days never falls below 18 or 19 millions, whereas by the Bank Act only 14 can be issued without an equivalent of gold being uselessly locked up. It may be assumed for argument's sake that two, even three, millions more notes might be issued with practical safety to the convertibility of the note,—in other words, that 16 or 17 millions might circulate without the Bank being called to exhange them for gold.

The first effect of such increased issue might have been last week, when Bank rate was 7, to lower the rate to 6, or if you will to 5 per cent. But what then? The two millions extra notes would soon be drawn out, the rate would again rise, and another two millions would be demanded.

Meantime, two millions of gold would have left the country, and the Bank would have an increased note liability with a corresponding diminution in the power of meeting it. The Chancellor of the Exchequer would, doubtless, insist on the Bank paying him some 50,000*l* for the enforced permission to issue the said two millions of notes.

Possibly he might like to get even that addition to his budget, but I insist strongly that it is most unwise policy to hazard the safety of twenty millions of notes being called in question, even in theory, for the sake of 50,000*l*. By all means have free trade in banking if you will; but not free trade in notes, if by that expression are meant unlimited issues by an unlimited number of individuals.

It will be observed that the main point of all the complaints, and of all the proposed remedies, is this:—The rate is at times inconveniently high—how can it be kept low? People forget that the value of gold must vary just as any other commodity does, and cry out to keep the Bank rate at an equal temperature of 4 per cent., rising occasionally to 5 or falling to 3 per cent. What a happy state this would be, could we only arrive at it! Trade and speculation would then have fair play; new companies would exult; there would be no complaints, no need of committees of inquiry into Bank Acts; all would be serene.

But I submit that it is not the Bank Act of 1844, be it good or bad, which prevents our reaching this Paradise.

No Act of Parliament will ever make men all prudent any more than it make them all sober: it is the "original sin" of mankind (if I may use the phrase) which is the chief cause of 10 per cent. Bank rate and of most panics.

When money is plentiful, men extend their business, take up new schemes, profitable and sound perhaps, but too heavy for their capital; they get out of their depth, require assistance, and for that assistance pay higher and higher until at last the inevitable catastrophe happens. The meaning of the common saying "that a panic is due every ten years" is simply that it takes that period for people to forget bad debts, to leave off being prudent, to become excited, then reckless, and at last insolvent.

The Bank Act—be it good or bad—neither raises nor lowers the value of money, it gives no undue preference to capital; but it serves as an index on a scale by which we can read the demand for and supply of money in the Bank; yet people pour out their wrath upon it instead of (as would in many cases be more just) upon themselves.

Surely the injustice of many of the complaints would be acknowledged, if we only recollect that the supply of gold is limited, while the facility of making bills creates a demand that is unlimited:—in other words, before we can reach the wished-for Paradise, our friends must solve the difficult problem of how to meet an unlimited demand with a limited supply.

Incidentally, but in connection with the foregoing remarks, it might be well to consider whether the existing confusion of ideas upon issue and banking might not in a great measure be cleared away, and our note system be improved by removing the issue department from the Bank, and converting it into a purely Government office. There are many arguments for and against: it is too serious a question to be lightly handled, but it is worth discussion.

London, November 25, 1865.

SAVINGS' BANKS RETURN.

THE following return shows the amounts received from, and paid to, Savings' Banks, and Post Office Savings' Banks, in the United Kingdom, by the Commissioners for the Reduction of the National Debt, during the four weeks ending Dec. 2, 1865:—

	Total Amount received by the Commissioners.	Total Amount paid by the Commissioners.
SAVINGS' BANKS:—	£ s d	£ s d
In money and interest credited	50,248 7 1	132,021 2 3
To transfer certificates from Post Office Savings' Banks to Savings' Banks	108 16 5	...
By transfer certificates from Savings' Banks to Post Office Savings' Banks	...	16,455 0 8
Total	50,357 3 6	148,476 2 11
POST OFFICE SAVINGS' BANKS:—		
In money and interest credited	55,000 0 0	11,547 15 5
To transfer certificates from Savings' Banks to Post Office Savings' Banks	16,455 0 8	...
By transfer certificates from Post Office Savings' Bank to Savings' Banks	...	108 16 5
Gross Total	71,455 0 8	11,656 11 10

Agriculture.

THE BIRMINGHAM STOCK SHOW.

ALTHOUGH the managers of the Midland Counties fat stock show declined to listen to a proposition for suspending the show during this season on account of the cattle plague, it is obvious to every visitor to Bingley Hall that the exhibition has been injuriously affected by the existing murrain. The numbers shown are less than in previous years, while the show generally is considered a good one. The Shorthorn classes are decidedly the best, and some of the animals in those classes are very good, but what forcibly strikes one is the great number of large ungainly beasts—such as have not been seen at the Smithfield Club Show for years—which are found in the Birmingham Hall. We remarked also many animals in which fatness, and perhaps quality, seemed to have been attained without much symmetry. The sheep were on the whole good, but we find the usual complaints that much of the fine outlines we admire are due to the skill of the shepherds, who so clip the wool as to give the appearance of better points than the animals really possess. Of course, this ought not, and perhaps does not, impose on the judges; but still the practice is the reverse of reputable. Whether in the actual state of our live stock in this country these fat stock shows do anything towards general improvement has been doubted, and it is certain that the preparing these animals for exhibition has become a kind of business. The farmers and others, however, who flock to the exhibitions seem to regard them with great interest, and probably the exaggeration of feeding capacity these prize competitors display does furnish some degree of information for ordinary use. The life of a fat prize ox is by no means so brief as might be supposed. Thus, we learn from the report of the *Mark Lane Express* that Mr Rowland Wood's first prize Shorthorn steer had been "winning prizes about home for the last two seasons, at Huntingdon and Peterborough in 1864, and again at the Peterborough meeting of the Northamptonshire Society in 1865." This animal is said to have been "absolute perfection," with the exception of being "a little faulty about his quarter."

In reference to the trimming the sheep, it is said—*apropos* of the present locale of the shepherds of two now deceased celebrated prize-winners—"though you cannot trim a bad sheep into a good one, there is no doubt you may fashion a fairish one into something a deal better," and therefore a certain exhibitor having secured one of these skilful shepherds, his stock as prize-winners may be expected to "run on."

Again, it seems that the pigs are beginning to be dealt with somewhat in the same way, though it might be thought that "shearing the sow" would not be a very hopeful process. Thus, Berkshire pigs ought not to show any white hairs, and some of the prize-winners of that breed are said to be "only disfigured as they were by the pigman having attempted to burn or rub out certain grey hairs, where the animals had consequently become quite bare." Here the attempted fraud seems not to have been very successful. Yet we learn "the judges expressed themselves very significantly as to the way in which some of the pens were prepared, by suggesting that in future pigs *painted* or *coloured* should be disqualified." Then "a pen of Berkshires exhibited by a clergyman were carefully singed." Some pigs were disqualified as being older—as shown by their teeth—than the ages at which they were entered.

On this latter point, however, it is only fair to say that it is asserted that by the mode of feeding, pigs are forced on so that the changes in their teeth take place earlier than they would do in their normal state, and that the inspectors do not allow for this.

The Poultry Show at Birmingham is allowed on all hands to have been magnificent. We certainly never saw anything like such an array of Cochin, Dorking, and game fowls. The weight of some of these, as well as of the ducks, must have been extraordinary. The roots, too, were remarkably fine.

Foreign Correspondence

(FROM OUR OWN CORRESPONDENT.)

PARIS, Friday.

The *Moniteur* has published the following return of the Bank of France, made up to the 7th inst. The return for the previous week is added:—

DEBTOR.	Dec. 7, 1865. f	c		Nov. 30, 1865. f	c
Capital of the bank	182,500,000	0	.....	182,500,000	0

	1,402,684,639	6	.....	1,436,754,470	0

The coin and bullion of the Bank, compared with last week, show an augmentation of 22,243,000f, and the discounts a decline of 56,681,000f. Both these items have occasioned some surprise, as generally the demand both for money and for discount accommodation is active towards the end of the year. The deposits have increased by 11,467,000f, and the circulation of notes is less by 42,993,000f.

The Bourse has been somewhat active during the past week, and quotations have improved. The anticipated death of the King of the Belgians had, however, yesterday a depressing effect, and has had a still greater one to-day.

The London newspapers have published a letter from M. de Ybarrondo, a Mexican agent to Messrs Baring, to the effect that the arrangement sanctioned by the Emperor Maximilian for the conversion of the Deferred Mexican bonds of 1837 could not be completed in consequence of Count de Germiny, President of the Mexican Financial Commission in Paris, having been unable to give 1864 bonds for the deferred ones, as required to do. This statement, I am assured, is literally exact; but the Emperor Maximilian appears not to have taken into account, in giving the order for the delivery of the 1864 bonds, that none of this series remains owing to their having been converted into 1865 bonds; and His Majesty appears, besides, to have entirely forgotten that the execution of preceding arrangements ordered by him, has left no bonds at his disposition in the hands of the Financial Commission of Paris. The affair is to be regretted no doubt; but the fault is entirely with the Emperor of Mexico. He ought to know that the loans raised for him are not inexhaustible, and that he cannot go on giving delegations on them for ever.

It is quite true, as a telegraphic despatch from Constantinople has announced, that the Credit Mobilier has undertaken a new loan of 6,000,000*l* for Turkey. The details of the arrangement were, however, not definitively concluded at noon to-day, but in all probability they will be settled and made known to-morrow. No importance appears to be attached here to the fact that the raising of the loan is regarded with irritation by parties interested in the Turkish conversion at London. *On se calmera* was the quiet answer given to an observation on the subject.

The Bank of France has been heard before the Superior Council of Commerce charged with the inquiry into Banks. The great establishment was represented by M. Rouland, the Governor, and M. de Waru, as a delegate of the directors. Of course these gentlemen defended the Bank with great energy against the accusations heaped on it, of unnecessarily raising the rate of discount, of keeping its capital invested in Government stock instead of employing it in banking operations, of not making sufficiently large purchases of the precious metals to meet moments of pressure, &c. In the course of his evidence, M. Rouland dwelt on the large absorption of capital which has taken place in late years for Government loans and public works, and said that that was one of the

Digitized by Google

causes of commercial crises. He affirmed, besides, that France has lost by the different foreign enterprises in which she has been engaged not less than 1,200,000,000f (48,000,000*l*), that loss resulting from the difference between the price she paid for bonds and shares and their present value.

M. Victor Bonnet, the well-known economist, has published in the *Revue des Deux Mondes* two articles on the various questions now being investigated by the Superior Council. They present in a new form the leading principles and opinions set forth in his book, *Le Credit et les Finances*, but some new matter is added. I have specially noted two points in the treatises:—the first is, that M. Bonnet holds that speculative finance societies are far from being so productive of good as their partisans allege; the second, that (contrary to what has been maintained in the ECONOMIST) a number of local banks of issue are not necessary to induce people to carry their money to banks, and so enable a great central metallic reservoir to be formed.

The Bank of Algeria announces that the dividend for the half-year ending 31st October has been fixed at 32f 50c per share.

The general warehouses for silk, which were recently opened at Marseilles, have just commenced operations by the sale of 291 bales of silk of China and Japan. As the greater part of the silk used in France, that of Spain, Italy, the Levant, Japan, China, and India arrives at Marseilles, it is believed that the manufacturers of Lyons will prefer to make their purchases there to going to London, and that consequently the town can be made a great silk market. If the expectation should be realised, considerable injury will be done to the silk market at London.

It is proposed to establish a company at Marseilles, with a capital of 8,000,000f, for purchasing and carrying on the great sugar refinery of Rostand and Co., who lately failed."

Messrs Arles Dufour and Co. of Lyons, in their last circular, say that manufacturers, having received important orders for Europe, have recently made purchases of the raw material with some confidence, and that holders have facilitated transactions by abstaining from exacting too high prices. Accordingly there has been no serious augmentation in quotations except for Asiatic sorts. "Whilst admitting," add Messrs Arles Dufour, "an improvement in the general aspect of affairs, we must call attention to the difficult position created for our trade by the high prices of the raw material, and still more by the glut of the American market, which, from the last advices, threatens importers of silk fabrics with serious loss."

A Dutch Company for lighting certain towns in Spain with gas has been soliciting in Paris subscriptions for 6,000 shares of 250 florins (21*l* 12s) each. The nominal capital of the company is 3,500,000 florins.

A telegram of some commercial interest has been received from Vienna. It is that an imperial decree authorises all foreign companies in shares, except those of assurance, to do business in Austria.

Customs returns, issued within the last few days, give details of the commerce of France in the first ten months of the present year, compared with the corresponding periods of the two preceding years. In the ten months of 1865 the value of the imports for consumption was 2,280,767,000f; of 1864, 2,069,731,000f; and of 1863, 2,021,142,000f; whilst that of exports of French production was, in 1865, 2,550,687,000f; of 1864, 2,483,390,000f; and of 1863, 2,157,797,000f. These figures show that trade in France is progressing in the most satisfactory manner possible.

The following is a detail of the value of some of the principal imports:—

	First ten months of 1865. francs.	First ten months of 1864. francs.	First ten months of 1863. francs.
Wool	223553000	189292000	192462000
Silk	244459000	231398000	243607000
Sugar	117381000	104579000	121614000
Cotton	333063000	278644000	210378000
Coal	103368000	93930000	81079000
Hides and skins	85477000	87096000	96110000
Oxen	65717000	65839000	63991000
Flax	62372000	42496000	39972000
Copper	72507000	69174000	67217000
Timber	96249000	91119000	87750000
Oleaginous seeds	52835000	47148000	34063000

The articles next in importance to these were olive oil, seeds for sowing, staves, tallow, guano, copper, indigo, woollen tissues, straw plait, and straw hats.

The principal exports of French production were:—

	First ten months of 1865. francs.	First ten months of 1864. francs.	First ten months of 1863. francs.
Silk tissues	332574000	364189000	324071000
Woollen tissues	317189000	316686000	245947000
Cotton tissues	90111000	89795000	77695000
Turnery, mercery, and buttons	143705000	144751000	115300800
Ready-made clothes and linen	90728000	88494000	63146000
Wines	223890000	199407000	187060000
Silk	96219000	85878000	77858000
Prepared skins	52747000	52282000	42274000
Articles in leather	67046000	75330000	65601000
Refined sugar	79942000	59884000	69465000

The more important of the other exports were tools and articles in metal, flax and hemp tissues, woollen yarn, silversmiths' work and jewelry, millinery and artificial flowers, furniture, brandies, chemical productions, butter, wool, timber, rosin, oxen, grain and flour, &c.

It is not possible to state the countries from or to which imports and exports were made, the French returns being drawn up in such a very imperfect manner that they do not present a table containing information on those points. Yet surely it is as of as much interest to know the amount of the trade done with England, Italy, Belgium, &c., as it is to know the value of the wool, silk, wines, and tissues imported or exported.

The precious metals, not included in the previous figures, stand thus:—

	First ten months of 1865. francs	First ten months of 1864. francs	First ten months of 1863. francs
IMPORTS.			
Gold bullion	48,937,839	92,831,088	64,550,232
Coin	279,808,011	265,654,485	245,021,994
Silver bullion	77,910,814	54,067,087	22,616,170
Coin	124,732,667	176,912,991	105,123,591
	531,389,361	589,465,651	437,311,987
EXPORTS.			
Gold bullion	39,299,223	21,184,224	71,081,107
Coin	195,273,900	263,005,041	224,753,696
Silver bullion	55,947,127	114,657,767	81,785,980
Coin	54,944,238	163,455,812	84,427,303
	345,464,488	562,302,844	462,048,086

It appears from these figures that in the first ten months of the present year the imports exceeded the exports by 185,924,873f, which in English money are 7,436,995*l*. Of the total imports of gold bullion and coin, 121,100,000f (round figures) were from England, 43,500,000f from Italy, 4,600,000f from the United States, 59,900,000f from the Zollverein, the rest from Belgium and other countries; and of the silver, 16,000,000f came from England, 72,000,000f from Italy, 41,100,000f from Spain, the rest from Belgium, the Zollverein, and other countries. Of the exports of gold, 21,000,000f were to England, 143,000,000f to Italy, 30,800,000f to Egypt, the rest to Spain, Belgium, the Zollverein, Turkey, &c.; and of those of silver, 5,900,000f went to England, 32,700,000f to British India, 2,900,000f to China, 8,900,000f to Egypt, 16,600,000f to Belgium, and the remainder to the Zollverein, Spain, and other countries.

The Municipality of Turin has caused to be published an appeal to capitalists to establish or extend different manufactures in that city, for which, it says, there is an excellent opening. Among the manufactures specified are those of refined sugar, prepared and varnished skins, flax, hemp, and cotton yarn and fabrics, woollen yarn, paper, and pasteboard.

The Suez Canal Company announces that it will pay the fourteenth coupon of interest from the 1st January.

The market report is as follows:—

FLOUR.—At *Paris*, prices are firm; yesterday they were, choice, 52f 50c the sack of 157 kilogs; first marks, 51f; good, 50f; other sorts, 48f to 49f. Six marks, current worth, 51f 75c; four months of January, 53f 50c. Type Paris, the 101 kilogs, 32f 25c current month.

WHEAT.—At *Paris*, yesterday, holders demanded a rise of 50c, but could not obtain it. Choice white was 27f 50c to 28f the sack of 120 kilogs; choice red, 27f 25c to 27f 50c; good, 26f to 26f 50c; other sorts, 25f to 25f 50c.

COTTON.—The sales at *Havre*, in the week ending Friday, amounted to 10,525 bales, and the arrivals were 3,746. The stock was estimated 31,710 bales. The closing quotations were 7f to 12f higher for United States; 10f higher for Egypt, Peru, Kurrachee, and Bengal; 5f to 7f for Tinnevelly; 5f for other sorts except Martinique, Guadaloupe, Hayti, sawginned, Coconado, and China, which remained unchanged. Low New Orleans was consequently 250f the 50 kilogs; good ordinary qualities in Broach, 210f; China, 205f; Jumel, 270f. This week, the market has been active, and yesterday New Orleans was 262f 50c; Pernambuco for delivery, 250f; Sorocaba, 265f and 260f, and for delivery 250f; Peru, 265f to 273f; Ingelghaut, 215f to 225f; Broach 220f; Madras, 220f; and for delivery, 190f to 212f 50c; Coconado for delivery, 185f; Bengal, 172f 50c; Rangoon, 170f; China, 200f to 210f.

COFFEE.—The demand at *Havre*, in the week ending Friday, was regular, and prices were firm. 79 sacks Port-au-Prince, 85f the 50 kilogs, in bond; 500 ditto, for delivery, same price; 950 Jacmel, for delivery, 83f 25c to 84f; 1,180 Gonaives, disposable, 86f 50c to 88f 50c; 150 St Marc, for delivery, 90f; 1,600 Rio, not washed, 69f to 81f; 400 Bahia, 67f 50c to 78f; and some Guadaloupe, 142f 50c, duty paid. Some damaged Rio was also sold by auction. The arrivals exceeded 3,000 sacks. This week, Gonaives, 87f; Bahia, 67f to 71f; Rio, 66f to 71f; Gonaives, 86f and 85f 50c; Ceylon, 90f; Malabar, 91f and 92f 50c. At *Bordeaux*, last week, 300 sacks Rio, not washed, 78f; 60 at prices not stated; 150 Bahia, 101f; 26 casks Santiago, 105f and 108f; 21 Jamaica, at established prices. This week, Rio, not washed, 78f. At *Nantes*, last week, 400 sacks Gonaives, at prices not stated. Nothing done this week. At *Marseilles*, last week, 6,000 sacks Maracaibo, indifferent quality, 81f 25c. This week, some damaged Bahia, by auction, 60f to 61f 75c.

SUGAR.—Calm prevailed at *Havre*, in the week ending Friday, but prices were firm. 110 casks French West India, disposable, 50f the 50 kilogs, bonne quatrieme, duty paid; 58 usine, second jet, 49f 75c; 2,060 sacks Pernambuco, 29f, in bond; 300 casks Havana, 33f to 34f, No. 12.

Digitized by Google

The arrivals were 1,294 sacks beetroot. This week, Porto Rico, 52f 25c, bonne quatrieme. At *Nantes*, last week, 8,878 sacks Reunion, two-thirds gros grain, 52f 50c, bonne quatrieme; 12,880 at 52f 25c; 300 at 52f 50c; 4,500 at prices not stated; some French West India, 48f, bonne quatrieme, and 48f 50c; usine, 51f 50c. This week, French West India, bonne quatrieme, 48f; usine, 56f 50c and 59f 50c. At *Bordeaux*, last week, some lots of French West India, 50f to 50f 50c, bonne quatrieme; and to take at Nantes, 48f 50c; 25,138 bales Reunion, for delivery and to take at Nantes, 53f 50c to 54f, bonne quatrieme. This week, Reunion, 54f 50c ditto. At *Marseilles*, last week, 250 casks French West India, 30f 50c, bonne quatrieme of Havre, in bond; 2,500 bales Reunion, 52f 50c, bonne quatrieme of Nantes, duty paid. No sales have been made this week.

INDIGO.—The sales at *Havre*, in the week ending Friday, were 57 chests, part at the estimates, part at a premium of 20c, part at prices kept secret. The arrivals were 5 chests. This week, Bengal at a premium of 40c to 50c. At *Bordeaux*, this week, Madras at prices not stated.

HIDES.—The demand at *Havre*, in the week ending Friday, was regular, and holders willingly realised: 600 La Plata dry, 95f the 50 kilogs; 15,200 ditto salted ox, 53f to 61f; cow, 42f to 46f 50c; 885 Rio Grande dry, 77f 50c; 4,000 ditto salted ox, 47f 50c; cow, 44f 50c; 300 Rio Janeiro salted ox, 52f 25c; 3,000 Pernambuco salted, 44f; 200 Bahia dry salted cow, 57f; 200 La Plata horse salted, 41f 50c; 400 Calcutta calf, 82f 50c. By auction, 377 Buenos Ayres dry ox, sound, 89f to 92f; 384 cow, 80f to 82f; also some lots of different sorts of damaged. The arrivals were about 19,000. This week, Rio Janeiro salted cow, 39f; Buenos Ayres dry, 75f; Monte Video salted ox, 60f and 61f; cow, 46f and 47f.

WOOL.—The sales at *Havre*, in the week ending Friday, were 150 bales La Plata unwashed, 1f 57½c to 2f 5c the kilog; 49 ditto washed, 5f 20c to 5f 95c; 19 bales Peru and Chili unwashed, 1f 45c to 1f 60c. By auction, 4 bales Buenos Ayres unwashed, 85f to 1f 60c; 9 Monte Video, 1f to 1f 90c; also some sorts of both lots damaged. The arrivals were unimportant. This week, Monte Video unwashed, 1f 50c to 2f 50c; Buenos Ayres ditto, 1f 50c to 2f 22½c.

TALLOW.—At *Havre*, in the week ending Friday, 180 pipes La Plata, disposable, or in the port, 58f and 58f 25c the 50 kilogs. The arrivals were 121 casks. This week, La Plata for delivery, 57f 50c. At *Paris*, yesterday, the 100 kilogs, octroi duty included, 119f 20c.

SPIRITS.—At *Paris*, yesterday, 3-6 first quality, 90 deg., disposable, 44f and 43f the hectolitre. At *Bordeaux*, the day before yesterday, 3-6 Languedoc, 86 deg., 53f; 3-6 beetroot, first quality, 90 deg, 54f.

COMMERCIAL AND MISCELLANEOUS NEWS.

Writing from Bombay on the 13th ult., Messrs Stoehr, Prieger, and Co. thus allude to the state of monetary affairs at that port during the preceding fortnight:—Money has been in active request for payment of the large cotton purchases both on the spot and in the up-country. The cash balance in the bank is again considerably reduced, but as it will probably soon be strengthened by the silver now in the mint, no change has been made in the rates of discount, which remain at 10 to 12 per cent. The imports of silver by the last two mails has fallen considerably short of expectations, but the next mail or two will probably bring large supplies, and with them more ease. Exchange—The fluctuations though not great have been many. After arrival of the mail of the 3rd October with only 30 lacs, Bank bills advanced to 2s 1 7-16d to ½d, and shortly before the arrival of the following gradually declined to 2s 1¼d to 5-16d. As soon as it became known that she brought only 38 lacs, rates however stiffened again, and close rather higher than a fortnight ago, with few buyers, say Bank bills, 2s 1⅜d to 7-16d; credits, 2s 1 9-16d to ⅝d; documents, 2s 1¾d to 13-16d.

During the week ending Dec. 6, the imports of the precious metals were:—Gold, 56,978*l*; silver, 37,550*l*. The exports were:—Gold, 197,058*l*; silver, 32,738*l*.

The following returns, published by the Veterinary Department of the Privy Council, and having reference to the disease amongst horned cattle, do not profess to give the total number of cases which have occurred in Great Britain, but only those which have been ascertained from the official information received from Inspectors, whether appointed by the Clerk of the Council or by the local authorities. The divisions of England are those of the Census. Column I. only records the cases reported as having commenced during the weeks indicated by the headings; "back" cases being added to column II.:—

Census Divisions.	I. Number Attacked.			II. Result of reported Cases from the Commencement of the Disease.

Ditto by rail beyond districts	92	
Ditto by canal and inland navigation	384	
		3,587
4. Sea-borne coal brought into port and exported in same ships		480
Total quantity of coal conveyed beyond limits of coal duty district during Nov., 1865		83,009
Ditto, 1864		51,830

Annexed are the returns of the circulation of the private and and joint stock banks in England and Wales for the four weeks ending the 11th of November:—

	Oct. 14, 1865.	Nov. 11, 1865.	Increase.	Decrease.
	£	£	£	£
Bank of England	21965514	21864805	...	100709
Private Banks	3122002	3133928	11926	...
Joint Stock Banks	2019154	2892421	...	26733
Total in England	28006670	27891154	...	115516
Scotland	4515404	4696685	181281	...
Ireland	6607715	6887925	280210	...
United Kingdom	39129789	39475764	345975	...

And, as compared with the month ending the 12th of Nov., 1864, the above returns show an increase of 917,944*l* in the circulation of notes in England, and an increase of 2,101,910*l* in the circulation of the United Kingdom. On comparing the above with the fixed issues of the several banks the following is the state of the circulation:—The English private banks are below their fixed issue 1,005,541*l*, the English joint stock banks are below their fixed issue 333,836*l*,—total below fixed issue in England, 1,339,377*l*: the Scotch banks are above their fixed issue 1,947,414*l*; the Irish banks are above their fixed issue 533,431*l*. The average stock of bullion held by the Bank of England in both departments during the month ending Nov. 8 was 13,135,813*l*, being a decrease of 389,398*l* as compared with the previous month, and a decrease of 141,489*l* when compared with the same period last year. The following are the amounts of specie held by the Scotch and Irish banks during the month ending the 11th Nov.:—Gold and silver held by the Scotch banks, 2,646,198*l*; gold and silver held by the Irish banks, 2,491,904*l*; total 5,138,102*l*; being an increase of 375,526*l* as compared with the previous return, and an increase of 559,571*l* when compared with the corresponding period last year.

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

AN ACCOUNT pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 6th day of December, 1865.

ISSUE DEPARTMENT.

	£		£
Notes issued	28,385,270	Government Debt	11,015 100
		Other Securities	3,634,900
		Gold Coin and Bullion	13,685,270
		Silver Bullion	...
	28,385,270		28,385,270

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	9,841,100
Rest	3,192 552	Other Securities	19 977,797
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	6,619 643	Notes	7,589,680
Other Deposits	12,647.000	Gold and Silver Coin	784,347
Seven Day and other Bills	471,129		
	37,483.324		37,483 324

THE OLD FORM

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	21,226,319	Securities	29,215,897
Public Deposits	6,619,643	Coin and Bullion	14,469,617
Private Deposits	12,647,000		
	40,492,962		43,685,514

Dated the 7th December 1865. W. MILLER, Chief Cashier

The balance of Assets above Liabilities being 3,192 552*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

An INCREASE of Circulation of	£10,581
An INCREASE of Public Deposits of	75,261
An INCREASE of Other Deposits of	175,479
An INCREASE of Government Securities of	100,000
An INCREASE of Other Securities of	327,287
A DECREASE of Bullion of	159,331
An INCREASE of Rest of	6,635
A DECREASE of Reserve of	192,806

The increase of 327,287*l* in the private securities, noted in this week's Bank return, gives evidence of some growth in the public requirements. There is, at the same time, an addition of 175,479*l* to the private deposits; but the reserve has been reduced to the extent of 192,806*l*, and the stock of coin bullion exhibits a decrease of 159,331*l*.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1855:—

At corresponding dates with the present week	1855.	1862.	1863.	1864.	1865.
Circulation, including bank post bills	£ 19,603,784	£ 20,116,003	£ 20,801,207	£ 20,118,116	£ 21,226 319
Public deposits	4,416,231	8,490,519	8,629,856	6,4[illegible]8,544	6.619.643
Other deposits	11,719,180	13,579,489	12,981,276	12,666,764	12,647,000
Government securities	10,264,376	11,084,517	10,712,330	10,474,542	9,841,100
Other securities	18,141,269	19,269 955	21,813,329	18,155.132	19,277,797
Reserve of notes & coin	6,399,238	10,127,183	7,465,577	8,848,484	8,364,427
Coin and bullion	11,078,578	14.828,063	13,008,617	13,840,694	14,469,617
Bank rate of discount	6 & 7 p c.	3 p. c.	8 p. c.	7 p. c.	6 p. c.
Price of Consols	88⅞	92⅜ xd	91⅜ xd	89¼ xd	87½ ⅜ xd
Average price of wheat	8 s 6d	46s 9d	40s 9d	38s 8d	46s 6d
Exchange on Paris (short)	25 25 35	25 15 22½	25 30 35	25 17½ 25	25 7½ 15
— Amsterdam ditto	11 17 17½	11 14 14½	11 17½ 18½	11 15 16	11 18 18½
— Hamburg (3months)	13 9 9½	13 6½ 7	13 8½ 9	13 8 8½	13 8½ 9½

In the corresponding week of 1855, rumours were again circulated that the Emperor of Russia had offered to make terms with the Western Powers. The Imperial Commercial Bank of Odessa had suspended cash payments. The King of Sardinia had terminated his visit to England. The stringent condition of the money market continued.

In 1862, the Provisional Government of Greece had ordered that the election of the future King should take place by universal suffrage. Signor Farini had succeeded in forming a new Ministry at Turin. The cession of the Northern side of the Valley of the Dappes to France had been agreed to by the Swiss Confederation. France was to cede an equal amount of territory on the Southern side of the Fauville road. News had arrived of the death of the ex-King of Delhi. In London money was in demand. The Indian Council had notified the increase of their drawings to 1,000,000*l* a month till further notice.

In 1863, the Austrian and Prussian representatives at the Diet had obtained a resolution for federal execution in Holstein and the order for the advance of the troops had been despatched. Various replies had been received by the Emperor Napoleon to his proposal of a Congress. The Royal patent of the 30th March had been withdrawn by the Danish Government, and the proclamation of King Christian IX. published to the Holsteiners. Arrests and exile were still made by the Russians in Poland. In Japan further losses to the English had resulted from an attack on the forts of Prince Satsuma. The bombardment of Fort Sumter was being continued. General Meade had crossed the Rapidan and some successes had attached to the Federal forces at Chattanooga. The transportation question was causing excitement at Melbourne. The Bank of Holland had advanced the discount rate to 5 per cent. The Bank of Turin had raised the rate of discount to 9 per cent.

In 1864, the King of Denmark had been visited in Jutland by many Schleswigers, by whom he had been presented with addresses from the inhabitants of the country. The Italian Senate had confirmed the vote of the Parliament for the transfer of the capital to Florence by 134 against 47 voices. Some disturbances had broke out in Albania. The American papers had confirmed the intelligence of Sherman's march in two columns upon Augusta and Macon. A new Russian 5 per cent. loan had been authorised in St Petersburg. The Bank of France rate had been reduced from 6 to 5 per cent., and the Bank of Prussia had reduced their rate to 6 per cent. In London, the demand for money was steady at the Bank minimum.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1855, a deficiency of 6,422,089*l*; in 1862, a deficiency of 5,690,466*l*; in 1863, a deficiency of 8,832,053*l*; and in 1864, a deficiency of 5,488,368*l*. In 1865, the deficiency is 6,630,797*l*.

DISCOUNT AND MONEY MARKET.—Such small change as is this week discernible in the character of the money market is of an unfavourable nature. The inquiry for money is rather more active; but, as at this period of the year more or less of stringency commonly prevails, the decline in the exchanges and rumours of foreign loans to be shortly issued are indications of greater importance. At the biddings for Government bills on India on Wednesday the advance in the rates showed a revival of the demand for remittances, which may also become an additional element of disturbance. The public anxiety concerning the shares in many of the lately issued joint stock companies is still expressed in letters to the leading journals. There can be little doubt that the creation of securities of this sort has been on a scale beyond that justified by the want of investments. The very heavy fall in value in some of the shares in question is to be attributed mainly to this circumstance. Whether sales will be pressed in such a manner as to alarm the public and create a panic remains to be seen, but such a crisis is not at all improbable in case of any sudden stringency in the market. The business done to-day has been at about the Bank rate.

Annexed are the current discount charges on paper of various dates:—

30 to 60 days	5⅞ per cent.
3 months	5⅞ per cent.
4 months	6¼ per cent
6 months—Bank bills	6¼ per cent.
6 months—Trade ditto	6¾ per cent.

During the early part of the day money for short periods on Government securities was freely taken in the Stock Exchange at 6 per cent. Later the supply was sufficient at 5 per cent.

The following are the rates allowed by the joint stock banks and discount houses for deposits:—

Joint Stock Banks	*4½ per cent.
Discount houses at call	4½ per cent.
Do. with seven days' notice	5 per cent.
Do. fourteen days	5¼ per cent.

* At the London and Westminster 3½ per cent. only on sums below 500*l*.

Bullion.—300,000 sovereigns have been withdrawn for Brazil, and 48,000 for Egypt. 28,000 sovereigns have been sent into the Bank from Lisbon.

The following rates of discount are those current in the chief continental cities:—

	Bank Rate. Per cent.	Open Market Per cent.
Paris	4	3¾
Vienna	5	5
Berlin	7	6½
Frankfort	5½	5
Amsterdam	6	6
Turin	5	4½ 5
Brussels	6	5½
Madrid	9	...
Hamburg	...	5
St Petersburg	6	6½ 7

The Bank of France return, just published, gives the following results on a comparison with that issued last week:—

	£
INCREASE.	
Cash in hand	890,000
Current accounts	460,000
DECREASE.	
Bills discounted, not yet due	2,253,330
Notes	1,760,000
Advances	12,000
Treasury balance	156,000

ENGLISH GOVERNMENT STOCKS.—The uncertainty of the money market, disquiet concerning the spread of the cattle plague, with a variety of other causes of less immediate moment, exercise a most depressing effect on the value of the Government funds. The public continue to sell stock, and the deliveries are upon a sufficiently extensive scale to neutralise the absorption by the Government broker, who, for some time past, has been a constant purchaser in the market. At the settlement, which has just taken place, money was greatly wanted, and the excess of securities in the hands of

Digitized by Google

dealers rather serves to show that speculative purchases have slightly masked the real character of the market, still open to fresh decline. The Government broker purchased to-day 10,000*l* New Three per Cents. and 10,000*l* Three per Cent. Reduced stock. The closing prices are all dull; Consols, 87 to 87¼ for money, and 87⅜ to 87⅝ for January account. New Three per Cents. and Reduced, 86¾ to 87. India Five per Cents., 102½ to 102¾.

In the Exchequer market June bills are 1s higher, at 8s to 3s dis.; March bills, 6s to 2s dis. India bonds, 14s to 19s premium.

FOREIGN STOCKS.—The foreign stock market has been greatly influenced by the constant dulness of English securities and the general disposition to sell miscellaneous shares. The current rumours of new loans also act prejudicially. A very small amount of business is transacted on behalf of the public, whose operations are not of a nature that is calculated to improve quotations. The closing prices of stocks dealt in to-day are subjoined:—5 per Cent. Brazil, 1865, 76; Scrip, 2⅛ to 2⅜ pm. 7 per Cent. Danubian, 74 to 76. 1 per Cent. Ecuador, 12 to 13. 7 per Cent. Egyptian, 91½ to 92½; ditto, 1864, 91 to 92. 5 per Cent. Italian, 76½ to 77½. 3 per Cent. Mexican, 24⅞ to 25⅛; ditto, 1864. 22⅞ to 23⅛. 4½ per Cent. Peru, 1862, 72½ to 73½. 3 per Cent. Portuguese, 46¼ to 46¾. 5 per Cent. Russian, 1822, 89½ to 90½. 3 per Cent. Spanish Deferred, 37½ to 38½; ditto Passive, 27⅝ to 27⅞; ditto Certificates, 14⅝ to 14⅞. 4½ per Cent. Swedish loan, 1864, 88. 6 per Cent. Turkish, 1854, 89 to 90; ditto, 1858, 72 to 73; ditto 1862, 71 to 72; 5 per Cent. ditto, 1865, 43¼ to 43¾. 4 per Cent. guaranteed, 99 to 100. 6 per Cent. Venezuela, 1864, 36 to 38.

French 3 per Cent. rentes are telegraphed from Paris this evening 68f 85c for money and 68f 90c for the account.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks on last Friday and this day:—

CONSOLS.

	Money. Lowest.	Highest.	Account. Lowest.	Highest.	Exchequer Bills
Saturday	87⅛	87⅜	87⅛	87⅜	9s 4s dis
Monday	87⅛	87⅜	87⅛	87⅜	9s 5s dis
Tuesday	87⅛	87⅜	87⅛	87⅜	4s dis
Wednesday	87⅛	87⅜	87⅛	87⅜	8s dis

RAILWAYS AND OTHER SHARES.—The markets have declined, and most quotations are lower than those of last Friday. The amount of business doing is insignificant. Great Eastern stock is 2 per cent. lower. Great Northern is also 2 per cent. lower, and the "A" stock 1½ per cent. lower. Great Western has declined 1¾ per cent., and Lancashire and Yorkshire 1 per cent. London and North-Western and London and South-Western are rather lower, and Metropolitan stock also has slightly declined. Midland Railway stock is 1½ per cent. lower, and South-Eastern 2 per cent. lower.

In Indian guaranteed stocks there is little business doing, and prices are somewhat dull.

Foreign railway shares are quiet, the amount of business being greatly restricted by the state of the other markets.

In banking shares, almost all the new companies are at or approaching very nearly to a discount. There are few buyers, and sellers are anxious to realise.

The miscellaneous share market is very dull. Amongst the quotations of this day are—Canadian Loan and Investment Company, 2½ paid, 2 to 1 dis. City of Milan mprovements, 5*l* paid, 2 dis. to par. City Offices, 10*l* paid, 3 to 2 dis. Consolidated Discount, 6 to 4 dis., with 10*l* paid. Contract Corporation, 10*l* paid, 9 to 7 dis. Credit Foncier of Mauri tius, 3 to 2 dis., 10*l* paid. Discount Corporation, 20*l* paid, 9 to 7 dis. East India Land, Credit, and Finance, 10*l* paid, 5½ to 4½ dis. East India Irrigation ond Canal, 4 to 3 dis. English and Scottish Marine, 5*l* paid, 2 to 1 dis. Humber Iron Works, 20*l* paid, 16 to 14 dis. International Contract, 10*l* paid, 6 to 4 dis. London, Italian, and Adriatic Steam, 15*l* paid, 10 to 7 dis. London Mercantile Discount, 10*l* paid, 11 to 9 dis. Quebrada Land, Rail, and Mining, 9*l* 10s paid, 5½ to 4½ dis. Smith, Knight, and Co., 10*l* paid, 14 to 12 dis.

On Wednesday the bidding for 350,000*l* Government bills on India were received at the Bank of England: 223,300*l* were allotted on Calcutta, 26,700*l* on Madras, and on Bombay 100,000*l*. The minimum price was 1s 11½d on Calcutta and Madras, and 1s 11¾d on Bombay. Tenders on Calcutta and Madras, at 1s 11⅞d, received about 10 per cent., and on Bombay, at 2s 0¼d, about 8 per cent. Above these prices the allotments were in full.

Tenders will be received at the Bank of England on the 20th inst., on the terms advertised for the Government drawing of bills on the 10th Nov. last, for 350,000*l* Government bills on India, of which not more than 100,000*l* will be drawn on Bombay.

On the 12th inst. the Crown agents for the Colonies will receive tenders for the first moiety of the Natal Government 6 per cent. loan of 100,000*l*, the principal and interest all payable in London.

Subjoined is the usual list of the closing prices of the principal railway shares on last Friday and this day:—

FOREIGN EXCHANGES.—There were few bills offered, and exchanges were lower than on last post day.

BULLION.—The following is the weekly circular of Messrs Pixley, Abell, and Langley on the transactions in bullion during the week, and in Indian rupee paper:—

Gold.—The America, from New York, has brought 36,000*l*; the Cuba from New York, has brought 22,500*l*; the Etna, from New York, has brought 22,000*l*; the City of Washington, from New York, has brought brought 19,500*l*. These amounts, making a total of 100,000*l*, have not been sufficient for the export demand, and about 100,000*l* in bars and coin have been withdrawn from the Bank. About 300,000*l* in sovereigns will be taken to-morrow for the Brazils, and in the absence of any arrivals, it is not unlikely that the Bank will lose further sums of bullion. The Pera has taken 4,750*l* to Madras.

Silver.—The fine bars, ex Shannon, were sold on the 30th ult. at 61½d per oz standard. Subsequently, sales were made at 61⅝d per oz. standard, and a consderable amount of business has been done at that price, and 61 9-16d per oz standard. We consider the market firm, at the former quotation for shipments via Marseilles. The Pera has only taken 1,350*l* to Calcutta.

Mexican Dollars.—The dollars, ex Shannon, were sold at 4s 11⅞d per oz, and about 25,000*l* went to China and the Straits by the Pera; the remainder were nearly all taken for refining. The price has since slightly improved, and an order has been executed at 60d per oz.

Digitized by Google

Exchange on India for drafts by the banks at sixty days' sight may be quoted 1s 11¾d to 2s Calcutta and Madras, and 2s to 2s 0⅛d Bombay. The Council drafts yesterday were sold rather higher as regards Bombay, rather lower as regards Calcutta and Madras; the former receiving about 8 per cent. at 2s 0¼d; the latter about 18 per cent. at 1s 11⅞d.

India Government loan notes remain without much change, and may be quoted 108 to 109 for 5½ per Cents.; 101 to 102 for 5 per Cents.; and 87 to 88 for 4 per Cents.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std, last price; ditto, refinable, 77s 11d per oz std, last price; Spanish doubloons, 74s to 74s 6d per oz; South American doubloons, 73s 9d to 73s 10d per oz; United States gold coin, 76s 3d per oz, last price. Silver—Bar silver, 5s 1 9-16d per oz std, nearest; bar silver, containing 5 grs gold, 5s 1¾d per oz std; Mexican dollars, 5s per oz; five-franc pieces 4s 11⅜d per oz, last price. Quicksilver, 8*l* per bottle; discount, 3 per cent.

Failures and Mercantile Embarrassments.—Mr Fred. Maynard has been appointed official liquidator of the affairs of the Free Trade Benefit Building Society, by Vice-Chancellor Kindersley.

A petition for the winding up of the Metropolitan Music Hall Company (Limited) is to be heard on the 15th inst. before Vice-Chancellor Kindersley.

The liquidators of the Tyne Iron Shipbuilding Company (Limited) have issued notice to creditors to send in details of their claims by the 15th inst.

The 10th January having been appointed for adjudicating upon claims on the East Cambrian Gold Mining Company (Limited), creditors are required to send in particulars by the 22d Dec. to the official liquidator.

Public Companies.—The Colonial Company (Limited).—This company, with a very influential direction, will combine the colonial properties of the two very respected firms, Cavan, Lubbock, and Co., nnd Messrs Burnley Hume, and Co. Nothing has been paid for goodwill, and the estates are taken upon entirely independent estimate, and at what the parties concerned believe to be a very low valuation. The directors are confident that the net profits of the business will be from 15 to 20 per cent. on the paid-up capital of the company, and base their calculation upon the present business of the two separate firms, without allowing for any contingent circumstances which may improve their position. Each firm will liquidate its own liabilities, except where the board of directors may think it desirable for the company to assume them. The estates and real securities to be transferred to the company are in Demerara, Berbice, Trinidad, and Barbadoes. The capital of the company is 2,000,000*l* in 40,000 shares of 50*l* each. Deposit, on application, 1*l* per share, and 4*l* on allotment. Further calls will not exceed 5*l* per share each, and it is estimated that not more than 20*l* per share will be called up during the first two years, and not more than 25*l* in three years. The vendors have agreed to guarantee, to the extent of the annual dividend on the above 10,000 shares, a net rofit in each year, for the first five years, of 10 per cent. on the paid-up capital for the time being; such guarantee, however, is to cease if at or after the expiration of three years the net profits of the company shall have amounted to a sum equivalent to an average of 10 per cent. per annum on the paid-up capital, for each of the said five years, calculating the capital for the last two years at not more than 25*l* per share.

The meeting of the Australian Mortgage Land and Finance Company (Limited) was held to-day. Some alterations proposed by the directors in the articles of association were adopted. The net profit was stated at 11,434*l*. The dividend declared is at the rate of 6¼ per cent. for the half-year, and 4,000*l* was carried to new account.

At the meeting of the London Chartered Bank of Australia, this day, the report of the directors was adopted.

At the meeting of the City of London Real Property Company, on the 4th inst., a dividend of 3½ per cent. for the half-year was declared.

The meeting of the Imperial Austrian Gas Company was held on the 5th inst., and the report presented by the directors was adopted.

On Tuesday, the meeting of the Peninsular and Oriental Steam Company was held. A dividend of 3½ per cent., with 3 per cent. from the underwriting account, was declared, and the directors' report approved by the shareholders.

The meeting of the Bank of British North America took place on the 5th inst. A dividend of 30s per share was declared for the half-year free of income tax.

Charles Laffitte and Co, capital 3,000,000*l*, in 150,000 shares of 20*l* each (1*l* to be paid on application and 4*l* on allotment, and six months to elapse after the allotment before any other call be made), is formed to extend the business of the old established bank of Charles Laffitte and Co. of Paris. The business will be similar to that great foreign banking house, viz., "a combination of banking business, financial agency, and mercantile monetary operations upon an extended scale."

Liebig's Extract of Meat Company is designed to manufacture on a large scale the pure and genuine "Extractum Carnis Liebig," under the immediate control of Baron Liebig, in the Brazils and adjacent countries, where the average price of a full-grown ox is 2*l*, and meat is proportionally cheap.

The adjourned meeting of the Ottoman Financial Association has been further adjourned to the 20th inst.

The shareholders of the New Zealand Banking Corporation held their meeting on Wednesday last. The net profits for the half-year were declared at 4,267*l*, and a dividend at the rate of 10 per cent. was declared; 227*l* is written off preliminary expenses account, 1,000*l* added to reserve, and 291*l* carried to new account.

At the meeting of the African Steam Ship Company on Wednesday last the directors' report was adopted, and a dividend of 8s per share declared.

A half-yearly dividend at the rate of 8 per cent. per annum, with a bonus of 6 per cent., payable on the 9th Jan. proximo, has been declared by the directors of the National Provincial Bank of England.

The report presented at the meeting of the Financial Insurance Company (Limited) by the directors on the 6th instant was adopted. A dividend at the rate of 8 per cent. per annum free of income tax was voted out of the profit, which was stated at 40 per cent. The balance of 32 per cent. is "carried forward to pay at the rate of 5 per cent. per annum. interest to the shareholders for the next half-year to the 30th June, 1866, and to meet contingencies."

The directors of Charles Crammell and Co. (Limited) have declared an instalment on account and in anticipation of the dividend for the current year of 2*l* 10s per share, payable on or after Saturday, the 27th day of January next, to those shareholders whose names shall stand on the books of the company on Friday, the 12th day of January next.

The Brazilian and River Plate Gas Company (Limited) is established to purchase and carry out concessions for lighting with gas the principal cities in Brazil and the River Plate. The directors have made a provisional arrangement for lighting the city of Fortaleza or Ceara, which contains 30,000 inhabitants, and that of Rosario, which contains 35,000 inhabitants. The capital is 200,000*l* in 20,000 shares of 10*l* each. First issue 10,000. Interest at the rate of 7 per cent. is to be paid during construction.

Miscellaneous.—Mr Falconer Larkworthy requests us to correct an error in our impression of last week. He has accepted the office of a director of the Bank of London.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 1½ per mille premium, and the short exchange on London is 25.15 per 1*l* sterling. On comparing these rates with the English Mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is about 2-10ths per cent. dearer in Paris than in London.

The course of exchange at New York on London for bills at 60 days' sight is 108¾ to 109 per cent. At this rate there is no profit on the importation of gold from the United States.

AVERAGES OF GRAIN.

The following is a statement showing the quantities sold and the average price of British corn (imperial measure) as received from the inspectors and officers of Excise, conformably to the Act of the 27th and 28th Victoria, cap. 87, in the week ended Dec. 2, 1865:—

	Quantities Sold. qrs bush	Average Price. s d
Wheat	78,676 4	46 6
Barley	84,984 3	33 10
Oats	6,161 0	22 8

COMPARATIVE AVERAGES.

The following is a comparative statement, for the corresponding week in each of the years from 1861 to 1864, of the quantities of British corn sold in the towns from which returns are received under the Act of the 27th and 28th Victoria, cap. 87, and of the average prices as ascertained under the Act 5th and 6th Victoria, cap. 14:—

Corresponding week in	Quantities Sold. Wheat.	Barley.	Oats.	Average Prices. Wheat.	Barley.	Oats.

COMMERCIAL EPITOME,

FRIDAY NIGHT

The supply of English wheat on sale at Mark lane to-day was but moderate. Both for red and white qualities, the trade ruled firm, and Monday's prices were well supported. In foreign wheat, a fair average business was transacted, at Monday's currency. Barley moved off somewhat slowly, but at full prices. Oats were in good supply: in most descriptions an extensive business was transacted, and the quotations ruled firm. The trade for beans and peas was firm, at full currencies. There was a fair demand for flour, at full prices. This week's imports amount to 9,230 quarters of wheat, 11,390 barley, 65,270 oats, and 310 sacks of flour.

At Liverpool, this morning, wheat, flour, and maize were in slow request, at barely late rates. The wheat trade at Wakefield, however, ruled firm, at full quotations.

There has been a large business transacted in the Liverpool cotton market at an advance of ⅛d to 1d per lb upon last week's rates; but since yesterday there has been decidedly less animation, and a decline of ⅛d per lb upon the highest rates of the week has been submitted to. The total sales amount to 99,000 bales, of which the trade have taken 46,000 bales, exporters and speculators together 53,000 bales. The actual export of the week is 12,000 bales.

From Ellison and Heywood's monthly report of the 1st inst., we extract the following:—

IMPORTS, EXPORTS, HOME CONSUMPTION, and STOCK of COTTON in Great Britain, for the first Eleven Months of 1865 and 1864.

	1865. bales.	1864. bales.
Liverpool.		
Import	2,304,783	2,131,471
Export	630,245	525,434
Home consumption	1,784,620	1,387,350
Stock, end November	356,210	500,000
London.		
Import	179,147	316,182
Export	170,590	167,692
Home consumption	71,140	77,299
Stock, end November	46,482	115,680
Great Britain.		
Import	2,483,930	2,447,653
Export	800,835	693,026
Home consumption	1,855,760	1,464,649
Stock, end November	392,692	605,689

ESTIMATED STOCKS of COTTON in Europe at the end of November, 1865, 1864, and 1863; and on 1st January, 1865.

	November 30 1865.	1864.	1863.	1st Jan., 1865.
Liverpool	356,210	500,000	259,250	466,800
London	46,480	115,690	44,050	109,060
Havre	36,000	61,200	25,300	48,540
Rest of Continent	17,000	15,980	11,550	23,600
Total	455,690	692,870	340,150	648,000

Digitized by Google

Advices from New Orleans are to Nov. 23. At that date the cotton trade was dull, at 52c to 53c for middling quality. Freight to Liverpool was 11-16d per lb. The arrivals from Sept. 1 to Nov. 14, including the stock on hand at the opening of the season, amounted to 307,325 bales, whilst the exports were 181,681 bales, leaving a stock of 125,644 bales.

From Mobile we have intelligence to Nov. 23. The week's receipts had been 12,548 bales, and the exports, 9,934 bales. The stock on hand was 57,277 bales.

The stock of cotton at Savannah, Nov. 17, was 10,824 bales. The price of middling cotton was 45c to 46c per lb.

Postal advices from Bombay are to Nov. 13. As regards the state of the cotton trade, Messrs Nicol and Co. write as follows:—The transactions reported during the past fortnight are considerable, and for the first few days after the departure of last mail prices were steadily supported, but latterly the market has fluctuated a good deal, and values have shown great irregularity. The market is now steady, and our quotations show a considerable recovery from the lowest point of the fortnight. Arrivals have been coming forward pretty freely, but selection is now much interfered with, and in some cases rendered a matter of difficulty on account of all the cotton here as well as most now arriving and on the way having been more or less damaged by rain water. The descriptions of cotton most in demand during the fortnight have been sawginned Dharwar, Dhollerah and Coompta, with which we include Vingorla, as the quality of this cotton is generally excellent, and will mostly go forward as Coompta. Sawginned, which has this year been of excellent quality, is now beginning to fall off a little, and although it still offers a fair selection we do not think the arrivals after this date will turn out to be so good. Prices during the fortnight have ranged from 400 rs to 455 rs per candy for this description, closing steady at 430 rs. Dhollerah has been next in favour at from 405 rs to to 435 rs, and we hear of contracts being entered into for the new crop in the districts at 380 rs per candy. Coompta has found buyers at 410 rs to 430 rs, and Vingorla at 391 rs to 420 rs. In Broach, Oomrawuttee, and other descriptions, the transactions reported are insignificant. The subjoined tables show the prices current Nov. 13, as well as the exports since the commencement of the year:—

CURRENT PRICES of COTTON at BOMBAY, Nov. 13.

Via the Persian Gulf we have intelligence from Bombay to Nov. 25. The cotton trade at that date was firm, and the week's shipments had amounted to 36,000 bales. The quotations were as follows:—Old Broach, 14½d; old Dhollerah, 14¾d; *new* Oomrawruttee, for March delivery, 14⅝d; *new* sawginned Dharwar, 15¼d per lb. Freight to Liverpool, 35s per ton.

From Alexandria, to Dec. 4, we learn that the cotton trade was very active at enhanced rates. According to the Egyptian Commercial and Trading Company's circular, fair open-ginned produce, on the spot, was quoted at 23½d; ditto, for December shipment, 23½d; ditto, for January, 23¾d; ditto, for February, 22d per lb, free on board.

The transactions in colonial and foreign grocery produce during the week have been somewhat restricted. The supply of produce brought forward at the public sales has been limited, and although the demand for most articles has ruled quiet, prices, as far as all good and fine qualities are concerned, have been supported. A few changes have, indeed, taken place since Friday last, but they have been wholly confined to inferior descriptions of produce, in which an occasional tendency to easier rates has been apparent.

The subjoined statement is from Messrs Trueman and Rouse's circular:—

The public sales of colonial wool were brought to a close on Wednesday. The catalogues comprised 61,471 bales, consisting of 15,662 bales from New South Wales and Queensland, 6,915 Victoria, 607 Tasmania, 1,901 South Australia, 4,450 New Zealand, 15 Western Australia, 30,737 bales from the Cape, and 1,184 bales from foreign ports. For Australian wool the biddings ruled very active, and at the close the quotations were 2d to 3d

Digitized by Google

nd even 4d per lb higher than at last sales. Cape wool sold readily at an advance of 1d to 1½d per lb. The following table, from Messrs Hazard and Caldecott's circular, shows the quantity of wool offered at public sale in each of the last five years:—

	1861. bales.	1862. bales.	1863. bales.	1864. bales.	1865. bales.

The silk trade has ruled quiet; nevertheless, all descriptions have changed hands at extreme rates. According to Mr H. W. Eaton's circular, the deliveries last month were 4,990 bales, against 5,035 bales in the corresponding month last year. The unsold stock is now 12,415 bales, against 8,143 bales; and the sold stock, 13,710 bales, against 11,203 bales at this period in 1864.

There has been a fair demand for hemp, at 34*l* for clean Russian qualities. Flax is firm at extreme rates. Jute fully supports last week's currency.

The following, from Messrs Powell and Co.'s circular, is in reference to the state of the leather trade during the month just concluded:—The leather trade of November has been fully equal to an average, with but little alteration to note in prices. Heavy sole leather has been in short supply, as also bellies of all kinds. In several articles the supply, which has been lessened in consequence of the bad weather for drying, has not been adequate to the demand; and the stock of leather on hand is much below the usual quantity. In raw goods there have been but few changes.

The market for copper has continued in a sensitive state. At one period, prices were nominally 1*l* per ton below the fixed rates; but the market is now firm, at quite the official quotations. Scotch pig iron has advanced to 59s 7½d per ton cash, mixed numbers. Other metals are firm in price.

The oil trade has been rather quiet. Linseed oil is now quoted at 38s 6d to 38s 9d per ewt, on the spot. In most other oils there has been a slight tendency to depression. For turpentine, there is a fair demand, at 47s for French spirits, on the spot. American refined petroleum is now selling at 3s 7d per gallon.

We learn from New York that the market for cotton and woollen goods was very quiet, and as the stocks of most descriptions were rapidly increasing, there were no buyers except at a considerable reduction in prices. The imports of foreign goods had been large, and the markets were abundantly supplied, the result being that the quotations had fallen to a considerable extent. In the market for grocery produce, however, there had been increased activity, at enhanced rates. Tea had commanded considerable attention, whilst sugar, owing to the unfavourable reports from Cuba with reference to the crop, had been freely dealt in at higher prices. The arrivals of wheat and flour had been large, but as regards the latter the bulk was received in very poor condition. The money market was firm, the more general minimum quotation being 8 per cent. In gold the fluctuations had been trifling, viz., from 146⅝ to 147 per cent. The stock of bullion in the banks of New York city, on the 18th ult., was 2,490,000*l* against 2,399,040*l* last year, whilst the balance in the Sub-Treasury at the same date was 11,991,560*l*. The shipments of specie from Jan. 1 to Nov. 18 were 5,399,020*l*, against 8,499,800*l* last year, 8,019,240*l* in 1863, 10,501,910*l* in 1862, and 666,450*l* in 1861. The imports of dry goods during the week ending Nov. 17 were valued at 463,350*l*, against 73,900*l* last year, and 213,820*l* in 1863.

THE COTTON TRADE.

LIVERPOOL—Dec. 8.

The cotton market on Monday became animated, with large transactions by the trade as well as on speculation, at advanced prices. On Tuesday again the sales were large, but business closed quietly upon rather less favourable accounts from Manchester than had been anticipated. On Wednesday, and to-day, the sales have been on a considerably reduced scale, but quotations generally rule decidedly above last Thursday's currency. In Sea Island a good business has again been effected at full prices. American has been in extensive demand, and advanced about 1d in the early part of the week, and though during the last two days this advance has not been fully maintained, prices are quoted ¼d per lb in ordinary and ½d in the better qualities above last Thursday. Brazil, under the excitement of Monday, advanced fully 1d per lb, but closed dull, with this advance barely maintained. Egyptian closes ½d to ¾d per lb above last week in fair qualities, and under, after a rise of ¾d to 1d on Saturday and Monday. In Smyrna a good business has been done, especially in new crop, and prices are ¼d to ½d dearer. The demand for East India has been very extensive, especially for the better qualities, and an advance of 1d per lb was generally obtained, though closing this afternoon at a partial reduction of ¼d per lb from the highest paint. The common qualities are still difficult of sale, but are about ½d per lb dearer. China and Japan are very scarce at an advance of about ½d per lb.

The transactions, to arrive, were large in the early part of the week, but more limited during the last few days; the latest quotations were yesterday, for Egyptian, fair new open, shipment November, 23d per lb; December, 23d and 23¼d; Oomrawuttee, middling fair, ship named, 15½d; Western Madras, fair, November shipment, and ship named, 16¾d per lb. The sales of the week amount to 99,100 bales, including 25,140 on speculation, and 28,120 declared for export, leaving 45,840 bales to the trade.

The market to-day opens with a fair demand, and the sales will probably amount to about 7,000 bales, without change in prices.

LONDON—Dec. 8.

Annexed is a portion of the circular issued this week by the London Cotton Brokers' Association :—There has been an active demand during the week, at gradually hardening prices, attributable to the improved state of the Manchester market, and also to the American advices, which at length begin to show a slight falling off in the receipts at the ports. Large transactions have taken place for arrival, as well as on the spot, and prices are pretty generally ¼d to 1d per lb above those of last week, although the market closes with a quieter feeling and at a slight decline from the late highest point.

NEW YORK—Nov. 25.

There is scarcely a new feature to the market. The receipts at all points are about the average of the past three months; the export movement, which last week appeared to have diminished, has been resumed, especially from Southern ports, with some degree of activity, as an instance of which, over 8,000 bales were cleared at New Orleans, principally for Liverpool, in a single day. In this market there has been an active business. To-day the market has been a little weak, although still active, the supplies having been considerably increased by the arrival of steamers and sail vessels detained by the storm that raged early in the week. A noticeable feature in the receipts this week is the large quantity from Florida. The deliveries over the Western railroads are also large.

MARKETS IN THE MANUFACTURING DISTRICTS.

The demand for goods, this week, both for home use and export, has been moderately active, at full prices. For the time of year, stocks generally are rather limited. Iron has moved off freely, and the quotations have tended upwards. The demand for coals has been less active.

MANCHESTER, Dec. 7.—A very large business was done in yarns at the close of last week, both for export and the home trade, and, as a consequence, on Tuesday of this week sellers were found so full of orders, and prices so advanced generally, as to be beyond the reach of buyers. Some of the better numbers have risen about 4d within a fortnight, and the lower and medium numbers, 2d to 3d. In cloths, which have not advanced in proportion, a small steady business has been done here this week from day to day, but the larger wants having been so freely supplied last week, leave little now for immediate disposal. For the present, buyers seem indisposed to follow the advance further, unless induced by some additional stimulus from America.

BRADFORD.—The excitement in the Liverpool cotton market does not appear to have any influence on the wool market. Buyers restricted their operations to the utmost. The downward tendency, however, appeared to have received a check for the present, and where sales were made, they were at prices against the purchaser. In worsted yarns some fair purchases were made from stocks. There was also a slightly improved demand on the part of the home merchants. There was no appreciable improvement in pieces, notwithstanding the advance in cotton. Prices are firm.

LEICESTER.—The demand for hosiery is slackening. Manufacturers are, however, tolerably well engaged in the warehouses, and completing orders on hand. Worsted yarns are quoted at high rates, with a firm market. There is no material change in the price of cotton yarns. The wool market is firm, at high rates.

NOTTINGHAM.—Cotton goods of most descriptions sell very slowly. The plain trade is extremely quiet, and the fancy branch is also dull. Buyers purchase only for immediate requirements.

Digitized by Google

In the silk department there is no improvement. Black laces meet a slow inquiry, and the narrow edging trade remains depressed. Silk commands exceedingly high prices. The hosiery trade continues very active for the time of year. Most branches are well engaged, and the operatives are in full work. Yarns are firm, at high rates.

SHEFFIELD.—Business here continues to be on the whole decidedly brisk. There is a good demand for Bessemer steel, especially for railway purposes and large castings; railway springs, buffers, and wheels are in good demand for home and export. The steel trade is pretty generally active, though there is not much pressure of orders.

WOLVERHAMPTON.—The iron-works are in tolerably full operation, and the home demand continues steady, while the orders from the United States keep up satisfactorily. The hardware trades keep active. There is a good home demand.

BIRMINGHAM.—The trade of the town continues steady. At all the manufactories they are working full time, and, although the fresh orders coming in are not large, there are sufficient on the books to render it certain that so much of activity as now prevails will be maintained up to Christmas.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Nov. 25.—The supplies of all kinds are on a liberal scale, and a large proportion is going into store, against the close of canal navigation. Flour is somewhat irregular, in consequence of the uncertain character of the arrivals from the West. Made of heated, grown, and otherwise unsound wheat, a great proportion is unsound, and for these, selling prices are 50 cents to $1 a barrel below current quotations for sound. The really sound flours on the market have been made at high cost and are well held; for export, $8.50 has been paid for extra State. Wheat has arrived freely, and there has been some pressure to sell, which, with less favourable news from Liverpool, has caused an irregular decline, the fine reds being best held. White wheats are very dull, especially common new crop. Corn has been active, and full prices have been obtained. The demand has been active for export and home use, while the receipts have been quite moderate, and some speculative feeling has been developed. The close, however, was slightly below the highest point. The following are the closing quotations:—Flour—Superfine State and Western, $7.80 to $8.10; extra State, $8.30 to $8.70; shipping round hoop Ohio, $8.85 to $9.10; extra Western, common to good, $8.25 to $10.85; double extra Western and St Louis, $11 to $15; Southern, supers, $9.25 to $10.60; Southern, fancy and extra, $10.75 to $15.50; Canada, common to choice extra, $8.50 to $12; rye flour, fine and superfine, $6.25 to $7; corn meal, Jersey and Brandywine, $4.25 to $4.85 per barrel. Wheat—Chicago spring, $1.60 to $1.81; Milwaukee Club, $1.75 to $1.85; red winter, $2 to $2.35; amber State and Michigan, $2.40 to $2.45. Corn—Western mixed, 90c to 96c: Western yellow, $1 to $1.05 per bushel.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

The arrivals of English wheat up to our market this week, have been but moderate, and in middling condition. Really fine samples moved off steadily, at very full prices. Inferior kinds have commanded very little attention at late rates. The show of foreign wheat has not increased; nevertheless, millers have purchased slowly, on former terms. The supply of both English and foreign barley has increased. Malting samples have produced full currencies; but grinding and distilling sorts have, in some instances, sold on rather lower terms. Malt has been in full average supply, and moderate request, at about stationary prices. Owing to large arrivals from abroad, oats have met a dull sale, at 6d per quarter less money. Beans have advanced 1s per quarter, and peas have sold at extreme rates. The flour trade has been very quiet.

The fluctuations in the value of produce in the various local markets have been unimportant.

The continental markets have, for the most part, been steady for fine wheat. All kinds of spring corn have commanded full currencies, with a good demand on English account. In America, prices of both wheat and flour continue too high to admit of profitable shipment to this country.

The Scotch markets have been fairly supplied with wheat, in which about an average business has been passing on former terms. Barley and oats have changed hands freely, at very full prices.

In Ireland scarcely any change has taken place in the value of produce. For the most part the transactions have been on a moderate scale.

At Mark lane, to-day, the supply oft English wheat on sale was but moderate, and the trade ruled firm, at full prices. Foreign wheat was in fair average request, at extreme rates. The barley trade was rather quiet, nevertheless, the quotations ruled firm. Oats—of which there was a good supply on offer—moveed off steadily, at full prices. Beans and peas changed hands at extreme rates. Flour was in fair demand at full currencies.

The state of the floating trade is thus reported by Mr. George Dornbusch:—Arrivals at ports of call since last Friday, 21 cargoes, viz., 12 wheat, 7 maize, 1 barley, and 1 beans. The trade has been steady at the commencement of the week, but during the last few days there has been less animation. Sales:—Wheat—32 arrived cargoes; Ghirka Taganrog, 43s to 44s; Odessa, 42s 6d to 45s 6d; Nicolaieff, 43s 7½d to 44s; Marianopoli, 45s 3d and 45s 6d; hard Taganrog, 44s per 492 lbs. Sandomirca, 47s 9d; Polish, 41s 9d to 43s 1½d; Enos, 40s 6d per 480 lbs. Maize—8 arrived cargoes: Galatk, 32s 6d and 33s per 492 lbs; Ibrail, 28s 9d to 31s; Bulgarian, 31s per 480 lbs. Barley—2 arrived cargoes; Nicolaieff, 25s; Kavarna, 23s per 400 lbs; Nicolaieff, on passage, B.L. Oct. and Nov., 24s per 400 lbs. Rye—2 arrived cargoes; Odessa, 31s per 480 lbs; Ibrail, 30s per 480 lbs. Linseed quiet, but steady—Calcutta, on passage, August shipment, has been sold at 67s per 410 lbs L.A.T.; Taganrog, B.L. Oct., 66s per 424 lbs L.A.T.: Odessa, shipping, 66s per 424 lbs L.A.T. Cottonseed—1 arrived cargo; Damietta, inferior quality, 5*l* 15s per ton; good quality new seed is worth 8*l* 10s to 8*l* 1bs per ton.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—The market opened flatly, with occasional sales at easier rates. There is now less desire shown to realise, although the general demand remains without improvement. 360 casks Barbadoes, by auction, part sold at 33s to 37s. Some crystallised Demerara went at 37s 6d to 40s 6d per cwt. The refiners have bought to a moderate extent privately, the sales of West India reaching 1,230 casks. The landings last week were 3,625 tons, the deliveries 3,577 tons, leaving the stock without material alteration. It is now 82,570 tons, against 112,070 tons in 1864 at the same period.

Mauritius.—1,723 bags chiefly sold; brown, 29s to 32s per cwt.

Bengal.—812 bags Gurpatta date sold by auction at 34s 6d to 36s.

Foreign.—By private contract, 8,000 bags clayed Manilla have sold at 33s 6d to 33s 9d. 2,380 boxes Havanna, No. 11½, are reported at 37s 6d. 600 casks Cuba at 36s to 36s 3d. 209 casks 89 barrels Porto Rico, by auction, part sold at 34s to 40s.

Refined.—The market continues inactive, and quotations unsettled.

RUM.—A moderate business is reported in Jamaica on previous terms.

COFFEE.—The market is firm. 705 casks 718 barrels and bags plantation Ceylon in the public sales all sold at full prices. The lots were mostly small. 1,470 bags native sold at 66s to 70s per cwt. 10 casks 1,255 bags East India partly sold at 73s to 74s for Madras. Singapore bought in at 58s. A floating cargo of Rio has sold at 58s 6d per cwt for the Levant.

TEA.—The sales on Tuesday and Wednesday passed off steadily at about previous quotations. Of 21,898 packages in the catalogues, about 14,171 sold, chiefly "without reserve." Many parcels of common to fair red and black leaf congou brought from 1s 1½d to 1s 3¾d; broken leaf, 9¾d to 10d. A few marks of fair quality scented caper, 1s 6d to

Digitized by Google

1s 8d; and two breaks of scented orange pekoe, 2s 0¼d to 2s 0½d per lb. Privately, the transactions are of moderate extent.

RICE.—Nothing of interest has occurred in this market by private contract.

IMPORTS and DELIVERIES of RICE to Dec. 2, with STOCKS on hand.

	1865.	1864.	1863.	1862.
Imports ..... tons	49160 ...	58050 ...	52750 ...	99190

SAGO.—1,448 cases offered by auction part sold at previous rates: small, 21s to 23s 6d; medium, 20s to 20s 6d; bold, 23s per cwt.

PEARL TAPIOCA.—203 boxes medium white grain have sold at 25s 6d to 26s per cwt.

SPICES.—White pepper is again dearer. 210 bags Singapore offered by auction sold at 5⅜d to 5½d, and further business has been done privately on the spot and to arrive. 240 bags Singapore black sold at 3¼d to 3⅜d per lb. Cassia lignea was dull and lower, several parcels in course of landing being advertised for sale. 59 barrels Jamaica ginger sold steadily at 68s to 73s per cwt.

SALTPETRE continues dull, the transactions of the week being very limited.

IMPORTS and DELIVERIES of SALTPETRE to Dec. 2, with STOCKS on hand.

	1865	1864	1863	1862
Imports ..... tons	9915 ...	12845 ...	15383 ...	16640
Deliveries	10245 ...	12445 ...	12875 ...	15870

COCHINEAL.—The public sales this week have comprised 2,000 bags, including 1,340 bags Teneriffe. Silvers declined 1d. Honduras, 3s 1d to 3s 6d; low and pasty, 2s 2d to 3s 1d; blacks, 3s 4d to 4s. Teneriffe silver, 3s 2d to 3s 4d; black, 3s 5d to 4s 4d; Mexican black, 3s 5d to 3s 6d per lb.

OTHER DRYSALTERY GOODS.—No business of importance has occurred. Gambier is firm at the recent advance. Cutch has sold at 28s to 30s per cwt on the spot and to arrive.

METALS.—Copper is firmer, and several sales have been effected at better prices than could be obtained last week. Tin has been firm, and previous quotations are supported. Straits sold at 98*l* per ton to arrive. British iron steady. Scotch pig last sold at 59s 9d per ton cash for mixed numbers. Spelter is quiet.

HEMP.—A parcel of fair roping Manilla has sold at 44*l* cash, and 45*l* prompt. Holders require some further advance. Business has been done to arrive at 42*l* per ton.

OILS.—The market for linseed has ruled quiet throughout the week at 38s 6d to 38s 9d for present delivery here, and 6d less in Hull. A good business done for the first four months of next year at 40s per cwt. Brown rape is active at 53s 6d to 54s 6d; foreign refined, 57s; English, 55s to 55s 6d. English brown, for delivery, January to April, has realised 52s per cwt. Olive oil is in less demand, and sellers now preponderate: Gallipoli, 56*l* 10s to 57*l* per tun. Palm is rather more in demand at 44s per cwt for fine Lagos. Cocoa-nut inactive. Cochin offered at 52s, and Ceylon at 48s to 46s 9d per cwt cash. A little sperm has brought 117*l* per tun. Other sorts are without change.

PETROLEUM.—Consumers having supplied their immediate wants, the market has become dull, and to-day not more than 3s 6d to 3s 7d could be obtained for refined Pennsylvanian: 2s 10d is offered for the first four months of 1866.

TALLOW.—The market has been firmer. First sort Petersburg Y.C., 49s 9d; January to March, 50s to 50s 3d; March only, 51s 6d per cwt. These prices are 1s to 1s 6d per cwt higher.

PARTICULARS OF TALLOW.—Monday, December 4, 1865.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market was steady to-day. 496 bags Bengal, offered by auction, part sold at 34s for Gurpatta date. Various parcels of West India, by auction, partly met with buyers; and the week's business is 1,880 casks. 3,000 bags grainy Jaggery Madras sold privately at 30s 3d. Business has been done in low Mauritius. 800 casks Cuba at 37s per cwt.

COFFEE.—159 casks 29 barrels &c. plantation Ceylon chiefly found buyers at full quotations. 192 casks 1,701 bags native brought 58s 6d to 71s. 107 cases 84 bags Neilgherry, 74s 6d to 90s per cwt.

SAGO.—153 boxes were taken in at high prices.

SPICES.—772 bags rough Bengal ginger were sold at 24s to 24s 6d per cwt., being lower. 66 bags Singapore white pepper sold at 5⅜d, being again rather dearer. 50 cases Zanzibar cloves realised 3⅜d. 197 bags low pimento were taken in at 2⅞d per lb. 123 cassia lignea were bought in.

SALTPETRE.—768 bags Bengal were taken in: refraction, 3¾ to 2½, at 26s. 118 packages low Scinde sold at 20s.

TALLOW.—At auction 1,003 casks Australian were all disposed at 9d to 1s advance: good beef, 47s to 48s. 245 casks South American sold; River Plate at 50s, and Rio Grande at 49s 3d. 241 casks P.Y.C. (brack 1863) sold at 48s to 48s 6d per cwt.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar continues neglected. No material alteration to note as respects prices. Dutch crushed remains firm, and higher rates are asked for present and forward delivery.

GREEN FRUIT.—Demand good, which is usually the case at the approach of Christmas. Arrivals of oranges from St Michael, Fayal, Valencia, Lisbon, and Palermo, parcels of which sold by Keeling and Hunt at public sale, went at prices equal to those obtained last week. Lemons 1s per case lower. Barcelona nuts firm; Para 1s per barrel lower. More inquiry for grapes of sound quality, and stock considerably less than previous season's.

ENGLISH WOOL.—More demand, at rather better prices.

FLAX.—Market very firm.

HEMP.—Market quiet and but little done during the week.

TOBACCO.—The market has presented no change as respects American descriptions, with the exception of very low qualities, for which holders have made fractional concessions. Some lots of superior classes were taken at outside quotations. Various other growths have continued in good demand at full prices.

METALS.—Copper is again improving, the market strengthening daily, although still much below the smelters' price, but sales of English may be quoted at 110s to 112s; rough, 108s; Australian cake, 110s. In other metals there is no change to note.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	51	6
Fat by ditto	2	6½
Yellow Russia	51	3
Melted stuff	40	0
Rough ditto	22	6
Greaves	23	0
Good dregs.....	6	0

METROPOLITAN CATTLE MARKET.

MONDAY, Dec. 4.—The total imports of foreign stock into London, last week, amounted to 15,837 head. In the corresponding week in 1864 we received 12,143; in 1863, 9,752; in 1862, 5,033; in 1861, 4,951; in 1860, 6,103; and in 1859, 4,311 head.

The supply of foreign beasts on offer here, to-day, was only moderate; of foreign sheep tolerably good. Some of the stock came to hand in prime condition; but most of it was of inferior quality. For the most part sales progressed slowly, at about stationary prices. The arrivals of English beasts fresh up this morning was moderate, and in improved condition. From Ireland and Scotland the receipts were about average ones for the time of year. Nearly all breeds moved off slowly; nevertheless, the prices current on Monday last were supported. The best Scots and crosses sold at 5s to 5s 2d per 8 lbs. There were a few good beasts on show from Norfolk, being the first of the season, which has commenced somewhat earlier than usual. With home-fed sheep we were again but moderately supplied; but there was an increased number of prime breeds in the pens. Most qualities of mutton moved off slowly; nevertheless, the quotations were tolerably firm. The best Downs realised 6s 4d to 6s 8d per 8 lbs. Calves were in short supply and steady request, on rather higher terms. The quotations ranged from 4s to 5s per 8 lbs. Prime small pigs were in fair request, at full prices; but large hogs were very dull. The great Christmas market will be held on Monday next, the 11th inst.

SUPPLIES.

	Dec. 5, 1864.	Dec. 4, 1865.
Beasts.....	4270	5310
Sheep	17630	24680
Calves	130	310
Pigs	250	510

THURSDAY, Dec. 7.—Our market to-day was fairly supplied with beasts, both as to the number and quality. Prime breeds moved off steadily at full quotations, but inferior stock was very inactive at late rates. The top figure was 5s 2d per 8 lbs. The supply of sheep was only moderate. On the whole, the mutton trade ruled steady at Monday's currency. The best Downs realised 6s 8d per 8 lbs. Calves, the supply of which was by no means extensive, were in fair request at late rates. Prime small pigs were quite as dear as last week. Large hogs and milch cows ruled about stationary.

Per 8 lbs to sink the offal.

	s	d	s	d		s	d	s	d
Coarse and inferior beasts	3	2	to 3	6	Prime Southdown sheep	6	4	to 6	8

HOP MARKET.

BOROUGH, Friday, Dec. 8.—The amount of business passing in hops is very moderate. Good and fine samples are firm in price, whilst in the value of inferior produce no change has taken place since our last notice. New Mid and East Kent, 80s to 109s; new Weald of Kents, 70s to 126s; new Sussex, 60s to 115s; yearlings, 95s to 135s per cwt.

POTATO MARKETS.

BOROUGH AND SPITALFIELDS, Friday, Dec. 8.—The supplies of potatoes on sale are tolerably large. Most qualities of produce are in fair demand, at about previous rates. Kent and Essex Regents, 65s to 90s; Yorkshire Regents, 60s to 90s; Yorkshire Flukes, 80s to 110s; Yorkshire Rocks, 50s to 70s; Scotch Regents, 50s to 80s per ton.

HAY MARKETS.

THURSDAY, Dec. 7.—The supplies on sale are good, and the trade is slow, at our quotations.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Dec. 8.—We have had a rather quiet week in this market, and do not anticipate any very great activity during the few weeks at the close of the year, as it is not the season for laying in stock; in fact, buyers have for a long time past only purchased for immediate use, considering current rates too high for speculative purchases.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Dec. 8.—Attendance small. Business limited in wheat, flour, and Indian corn, at a shade under late prices. Oats and oatmeal firm, but not active. Beans, peas, and barley steady.

The Gazette.

TUESDAY, Dec. 5.

BANKRUPTS.

J. M. Bedford, Hartland road, Camden town, patent laminæ manufacturer—J. Bird, Seymour place, Bryanston square, builder—J. Bucksey, Littleton, farmer—J. Bushell, Gloucester terrace, Islington—G. EPITOME OF RAILWAY NEWS.

TRAFFIC RECEIPTS.—The traffic receipts of railways in the United Kingdom amounted for the week ending the 25th of November on 12,299 miles, to 643,618*l*, and for the corresponding week of last year, on 11,889 miles, to 610,060*l*, showing an increase of 410 miles and of 33,558*l*. The gross receipts on the 14 principal railways amounted in the aggregate, on 8,808 miles, to 537,662*l*, and for the corresponding week of 1864, on 8,489 miles, to 510,779*l*, showing an increase of 319 miles and an increase of 26,883*l*.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, Dec. 4.—In the share market to-day there was a general prevalence of dulness, affecting with weakness English railways, American securities, mines, and the land companies, but in the other descriptions there was no material average alteration of the closing prices. Of the English lines, Glasgow and South-Western advanced 1, North-Eastern (Leeds) ½, and Great Western (Newport) 2; and ditto (original) declined ¼, Great Northern (A stock) and Great Southern and Western (Ireland) 1 each, and Lancashire and Yorkshire, North-Western, Midland, and South-Eastern a further ¼ each. In colonial, Punjaub receded ½. In foreign, Lombardo-Venetian and Paris and Mediterranean improved ⅛ and ¼ respectively; and Bahia declined ½, and Dutch-Rhenish a further ¼. In American, United States (5-20) declined ⅛, and Illinois Central shares ¼. In British mines, Grenville and West Bassett declined ¼ and 1 respectively. In foreign mines, Montes Aureos and St John del Rey declined ⅛ and 1 respectively.

TUESDAY, Dec. 5.—In the share market to-day only an occasional business was transacted, and miscellaneous shares showed several instances of lower final quotations, but mines were fully sustained, and in the other descriptions there was no material change in tone. In English railways, North-Western recovered ¼; North London improved 1, and Metropolitan ⅛; and North British (Edinburgh, Perth, &c.) and Great Northern declined ¼ each, and ditto (A stock) Great Western, and South-Eastern a further ⅛ each. In colonial, Madras (4¾ and 4½ per cents.) advanced 1 each, and Great Southern of India ⅛; and Great Western of Canada (5½ per cent.) declined 1, and ditto (paid up shares) and Buffalo and Lake Huron ⅛ each. In foreign, Bahia recovered ½, Northern of France improved ⅛, and Dutch-Rhenish further receded ⅛. In American, no alterations occurred in the closing prices. In British mines, Great Laxey improved ½. In foreign mines, Cape Copper and Fortuna improved ¼ each.

WEDNESDAY, Dec. 6.—In the share market to-day, as a result of the general absence of animation, all the descriptions were affected with more or less tendency to depreciation at the close. In English railways, Glasgow and South-Western inproved 1, and North London a further ½; North-Western and Metropolitan relapsed ¼ and ⅛ respectively; and Great Eastern declined 1½, ditto (East Anglian), Lancashire and Yorkshire, and Midland ¼ each, North Staffordshire ½, Great Western a further ⅜, and Great Northern a further ½. In colonial, Great Southern of India relapsed ½, and East India, Great Indian Peninsula, Punjaub, and Grand Trunk of Canida each declined ½, Great Western of Canada a further ⅛. In American, United States (5-20) declined ⅜, Erie shares (paid up), ditto (dedentures), and Illinois Central (shares) ¼ each, and Philadelphia and Erie ½. In British mines Wheal Seaton improved 5 East Wheal Russel and East Lovell declined ¼ and ½ respectively, and Providence are now quoted ex dividend. In foreign mines, Washoe Gold (of both descriptious) receded ½ each.

THURSDAY, Dec. 7.—In the share market to-day the transactions were few, and a further tendency to dulness affected the several descriptions generally. In English railways, Bristol and Exeter improved 1; and South-Eastern declined 1, Midland (9*l* shares) ¼, ditto (original stock), Great Eastern (East Anglian), Lancashire and Yorkshire, and North-Western a further ¼ each, and Great Western a further ⅜. In colonial, Punjaub recovered ½; and Bombay and Central India, Eastern Bengal, and Grand Trunk of Canada (fourth preference) declined ½ each, ditto (third preference), 1½, ditto (second preference) 1, Great Western of Canada (new shares) ⅜, and ditto (paid up) a further ⅛. In foreign, Great Luxembourg improved ⅛, and Dutch Rhenish (paid up) declined ½ Sambre and Meuse ⅛, and Lombardo-Venetian and West Flanders a further ⅛ each. In American, United States (5-20) further declined ⅜, and Erie shares (paid up) and Illinois Central (shares), ½. In British mines, Providence declined 1, and East Lovell a further ½. In foreign, mines, Cape Copper and Fortuna improved ¼ each, and Montes Aureos, receded ⅛.

FRIDAY Dec. 8.—The railway market was dull to day, and the few variations which occurred in quotations were in an adverse direction. Great Eastern stock showed chief depression, and declined ⅝ per cent. Metropolitan and London and North-Western receded ¼.

THE
BRAZILIAN AND RIVER PLATE GAS COMPANY, LIMITED.

Incorporated under "The Companies Act, 1862," by which the Liability of each Shareholder is limited to the amount of his Shares.

CAPITAL, £200,000, in 20,000 Shares of £10 Each.

FIRST ISSUE, £100,000.

Deposit on Application, £1 per Share; and £1 on Allotment. The subsequent Calls not to exceed £2 per Share, and at intervals of not less than Three Months.

Interest at £7 per cent. per annum on the paid-up Capital during construction.

The seat of the Direction will be in London, and the Meetings of the Shareholders will be held in London Half-Yearly.

DIRECTORS.

W. H. Michael, Esq., F.C.S., Chairman of the Swansea Gas Light Company, Cholmeley Park, Highgate.
George Buckley, Esq., Director of the Imperial Austrian Gas Company.
Stephenson Clarke, Esq., Director of the Surrey Gas Consumers' Company.
Robert Hudson, Esq., Chairman of the United General Gas Company, Clapham Common.
William Innes, Esq., Engineer of the Phœnix Gas Company.
Joseph Quick, Esq., Director of the Para Gas Company.
Henry Palfrey Stephenson, Esq., Deputy-Chairman Crystal Palace District Gas Company.

BANKERS.

Alliance Bank, Lothbury, E.C. | London, Brazilian, and Mauá Bank, River Plate.

ENGINEERS—Messrs Law and Blount, 15 Essex street, Strand, W.C.

SOLICITORS—Messrs Baxter, Rose, Norton, and Co., 6 Victoria street, Westminster, S.W.

BROKERS—Messrs Whiteheads and Coles, 8 Moorgate street, E.C.

AUDITORS.

Samuel Andrews, Esq., Secretary of the Equitable Gas Company. | Robert King, Esq., Secretary of the Singapore Gas Company.

SECRETARY—Charles Robinson, Esq. | TEMPORARY OFFICES—15 Essex street, Strand, W.C.

PROSPECTUS.

The object for which this Company is established is to purchase and carry out concessions for lighting with gas the principal cities in Brazil and the River Plate.

The Directors have entered into a provisional arrangement to purchase upon favourable terms the concessions which have been granted by the respective Governments for lighting the City of Ceara, or Fortaleza, in the northern part of Brazil, and the City of Rosario, in the Argentine Confederation.

Concessions for other important cities are also being negotiated, which will be at the disposal of the Company.

Fortaleza, or Ceara (as it is more commonly called in this country), with a population exceeding 30,000 inhabitants, is a seaport, and the capital city of the province of Ceara, in the northern part of Brazil. Its chief exports are cotton, sugar, coffee, and hides, and its trade and commercial importance are so rapidly increasing, that the value of the imports has more than doubled during the last five years, whilst that of the exports has increased nearly fourfold in the same period. This rapid and material progress may be principally attributed to the fact that Ceara is one of the most densely-populated districts of Brazil, and that the proportion of the slave to the free population is only 1 in 15, being smaller than in any other province.

The contract entered into with the Government for the lighting of Ceara is for 59 years.

The minimum number of public lamps as fixed by the concession is 500, but has been enlarged by the President to 694, and the amount to be paid is settled by the Government at thirty reis per hour for any number of lights less than 750; after 750, twenty-eight reis; after 1,000, twenty-five reis; this would be equivalent to about £1 per 1,000 cubic feet, the same price as will be paid by the private consumer.

These payments are to be made monthly, and in accordance with the actual standard value of gold, so that the receipts will in no way be affected by the fluctuations in the rate of exchange.

The Company will be exempt from the payment of all provincial and general taxes and imposts, including the import duties upon the apparatus and materials imported.

The Government will cede to the Company, free of charge, a suitable piece of land for the site of the works, upon the sea shore, within the precincts of the harbour.

The Company is to have the preference in contracts for lighting the other cities and towns in the province, as well as in the renewal of the present contract when the term of 59 years shall have expired.

Rosario, containing a population of about 35,000 persons, is situated upon the River Parana, and is, next to Buenos Ayres, the most important city in the whole of the Argentine Confederation. It is the terminus of the Argentine Central Railway to Cordova, now in course of construction (a portion of the Rosario end being already completed), and the importance of its trade and commerce is shown by nearly all the European maritime powers having established Consulates at Rosario.

The contract for the public lighting is for 30 years, and the Government is to pay £1 sterling for every thousand cubic feet of gas consumed in the public lamps, with liberty for the Company to charge at least an equal rate to private consumers.

The payments are to be made in sterling, so that they will not be affected by the fluctuations in the rate of exchange.

The materials and apparatus requisite for the establishment of the works are to be imported free of duty.

A suitable plot of land for the site of the works has already been ceded to the Concessionaire.

At the end of 30 years the Government has the right to purchase the works at a valuation; should they not do so, the works are to remain in the hands of the Company for a further period of 20 years, after which they are to become the property of the Government.

A sinking fund has been included in the estimates, in order that the whole of the capital expended upon the works at Rosario may be returned to the shareholders at the termination of the contract. Should the Government purchase the works at the end of 30 years, the sinking fund then accumulated would remain to be divided as a bonus amongst the shareholders.

The engineers by whom the works have been designed have had great experience in the execution of similar works in South America, the gas works at Pernambuco and at Bahia (both in Brazil) having been constructed from their designs and under their direction, and one of the partners has resided for nearly nine years in Brazil superintending the construction of important works for the Imperial Government and private parties.

Provisional contracts for the execution of the works, within the Engineers' estimate, have been entered into, as to portions thereof, with Messrs John Aird and Sons, who have already been engaged in the construction of two of the gas works now existing in the Brazils; and as to other portions, with Messrs Hanna, Donald, and Wilson, of Paisley, who have also had considerable foreign experience in the erection of similar works.

The working of similar undertakings in Brazil has shown the necessity of confining the first outlay to the cost of such works only as are absolutely essential, and extending them as the demand may require. With this view these works have been so designed that they will allow of easy extension at very moderate cost. The estimated amount of capital, £70,000, is sufficient to meet all present requirements, and efficiently to carry out the two concessions already granted.

The amount of the gross working expenses at the Gas Works at Bahia and Pernambuco per ton of coals carbonised are found most closely to approximate; adding to this amount 25 per cent. to compensate for the reduced scale of the works at Ceara and Rosario, the public lighting alone (which is guaranteed by the Government) would give a dividend of 7 per cent. per annum, and the private lighting, allowing only for a very moderate consumption, would give a further 7 per cent., making the probable annual profit 14 per cent. upon £70,000, the amount of the capital required for carrying out the lighting of those two cities.

The amount to be paid for the two concessions is £3,000 in cash, and £4,000 in shares, which amounts include the entire cost of the preliminary expenses.

Translations of the concessions, together with the deed of transfer to the Company, and the articles of association, may be inspected at the offices of Messrs Baxter, Rose, Norton, and Co.

Applications for shares are to be made to the Bankers of the Company, accompanied by a payment of £1 per share. In the event of no allotment of shares being made, the deposit will be returned in full. Should a less number of shares be allotted than are applied for, the deposit will be made available towards the payment on allotment, and the balance, if any, returned to the applicant.

Prospectuses, with forms of application for shares, can be had of the Brokers, Bankers, Solicitors, or Secretary of the Company.

GENERAL DEBT OF THE OTTOMAN EMPIRE.

CONVERSION OF THE OLD INTERNAL DEBTS.

The public are informed, that the period during which Consolidés and other Turkish Internal Bonds are received for conversion into the 5 per Cent. General Debt of the Ottoman Empire has been extended, on the original terms, to 31st December, after which date the conversion will be definitively closed.

The terms of exchange are at present as follows for Consolidés of the 1st, 2nd, 3rd, and 4th issues:—

For Bonds of £100 Turkish Money, there will be given in exchange Bonds of the General Debt for £121 Turkish Money, equal to £110 sterling, giving at 5 per cent. an Annual Interest of £5 10s sterling, payable in London; or 137½ francs payable in Paris, Amsterdam, or Frankfort.

Notice is likewise given to holders of converted (stamped) Consolidés, in London only, that they can receive New 5 per Cent. Bonds, in exchange for any of the former bearing within the entry stamp any List No. between 1 and 1,365, or for conversion receipts bearing any such No.

Lists can be had at the offices, open for such business on Mondays and Thursdays only, from 11 to 2.

For the General Credit and Finance Company of London (Limited), Agents for the Contractors,

JAMES MACDONALD, General Manager.

27 Austinfriars, London, November, 1865.

NEW SOUTH WALES GOVERNMENT DEBENTURES.

The Government of New South Wales hereby give notice, that the following Debentures, aggregating £300,000, will fall due on the 1st January, 1866, and be payable at the Bank of New Wales, 37 Cannon street, London, and at the offices of their Financial Agents the Oriental Bank Corporation in Threadneedle street, London. The Government further notify that after the 1st January, 1866, interest will not accrue on the said Debentures, and request that the Bonds may be left three clear days for examination before payment.

Three thousand Bonds of one hundred pounds each.

London, Nov. 25, 1865.

NATAL GOVERNMENT 6 PER CENT. LOAN, £100,000.

Authorised by Law No. 15 of 1864, enacted by the Lieutenant-Governor of Natal, with the advice and consent of the Legislative Council thereof.

Her Majesty's Principal Secretary of State for the Colonies having authorised the undersigned to negotiate the above Loan in the London market by the issue of debentures, they hereby give notice, that they will be prepared to dispose of the first moiety thereof, by public tender, on Tuesday, the 12th proximo.

The debentures will be issued in sums of £500, £300, £200, and £100 each, bearing interest at the rate of 6 per cent. per annum, commencing from the 15th November, 1865, payable half-yearly at the offices of the Crown Agents for the Colonies in London, where also the principal will be finally repaid.

The security offered is the general revenue of the Colonial Government, upon which the only charge that now exists is £110,000 borrowed under Law No. 8 of 1860, since the passing of which, the revenue has increased upwards of 90 per cent.

The money now required will be applied exclusively to the introduction of coolie labourers from India, to work on the rapidly extending sugar, coffee, and cotton estates of Natal, and it will be repaid in 31 years from the 15th November, 1865, out of a fund to be formed in this country, by the annual investment, under trustees, of a sum equal to two per cent. on the total amount borrowed.

Applications in accordance with the annexed form, endorsed, "Tender for Natal Loan," will be received by the undersigned till One p.m., on Tuesday, the 12th December next, and then opened at their offices, in the presence of such of the applicants as may be pleased to attend.

The highest tenders will be accepted, provided the rates offered are not below the minimum, which will be placed in a sealed paper on the table before the tenders are opened.

Tenders at a price including a fraction of a shilling, other than sixpence, will not be accepted; and in the event of an equality of tenders beyond the amount to be disposed of, a pro rata distribution on such tenders will be made.

Five per cent. of the purchase money must be paid into the Bank of England on the 13th December next, and the balance within ten days thereof.

Pending the receipt from the Natal Government of the debenture bonds, certificates will be issued to purchasers on production of the Bank receipts for the money.

Forms of tender, with full particulars of the financial condition of the Colony, may be had on application to the undersigned Agents for the Loan.

PENROSE G. JULYAN, } Crown Agents
W. C. SARGEAUNT, } for the Colonies.

Offices of the Crown Agents for the Colonies, Spring gardens, London, November 29, 1865.

FORM OF TENDER.

To the Crown Agents for the Colonies, Spring gardens, London.

Gentlemen,—I hereby tender for the following portion of the Natal Government 6 per Cent. Loan, authorised by Law No. 15 of 1864, subject to the conditions contained in your advertisement of the 29th November, 1865, viz.:—

Debentures to the extent of £ , for which I undertake to pay at the rate of £ , in money, for every £100 in debentures.

Name .....
Profession or occupation .....
Address .....
Date .....

SOUTH AUSTRALIAN GOVERNMENT BONDS.

Notice is hereby given, that the BONDS redeemable in London on the 1st January, 1866, will be PAID on that and subsequent days, between the hours of Twelve and Three o'clock, on presentation at the office of the SOUTH AUSTRALIAN BANKING COMPANY, 54 Old Broad street, London, E.C.; and further, that the half-yearly interest due at the same date, will in like manner be paid as aforesaid.

The coupons, or the bonds having no coupons, must be accompanied with separate lists, and left three clear days for examinations.

FRANCIS S. DUTTON,
Agent-General for South Australia.

*** Separate lists for coupons, separate lists for bonds not having coupons, are now deliverable on application.

EAST INDIAN RAILWAY COMPANY.

Notice is hereby given, that the Transfer Books of this Company will be closed from Friday, the 15th day of December, 1865, to Friday, the 12th day of January, 1866, both days inclusive, for the purpose of making up the interest account to 31st December, 1865. The Interest Warrants will be forwarded on the 11th January to the Proprietors who are registered in the Company's books on the 14th day of December next.—By order of the Board, D. I. NOAD, Secretary.

East Indian Railway House, Alderman's walk, New Broad street, London, 30th Nov., 1865.

N.B.—Transfers will not be received at the office while the Books remain closed.

EAST INDIAN RAILWAY COMPANY.

THE MUNICIPALITY OF TURIN

being convinced that a very great and advantageous development in manufactures would take place in that city were it furnished with a motive power obtainable on more reasonable terms than the high price of fuel will allow for steam power,—have determined upon the construction of a Canal, fed by the waters of the Po, for the purpose of supplying a natural motive power of at least 4 to 6,000 horse power.

The scheme is already drawn up, and before commencing operations the Municipality has determined upon inviting foreign capitalists to come forward and ask for a concession for their important work. The estimated outlay is Ten Millions of francs. Particulars may be seen at the office of the Italian Consulate General, No. 31 Old Jewry, comprising, amongst other information—

1. The nature of imports into Italy from abroad.
2. The duties to which such imports are subjected.
3. The resources which the country offers both in productions and in manufactures.
4. All the advantages which concessionnaires may reap from the introduction into Italy of manufactories for the products of which she has hitherto been dependent on foreign countries

ROYAL AGRICULTURAL SOCIETY OF ENGLAND.

On Tuesday, December 12, at Eight o'clock p.m., Dr. VOELCKER will deliver a LECTURE on "DISINFECTANTS, the PREVENTION OF INFECTION," &c.—By order of the Council,

H. HALL DARE, Secretary.

12 Hanover square, W.

ROYAL AGRICULTURAL SOCIETY OF ENGLAND.

The General Meeting of Members will be held at the Society's House, 12 Hanover square, on WEDNESDAY, DECEMBER 13, at Twelve o'clock.—By order of the Council, H. HALL DARE, Secretary.

London, December 1, 1865.

CHARLES NOON AND COMPANY (Limited).

APPLICATIONS for SHARES should be made on or before TUESDAY the 12th instant.—By order of the Board.

Leicester, Dec. 8, 1865.

CHARLES NOON AND COMPANY (Limited).

Prospectuses and forms of application for shares may be had in London of Messrs Smith, Payne, and Smith; Messrs Glyn, Mills, Currie, and Co.; Messrs Holderness, Fowler, and Co., of Change alley, sharebrokers; and Messrs Hamber and Harrison, of 20 King's Arms yard, solicitors.

CHARLES CRAMMELL AND CO. (Limited.)

Notice is hereby given, that the Directors have determined on and declared an instalment on account and in anticipation of the Dividend for the current year of £2 10s per share, payable on or after Saturday, the 27th day of January next to those shareholders whose names shall stand on the books of the Company on Friday, the 12th day of January next.—By order

JOHN DAWSON, Secretary.

Cyclops Steel and Iron Works, Sheffield, Dec. 6, 1865.

LIEBIG'S EXTRACT OF MEAT COMPANY (Limited). — ("Extractum Carnis Liebig.")—Registered under the Companies' Act, 1862.

Capital £500,000, in 25,000 shares of £20 each. It is not intended to call up more than £14 per share. Payments to be spread over the following periods:—Deposits—£1 on application, £4 on allotment. Calls—£4 payable 2nd April, 1866: £2 10s payable 2nd July, 1866; £2 10s payable 2nd November, 1866; total, £14. Payments will be received in advance of calls, and interest allowed thereon at six per cent. per annum. Six per cent. per annum is to be paid to the shareholders on all capital actually paid up before any division of profit, and the Directors receive no remuneration until such six per cent. is provided for. 12,500 shares have been taken privately, and 3,500 being reserved for South America, only 9,000 shares remain for allotment in England and on the Continent.

SECRETARY (pro tem.)—Charles Rotter, Esq.

AUDITOR.

Joseph Sawyer Esq., Public Accountant, 173 Fenchurch street, London.

ABRIDGED PROSPECTUS.

The object of this Company is to manufacture on a large scale the pure and genuine "Extractum Carnis Liebig" (Liebig's Extract of Meat), with the assistance and under the immediate control of Baron Liebig—in those countries where meat is unusually cheap, principally the River Plate and Brazils, where the average price of a full grown ox is about £2—and for that purpose to take over the business and entire property of the Fray Bentos Company, established some years since at Fray Bentos, on the River Uruguay, and at Antwerp. That Company under Mr Glebert's very able management has achieved a very great success, viz., the manufacture in the River Plate, on a large scale, and as an entirely new branch of industry, of Liebig's Extract of Meat of the purest and best quality.

Taking the present average price of cattle in the River Plate and Brazils, and calculating the cost of manufacture on a large scale, based upon the experience and results of the working at Fray Bentos, it is very confidently expected that on the probable annual minimum production of the three manufactories of 1,000,000 lbs of extract, the profit at 4s per lb will amount to about £200,000 per annum on the paid-up capital of £350,000.

The production in 1866 will probably be at least 60,000 lbs, in 1867 about 600,000 lbs, and in 1868 about 1,000,000 lbs.

Detailed prospectuses may be obtained at the Company's temporary offices, 43 Mark lane; and of the bankers, brokers, and solicitor.

EXCHANGE AND DISCOUNT BANK, Limited.—LEEDS

Capital, £200,000 in 20,000 shares of £10 each.

Of which £5 per share only is proposed to be called in the following manner, viz.:—

£1 per share on application; £1 on allotment; £1 on the 1st July, 1866; £1 on the 1st October, 1866; and the remaining £1 on the 1st January, 1867.

After payment of the above calls the liability of each shareholder is absolutely limited to £5 per share beyond, or £10 per share in all.

PROVISIONAL COMMITTEE.

Hammond Allen, Esq., Banker, Leeds.
Emmanuel Bradley, Esq., Cloth Manufacturer, Leeds and Morley.
John James Cousins, Esq., Banker, Leeds.
Thomas Dawson, Esq., Caledonian Mount, Leeds.
Rev. Francis Foster, M.A., Poyston, Haverfordwest.
D. W. McCarthy, Esq., Oil Merchant, Leeds.
Charles Winter, Esq., Strathmore Lodge, Sydenham park.

BANKERS.

Cousins, Allen, and Co., Leeds.
London and Westminster Bank, London.

BROKERS.

Messrs G. Ridsdale and Co.; Messrs Potter and Co.

This Company is proposed to be formed for the purpose of purchasing and extending the banking business established by Messrs Cousins, Allen, and Co., and at present carried on by them in their new and commodious premises adjoining the Post Office.

No promotion money whatever will be paid in the formation of this Company.

The success that has attended the system of banking introduced into Leeds by Messrs Cousins and Co. four years ago, has proved so decided, and has been received so favourably by the public, that the promoters of the present undertaking feel assured that its varied advantages only require to be thoroughly understood to ensure the support of every mercantile firm in the town occupying an independent position.

The economical facilities for business offered by the Bank are so advantageous that, in many cases, accounts of the largest magnitude are conducted free from any cost to the customer; and, upon certain conditions, at a considerable profit to him. Thus every inducement is afforded to the merchant or trader to pass the whole of his returns through his Bankers' hands, and encouraging many to avail themselves of the convenience and advantage of a Banking account, who have been deterred from doing so by the very high commission charged under the ordinary provincial system.

The soundness of the undertaking, and its permanent advantages as an investment, are guaranteed by the total exclusion of ordinary Banking risks, as no overdraft is granted, under any circumstances, without a considerable margin of absolute security be lodged for the same.

Instead of the stringency of the system being a barrier to business, the promoters are convinced, from present results, that a wider field exists in Leeds for extending its operations.

An arrangement has been made with Messrs Cousins, Allen, and Co. for the transfer of their business; and those gentlemen continue the management for three years, guaranteeing a minimum profit of 6 per cent. per annum for that period, after all expenses are paid; their remuneration for management being entirely contingent upon and paid out of profits realised after such guarantee has been fulfilled.

Although the minimum profit guaranteed is only six per cent., a much larger rate could be paid if no additional business should accrue to the bank; and, as it is now in active operation, the dividend will be paid upon the shares from the day of allotment.

The Provisional Committee have also reserved the right of retaining Mr Cousins's services as Managing Director, if they desire it, for two years beyond the above time.

As a proof of the confidence Messrs Cousins, Allen, and Co. entertain in the business, they undertake to receive their purchase money entirely in shares at par.

The Provisional Committee have made an arrangement on advantageous terms with Messrs Cousins, Allen, and Co., for the purchase of the Building and Offices adjoining, in order that the premises may be enlarged when necessary, for which they are peculiarly adapted, the bank having been built with that object in view; the site being as good as possible for such a purpose.

The appointment of Directors will take place at the First Meeting of shareholders.

A distinctive feature in the articles of association will be, that no Director shall, under any circumstances, receive an advance from the bank, without ample bona fide security be lodged for the same.

If no allotment takes place, the deposit will be returned in full.

Applications for shares to be made at the bankers' or brokers', where the necessary forms may be obtained.

The following table shows the market value of shares in banking companies in Yorkshire:—

	Paid.	Present Price.
	£	£
Bradford Old Bank	10	29

H. S. Bird, Esq.

TEMPORARY OFFICES.
Langbourn chambers, Fenchurch street, E. C.

ABRIDGED PROSPECTUS.

This Company is not a speculative one; it is formed for the purpose of more efficiently carrying on an established and profitable business, which has grown to its existing magnitude under the management of the present proprietor, and is capable of an extension beyond the ordinary means of private enterprise.

While the Company will direct its immediate attention to the extension of the business by building new boats, the Directors have made a provisional agreement with Mr William Watkins, the owner of a fleet of the most powerful tugs now on the Thames (sixteen in number), for the purchase of these boats, and the entire goodwill of the business, for the sum of £55,000. The valuation of the boats, &c., has been made on behalf of the Directors by Messrs Alfred Brett and Co. (150 Leadenhall street), the well-known brokers and steam ship valuers, which valuation, together with the statement of account, may be seen at the temporary offices of the Company. The Directors have secured the services of the vendor in the management of the business for a period of at least five years, upon terms mainly depending on the profits of the undertaking, and the business will be taken over by the Company as from the 1st October, 1865.

The vendor also guarantees a minimum dividend of 10 per cent. per annum on the first issue for the first three years.

The statement of account, as taken from the books and certified by Messrs Quilter, Ball, and Company, shows that the profits for the two years ending 1st of July last, amount to 17 per cent. per annum on the capital employed.

In the event of no allotment being made the deposit will be returned in full: should a less number of shares be allotted than are applied for, the money paid on deposit will be made available toward the payment on allotment, and the balance (if any) will be returned to the applicant.

Prospectuses may be obtained at and applications for shares may be made to the bankers, brokers, or to the secretary (pro tem.), at the temporary offices of the Company, every application being accompanied by the deposit of £1 per share.

Copies of the articles of association may be obtained (gratis) at the offices of the solicitors to the Company.

CHARLES LAFFITTE & COMPANY (Limited).

Established under the Companies Act, 1862, by which the liability of the shareholders is limited to the amount of the shares for which they subscribe, and in accordance with the International Treaty entered into between England and France in May, 1862, in relation to public companies established in both countries.

Capital £3,000,000,
Divided into 150,000 shares of £20 each.

£1 to be paid on application, and £4 on allotment, and six months to elapse after date of allotment before any call is made payable.

First issue 75,000 shares,
Of which 25,000 have been privately subscribed.

DIRECTORS,

Mr Charles Laffitte, Chairman.
John Ennis, Esq., Director of the Bank of England.
Mr F. P. Bayvet, merchant, Censeur of the Bank of France.
Harvey Lewis Esq., M.P., Director of the National Bank.
Mr H. Bourlon, Depute au Corps Legislatif, Director of the Paris and Orleans Railway.
F. B. Henshaw, Esq., Director of the National Bank.
Mr L. C. Grimoult, merchant, Ex-President of the Tribunal of Commerce of Paris,
George Bate, Esq., Great George street, Westminster.
Mr A. Gautray, 17 Rue du Cloque, Paris.
Sir John Gray, M.P., Charleville House, Dublin.
George Payne Kitson, Esq., (late of Sir John Guest and Co.)

SOLICITORS.

Messrs Vallance and Vallance, Essex street, Strand, and George yard, Lombard street.

BANKERS.

The National Bank, London, and its Branches.
The London Joint Stock Bank, London.

SECRETARIES, (pro tem.)
In London—Mr William H. Read
In Paris—Mr Paul Zucchi.

AUDITORS.

Messrs Johnstone, Cooper, Wintle, and Evans.
E. H. Galsworthy, Esq.

Temporary Offices.
No. 18 Old Broad street, London.
No. 48bis Rue Basse du Rempart, Paris.

PROSPECTUS.

This Company is formed to extend the business of the old-established Bank of Messrs Charles Laffitte and Co., of Rue Basse du Rempart, Paris, to this country and elsewhere, by converting it into a joint stock undertaking, on the principle of limited liability, and thereby to afford the commercial community and general public facilities for transacting their Foreign Banking and Financial operations through an establishment having its centre in London, and possessing the advantage of a name well known and accredited throughout Europe, together with a thoroughly organised, most extensive, and influential connection.

The business of the Company will be similar in character to that hitherto carried on by Messrs C. Laffitte and Co. and other great Foreign Banking houses, viz., a combination of Banking Business, Financial Agency, and general Mercantile Monetary affairs, with the advantage of increased resources and a more extended field of operations.

An arrangement has been concluded with Messrs Charles Laffitte and Co for the purchase of their business for the sum of £150,000, which amount has been arrived at upon a moderate computation of its value, based upon a statement of the profits actually realised during a series of years. Two-thirds of the purchase money will be taken in shares, on which £10 per share will be credited as paid-up; and Mr Charles Laffitte will continue his connection with the undertaking in the capacity of chairman of the Company, and will give to it all the advantage of his influence and experience.

Negotiations are pending for incorporating with this Company other Banking, Financial, and Commercial Establishments, for the purpose of extending the sphere of its operations, and of affording to the establishments alluded to, the opportunity of consolidating their business, and of reducing the existing liability of their shareholders.

In case no allotment is made, the money deposited on application for shares will be returned in full.

Forms of application for shares and every information can be obtained of the bankers, brokers, and solicitors, or at the offices of the Company, where copies of the memorandum and articles of association, and of the agreement with Messrs Charles Laffitte and Co, may be seen.

December 9th, 1865.

CHARLES LAFFITTE and CO., Limited

Samples, testimonials, and full instructions on application to CROGGON and CO, 2 Dowgate hill, London and at 2 Goree Piazzas, Liverpool.

DR DE JONGH'S (Knight of the Order of Leopold of Belgium)

LIGHT-BROWN COD LIVER OIL, Prescribed by the most Eminent Medical Men as the safest, speediest, and most effectual remedy for CONSUMPTION, CHRONIC BRONCHITIS, ASTHMA, COUGHS, RHEUMATISM, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS, Is incomparably superior to every other kind.

Dr EDWARD SMITH, F.R.S., Inspector of Poor Laws, Late Physician to the Hospital for Consumption and Diseases of the Chest, Brompton, in his Work on "Consumption," writes: "It is impossible in private practice to determine whether the Oil which we prescribe is genuine Cod Liver Oil or not, and hence we think it a great advantage that there is one kind of Cod Liver Oil which is universally admitted to be genuine—the Light Brown Oil supplied by Dr de Jongh."

Dr BARLOW, Senior Physician to Guy's Hospital, states: "I have frequently recommended persons consulting me to make use of Dr de Jongh's Cod Liver Oil. I have been well satisfied with its effects, and believe it to be a very pure oil, well fitted for those cases in which the use of that substance is indicated.

Sold only in capsuled Imperial Half-Pints, 2s 6d; Pints, 4s 9d; Quarts, 9s; by respectable chemists.

Sole Consignees, ANSAR, HARFORD, and CO., 77 Strand, London, W.C.

FLUTES.—THE NEW MODEL FLUTE (old fingering), for beauty and volume of tone unsurpassed, 3½ gs. and 7 gs. Also a Rudall and Co.'s Prize Medal Flute, about half cost, at Messrs KEITH, PROWSE, and CO.'s manufactory, 48 Cheapside. Just published, Rockstro's "Hints to Flute Players," price 6d.

CONCERTINAS.—AT MESSRS KEITH, PROWSE, and CO.'s manufactory, 48 Cheapside, may be found, CONCERTINAS, which, for quality and durability, have proved by their long use in India and other extreme climates to be unsurpassed. Prices, first-class, 5 to 15 guineas. Ordinary concertinas two guineas.

HARMONIUMS, BY ALEXANDRE.—The new church Harmonium, with stops and knee pedals, Venetian swell, and four rows of vibrators, is now being introduced (price 24 guineas, packed and delivered at any London railway station) by the city agents, Messrs KEITH, PROWSE, and CO., 48 Cheapside.

MUSICAL BOXES, BY NICOLE, FRERES.—Messrs KEITH, PROWSE and CO., direct importers, offer parties seeking really fine, well-tuned Instruments a selection of more than 200 boxes, with all the recently-introduced improvements, from four guineas. The new boxes, with accompaniment of flutes, bells, and drum, should be heard to be appreciated, as the expressive effects upon the ear are exceedingly novel and beautiful.—48 Cheapside.

THE ORGAN ACCORDION has two rows of vibrators, organ keyboard, three octaves, and is as easily played as the accordion. Any pianist can perform upon it without study. Price from 4 guineas.—KEITH, PROWSE, and CO., 48 Cheapside.

WHERE SHALL WE DINE? Go to DEACON'S COFFEE HOUSE, WALBROOK, where the "Economist" and all other newspapers in the world are taken in and file. Directories for every county in England, also for Canada and Australia. Advertisements inserted in any papers English or foreign.—Wm. Howell, proprietor.

N.B.—Lists of Heirs at Law, Next of Kin.

FORD'S EUREKA FLANNEL SHIRTS, made from the very finest Australian wool, 10s 6d each, the exact same quality as usually sold at 12s 6d and 13s 6d. A quantity of new patterns, either woven or printed, many exclusively our own, and not to be obtained elsewhere. Country residents should write for the patterns, the Illustrated List, directions for self-measurment, and have three shirts or more sent carriage free.—38 Poultry, London.

NOTHING IMPOSSIBLE.—The greatest and most useful invention of the day, AGUA AMARELLA.—Messrs JOHN GOSNELL and CO., Three King court, Lombard street, perfumers to Her Majesty, respectfully offer to the public this truly marvellous fluid, which gradually restores the human hair to its pristine hue—no matter at what age. The Agua Amarella has none of the properties of dyes; it, on the contrary, is beneficial to the system, and when the hair is once restored one application per month will keep it in perfect colour. Price one guinea per bottle; half bottles, 10s 6d. Testimonials from artistes of the highest order and from individuals of undoubted respectability may be inspected. Messrs John Gosnell and Co. have been appointed perfumers to H.R.H. the Princess of Wales.

KEATING'S COUGH LOZENGES.—A safe and certain remedy for Coughs, Colds, Hoarseness, and other affections of the Throat and Chest. In Incipient Consumption, Asthma, and Winter Cough they are unfailing. Being free from every hurtful ingredient, they may be taken by the most delicate female or the youngest child; while the Public Speaker and Professional Singer will find them invaluable in allaying the hoarseness and irritation incidental to vocal exertion, and also a powerful auxiliary in the production of melodious enunciation.

Prepared and sold in boxes, 1s 1½d, and tins, 2s 9d, 4s 6d and 10s 6d each, by Thomas Keating, Chemist, &c., 79 St Paul's churchyard, London. Retail by all Druggists and Patent Medicine Vendors in the World.

KEATING'S PALE NEWFOUNDLAND COD LIVER OIL. The Finest Imported this Season.

This VALUABLE MEDICINE having of late years come into such general use, and being, moreover, so extensively prescribed by the most eminent practitioners both in town and country, Mr Keating can with the greatest confidence recommend this Oil as being perfectly pure, nearly tasteless, and free from adulteration, having been analysed, reported on, and recommended by Professor Taylor, of Guy's and St Thomas's Hospitals, Dr Scott, M.D., L.R.C.P., F.L.S., &c., and Dr Edwin Payne, M.D., L.R.C.P., M.R.C.S., who, in the words of the late Dr Pereira, says that "The best Oil is that which is most devoid of colour, odour, and flavour, characters this will be found to possess, being purely of hepatic origin, a point of great weight with regard to its therapeutic value."

Sold in half-pints, 1s 6d; pints, 2s 9d; quarts, 5s; and five-pint bottles, 12s 6d, imperial measure, by Thomas Keating, Chemist, 79 St Paul's churchyard, London.

Published by John Clements, Little Pulteney street, price 7d, New Work on the

PURE DENTISTRY, AND WHAT IT DOES FOR US.

By A. ESKELL, Grosvenor street, W.

Sold by Simpkin and Marshall, and may be had of all booksellers.

In addition to the information formerly given, it gives a concise summary of the Reports of the Companies for the present year as will enable Investors to judge of their position.*

THE STATE OF THE MONEY MARKET.

The return of the Bank of England this week was certainly not one which *compelled* them to augment their rate of discount; but, upon the whole, we cannot but regret that they did not do so. In the first place, the return itself, as far as the banking department goes, compares very badly with that of last year, when money also was at 6 per cent. The figures are—

	1864. £		1865. £
Public deposits	7,161,719	.....	7,081,336
Private —	12,267,474	.....	14,259,882
Seven-day and other bills	491,117	.....	458,969
Liabilities of banking department	19,920,300	.....	21,800,187
Reserve in banking department	9,593,996	.....	8,117,953

A less reserve against a larger liability. Secondly, it may be laid down as a rough rule that when the bullion in the Bank is under 15,000,000*l*, the foreign exchanges ought to be watched with care and caution. That amount, or something like it, experience teaches, is about the minimum we ought to keep, unless we are to reconstruct our whole currency system. But now the bullion is little over 14,000,000*l*, while the exchanges are unfavourable, and more than 600,000*l* was taken from the Bank for export during the week.

It is true, and this may be reasonably supposed to have weighed with the Directors of the Bank, that the foreign exchanges were rather firmer on Tuesday, and this improvement was maintained yesterday. It is also true that at this time of the year trade generally rather slackens, and therefore the demand in Lombard street and at the Bank commonly declines.

But, on the other hand, though most trades are in their usual state, the cotton trade is in an exceptional state. The instant it was telegraphed to Liverpool that the rate of discount was not raised by the Bank of England on Thursday, the cotton market became more buoyant. The least encouragement would soon stimulate a great trade in the North of England. Secondly, this is a time of year at which the banking department (and under Peel's Act, at all events, this is very material) is especially pressed upon. Take the close of last year:—

	£
On the 14th of December, 1864, the reserve of the Bank of England was	9,593,996
On the 7th of January, 1865, it was	8,117,953
A diminution of	1,476,043

Although there was then no unfavourable foreign exchange. And if this amount, and other sums besides consequent on an unfavourable exchange, should be taken away this season at the same period, the account of the Bank will be very different from that which we should wish to see it, or from what it ought to be. Thirdly, the silver market shows indications, which are confirmed by some of the soundest cotton operators, that a great amount of silver will soon be transmitted to the East. It has been postponed and postponed, because of the high rate of discount, but sent it must be eventually, for it is the payment of a debt in cash to a country which exacts cash, and will take nothing else. Fourthly, several loans to foreign Governments, and other foreign finance borrowings, hang over the market, and these will take bullion from us if we let them, and we do not raise the rate of interest. We regret, therefore, that the Bank of England did not raise its rate on Thursday last; it would have been a determined step, but perhaps it was a case in which a strong determination was the best wisdom.

As respects the future, the least accident would send the rate up, and yet no accident happens. This being a dead time of the year, it may struggle on as it is. We cannot pretend to foretell precise moments to our readers; we can only indicate the present state of business, and the general causes which are in action.

One thing is very certain, that the London market has gone through a splendid half-year, the best, perhaps, it has ever seen. Last year it charged higher rates, but last year it made considerable bad debts. A large lender could hardly help doing so then. There was a collapse of industry which tried every one. But now there are no bad debts and no collapse. The high gross profits of bankers will not be impaired by any large losses or bad bills.

THE ECONOMICAL CONDITION OF JAMAICA.

THE political steps taken as to Jamaica—the suspension of Governor Eyre, the provisional Governorship of Sir Henry Storks, the careful investigation of recent events by a Judicial Commission—are so good, and so precisely those which in previous numbers of the ECONOMIST have been recommended, that we have nothing new to say about them. While it was uncertain whether Governor Eyre would be tried, it was wise to insist on his possible offences; now that he is on his trial, it is advisable not to insist on them, in order that the trial may be fair. On the politics of Jamaica we need say nothing more, but its economical condition is a subject demanding from us the most scrupulous examination. What is the state of Jamaica? How did Jamaica come to be in the state in which it is? What should be done to get it out of that state? These are questions on which it is our duty to write, and on which—as every point is contested, as every point is a matter to some one or other of almost fanatical and almost superstitious faith—we must write of at length, and with a studious reference to impartial authorities. A partisan article on either side would be far more easily written, and perhaps more easily read; but then such reading and such writing would both be useless.

The character of the negro is now known to us by abundant testimony. His is the one savage and untutored race which will bear the proximity of civilisation. Other races more or less slowly die away, but for good or for evil, as a blessing or as a curse, the negro lasts and lives. He can work, which no other savage race can—measuring work by the standard of civilised man—but he will not work unless he has strong plain motives. To all men the motive to disagreeable labour must be strong, but to a semi-savage it ought to be especially strong, to be very near and very obvious. To a negro especially it ought to be so. In the days of slavery he contracted the natural notion that labour was not only a pain but a degradation. It was so *then* to him, and he fancied it must always be so. Such a race, so born and so trained, ought evidently to be placed under the keenest incentives to labour which experience suggests for our use, otherwise it will be indolent and vicious, half savage and superstitious, subsisting upon as little as possible, and that little precarious.

It would be very untrue to say that the whole of Jamaica was in this miserable and unhappy condition. There are many parts in which the blacks work well, where they are happy, where they have enough and to spare, where their moral and religious condition is for such a sort of people reasonably good. But in a great part of Jamaica, and those the places where the late discontent occurred, the people are, no doubt, mostly lazy, degraded, and wretched. In fact, when the matter is examined, being the race which ought to have the best spurs to industry, they have been placed under the fewest motives to exertion, and the most insidious temptations to idleness, of any race in the world.

There are (fear and slavery being as here out of consideration) three incentives to industry. First, wages, which everybody understands. Secondly, the ownership of land, which is not much known in England, but which is the usual incentive over almost all the world, and which has turned many great parts of it into garden grounds. Thirdly, taxation, which also is unfamiliar to us in England, but which in most of the world is a formidable whip. Over all Asia, and often elsewhere, the actual cultivator has to pay much of the produce to the Government collector. He must pay it or he loses his land. If he loses his land he dies. All these motives should have been, if possible, concentrated on the negro, but, in fact, he has felt none of them, while he has often been exposed to the opposite and correlative temptations.

First, of wages. The first condition of these is that a prosperous capitalist should be at hand able and willing to pay them. But in Jamaica capitalists have long ceased to be prosperous. It was, as it has been justly called, a sugar "hot-"house." Under the old system of monopoly it possessed a a very artificial profit which even with monopoly it could hardly maintain, and which without monopoly it lost at once. There has been always "distress" in Jamaica. Lord Grey has given a collection of their "groans," going back to the year 1800, and there are others long before that. They had (with other West Indian islands, then mostly inferior to them) a monopoly of the English market, and they exerted themselves as well as they could to meet that demand. They could not do it very well. They were mostly absentee farmers and absentee manufacturers. They not only owned the estates, but first cultivated them, and then manufactured or half-manufactured the produce. Sugar does not grow; it is made; and it is easy to imagine (and it is perfectly well known) what sort of making it was when the capitalist lived in England and the manufacture went on in the tropics. Still, as long as they had plenty of slaves and plenty of the very best land, the English makers of West India sugar contrived to make it. But, according to Mr Merivale, the best authority on the subject, even before any change was made in English policy, even before English philanthropy and English political economy began to interfere with the slave monopoly, the best lands showed symptoms of exhaustion. Slave cultivation always wears out a soil, and it had done so here. Just at this moment the slave trade was repealed, and after that Jamaica could not be prosperous. She had no longer plenty of slaves. Whatever may be the reason, the number of slaves did not increase, but diminish. In 1817, Jamaica had 346,000; in 1829, when, according to the ordinary laws of population, there should have been a large increase, she had only 322,000. She wanted, therefore, at that period the two principal instruments of slave-sugar: her land was diminishing in effectual fertility; her slaves declined in number. Her tools were fewer, and her soil was worse. Accordingly her produce declined. The exports of sugar were:—

	£
1805	137,906
1811	127,751
1833	78,375

In that year the slaves were emancipated, and it is plain what difficulty there was in offering them tempting wages. The capitalists were absentees already in a state of decline. Their best property was their slaves, and Parliament had released their slaves. No doubt a large purchase-money was paid, and that ought to have been spent in buying free labour. But most of it did not even get to those who were so to spend it. The Jamaica land and slaves were largely mortgaged, and the purchase-money did not reach the capitalist mortgagor, but was absorbed by the intercepting mortgagee. The Jamaica planters had little spare money, and no spare energy, and their position was one which would have baffled men of the greatest energy and mind. They would have had to make new arrangements, even if they had kept their slaves, to meet the declining productiveness of the soil; and now they had to make those arrangements without their slaves. It need not be said that they failed. "Want of capital" has been the uniform cry of Jamaica since 1833. They have been less able to tempt the emancipated negroes by wages than almost any other set of capitalists who ever lived. Independently of economical grounds and of moral grounds, they were on economical grounds the last persons to entrust with emancipated slaves. Subject, of course, to exceptions, and speaking broadly as is the necessity of history, they were a much encumbered class: their old means did not suffice for their new position; they had not enough money to pay tempting wages. Free trade, too, when it came, required still further efforts, and found a struggling race of planters, even less able to make any effort. At first, Jamaica had a splendid monopoly, plenty of the best land, and as many slaves as she chose to buy. By 1850 she had lost them all. Ever since it has been getting worse and worse. No one, or hardly any one, now sends new capital to Jamaica; no one at all thinks of emigrating there. For many years wages have been in Jamaica an uncertain, declining, and often insufficient support. The negro who required most to tempt him, who ought, if possible, to have been employed by the richest capitalist, was, in fact, employed by the poorest: the labourer who wanted most and the capitalist who could pay least were unhappily coupled together.

Wages, the first of our inducements, having thus failed, the next of them is the possession of land, and this has been, in a great part of the island, so managed as to be not a motive to industry, but a temptation to sloth. Land may easily be both, and it has been both in Europe. The same land which has demoralised (economically demoralised) the Irishman, which has made him disinclined to steady industry, which has made him disposed to fanciful idleness, has made the French peasant—a man of kindred race, another Celt—laborious, careful, frugal, above all similar people. The same land which has made the Irish multiply the fastest has made the French increase the slowest of any nation,—if, indeed, they increase

Digitized by Google

at all. And the reason is very obvious. There is no occult property, no miraculous virtue in land. Land only acts upon those who cultivate it by means of what they can get out of it. If the cultivator is sure that, if he works very much on the land, he will have very much, then he will work very much; and if he is not so sure, he will not work so much. There is a saying, "What does the Swiss peasant think of "when he is awakened? his land; what does he think of "while he is awake?—his land; what does he dream "of while asleep?—his land." It becomes a kind of idol—a kind, if so familiar a phrase may be pardoned, of *pet* to him. But this is because it is his own. It is the "magic of pro-"perty" which works the marvel. It is this which makes him rise early and take rest late, and eat the bread of carefulness. The Swiss or the French peasant works on his land, because he knows that every atom of produce he can get out of the land will be his, and that everything of permanent or long-enduring fertility he can impart to the land will be his too. The habit of so acting belongs not (as has been fancied) to any single race, but to human nature generally. All over British India the same experiment has been tried with it is difficult to say how many races, with men speaking how many languages, and the result is the same. It is,—give men the ownership of land, and they will work on the land; refuse that ownership, and they will not work on it.

The last was the policy pursued, as far as it could be pursued, in Jamaica, and it was most natural that it should be pursued. It was hardly a matter of blame. The constitution, though nominally popular, owing to the practical restrictions on the suffrage, on which we have before commented, is really oligarchical. Governor Eyre told us just a year ago, on the 19th December, 1864, in language which reads oddly after recent events: "The present returns show that the number "of persons qualified to vote at elections of members of "Assembly were 1,903, whilst the actual number of voters "who returned the 47 members of Assembly of the last "elections only amounted to 1,457, that is, 1,457 selected "the representatives who constitute the House of Assembly, "whilst 436,807 had no voice or influence at all in such selec-"tion, and yet Jamaica is said to possess representative institu-"tions." This small minority was under the control of the planters, and the planters did not wish the negroes to own the land; they thought they would not work for wages if they owned it. The decision was natural, but it was fatal. It has entailed their ruin, and the ruin, we will not say, but the danger of the negro also. They could not prevent the negroes *having* land; it was too plentiful; it was too good; all they could prevent was their *owning* it, and this as far as might be they did. Governor Hincks, who was Governor of Barbadoes, the colony which has succeeded, and who looked at the failure of Jamaica with an eye enlightened by that experience, observes in a passage which on account of its grave importance we annex as a whole to this article:—"I have long been of "opinion that the abandonment of the sugar estates by the "creole labourers in many of the West India colonies is mainly "to be attributed to the unsatisfactory tenure established at the "period of emancipation, under the mistaken idea of keeping "the labourers in a state of dependence on the proprietors." The members of the Baptist Jamaica Union in a letter to Mr Cardwell, which is very carefully written, and well worth grave consideration, put first among the disadvantages of the negroes,—"The uncertain tenure on which rented land is "mostly held. On very few properties can it be leased for a "term of years; and, consequently, the small growers cannot "risk the cultivation of produce which stands more than "twelve months. Coffee, *e.g.*, which takes three years to come "into bearing, and trees of which yield an annual crop, he "cannot plant; he would have no hope of reaping the benefit. "In most cases the tenant is subject to a six months' notice "to quit; and not unfrequently, no sooner has he planted off "an acre of ground provisions, than such a notice is served "upon him. We also know of cases of hasty and illegal eject-"ment through the caprice of the overseer or proprietor, "when, from ignorance or poverty, the tenant has been unable "to seek the redress which the law provides."

In truth as many as three fatal blunders have been committed in regard to land in Jamaica which have turned it from a source of thrift, as in France and most parts of the world, to a source of improvidence, as in Ireland and a few other exceptional regions.

1st. This insecurity of tenure. Even though the land be rented at a low rate, which is often the case, the difference on the renter's mind is the same. It is not the amount of that annual payment, but the duration of his sure holding which ensures his conduct, determines his feeling, moulds his character. Rented cottier holdings are the worst form in which land can be held. Large farms employ great capital, and are capable of being worked by great intelligence; small owned properties cultivate the industry and the thrift of the possessor. But small rented plots do neither,—they can employ no large capital and no great intelligence; they can only employ a hundred petty industries and a hundred petty intelligences; and they extract no proprietary enthusiasm. The holder is not sure that he and his shall always possess that loved and treasured bit of earth; he will not work much on the land, for he is not sure that he shall have much if he does. It may be said—and it is said—if the negro does not like that rented tenure, why does he not "squat?" But squatting is another species of insecure tenure. It means taking land to which you know you have no right, and that land will never have the consecrated blessing of property. You will never be sure you will have it always, and that if you work upon it you will have the fruits of your work.

2ndly. The Jamaica Government did not make roads, and roads are, if not essential, all but essential to peasant properties. A man only wants the necessary *quantity* of necessaries; after that there is no use in producing them, and he will not produce them unless he can sell them. He will not produce anything else unless he has a market for it elsewhere or he can use it himself. But a negro wants dress and fine clothing more than he wants anything else, and he cannot produce that on a lone property. He ought to have a road to bring his surplus industry to market. Peasant proprietorship produces none of its characteristic values where any extra quantity of produce produced by extra industry is of no use to the proprietor, but must rot on the land where he made it.

3dly. The holdings of the negroes have often been holdings like the provision grounds they cultivated in the days of slavery. In those times the slaves worked almost always on the estates, and at odd times cultivated little bits of land—just enough to keep them—for themselves. Under a system of slavery it was consistent and reasonable to allow the slave only the minimum of such land; his duty was to work for his master; and there was no more reason for a Jamaica planter giving his slave more land than would just keep him than for an Alabama planter giving him more bacon than would just keep him. The negro was to be subsisted by the master, and to work for the master. But under a system of free labour, this minimum of subsistence ground is radically visious; it eats the characteristic virtue out of proprietary ownership; it is of no use working on it much more than you must, for you cannot even thereby make it yield much more.

Another population might not have felt these evils so severe. Both the two last, perhaps all three, can be met by locomotion. If there is not enough land, not accessible land, not secure land, at parish A, then go to parish B where there is land, sufficient, accessible, and safe. But the negro is a stationary being. Mr Sewell, an accomplished traveller, shows in his "Ordeal of Free "Labour":—"Were work and wages both guaranteed, I "doubt whether the negro could thus be induced to leave his "home. He has an invincible dislike to move his household "gods. It seems an unaccountable prejudice; but, through-"out the whole island, the people may be found clinging to "the plots of ground upon which they were born and their "fathers before them." A localised population such as this are the helpless victims of vicious tenure. They cling where they were born. The feeling of local attachment is of all the amiable feelings perhaps the most pernicious to civilisation. It keeps men where they are, and does not, like affection for even the very worst human beings, discipline and elevate them while they are there. The negro was the very sort of man most to suffer by bad land tenure, and, as by a fatality, the three very worst kinds have been combined upon him.

It is, indeed, alleged that the fault is not the fault of the tenure, but the fault of the negro. It is said he has in him an ineradicable though latent vice which prevents his being cultivated by the ownership of land as other nations have been cultivated by it. And if it is only meant that a race used to compulsory labour might on sudden freedom feel a violent passion for absolute idleness, we should be eager to agree. But if it is meant that there is in the negro, to use the term of Lloyds', a "proper vice" which unfits him for good land

Digitized by Google

ownership, the facts prove the contrary. In the Mauritius, where there is secure and sufficient land, with a good market, the negro works exceedingly well. And in Jamaica itself, Governor Darling, the Governor before Mr Eyre, tells us:—"The proportion of those who are setting themselves industriously on their own holdings, and rapidly rising in the social scale, while commanding the respect of all classes of the community, and some of whom are to a limited extent themselves the employers of hired labour, paid for either in money or in kind, is, however, I am happy to think, not not only steadily increasing, but at the present moment is far more extensive than was anticipated by those who are cognisant of all that took place in this colony in the earlier days of negro freedom. There can be no doubt, in fact, that an independent, respectable, and I believe trustworthy middle class is rapidly forming." When they can really have suitable land as their very own, the negroes are susceptible enough of the influence of property, though they are not so susceptible as nations who have felt the education of property from generation to generation, who have always been free, who believe that labour may be a burden, but that it is not a brand.

The last of the three means of augmenting industry which we specified is taxation, and this has been as ineffective for good as our first expedient—wages; and as much used for evil as our second instrument—land. In great part of the world, as has been said, the visit of the tax-gatherer is a principal incentive of industry. And for this purpose what is generally the disadvantage of direct taxation is an advantage. You cannot evade it. Indirect taxation is, to a great extent, self-taxation; and for many purposes this capacity for self-adjustment by the tax-payer is an ingredient of singular value; it enables the man who has really little, to pay little because he consumes little; and no other form of taxation has an index half as nice or flexible. But for our present purpose this flexibility is an evil. You wish to tax a man not on what he has but on what he ought to have; you mean to stimulate his torpid industry, not to limit your exactions to his present means. What is wanted for this purpose is that the negro should have land enough to pay a heavy tax, and that, as Lord Grey proposed thirty years ago and more, a heavy tax should be imposed upon it. This formidable direct taxation would have co-operated with the instinct of property; it would have worked as Oriental taxation has worked; it would have stimulated industry; it would have compelled the negro to begin to work, and when he had begun, like the ryot in India, in time he would have gone on.

But the very reverse system has been adopted. The principal part of the Jamaica revenue is raised from import duties, and most of these are upon the very articles which the negro consumes. If they were actual necessaries it would be very well, but they are, if we may so say, voluntaries, or almost voluntaries, in that climate. You wish the negro to dress well; his love of fine clothing is a main hold upon his exertions, and yet you tax that dress as highly as you can. There are taxes, too, on imported provisions, and these are equivalent, as Lord Grey also observed, to so much protection to the negro provision grounds, and so much consequent discouragement to estate cultivation. As much direct taxation as could fairly have been imposed on the negro should have been imposed, and as little indirect taxation. The former compels him to labour, the latter encourages him in idleness. Cheap attractions which he will buy, heavy taxes which he must pay, are the true incentives to negro industry.

The export duties are worse. They are duties on the produce of the small estates of the small cultivators, who are the very class whose industry you mean to promote. They are a direct discouragement to negro industry, as far as they go. They yield very little to the revenue, but how much trade they prohibit we cannot say.

Upon the whole, therefore, it is no wonder that many of the negroes are idle, miserable, and ripe for discontent. They have poor wages, insufficient land, and insecure tenure, taxation which does not induce them to labour, which enhances the price of what they desire, and lowers the price and discourages the export of what they may have to sell. Most of the motives to indolence have been concentrated upon them, and most of the motives to exertion have been withdrawn from them. They have been idle because they had little cause not to be idle; they have not worked because they had little cause to work.

Such is the economical origin of the present calamities of Jamaica, as far as that origin is economical; what the remedy is, we cannot at the end of a long article fully discuss, but will explain, as far as possible, on another occasion.

EXTRACT FROM DISPATCH OF GOVERNOR HINCKS.

"I have long been of opinion that the abandonment of the sugar estates by the creole labourers in many of the West India colonies is mainly to be attributed to the unsatisfactory tenure established at the period of emancipation, under the mistaken idea of keeping the labourers in a state of dependence on the proprietors.

"It is not in the West Indies alone that cheap land has led to a scarcity of agricultural labourers, and of course to high rates of wages. The same cause has produced a like result in Canada and the United States.

"But in my opinion the West India planter has a most important advantage over the Canadian farmer, owing to the fact that the staple tropical product, the sugar cane, must be manufactured on the spot, and that the skill and capital required for this purpose place it out of the power of ordinary labourers to cultivate the cane without the aid of capitalists.

"It is, moreover, admitted on all hands that the most profitable tropical product is the sugar cane, and that it would be for the general interest of the community, proprietors as well as labourers, that all available labour should be employed in the production of this plant.

"It is in my opinion a fatal error to rest satisfied with the common allegation that the creole labourers are notoriously idle, and inclined to relapse into barbarism. It must, I think, be conceded, that the exceptions are too marked and too numerous not to render such an assertion a very unsafe guide for a statesman.

"What are the ordinary inducements to industry on the part of creole labourers? In most of the colonies, circumstances have rendered it difficult if not impossible for them to cultivate the cane. Their industry is chiefly employed in the raising of provisions, for which there is a very limited demand, and which, if redundantly supplied, would fall in price.

"It may be alleged that it would be open to the labourers to cultivate the cane on their allotments on the sugar estates, as, indeed, they do in Barbadoes; but there is a simple and obvious reason for their not doing so elsewhere, even if they were permitted by the proprietors. No man will remain as a tenant at will, liable to ejectment at a few days' notice, if he can obtain a freehold of his own.

"The tenure, I have no doubt, drives the labourers from the sugar estates, and when removed from them the cultivation of the cane is out of their power. In Barbadoes, the labourers remain on the estates, not because they like the tenure, but because the scarcity and high price of land place freeholds beyond their reach; but even there the fact to which I have elsewhere referred, that 10,000 acres of land have already been acquired by the industrious classes, is conclusive proof that the tenure is only submitted to from necessity.

"I believe that if at the period of emancipation the small allotments had been granted in freehold to the labourers, or even sold to them at prices as low as they could have got land elsewhere, and if at the same time encouragement had been given to them, by the manufacture of their small crops which would have been raised by the labour of extra hours, there would have been little, if any, abandonment of the estates."

KING LEOPOLD.

KING LEOPOLD, of Belgium, who died on Sunday, was for thirty years an international Cabinet Minister. The unique character of that position, without precedent except in the annals of the Papal Court, would of itself be sufficient to explain the immense interest felt by Europe, and especially by the highest class in Europe, in the tidings of his death, but the event derived additional importance from a fact little noticed by the public. An international Cabinet Minister has become more than ever necessary, and there is no other who possesses the requisite combination of qualities and position. Englishmen, who rarely study foreign politics with any attention, are scarcely aware of a new and very curious difficulty which, on the Continent, besets all international questions. The rule of individuals is not ended, but it has gradually been limited by another seldom exercised but when exercised quite irresistible kind of sway. Despite constitutions, and charters, and assemblies, and other arrangements tending to divide power, about a dozen persons still possess the initiative of great political action on the Continent. If two persons in Prussia, or one in France, or three in Italy, or one in Austria, or two in Russia have made up their minds, the act on which they have made it up is nearly certain to be attempted, and very likely indeed to be carried through. But they are subject to this restriction, that the act to be accomplished must be at least tolerable to their own peoples, and all other

Digitized by Google

peoples to be affected by it. For example, if the Emperor of the French, the King of Prussia, and Count von Bismark, had made up their minds to divide Belgium, armies would move, war would begin, and a great political epoch would commence. But the three persons who possess this tremendous initiative understand perfectly well that though popular forms will not stop them, it is needful, in order to succeed, to know what the European world would feel in the event of their taking action. Kings are now in the position of strong Cabinet Ministers, who can do or refuse to do almost anything, but who are obliged, nevertheless, to form an idea whether their action or refusal of action will be acceptable to the country. It is possible, therefore, for an adviser who knows them, and the other great politicians, and the different peoples, and who can speak with some of the frankness of an equal, and who is trusted as only equals ever are trusted, to give most effective and weighty counsel either for or against the contemplated movement. Only a King could do this, and only a King personally neutral, and only a personally neutral King who was, and was known to be, a man of great judgment, serene intellect, and disinterested character. Such a man was Leopold, and he had therefore among the small knot of gentlemen who really govern Europe just the kind of influence which a strong Minister, say Sir Cornewall Lewis, has in the Cabinet of a single nation. This influence was always exerted, if not in favour of peace and freedom, at least of order and moderation, of temperance in demand and forbearance in resistance, and its loss is as real a calamity to Europe as the loss of Sir Cornewall was to England. How great that loss was none but Ministers know, and how great this loss none but Kings, who can so seldom find an adviser who knowing all the points is neither interested nor a subject. Their peoples can know it only through an induction, but then the induction is a very strong one. No one would deny that it is important to restrain the Emperor of Austria from rashness, or the King of Prussia from untimely aggression, or the Emperor of the French from giving the rein to "ideas," or our own Sovereign from holding out too long against a public wish, and King Leopold by his exceptional position had, and exercised, very much such a power of restraint. It is said, for example, that a letter from him warning his connection, the Kaiser, not to invade Piedmont arrived just too late, and though the story may, like most such stories, be entirely baseless, it illustrates exactly the value of his position. The Kaiser, who would listen to nobody else, might have listened to him, and immense misfortunes to Austria would have been averted. The death of such a man is a serious event, more especially as he cannot be replaced. There does not now exist a human being who could write a letter to every great Sovereign in Europe with a certainty that his words would be weighed as those of a wise King, friendly to the person addressed.

That is a great loss, and it is the greater because the great personal authority of King Leopold served to conceal, or rather to neutralise, one of the many territorial difficulties now existing in Europe. He ruled a State which statesmen have for many years thought ought to be kept neutral, which is greatly coveted by a very powerful people, which is quite incapable of self-defence, and yet which, in the judgment of many persons of authority, *must* be kept independent. King Leopold did keep it independent. It is as certain as any thing in politics can be, that as long as he lived the "Belgian question" would never arise, and it is not certain that his son can keep it from arising. Now the Belgian question may mean very little indeed—the voluntary resolution of a few provinces, now forming one little kingdom, into parts of three bigger kingdoms,—but it may also mean that most appalling of conceivable calamities a general European war, perhaps the one event the possibility of which shakes the fortitude of cool and experienced statesmen. The mere revival of a question to which so monstrous a possibility attaches is of itself an evil, and a great evil, and with King Leopold's death it does revive. People often say that the lives of individuals cannot now-a-days involve such immense results, because the world has passed beyond the era of dynastic wars, but that is only partially true. No King can now undertake a war of conquest because he chooses, but almost any King can restrain his people from undertaking one which *they* choose; and the influence of King Leopold helped to make Kings willing to use that veto in the case of Belgium. The influence of individuals was once greatly overrated, but the tendency is now too much in the other direction, as any one will see who looks through the interminable papers about the late Danish war. King Frederick being a legitimate dynast other legitimate dynasts did not like to attack him; but when he died they attacked his successor, and nearly succeeded in creating a general war. We may see the same occurrence from almost the same cause in Belgium, or we may not. The probability is we shall not, for existing things always like to continue existing, and Belgium cannot well cease to exist without the consent of the Belgian people, but no one worthy of attention would deny that the posibility of seeing it has been increased by King Leopold's death. He was a very able man, and his son is not very able; he was very moderate, and his son is tinged with a faith of all others least favourable to moderation; he had enormous personal weight, and his son has none at all. It is possible to overrate the importance of such differences, but *quantum valeant* they are losses to a kingdom which cannot afford to lose anything, which is always in peril of its existence, and which cool-headed men still greatly desire should continue.

For all these reasons, we deeply regret King Leopold, who, moreover, was a good friend to England, and a statesman of a sort very rare and very valuable among Kings. He was, perhaps, the only one in Europe who clearly saw—what by-and-by many will be compelled to see—that an able Sovereign who wants power can get it without killing people, or shutting up assemblies, or punishing free speech, or impeding free life in any way. Let the form of government be what it may, it must be carried on by a limited number of persons, and if the form is monarchical, these persons must listen to what the King has to say. If what he says is, on the whole, the best thing said, they must adopt it, and with an able King it is very likely to be the best thing. No Minister has his freedom from party bias, or his experience, or his intercourse with powerful persons abroad, or his knowledge of both parties, or generally his indifference to minor points. These are immense intellectual advantages, and, when coupled with the mysterious hold Kings have over the masses of their subjects, give him quite as effective a dictatorship as most sensible politicians would desire. In 1848, King Leopold had to tell his people that, if they liked, he would resign, but all the same, during the seventeen following years no party in Belgium could pass an Act of which he heartily disapproved, and he once or twice carried measures opposed to the wishes, and even the wills, of all Belgians save the members of the Chamber. He had convinced the latter, and, that accomplished, was a good deal more powerful than most absolute monarchs. Such an example could not fail to find imitators, and the death of such a King is the loss not only of a great security, but of a very good and effective example.

THE STATE OF THE SOUTH.

THE present condition of the South is very curious and not very satisfactory, but no one, we think, who deals fairly with the terribly complex difficulties involved, will doubt that the Free States of the North are, on the whole, acting as humanely and wisely by the South as their somewhat perplexed and hand-to-mouth public opinion on the subject will allow. It is true, we think, that neither the President and his Cabinet, nor such half-organised public opinion as there is in the Free States, has any distinct plan for dealing with the late rebel States. Doubtless, both Mr Johnson and the general opinion of the North is in favour of reconstituting political society at the South on a new basis as soon as possible. Doubtless, also, both Mr Johnson and the Northern people at first undervalued very greatly the difficulties with which they would have to deal, and imagined that the great candour with which the Southern States admitted their military defeat, and withdrew all pretence of independence, implied far more pliancy as to the principles involved in the recast of their political life than they have actually shown. At first Mr Johnson seemed to be going on a great deal too rapidly. He authorised the calling of conventions in the various Southern States to repeal the Act of Secession, and to agree to the constitutional amendment abolishing slavery for ever; and in the case of those States which complied with his conditions—as yet three—he permitted the election of State Legislatures and State Governors (often from the old Secession party) to bring back the State into the Union. In Mississippi and North and South Carolina the crystallisation of the new system has proceeded thus far. But at this point Mr

Digitized by Google

Johnson halted, and not without reason. He has been governing the seceded States hitherto by a very complex system, through a Provisional Governor, appointed by himself, doubly checked by the commander of the occupying force of soldiers, who has considerable authority in his hands—authority for all military emergencies—and by the Freedmen's Bureau, which has a department in all the seceded States, and takes into its hands, as yet, all disputes between the negroes and the whites which are not settled by force in localities beyond the reach of this imperfect organisation. These three authorities, the Provisional Governor, Mr Johnson's nominee, the military commander, and the authorities of the Freedmen's Bureau, are practically the only working Government now existing in any of the Southern States, for though, as we have said, in three of them State Legislatures have been chosen, and State Governors elected, Mr Johnson feels that the responsibility of handing over the actual government of the State to authorities so reluctant to recognise either the rights of the Freedmen, or the claims of the Federal Government, wherever they are not enforced by actual troops, is too great for him to bear, and though he has permitted the new organisation to complete itself, he still refuses it actual power.

In this hesitancy—though it would have been well if he could have seen his own way a little longer before him—Mr Johnson is doubtless showing more sagacity than he showed in encouraging the hope that the South should immediately be permitted to resume its old place in the Union. The truth is, that in scarcely any of the States have the negroes been allowed even to give evidence in courts of justice—in almost all there has been no disposition to repudiate the debt contracted for waging war on the North—and, besides this, the practical discontent with the Union is breaking out again, as of course it was sure to do, more visibly now, that the immediate terror caused by the armies of the North is in great measure removed. Mr Johnson begins to realise that if the South re-enters the Union in its present state of mind, it re-enters almost as much of a slave power and a disaffected power as before. No doubt all the States profess to think slavery at an end, but they are as determined as ever to reorganise society on the basis of caste, and the basis of caste implies, fortunately for the negroes, the basis of disaffection towards the Union. The Southern States, if they re-enter the Federation as they are, will re-enter with all the living germs of hostility to the North caused by a radically distinct society already active within them. To take one or two instances. The plan of the Freedmen's Bureau has been to let the blacks and whites of each district select a representative to sit with the Government agent appointed to try the disputes between the two races and assist him in doing justice. Now, in York Town, Virginia, as we learn from the *New York Tribune*, the blacks have elected a mulatto, an educated and quite competent man, as their representative, on which the whites demand that the Government shall cancel the election, as they entirely refuse to let any representative of their's sit with a man of colour, and intimate that they will not elect a representative at all unless the mulatto is superseded. So, again, in Essex County, Virginia, a negro who had been in the Northern army had applied to his former master to let him build upon a bit of his land. The master was quite willing, but was aware that he ran a great risk of being punished by a sort of white Vigilance Committee, organised for the express purpose of punishing (by negative or positive means) all negroes who had been within the Northern lines during the rebellion. Accordingly the landowner writes to this Vigilance Committee for *leave* to let his former slave build on his own land, and was peremptorily refused, and therefore he also refused his former slave's request, who will have to leave the district. These are very mild cases of a whole host of facts, all showing that the new organisation of Southern society, if allowed to proceed in its present course, will, in fact, produce the old Southern society very little modified over again. The negro will indeed, in some respects, be in a worse position, for now that he has ceased to be property, he has become an enemy; and it is clear, from the shocking cruelty of some of the newly proposed vagrant laws, and from the general refusal to admit the negroes' evidence in courts of justice, there will be something like a deliberate attempt in many parts of the South to force them into emigration, or to replace them in *penal* servitude for purely nominal offences.

Looking to all these symptoms—and we could fill pages with them instead of a few lines—of the ingrained caste-feeling remaining in the Southern States, and certain to penetrate all their voluntary organisations, we do not know how Mr Johnson can do better than decline to recognise the authority of the new Legislatures until they have given substantial proofs of a disposition to accommodate themselves more honestly to the new circumstances. It is in many respects unfortunate for the South that the public opinion of the Free States is so inert, so ill-organised, so ill-instructed on all questions except the Union. It is evident that the true state of the South is almost as little known and discussed now in the North as in England, for the question of Union being once decided, to the masses all else is nearly indifferent, and Congress itself is a poor instructor in this matter. The Northern deputies know very little more than their constituents, and what little they do know they say ill, and not in a way to instruct the country. Hence the Executive Government is left pretty nearly to its own resources in the treatment of these questions, nor are its own resources very large. It is obvious that Mr Johnson began by being excessively sanguine as to re-construction, and only recoiled from the results of giving back all the old political powers to barely converted slave-owners and Secessionists when he saw before him the bodies brought into existence which were to exercise these powers. But it is well, we think, that he has recoiled. Anxiously as all men must wish to see regular government restored to the South, —badly as the present hand-to-mouth system of provisional governors, military officers, and freedmen's bureaux works in the Southern States, where a hostile white population of course does all it can to prevent, by their interposition, cases of outrage from coming before these scattered authorities at all,—there can be no doubt that it would be a still more fatal evil if the radically bad social organisation which led to the war had but been pruned away by the sword, and was to sprout out afresh in all its luxuriance the moment that the sword is sheathed.

THE BANK OF ENGLAND.

TO THE EDITOR OF THE ECONOMIST.

SIR,—Will you allow me to make a few remarks on your contributor's excellent article on the Bank of England.

And first, with regard to his concluding recommendation that the question of removing the issue department altogether from the Bank should be fully discussed. To this there can be no objection. Such an inquiry might, at least, have the effect of proving what it is so hard to persuade the public of, namely, the reality of the separation that exists between the issue and banking departments. Even a well-informed person like your contributor betrays confusion on the question in some of its bearings. Witness his remarks on the Government debt to the Bank. By quoting its amount at 14 millions, instead of 11 millions, he seems to partake of the common but erroneous impression that the capital of the Bank and the Government debt are in some way connected. Now, the whole of the capital of the Bank is invested in Government and other securities, quite irrespective of the Government debt, which has been transferred over to the issue department, that is to say, to the Queen in Parliament acting through the Bank in their capacity of mere agents of the State. When people therefore discuss the policy of the Government paying off the debt to the Bank, they forget that it is virtually paid off already. For, what was the theoretical process of the first creation of the issue department? The Queen in Parliament said to the Bank, you shall no longer, as you have been used to do, issue notes on your own credit: you shall pay them all off. We have created an issue department from which all notes shall henceforth emanate; and to enable you to pay off your notes, we shall pay with our issue department notes all our debt to you the Bank, and buy of you securities to such an amount as will make up, together with the said debt, 14 millions; and, further, we will buy of you as much gold coin and bullion as you choose to sell at a fixed rate, giving our issue department notes in payment. We, the Queen in Parliament, appoint you the Bank to be our agents for the issue and payment of our notes, which will be different in their essence from your old credit notes, inasmuch as those which you may issue on our behalf shall be of the nature of receipts representing a certain weight of gold delivered into your keeping by any of the public, which you are to redeem by delivering back the

Digitized by Google

bullion as coin to any one who demands it in exchange for our receipts or notes.

We may therefore read the account of the issue department as a simple statement, thus :—

The Queen in Parliament (by the Bank of England as agents of the State) has issued the following notes, viz. :—

	£
Notes issued on the credit of the State, in payment of certain State obligations, which are thereby virtually cancelled	14,650,000
Notes issued in exchange for gold	13,237,690
Total notes issued	27,887,690

The issue of notes then being the act of the State, the question recommended for discussion appears to be this :—Is it advisable to sacrifice such practical advantages as may attach to the management by the Bank of the department for the issue of notes, in order to afford clearer evidence to the public of the nature of the issue department, and to dispel the prevailing delusions on the subject?

This question I shall not pretend to solve, but I think it might contribute to remove some of "the existing confusion of "ideas upon issue and banking," if the public had a clearer understanding of the nature of the different instruments, having more or less the character of money, used in the payment of debts.

Money is defined as that which shall be an *equivalent* and a *measure of value*. Gold is money in the highest sense, being both an equivalent and a measure of value, and, as it serves to pay debts both at home and abroad, may be called *universal* money. Bank notes, though not an equivalent, represent equivalent money in existence, and being a legal tender in payment of debts within the radius of their currency, may be called *national* money. Deposits, represented by cheques, are not equivalent money; they are simply measure of value money, and being used only in the settlement of transactions between persons known to and trusted by one another, may be called *personal* money. It is true that deposits are or ought to be potential bank notes or gold, but they are not actual bank notes or gold. The London bankers hold perhaps 100 millions of deposits, but they do not hold, nor do their deposits command or represent 100 millions of bank notes or gold in existence. They are merely, so long as they exist as deposits, the title to and the measure of value of debts, and an overwhelming proportion of the debts of individuals are settled by transferring these titles from one to another.

Now, every time that a pinch occurs in the money market, the cry is renewed for more bank notes, when it is not bank notes that are wanted. Bank notes are used almost solely in the retail transactions of the country, and in payment of wages, or as the medium for obtaining the gold they represent. The notes required by the public for retail transactions and for wages do not increase when there is a pinch in the money market; the demand for that purpose is always calculable, and, as you have shown, always oscillates within certain limits according to the time of year. There is nothing more clear from an examination of the Bank accounts than this, that a pinch in the money market is by no means necessarily followed by an increase of notes in the hands of the public. The account you publish to-day is an instance; the Bank has lent upwards of 2,000,000*l*, and the notes with the public have actually decreased. The only other purpose for which the public can want bank notes is to obtain possession of gold. But to create bank notes in the sense of those who clamour for them will not create the gold they want. Now, when they do not want gold or bank notes, what is it that they do want? It is simply the command of deposits. Take an instance. A merchant accepts a bill for 10,000*l* against a cargo of goods, and his bill becomes due before he can sell the goods. He goes to a banker and borrows some of his deposits, and pays his bill by transferring the deposit he has borrowed. No bank notes enter into the transaction at all. A multitude of transactions more or less of this character go to make a pinch in the money market, and in all such cases it is gold or deposits that are wanted, and not bank notes, except in that portion of the demand which arises out of the retail and wages transactions of the country.

I have not spoken of times of panic when there may be a disposition to convert deposits or potential bank notes into actual bank notes, another instance of "an unlimited demand "to be met by a limited supply." Such an abnormal condition I think can only be met by an extraordinary remedy *pro re nata*, like the suspension of the Bank Act, the analogy to which, in a disorganised state of society, is the proclamation of martial law.

It behoves us, then, to learn to discriminate between gold, and bank notes, and deposits; and to make our minds up as to which of the three we may really happen to want. We may then learn to attribute to overtrading and to our own imprudence, what we have been always in the habit of attributing to an insufficient supply of bank notes.

It might be a help to some to suggest the following mode of treating the account of the banking department, by dividing it into two parts, thus :—

Proprietors' Account.	£
Proprietors' capital	14,553,000
Rest, or accumulated profit	3,221,496
	17,774,496
Securities in which the capital and rest are invested	£ 17,774,496
	17,774,496

General Banking Account.	£
Deposits and post bills; being the fund from which alone the Bank can accommodate the public with loans or discounts	21,800,187
	21,800,187
Securities, being deposits employed in accommodating the public	£ 13,682,234
Reserve, being deposits unemployed	8,117,953
	21,800,187

I am, Sir, your obedient servant,

Dec. 15, 1865. F.

BANKS OF ISSUE.

TO THE EDITOR OF THE ECONOMIST.

SIR,—There are two distinct classes of questions which require to be kept apart in discussing this subject, One class of questions regards the conditions imposed on existing, or to be imposed on future banks of issue by the Legislature.

Amidst much difference of opinion as to what these conditions should be, there is much general concurrence as to the results which it should be the objects of conditions to secure, viz. :—

1. The immediate convertibility of all bank notes into coin on demand.

2. Security against loss to the holders of the notes of any bank which may suspend payment.

3. Some contribution by banks to the general revenue of the country for the privilege of issue.

4. The existence of only strong banks of issue, by requiring some considerable amount—perhaps a million—of paid-up capital as a condition to be considered a bank.

If it be assumed as possible that the Legislature may and can adjust fair terms under which banks of issue may continue to exist, or may come into existence, a second class of questions then arises, which are difficult of solution, very much because of personal and existing interests, previously expressed opinions, and other disturbing causes.

The one great question, however, is—Shall the privilege of complying with conditions imposed by the Legislature continue to be the monopoly of a few banks as at present, or shall other banks, willing to afford greater security and better service to the public, be permitted to compete?

There is a certain analogy between the arguments now used for banking monopoly and the arguments which were formerly used in favour of the late East India Company being the sole importers of tea from China. Although other merchants were long allowed to import silk and other China produce, they were for years interdicted from tea, just as many banks are now interdicted from one department of banking business. The great London mercantile firms which sprang up and flourished under the India House monopoly were the last to attack it, just as the London banks and money-dealers of the present day are contented with their prosperity under the monopoly of one large bank in London. It is for the general trading community who are the sufferers to place it with tea, sugar, corn, and other monopolies, among the things that have been. The present Chancellor of the Exchequer, though he has hitherto expressed himself against free trade in banking, is as willing to be instructed in what will conduce to the general prosperity of the country as was the late Sir Robert Peel.

The tendency of the present system is to minimise the

Digitized by Google

quantity of gold coin held in the country, coin being now more than ever apt to be suddenly wanted for this country's dealings with the other countries of the world. The vicious principle that the notes of one particular joint stock bank may be tendered by a debtor to a creditor tends to drive coin out of the country, to be brought back at great charge, distributed unequally over the general community, instead of at the expense of the particular bank which, by exercising its monopoly in a particular manner for its own profit, induced the coin to be exported.

Under a system of really free banking each bank must hold coin to meet its requirements, and the aggregate so held by many banks would as much exceed the few millions held by the Bank of England, on which the whole trade of the country is made to hinge, as the aggregate amount of business transacted by other banks exceeds the business of the Bank of England. By frequent (in London by daily) exchanges of notes at clearing houses, over-issue of notes is impracticable.

Payment of notes in coin can of course be required only at the places of issue, where the necessary stock of coin would be held.

Notes in the possession of branches or of servants of banks are not held to be issued till they pass into the hands of the community.

The beneficial effect of this is seen in Scotland. The large, strong banks open agencies in small towns and villages by means of their high credit, without using their capital. A box of a bank's notes is sent to its agent, who pays them out in the usual course of business. When returned to the bank, perhaps on the very day of issue, interest at once begins to accrue to the depositor of the bank's own notes, so long as he allows them to remain at his credit. The branches of different banks in a small town exchange notes with each other, and notes of banks not having branches in the locality are sent in parcels to the head offices, to be there exchanged. This conduces to economise capital, to diffuse it even in remote and poor districts, and to that respectability among shopkeepers and small traders which is implied in having a bank account.

As regards security to holders of notes of such banks as may suspend payment, an obvious and customary suggestion is that Government securities be deposited specially and solely applicable to note issues. This is not, however, at present done by any existing bank of issue. The Bank of England and other banks hold Government and other securities; but these are available, and are constantly used, to meet general obligations and requirements. If securities are to be specially deposited against note issues, what shall be the amount? Shall it be for the sum of the average circulation, or to the extent of all the notes signed and ready to be issued in the hands of agents and servants of the bank, in addition to the amount in the hands of the public? or shall it be for some amount intermediate between these two sums?

It is argued by many that a false security is created, and bank responsibility weakened, if securities are deposited specially and solely against notes issued, and that it is better for the public that the Legislature should do nothing to lessen the inducements to prudent management on the part of banks.

It is obvious that in practice, notes of all banks will circulate so long as they can be paid in and accepted by other banks. When a catastrophe does occur, banks holding the notes of an insolvent bank are entitled to the same security as the general public, in whose hands there may also be notes of the failed bank. This security may be afforded by the Legislature constituting its notes a preferable and prior claim on the estate of a failed bank. There is no unfairness to other creditors in this, because a liberty of choice exists as to holding the bills of, or depositing money in, a bank of issue subject to the condition that payment of its notes in full formed the first claim on its entire assets.

A stamp for the purpose of taxation on each note ready to be issued by banks would enable the utmost amount of each bank's possible note obligations to be at all times correctly known at the Stamp Office. This might bear some proportion to the paid-up capital, beyond which limit the Stamp Office would decline to issue more note stamps to a bank. The stamped portions of old notes when returned might be exchangeable for stamps to new notes.

The average note circulation of each bank might be known by periodical returns, as at present.

Joint stock banks have this manifest advantage for the public, that their capital is not taken away when a rich partner dies. His shares are merely transferred to others, and the capital remains undiminished. It will be a great public benefit when the country note circulation of old respectable, but sometimes weak, private banks is replaced by the notes of strong joint stock banks, each with at least a million of paid-up capital, having agencies throughout the country.

It is needful to remove legislative prohibitions against the many existing strong banks issuing notes in London and elsewhere to such an amount as may be safe, having regard to amount of paid-up capital, on terms analogous to those on which the Bank of England is permitted to issue, but still more in the interest of the community and without the mischievous principle of a bank note being a legal tender instead of coin.

Although no one bank of issue should have better terms than another, the current charter of the Bank of England must be allowed to run out, when it should come in every respect under whatever law may apply to other large joint stock banks of issue. A term of years might be allowed for existing weak banks of issue to amalgamate with strong banks, before the privilege of issue by banks having a less paid-up capital than a million should cease. The abolition of banking monopoly, and the permission to strong banks of issue to come into existence would produce greater benefit to the general community than all the free-trade measures which have yet been adopted by the present generation.—I am, &c.,

A Glasgow East India Merchant.

Agriculture.

GAME; THE TIDE TURNING.

We ventured a short time ago to suggest the hope, arising from various acts and circumstances occurring in different parts of the country, that a beneficial change was taking place in the fashion of game-preserving, and that the mischievous and un-English system of battue shooting was tending towards decline. In support of that view we referred, amongst other things, to the arrangement made by the Earl of Southesk in Scotland, for giving up the game—at least the control of it—for a term of ten years to his tenants. The arrangement was, we thought, needlessly complex, but as a measure of transition from a bad state of things to a better, deserving of commendation. We have lately received the following communication on the subject of that arrangement from a local agriculturist:—

"Game: Is the Tide Turned?"

In an article of yours under the above heading, copied into the *Montrose Standard* of Friday last, commenting on Lord Southesk's arrangement with his tenantry, you state that "all their leases contain conditions binding them to submit without compensation to any amount of damage by game." As one of his lordship's tenants, I beg you will give this an explicit contradiction. My own lease contains no such obligation, and I don't believe there is a lease on the whole estate that contains such an unreasonable condition. It was claims of damages coming in that awakened his lordship to the evils of excessive game-preserving, and ultimately led to the arrangement that has been come to. The rent is small, but not quite *nominal* as you represent it. The arrangement gone into, we believe with the best intentions on the part of our landlord, promises to give satisfaction to the tenantry, but as yet it can only be looked upon in the light of an experiment; and whether the scheme will prove satisfactory to all parties concerned remains to be seen. The tenantry however are grateful to his lordship for entering into a scheme that puts the game very much at their own command, and I believe they will do their best to work it in a manner that will protect themselves and not displease their landlord.

This puts the arrangement very much in the light we saw it, *i.e.* as an experiment which may and probably will lead to the only real cure for the game evil, the giving up the game to its feeders and natural owners, the tenants. At all events it has done one thing, it has gone far to restore good-will and considerate attention to each other's wishes between landlord and tenant. This, between parties so intimately connected in business relations, will be a great gain to them both.

Another case referred to was the supposed surrender of the game to the tenants on Lord Dudley's estates in the Midland counties. We say "supposed," because, though a paragragh to the effect we stated went the round of the press, it appears from his lordship's circular to his tenants, which has now been published, that the concession of the game to the tenants is special, exceptional, and indeed, temporary only. We still regard this letter as a sign of the times in game-preserving circles, though not so satisfactory a sign as on the first account of it it appeared. The letter is in many respects so singular, and suggests so many reflections on the relation of landlord and tenant on the Dudley estates, as well on the confession made by the actual concession of the injury occasioned to the tenants by the reserved game, that we must make it the subject of a few comments.

The following is Lord Dudley's circular, as sent to his tenantry, which it seems was a kind of jubilee concession on the occasion of his lordship's marriage:—"You will probably have heard of my

Digitized by Google

intended marriage with Miss Moncrieffe, by which the crowning honour of a lady at its head may not be wanting to my house, and if it be the will of Heaven my name and estates may be handed down in a direct line. Actuated by the desire that this should be *the cause of rejoicing to many who hold under me as tenants* in some tangible form and shape, and knowing how much suffering has been caused by two successive years of very poor agricultural returns—I give you permission till the 1st of February, 1866, to kill by yourself, friends, or servants (duly authorised by you), all the game on the lands held by you of me, saving only in the covers, in which I shall shoot as soon as the fall of the leaf permits. To this permission, however, I must annex one or two conditions. First, that you will kill the game fairly by day in a sportsmanlike manner, and that during the time of such leave you will protect your lands from all poaching and trespass, so that, intended as it is for the benefit of your farm and your own amusement, it may not be abused; and further, that as there are many on the estate who, though tenants, have no land, or any chance, therefore, of getting game, you will not sell what you may kill, but after supplying your own table and that of your friends, you will share your privilege with your dependents and poorer neighbours, as I propose to do with what I have reserved to myself. I hope that all hedgerow rabbits, save only in hedges forming the boundaries of my covers, which shall be killed by my keepers as soon as I have shot in them, may be entirely destroyed, and so be to you for the future no cause of loss or anxiety. Let me beg that you will not course the hares till after Christmas, and that when you shoot you will give notice to the keeper of the beat, who will be present with my instructions, to lend you all the assistance in his power, and to this I will only add that the privilege is conferred upon you in the name of your future countess."

This assuredly falls very far short of a relinquishment of the game to the tenants. It however clearly admits that the loss caused to the tenants by the game reserved to the landlord is so serious that permission to kill it down during the season is deemed a sort of compensation for "suffering caused by two successive years of very poor agricultural returns," and that the concession constitutes such a boon to the tenants as to be a cause of "rejoicing" on so conspicuous an event as the landlord-magnate's marriage.

Further than that, the letter puts in a strong light the sort of semi-feudal and dependent condition which, in the landlord's view, his tenants occupy. Can any one believe that men of capital and enterprise would willingly embark in farming with this liability, to be thus addressed by the owner of their farms for which they pay as rent the full market value? Depend on it the evils of the game question lie deeper than those who are now seeking for palliatives believe.

Foreign Correspondence

(FROM OUR OWN CORRESPONDENT.)

PARIS, Friday.

The *Moniteur* has published the following return of the Bank of France, made up to the 14th inst. The return for the previous week is added:—

DEBTOR.

	Dec. 14, 1865. f	c		Dec. 7, 1865. f	c

The variations between the Bank return of to-day and that of last week are not important—an augmentation of 11,903,000f in discounts, and of 10,884,000f in the circulation of notes; and a decline of 3,951,000f in the coin and bullion, and of 6,490,000f in the deposits.

The death of the King of the Belgians has not produced anything like the effect on the Bourse that was at one time expected; and the reason is that it does not appear likely—for the present, at all events—to occasion any grave political complications. What the President of the United States will say in his Message on the subject of Mexico is, for the moment, the principal pre-occupation. Transactions have not been active since last week, and the following are the quotations:—

	Dec. 7. f	c		Dec. 14. f	c

The arrangements for the new loan to Turkey have been completed since my last. The contractors for it are the Credit Mobilier of Paris, the General Financial Society of Constantinople, the Credit Mobilier of Madrid, and the Ottoman Bank of London. With the latter are to be grouped several important houses and influential capitalists. Some of the parties thought, I hear, that it would be desirable to postpone the presentation of the loan to the public until after the 1st January; but their opinion has not prevailed, and in all probability the subscription will be opened on the 20th, 21st, and 22nd of the present month. As you have been informed the nominal amount of the loan is to be 6,000,000*l*, which make 150,000,000f. It is to be represented by 300,000 bonds of 500f each; but as they are to be issued at 330f (13*l* 4s), the sum actually raised will be only 99,000,000f, or 3,960,000*l*. How far this sum will be reduced by commission and other charges is of course not made public. Each bond is to bear 30f (1*l* 4s), being 6 per cent. interest, payable half-yearly on the 1st of January and the 1st of July, and the whole 300,000 are to be paid off at 500f in 21 years, by half-yearly drawings. The 330f are to be paid, 30f on subscribing, 75f on allotment, and 75f on each of the dates 1st of February, 1st of April, and 1st of May. Interest is to run from the 1st of January, 1866, and calls paid in advance are to receive discount of 6 per cent. It is calculated that, taking into account the time allowed for the payment of calls, the real price of each bond is reduced to 325f 88c, so that investments will be at the rate of 9.20 per cent., and that if the advantage arising from reimbursement at 500f for a nominal sum of 330f be counted, this will be equal to 11.77. The Turkish Government has agreed to give in guarantee of the interest and reimbursement of the loan the duties on oxen in Roumelia and the Archipelago, the copper ores of Tokat, and, after 1868, the sums now employed in the reimbursement of the serghis of Syria.

Reports have been spread that Mr Laing and his associates in the Turkish conversion have formally protested against the new loan, on the ground that it is contrary to engagements entered into with them, and that they have even succeeded in obtaining diplomatic intervention against it. But it is asserted, on good authority, that the rumours are entirely unfounded. What in all probability gave rise to them was, that after the main conditions had been settled, there were certain formalities to be fulfilled, and that they encountered some little delay. They have, however, as I am informed, been accomplished this very day.

In connection with this matter, it is right to communicate the following "Notification to the Bondholders of the Five per Cent. General Debt of the Ottoman Empire," which has been issued by the gentlemen above mentioned. You will observe that whilst proclaiming that the new loan cannot injure the rights of those bondholders, it displays no friendly feeling to the operation:—

"The bondholders of the Five per Cent. General Debt have been moved by the announcement of a new loan which the Ottoman Government is said to be on the point of contracting, and of which the issue is said to be confided to the Credit Mobilier of Paris and to the Ottoman Bank. The conditions of the loan are represented to be calculated to suppress or lessen the guarantees on which the Grand Livre of the General Ottoman Debt is based. In our double quality of issuers of the Five per Cent. loan, and of contractors for the conversion, we hasten to reassure interested parties on this subject. Their rights are beyond the reach of any

Digitized by Google

encroachment, and whatever be the conditions of the new loan, the laws decreed by the Ottoman Government can neither be disregarded nor changed. As regards specially the maintenance of the guarantees given to the General Debt of the Ottoman Empire, it is sufficient, in order to remove all apprehension, to call to mind article 1 of the law of the 17th and 29th March, 1865, and the explanatory report of the Minister of Finance which accompanies it, and which we mentioned in our prospectus. It is therein said, 'the service of the General Debt shall be assured and guaranteed both by the general revenues actually free of the Ottoman Empire, and by those previously engaged which may become disposable in proportion as the foreign debts, of which these revenues constituted the special guarantee, shall be paid off.' The holders of the Ottoman Five per Cent. should then be completely reassured. The financial projects which are spoken of cannot in any case affect consecrated rights, which are protected by laws and solemn declarations.—Paris, December 13, 1865. (Signed) PHILIP ROSE, authorised agent of Mr S. Laing, and of the General Credit Finance Company of London (Limited); LOUIS MERTON; H. DRUMMOND WOLFF."

The Government has at last determined on putting down the monopoly of cabs in this city possessed by the Compagnie Imperiale des Petites Voitures. The resolution will afford general pleasure to the Parisians, the monopoly having for a long time past given rise to numerous well-founded complaints. The company, of which the capital is 40,000,000f in 160f shares, will of course have to be indemnified for the loss of its privilege. Now that the cab industry is to be set free, there can be no reason for maintaining the monopoly enjoyed by the Omnibus Company, albeit, it must be confessed, that company serves the public as well as can be expected from a concern which has no competitors. Why, too, should not the undertaker's trade be thrown open, instead of being confined as it always has been to a company rejoicing in the high sounding name of Administration des Pompes Funebres? Surely it is an absurdity to make the burial of the dead a monopoly, when the living man is free to clothe and feed himself where he lists; and surely it is a grievous hardship on the public to be compelled to pay for interments the high tariffs of a privileged association, when liberty would make them cheaper. Then is there any good ground why the Mont de Piete should remain a monopoly? True, it is regarded as a charitable institution because its profits go to the Board of Public Assistance for the Poor; but they come from the poorest of the poor, and they are obtained by charging an exorbitant rate of interest for loans on pledges. If the pawnbroking business were taken from the Mont de Piete, and confided, under proper restrictions, to private persons, much good would undoubtedly be done to the poverty-stricken. Another question—Is there any reasonable reason why "the Administration" should occupy itself with wet nurses? Its doing so necessitates the maintenance of a staff of physicians, office-keepers, and clerks, whom the public and the nurses have to pay. It is not conceivable that any evil results would arise if this expense were saved, and if the wet-nursing occupation were set as free as cab-driving.

The Superior Council of Commerce appears not to fear repetitions in the testimony of the witnesses in the Bank inquiry. One after another presents himself to say what has been said already in favour of the Bank of France and of its mode of acting. In the last batch of deponents who testified for the Bank, and for the principles it adopts, was Mr Blount, the English banker of this city. He declared himself incapable of understanding the complaints that are made against the Bank for raising the rate of discount in times of monetary pressure, seeing that it cannot do otherwise; and he approved of all it does, except lending money on deposit of securities, which is a branch of business he thinks it would do well to abandon. As to its capital, he held that it is rightly invested in stock as a guarantee, and consequently he rejected the Pereire-Chevalier theory, that it ought to be employed in discounts.

No public appeal has been addressed to the financial circles of Paris to subscribe shares in the new limited company of Charles Laffitte and Co. Considering that M. Charles Laffitte's house is a Paris one, and that he himself has for many years been extensively engaged in French affairs, this indifference to Parisian support looks singular in the eyes of some persons.

It has been reported in the money market that the Credit Mobilier has consented to raise a loan for Spain, but I am assured that no operation of the kind is contemplated by that establishment for the moment.

Not only by advertisements in the newspapers, but by huge placards stuck on the walls, the public is reminded that the drawing of the half-yearly lotteries attached to the Mexican loans of 1864 and 1865 is to take place on the 2nd January. In each lottery, prizes of 20,000*l*, and numerous others of smaller amount, are to be gained; and the chance of getting such sums naturally excites great interest among the bondholders.

A company for collecting and selling ice at Paris, and for carrying on the large ice houses constructed by the municipality, is advertised. Its capital is to be 2,500,000f in 5,000 shares.

The Saragossa and Alicant to Madrid Railway Company advertises the payment of 7f 50c from 1st January next, as half-year's interest on bonds; but the directors have thought it prudent, from the unfavourable circumstances which have affected the lines, to suspend for the present the payment of the last half-year's coupon on shares. They have made known this determination by the following announcement:—"In consequence of events which could not be controlled having occurred in Spain, and particularly on the lines of the company, in the second half of 1865, the board of directors do not consider themselves authorised, before the definitive drawing up of the year's accounts, and without a vote of a general meeting of shareholders, to cause to be paid on shares on the 1st January, 1866, a new coupon of the year 1865, in addition to that of 15f (12s) already received by the shareholders on the 1st July last on account of that year."

The French Transatlantic Company has published a notice on its situation, from which it appears that a dividend of 45f can be distributed for the present year.

In a recent letter, the amount of the commerce of France with England in 1864 was stated. The following is a detail of the value of the principal articles imported into France from England in that year:—

	Total Imports. francs.		Portion thereof taken for Consumption. francs.
Cotton	135,712,957	.....	128,944,397
Silk	126,219,317	.....	105,466,747
Wool	62,887,576	.....	61,989,484
Woollen tissues	40,278,064	.....	26,056,070
Copper	27,075,899	.....	22,680,615
Coal	26,780,398	.....	23,896,898
Iron and steel	17,768,083	.....	4,374,928
Cotton tissues	17,184,557	.....	7,593,328
Oils	12,001,381	.....	11,088,467
Oleaginous seeds	11,105,318	.....	1,485,806
Machinery	10,979,255	.....	9,942,828
Woollen yarn	9,730,190	.....	9,114,369
Coffee	9,473,573	.....	10,695,957
Silk tissues and ribbons	9,361,760	.....	4,879,377
Iron ships	8,579,120	.....	659,543
Skins	7,500,966	.....	6,030,476
Cotton yarn	7,131,498	.....	4,882,042
Tin	6,568,195	.....	6,552,559
Flax and hemp tissues	6,445,334	.....	4,339,064
Jute	6,432,270	.....	6,432,270
Tools and articles in wood	5,753,785	.....	4,203,141
Goats' hair yarn	5,110,092	.....	5,105,672
Flax and hemp yarn	4,614,620	.....	2,635,911
Indigo	4,874,472	.....	2,560,608
Sugar (raw)	3,151,053	.....	3,726,148
Pottery	2,110,156	.....	1,990,221
Rice	1,752,455	.....	1,207,653
Flax	1,729,471	.....	1,728,851
Paper, pasteboard, and books	1,629,658	.....	1,549,150
Lead	1,472,047	.....	1,442,018

In the term "England," Malta and Gibraltar are included; and perhaps your readers will learn with some surprise that in the item of cotton they figured for 2,386,690f, and in that of silk for 6,554,549f.

The principal exports from France to England were as follow:—

	Total Exports. francs.		Portion thereof of French Production francs.
Silk tissues	323,799,129	.....	205,656,786
Woollen tissues	105,994,980	.....	98,512,505
Mercery and buttons	53,896,897	.....	52,988,763

The market report is as follows :—

Flour.—At *Paris*, firmness continues to prevail, and certain dealers have even raised their prices from 50c to 1f the sack. Yesterday, the quotation was 48f 50c to 53f the sack of 157 kilogs. Six marks the current month were 52f 50c; four months of January, 53f 75c and 53f 80c; type, Paris, the 101 kilogs, 32f 75c. In most of the provincial markets calm prevails.

Wheat.—At *Paris*, yesterday, offers were numerous, and for some lots concessions were made by holders. Choice white, 28f the sack of 120 kilogs; choice red, 27f 50c; first quality, 26f to 26f 75c; ordinary, 25f to 25f 50c.

Cotton.—The market was animated at *Havre*, in the week ending Friday, as many as 17,425 bales having been sold. The arrivals were 4,784 and the stock 28,165. The closing quotations were 5f to 13f higher for United States; 5f higher for Peru, Egypt, Surinam, Cayenne, Cumana, Carthagena, and Porto Rico; 5f to 10f higher for Tinnevelly; 10f higher for Brazil, Martinique, Guadeloupe, Hayti, Kurrachee, Madras, Bengal, China, and Surat; 10f to 15f higher for sawginned; Coconada unchanged. Low New Orleans was consequently 267f the 50 kilogs; good ordinary quality in Broach, 220f; in Tinnevelly and Madras, 220f; in China, 215f; in Jumel, 275f. This week calm has prevailed, and yesterday Mobile low middling was 257f 50c; Pernambuco, for delivery, 250f to 265f; Bahia, indifferent quality, 245f; Oomrawutta, 200f; Madras, for delivery, 200f; Coconada, 185f.

Sugar.—Business was limited at *Havre*, in the week ending Friday, but prices were firm. Some French West India usine, on sample, 52f 75c the 50 kilogs, duty paid; some Porto Rico, 52f 25c, bonne quatrieme, ditto; 162 casks Havana, 33f, No. 12 in bond. The arrivals were only 4,275 sacks beetroot. This week, Havana, No. 12, 34f and 35f. At *Nantes*, last week, some small lots of Gaudeloupe, 48f, bonne quatrieme; and usine, 56f 50c to 59f 50c. This week, Reunion, on the basis of 51f 75c, bonne quatrieme—sales very large; French West India usine, 59f; and second jet, 52f 50c. At *Bordeaux*, a small lot of Martinique at 50f, bonne quatrieme; 2,600 sacks Reunion, 52f 50c, ditto. This week, Reunion, to take at Nantes, 52f 25c, bonne quatrieme. At *Marseilles*, last week, there were no sales. This week, French West India, 30f 50c, bonne quatrieme of Havre.

Coffee.—The demand at *Havre*, in the week ending Friday, was active, and prices were firm: 200 sacks Port-au-Prince, 83f to 84f the 50 kilogs, in bond; 251 Jacmel, for delivery, 84f; 525 Gonaives, disposable, 86f to 88f; 1,391 ditto, for delivery, 85f 50c to 86f; 4,400 Rio not washed, disposable, 66f to 71f; 2,420 ditto, for delivery, 66f to 84f; 186 Rio washed, 96f to 96f 50c; 200 Ceara, 88f; 2,233 Bahia, 67f to 71f; 1,200 Malabar, 91f to 92f 50c; 200 Ceylon native, 90f; 27 casks plantation, 95f; some Guadaloupe habitant, 140f to 142f 50c. By auction, various lots of different sorts of damaged. The arrivals were about 9,000 sacks. This week, Rio, 67f to 73f; Gonaives, 86f and 88f 50c; Hayti, 85f. At *Bordeaux*, last week, 250 sacks Rio washed, 101f; 320 not washed, 78f; 180 Mysore, 118f; 187 Ceylon, 117f 50c; San Jago, 94f; 24 casks ditto at prices kept secret. This week, La Guayra and Rio washed at prices not stated; and unwashed, 78f; Mysore, 121f 50c. At *Nantes*, no sales last week, and none this. At *Marseilles*, last week, 2,293 sacks Brazil, 70f to 85f. This week, Rio, 86f and 85f.

Indigo.—The sales at *Havre*, in the week ending Friday, were 120 chests Bengal, the greater part at 37c to 50c above the estimates, the rest at prices kept secret; also 2 serons Guatemala, prices not given. No arrivals. This week, Bengal at premiums of 50c and 40c. At *Bordeaux*, last week, 28 chests Bengal, at an advance of 25c to 30c; 64 Madras, at established prices; 6 Kurpah, at quotations not given. This week, Kurpah, prices not stated.

Hides.—At *Havre*, in the week ending Friday, 2,500 Buenos Ayres dry, 75f to 85f the 50 kilogs; 2,950 La Plata salted ox, 60f to 61f; 6,200 ditto cow, 45f to 47f; 1,436 Rio Grande dry, 82f 50c to 83f; 3,200 ditto salted ox, 54f; cow, 43f 75c; 1,150 Rio Janeiro salted ox, 52f; 100 ditto cow, 39f; 1,768 Lima salted ox and cow, 43f, indifferent quality; 2,735 La Plata horse, 41f 50c; 28 bales La Plata kid, 12f 52c to 14f the dozen. The arrivals exceeded 16,000. This week, Rio Janeiro salted ox, 52f; cow, 38f; Buenos salted ox, T.Q., 52f 50c; Monte Video salted saladeros ox, 61f 50c; T.Q., 53f; Rio Grande salted ox, 54f; horse, 41f 50c; La Plata kid skins, 13f 50c and 13f the dozen. By auction, various lots of differents sorts of damaged were sold; also dry ox and cow, sound, 57f to 67f; Rio Grande salted ox, 52f 25c; Valparaiso drysalted ox and cow, 64f to 69f 50; Arica, 69f to 75f 50c; Calcutta calf, 55f fourth class to 111f first.

Wool.—The sales at *Havre*, in the week ending Friday, were 270 bales La Plata unwashed, 1f to 2f 22½c the kilog; 4 bales Monte Video washed, 3f 40c; 32 Buenos Ayres washed, 5f 70c. The arrivals were about 150 bales. No sales this week.

Tallow.—At *Havre*, in the week ending Friday, 52 pipes 10 demi-pipes Rio Grande, 57f the 50 kilogs in bond; 250 demi-pipes La Plata for delivery 57f 50c, duty paid. The arrivals were 2,022 casks. This week, Monte Video 58f. At *Paris*, yesterday, the 100 kilogs were 121f 20c, octroi duty included.

Spirits.—At *Paris*, yesterday, 3-6, first quality, 90 degs., disposable, 43f the hectolitre. At *Bordeaux*, the day before yesterday, 3-3 Languedoc, 86 deg., 54f; 3-6 beetroot, first quality, 90 deg., 53f.

COMMERCIAL AND MISCELLANEOUS NEWS.

The imports of the precious metals during the week ending Dec. 13, were :—Gold, 59,074*l*, silver, 70,391*l*. The exports were :—Gold, 456,821*l*, silver, 381,502*l*.

The following returns, published by the Veterinary Department of the Privy Council, and having reference to the disease amongst horned cattle, do not profess to give the total number of cases which have occurred in Great Britain, but only those which have been ascertained from the official information received from Inspectors, whether appointed by the Clerk of the Council or by the local authorities. The divisions of England are those of the Census.

Column I. only records the cases reported as having commenced during the weeks indicated by the headings; "back" cases being added to column II. :—

Census Divisions.	I. Number Attacked. Week ending Dec. 9.	Week ending Dec. 2.	Week ending Nov. 25.	II. Result of reported Cases from the Commencement of the Disease. Attacked.	Killed.	Died.	Recovered.	Remaining.

THE OLD FORM

The above Bank accounts would, if made out in the old form, present the following result :—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	21,312,419	Securities	31,553,730
Public Deposits	7,081,336	Coin and Bullion	14,021,403
Private Deposits	14,259,882		
	42,653,637		45,575,133

Dated the 13th December 1865. W. MILLER, Chief Cashier.

The balance of Assets above Liabilities being 3,221,496*l*, as stated in the above account under the head Rest.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

A decrease of Circulation of	£213,900
An increase of Public Deposits of	461,693
An increase of Other Deposits of	1,612,882
No change in Government Securities.	
An increase of Other Securities of	2,337,833
A decrease of Bullion of	448,214
An increase of Rest of	28,944
A decrease of Reserve of	246,474

The chief features in the Bank return published this week are the large increase of 2,337,833*l* in the private securities, and the addition of 1,612,882*l* to the private deposits, indicating the general apprehension of an advance in the rate of discount and over preparation by the mercantile public against its effect. The decrease in the coin and bullion is only 448,214*l*, and the diminution in the reserve, 246,474*l*.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during

In the corresponding week in 1855, the money market in London was very tight. The Order in Council, authorising the Bank to issue 475,000*l* additional notes on securities, had no perceptible effect upon it. In Paris, capital was in great demand.

In 1861, the death of the Prince Consort was announced. The message of the President of the United States had arrived, but it contained no allusion to the Trent affair. At New York, the insurance on shipping had advanced.

In 1862, intelligence of the opening of the Federal Congress had arrived. At Vienna, the Session of the Council had been closed. Money was somewhat cheaper in London.

In 1863, the Danish Government had received notice that, unless certain demands were complied with, Federal troops would enter Holstein. News of the death of Lord Elgin had come to hand from Bombay. General Grant had abandoned the winter campaign.

In 1864, there was an active inquiry for accommodation. The rate for money at the Bank of England had been reduced to 6 per cent. The sale for cotton was quiet.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1855, a deficiency of 6,038,299*l*; in 1862, a deficiency of 5,323,852*l*; in 1863, a deficiency of 8,178,651*l*; and in 1864, a deficiency of 5,462,592*l*. In 1865, the deficiency is 7,355,748*l*.

Discount and Money Market.—A heavy demand at the Bank during the early part of the week was consequent on the general apprehension of an immediate advance in the discount rate. The firmness of the exchanges on Tuesday evening contributed to the easier feeling expressed on the following day, but the terms in the open market were still about ½ per cent. above the Bank minimum. The Bank court yesterday separated without announcing any alteration; and, as a full supply had been secured in many quarters, money has to-day been offered for short periods on easy terms.

The Bank return gives evidence of an extreme degree of precaution on the part of the public; the addition to the deposits being equal to two-thirds of the amount of discounts applied for during the week. The decrease in the reserve is small, and that in the stock of coin and bullion, owing to the return from the provinces, is much less important than had been expected in face of the large exports of the week.

The Indian demand for silver has been checked by the belief of an advance in discount, but the improved tone of the market indicates the probability of further shipments with any degree of ease in money.

The Stock Exchange settlement has, as usual, led to additional activity to-day; a considerable amount of advances being made by the discount houses and financial establishments on stocks and shares.

Annexed are the current discount charges on paper of various dates :—

30 to 60 days	6 per cent.
3 months	6½ per cent.
4 months	6½ per cent
6 months—Bank bills	6½ 7 per cent.
6 months—Trade ditto	7 ⅓ per cent.

In the Stock Exchange money has varied a little in value, but the closing rate on Government securities for short periods is 5 per cent.

The following are the rates allowed by the joint stock banks and discount houses for deposits :—

Joint Stock Banks	*4½ per cent.
Discount houses at call	4½ per cent.
Do. with seven days' notice	5 per cent.
Do. fourteen days	5¼ per cent.

* At the London and Westminster 3½ per cent. only on sums below 500*l*.

Bullion.—No operations are reported to-day at the Bank.

The following rates of discount are those current in the chief continental cities.

	Bank Rate. Per cent.	Open Market Per cent.
Paris	4	3¾
Vienna	5	5
Berlin	7	6½
Frankfort	5½	5
Amsterdam	6	6
Turin	5	4½ 5
Brussels	6	5½
Madrid	9	...
Hamburg	...	5¾ 6
St Petersburg	6	6¼ 7

The Bank of France return just issued gives the following results on a comparison with that last published :—

Increase.	£
Bills discounted, not yet due	480,000
Notes	445,000
Treasury balance	165,680
Decrease.	
Cash in hand	160,000
Current accounts	260,000
Advances	10,000

English Government Stocks.—The generally unsettled condition of the money market has again operated prejudicially on the prices of stocks. Consols have been as low as 86¾; and, notwithstanding some slight rally, chiefly occasioned by the re-purchase of speculative accounts, remain with comparatively little animation at 87½ for January account. Excepting those made by the Government broker, who took 12,000*l* Reduced Three per Cents. to-day, the purchases for investment account are very small; and, as fears prevail that dearer money is still to be expected, the market is again dull, with a declining aspect. Consols close for money, 87⅛ to 87¼. New Three per Cents. and Reduced, 86⅞ to 87. India Five per Cents., 102½ to 102¾.

Exchequer bills for March, as well as those for June, are quoted at 6s to 2s dis. India bonds, 14s to 19s prem.

Notice has been published in the *Gazette* that interest on the Exchequer bills, due in June next, will accrue at the rate of 3 per cent. per annum, on and after the 1st January proximo.

At the bidding for 50,000*l* Natal Government 6 per cent. debentures on Tuesday, the tenders received by the Crown Agents for the Colonies amounted to 24,000*l* only, and at rates varying from 91 to 101. 20,000*l* were allotted at and above the official minimum 97.

At the special general meeting of the proprietors of the Bank of England, on Wednesday, Mr Thomas Baring was elected a director in the place of the Right Hon. George Joachim Goschen, who had retired on accepting the office of Vice-President of the Board of Trade.

Foreign Stocks.—Business is still upon a limited scale, and prices remain dull. The closing quotations of stocks dealt in to-day are subjoined :—5 per Cent. Brazilian scrip, 1½ to 1¾ prem. 7 per Cent. Danubian, 74 to 76. 7 per Cent. Egyptian, 92 to 93; ditto, 1864, 91½ to 92. 5 per Cent. Greek, 15¾ to 16¼. 3 per Cent. Mexican, 24⅝ to 24⅞. 5 per Cent. Moorish, 93 to 95. 4½ per Cent. Peruvian, 72 to 74. 3 per Cent. Portuguese, 46¼ to 46½. 5 per Russian, 1822, 89 to 90; 4½ per Cent. ditto, 1860, 89; 5 per Cent. ditto, 1862, 88 to 89. 5 per Cent. Sardinian, 72 to 74. 3 per Cent. Spanish, 44 to 45; ditto, 3 per Cent. Deferred, 37½ to 38½; ditto, Passive, 27¼ to 27½; ditto, Certificates, 14⅝ to 14⅞. 6 per Cent. Turkish, 1858, 70⅓ to 71½; ditto, 1862, 71½ to 72½; 5 per Cent., 1865, 43 to 43½. 6 per Cent. Venezuelan, 1862, 36 to 38; ditto, 1864, 36 to 38. 5 per Cent. Italian, 65 to 65½.

The price of French Three per Cent. rentes, telegraphed this evening from Paris, is 69f 10c for money, and 69f 17c for the account.

The contract for the new Turkish loan was issued on the 14th inst. in Paris. Bonds of the nominal amount of 500f will be issued at 330f, bearing 30f interest. The loan will be redeemed at par in 42 half-yearly drawings.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks on last Friday and this day :—

	CONSOLS. Money. Lowest.	Highest.	Account. Lowest.	Highest.	Exchequer Bills

RAILWAYS AND OTHER SHARES.—Operations in the English railway market continue to be few and unimportant. The result of the South-Eastern Railway meeting has produced a further decline in the shares. Caledonian stock has fallen 1½ per cent. Great Eastern 42½ to 43½. Great Northern ½ per cent. South Western stock has declined 4 per cent. Great Western 1 per cent. Lancashire and Yorkshire is ½ per cent. lower. London and Blackwall steady, at 88 to 90. London and North-Western ¼ per cent lower, at 125 to 125½. Metropolitan rather firmer, after having been dull, Midland stock is 1¾ per cent. lower. South-Eastern is 2¼ per cent. lower, at 74½ to 75¼.

In Indian stocks, prices have scarcely varied. The rates for money on deposit being high, the temptation to investors is not so strong, and the abundance of new shares of joint stock and other companies also tends to reduce the investments in guaranteed securities.

Business in foreign railway shares is of insignificant amount.

In banking shares, prices remain dull. The shares of the Alliance Bank have declined to 3 to 4 premium.

In miscellaneous shares there is a rise in Hudson's Bay, which have advanced to 17. Generally, and with very little exception, prices are dull.

Subjoined is the usual list of the closing prices of the principal railway shares on last Friday and this day :—

RAILWAY DIVIDENDS.—The dividend proposed on London and Greenwich Railway stock is at the rate of 1*l* 7s 6d on the original stock, or 5s 6d per share, free of income tax.

FOREIGN EXCHANGES.—The improvement on Tuesday's rates was fully maintained, with, in a few cases, a further disposition in advance.

SETTLING DAYS.—The following notice has been posted in the Stock Exchange :—

Application having been made to the Committee to fix a special settling day for transactions in the shares of the Anglo-Greek Steam Navigation and Trading Company (Limited), and evidence having been heard thereon, it was resolved "that a special settlement be refused."

BULLION.—The following is the weekly circular of Messrs Pixley, Abell, and Langley on the transactions in bullion during the week, and in Indian rupee paper :—

Gold—The demand for gold has been exceedingly active this week, and as the arrivals have been but small, the large amount of 868,000*l* in bars and coin has been withdrawn from the Bank; on the other hand, 50,000*l* in sovereigns have been sent in. The continental exchanges are now slightly firmer, and the export may probably be diminished. The MacGregor Laird brings 8,400*l* from Africa; the Bavaria brings 27,600*l* from New York; the Arago brings 67,200*l* from ditto; the City of London brings 5,300*l* from ditto; the Atrato brings 72,000*l* from the West Indies. The Delta has taken 15,000*l* to Bombay, and the West India steamer took 300,000*l* in sovereigns to the Brazils. The Messageries steamer, leaving Marseilles on the 19th inst., will also take about 151,000*l* to Alexandria. The Great Britain, from Melbourne, has about 500,000*l* on board, and as she left on the 24th October, may be considered as due about the 20th inst.

Silver—An active business has been done during the week in bars for India, and the Delta has taken 344,700*l* to Bombay. The price has improved to 61⅜d per oz standard, at which rate a large additional sum has been sold for shipment via Marseilles; the anticipation of dearer money somewhat checked purchases to-day, and we quote the price as 61 9-16d to 61⅜d per oz standard. The Atrato has brought 96,800*l* from the West Indies.

Mexican Dollars.—In the absence of arrivals in the early part of the week, purchases of dollars were effected at 60½d per oz, holders asking 60¼d per oz; the price is now nominally 60⅜d per oz, with sellers at that rate. The French steamer has brought about 20,000*l*, and these are now on the market. The Messageries steamer has taken 22,000*l* to China.

Exchange on India for drafts by the banks at 60 days' sight may be quoted 2s to 2s 0¼d Bombay; 1s 11¾d to 2s Calcutta and Madras: sight drafts 2s 0⅜d to 2s 0¼d.

India Government loan notes remain without much change, and may be quoted 107 to 109 for 5½ per Cents.; 100 to 102 for 5 per Cents.; and 87 to 89 for 4 per Cents.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std, last price; ditto, refinable, 77s 11½d per oz std, last price; Spanish doubloons, 74s to 74s 6d per oz; South American doubloons, 73s 9d to 73s 10d per oz; United States gold coin, 76s 3½d per oz, last price. Silver—Bar silver, 5s 1 9-16d per oz std; bar silver, containing 5 grs gold, 5s 1⅝d per oz std; Mexican dollars, 5s 0⅜d per oz, last price; five-franc pieces, 4s 11⅜d per oz, last price. Quicksilver, 8*l* per bottle; discount, 3 per cent.

FAILURES AND MERCANTILE EMBARRASSMENTS.—The resolution for the winding up of the Cambrian Consolidated Gold Mining Company has been confirmed, and Mr J. C. Goodman, the secretary, appointed liquidator.

The Vice-Warden of the Stannaries at Exeter will hear a petition for the winding up of the South Creuver Mining Company on the 28th inst.

PUBLIC COMPANIES.—An extraordinary general meeting of the City of Milan Improvements Company was held on Monday, for the purpose of altering the constitution of the company to that of a Societa Anonyma. It is proposed to give currency to the shares on the continental markets and to extend the enterprise under its control.

At the meeting of the London and River Plate Bank (Limited), held on Monday, the directors' report, recommending a dividend of 5 per cent. and a bonus of 5 per cent., was adopted. 6,144*l* 10s 1d was carried to new account. 20,000 new shares of £25 each are to be issued at 30s premium to shareholders registered on the books of the Company on the 16th December, 1864.

The dividend declared on the Australian Land Mortgage and Finance Company (Limited) is at the rate of 12½ per cent. per annum, free of income tax, for the half-year ended 30th June last.

A dividend of 5 per cent., free of income tax, has been declared by the directors of the Chartered Mercantile Bank of India, London, and China; making, with the dividend of 8½ per cent. paid in July last, 13½ per cent. for the year.

The English and American Bank (Limited) is intended to transact exchange business between Great Britain and America, and more especially in the latter country, where a large field for such a bank exists. Twenty-five thousand shares have already been taken. The first issue is 30,000 shares, so that only 5,000 are now offered to the public. Arrangements have been made with the Oriental Bank and the Union Bank of London to enable it to commence exchange business in America and elsewhere on the best footing. The capital is 1,800,000*l*, in 60,000 shares of 30*l* each.

The Colonial Company's shares are ½ to 1 premium.

Official letters received by the last mail state that Colonel

Digitized by Google

N. W. Elphinstone had assumed the charge of the agency of the Punjaub and Delhi Railways on the 31st October. Colonel Elphinstone had for many years held high office under the Government of the Punjaub, and has earned a distinguished reputation for his administrative ability and for his successful exertions in introducing education amongst the natives.

The Commercial Company of Africa (Limited), capital 300,000*l*, present issue 200,000*l* in 20,000 shares of 10*l* each, has been formed for the purpose of conducting, on a large scale, the trade in the Bights of Benin, Biafria, the river Niger, and other parts of Africa, where a very large commerce is carried on in palm oil, palm nut kernels, gold dust and ivory, and other produce. This company is to take over without payment the goodwill and business connections of the London and African Trading Company; and the directors of the new company have reason to believe that the shareholders in the London and African Trading Company will subscribe for shares in this company nearly equal to the working capital at present wanted in that undertaking.

The Tees and Continental Steam Shipping Company (Limited) is formed to establish steam communication between Middlesborough and various continental ports. It is, in the first instance, proposed to establish lines of steamers to Hamburg and Rotterdam. The capital of the company is 250,000*l* in 10,000 shares of 25*l* each.

The new banking house, of the Union Bank, in Chancery lane (corner of Carey street) being now completed, the business of their Temple bar branch will be removed to that place on Wednesday, the 20th instant.

The Exchange and Discount Bank (Limited), Leeds, capital 200,000*l*, in 20,000 shares of 20*l* each, is designed to take over the business of Messrs Cousins and Allen in that town. That business has been carried on upon the principle of making it the interest of the customer to pay in money to his account, and as this is the true principle of banking, has probably thriven in consequence.

The Anglo-Romano Water Company is intended to conduct to Rome the water of the springs at Arsoli, known as the Aqua Marcia and Regina Aquarum of the ancient Romans. Water in Rome is very scarce, and is dealt with as property, in the same manner as land or houses, and it is therefore presumed that any addition to it will be of great utility to society, and great value to the introducers. The capital of the company is 200,000*l*, in 10,000 shares of 20*l* each. First issue, 7,500 shares.

At a special general meeting of the Guardian Fire and Life Assurance Company, held this day, which was numerously attended, a bill, to be introduced into Parliament in the next session, to enable the Company to reduce their paid-up subscription capital, and for other purposes, was unanimously approved.

Miscellaneous.—The amounts nominally assigned for the redemption of Passive stock at Madrid on the 30th instant are as follows:—

75,000	Escudos	for 1st class	interior stock
48,885,300	Mils	— 2nd	— —
1,359,456,200	Mils	— 2nd class	exterior stock

The mail from Guayaquil has brought a remittance of 1,168*l* 11s 11d on dividend account of the debt of Ecuador.

Tenders will be received up to 12 noon on Wednesday, the 20th instant, in conformity with the agreement of the 25th March, 1861, for the redemption of the New Granada foreign debt. The amount applicable to the redemption for December, 1865, is 3,460*l*, of which 2,306*l* 13s 4d for the active, and 1,153*l* 6s 8d for the deferred debt.

The numbers of 136 bonds for 70,900*l* of the Turkish Six per Cent. loan of 1858 were drawn on Tuesday last, and are advertised for payment at par on the 1st March proximo.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 1 per mille premium, and the short exchange on London is 25.12½ per 1*l* sterling. On comparing these rates with the English Mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is nearly 3-10ths per cent. dearer in Paris than in London.

The course of exchange at New York on London for bills at 60 days' sight is about 109 per cent. At this rate there is no profit on the importation of gold from the United States.

POST OFFICE ANNOUNCEMENT.

Information has been received from the Spanish Post Office, that the laws of Spain forbid the transmission by the post within that country, of letters or packets containing watches, jewelry, or other articles of value which are liable to Customs' duties, and, that, if any such letters or packets shall be forwarded in the mails to Spain, they will not be delivered but sent back from the frontier. The Postmaster-General thinks it necessary to make this regulation known to the public, in order to warn persons against sending by the post to Spain any articles which are liable in that country to Customs' duties.

CORN IMPORTED AND EXPORTED.

An Account showing the quantities of the several kinds of Corn and Meal imported into each division of the United Kingdom; and the quantities of British and foreign Corn and Meal, of the same kinds, exported from the United Kingdom, in the week ended the 9th December, 1865.

COMMERCIAL EPITOME,

FRIDAY NIGHT

The supply of English wheat on sale at Mark lane to-day was very moderate, yet the trade was slow at Monday's currency. Foreign wheat, of which there was a fair supply on offer, was in limited demand at late rates. The supply of barley was tolerably large, and the trade ruled quiet at former prices. Malt was in limited request at full prices. Oats were in large supply, and the trade was less active, on rather easier terms. Beans and peas ruled firm at full currencies. Flour moved off slowly at late rates. This week's imports amount to 9,830 qrs of wheat, 4,970 barley, 68,040 oats, 440 sacks and 1,420 barrels of flour.

At Liverpool, this morning, wheat and flour were in slow request, at previous rates. There is a good demand for maize on rather higher terms. At Wakefield, the wheat trade is quiet, at late rates.

There has been a fair extent of business transacted in the Liverpool cotton market during the present week, the total sales amounting to 80,000 bales, of which the trade have taken 46,000 bales, exporters 22,000 bales, and speculators 12,000 bales. Quotations remain unchanged from Friday last. Yesterday, when the Bank had decided not to raise their rate, the market became very buoyant, and a very large business was done, at a general advance of ¼d to ½d per lb upon the prices of the day previous. To-day, however, upon receipt of later news from America, reporting a decline of 2c in New York quotations, the market has become suddenly dull, and the advance of yesterday has been partially lost.

Intelligence from Bombay, via the Persian Gulf, is to Dec. 1. At that date the cotton trade was very firm, Dhollerah produce being quoted at 420 rupees per candy. The week's exports had amounted to 39,000 bales. Freight to Liverpool was 35s per ton.

Advices from Galveston, Texas, are to Nov. 18. The cotton trade was very firm, and higher prices were demanded. Middling quality was quoted at 27 to 30c per lb in gold. The stock in hand was 20,702 bales.

We learn from New Orleans, to Nov. 30, that the cotton trade was firmer, on higher terms. The stock on hand was 133,254 bales, against 5,541 bales last year. The following table shows the extent of the arrivals and shipments of cotton, from Sept. 1 to Nov. 21, in each of the last ten years, as well as the stocks on hand at the close of these periods:—

Year.	Arrivals.	Exports.	Stocks.
1865	24,275	192,860	133,254
1864	11,168	10,202	5,541
1863	31,577	21,626	...
1862	1,049	1,750	...
1861	1,789	...	11,907
1860	627,623	385,863	315,744
1859	709,698	401,380	334,340
1858	594,830	329,029	296,031
1857	379,596	109,680	197,237
1856	536,690	263,329	280,335

From Savannah we have intelligence to Nov. 23. Middling cotton was quoted at 47c to 49c; and Sea Island at 85c to 125c per lb. The receipts since Sept. 1, including the supply on hand at that date, had amounted to 61,118 bales, and the exports to 58,619 bales, leaving a stock of 2,509 bales.

Very little change has taken place in the value of colonial and foreign grocery since last we wrote. The demand has been somewhat more active, and prices have ruled firm. The leading feature of the week is an improved inquiry for raw sugar, resulting in a fair amount of business at, in some instances, a slight advance in prices, as compared with last week. The tea trade has been rather quiet; nevertheless, previous quotations are supported. Advices from China state that the export to Great Britain had amounted to 81,500,000 lbs. Coffee, in the early part of the week, was very firm, but the market closes with less activity, and inferior plantation Ceylon produce has slightly declined in price. Rice is a dull inquiry; but for dry fruit there is good demand, at fully late rates. There has been a tolerably active market for rum, and prices have ruled firm.

IMPORT and DELIVERY of TEA in London, from Jan. 1 to Nov. 30, 1864 and 1865, with STOCK on hand on Dec. 1, 1864 and 1865.

Silk is decidedly less active; the amount of business doing is very moderate, and, in some instances, sales have been effected at rather lower prices. The annexed table, from Messrs Durant and Co.'s circular, shows the state of the silk warehouses on the 15th inst.:—

STATE of the SILK WAREHOUSES.

Chinese thrown	1	60	110	953

From Shanghai, we have intelligence to Nov. 9. The amount of business passing in silk was limited, at about previous quotations. The export since the opening of the season had been 24,375 bales.

Messrs Arles Dufour and Co., writing from Lyons on the 12th inst., thus allude to the state of the silk trade:—During the past month important purchases of goods have been made, and orders have been placed for the European spring trade. Manufacturers, seeing their unsold stock considerably decreased, have been encouraged to lay in fresh supplies of raw material, the stock of which is decidedly small everywhere, principally as regards all superior descriptions. The deliveries through the condition house were 4,300 bales, against 3,605 bales; in November, 4,400 bales, against 2,870 bales last year.

At Zurich, last month, a very moderate business was transacted in silk. Prices, however, ruled firm, and, in some instances, fine qualities realised rather more money. During the nine months ending Nov. 30, 772,610 lbs passed the condition house, against 872,463 lbs last year, and 901,744 lbs in 1863.

Copper is very firm, and the late advance in prices is fully supported. Scotch pig iron has advanced to 62s 6d per ton cash, mixed numbers, whilst other metals rule firm in value. The oil trade has been rather quiet; linseed oil is selling at 38s 6d to 38s 9d; but foreign-refined rape commands 58s per cwt. French spirits of turpentine are selling at 46s per cwt, on the spot. American-refined petroleum is quoted at 3s 6d to 3s 6½d per gallon. The tallow trade is steady, at 49s 3d to 49s 6d for P.Y.C., on the spot.

Advices from New York to Dec. 2 state that a slight fall had taken place in the value of cotton goods, but that the market exhibited more activity, buyers having shown increassd di position to operate at the reduction. The demand for the raw material had been somewhat inactive, and prices were rather drooping. In the various articles of food and drink, a fair business had been transacted, chiefly for home consumption, at full prices. The export demand for breadstuffs had been very moderate. In the money market, there had been a fair amount of activity; the rate of discount for the best short-dated paper was 7 per cent. The fluctuations in the premium on gold had been from 46⅞ to 48 per cent. The stock of bullion in the banks of New York city on the 25th ult. was 2,468,710*l*, whilst the balance in the Sub-Treasury amounted to 13,736,010*l*. The shipments of specie, from Jan. 1 to Nov. 25, were 5,443,730*l*, against 8,804,630*l* in 1864, and 8,218,600*l* in 1863.

In the wool trade, both as regards home-grown and colonial produce, a very moderate business has been transacted, but at full prices. Hemp is steady, at 34*l* for clean Russian qualities. Flax fully supports last week's currency.

THE COTTON TRADE.

LIVERPOOL—Dec. 15.

The cotton market was quiet on Saturday, waiting further American advices, and a concession was submitted to of about ½d per lb. On Monday the demand revived upon accounts per Persia of diminished receipts in the American ports, and with further advices since to the same effect, although accompanied by lower quotations, a large business has been transacted daily. Prices have rallied, and the week closes with animation, partly attributable to the Bank rate not having been raised. Sea Island has been in good request at previous rates. American, after receding ½d per lb in the early part of the week, became decidedly firmer, and closes at ½d per lb above last week in the ordinary and middling qualities. Brazil has not varied throughout the week, but is now in much improved demand. Egyptian, after great heaviness and a decline of about ½d per lb in the early part of the week, is quoted ¼d to ½d in middle qualities and 1d in the lower descriptions above former rates. Smyrna has been in good request, without material change in value. East India was freely offered at lower rates, but as the demand increased prices fully recovered, and have advanced about ¼d per lb in the better qualities; the lower descriptions are firmer, but not quotably dearer. With China and Japan, the market is very moderately supplied at partially higher rates.

The transactions, to arrive, during the last few days have been very large, prices corresponding to the market, on the spot; the last quotations were this day, for New Orleans, middling, ship named, 21½d and 21¾d per lb; Upland, middling, at sea, from Savannah, 21¾d; bales, ship named, from New York, 21½d; Egyptian, fair, December shipment, 23½d; ship named, 23⅝d; fully fair, 24d; Smyrna, sample guaranteed, ship named, 17d; Dharwar, fair, ship named, 18d; Dhollerah, middling fair, ship named, 16d; sample guaranteed, 17d; fair landing, 17d; from quay, 17½d; Oomrawuttee, fair, September sailing, October sailing and ship named, 17d; new crop, January or February shipment, 17d; Comptah, fair, ship named, 17d; Tinnevelly, good fair, October shipment, 17d; Western Madras, fair, ship named, 17d; Bengal, fair, November or December shipment, 12d per lb.

The sales of the week amount to 80,390 bales, including 11,770 on speculation, and 22,260 declared for export, leaving 46,360 bales to the trade. The sales to-day will probably amount to about 8,000 bales; the market without change.

LONDON—Dec. 15.

Annexed is a portion of the circular issued this week by the London Cotton Brokers' Association:—During the week there has been a fair demand for cotton, both on the spot and for arrival. Yesterday, when it became known that there was no alteration in the Bank rate, a brisk demand sprang up, and there were more buyers than sellers at the quotations.

NEW YORK—Dec. 2.

We quoted our last market weak, but fairly active at 52c to 54c for middlings. The advices by the Scotia, however, advising a partial recovery on the 18th, of the decline of that week in Liverpool, led to more activity in this market, but prices rather favoured the buyer—the average being about two cents below last week. At the decline there is a good demand, and to-day orders could not be readily filled. Accounts from the Southern markets are uniformly of the same tenor. Steady receipts in the aggregate; feverish and unsettled prices, though the fluctuations quoted are quite small. The sales in this market for the past week are about 16,000 bales. The stock in this market is estimated at 180,000 bales; and in all the ports 400,000 bales. To-day's market closed quiet at the following quotations:—

	New York Classification. Upland. c	Florida. c	Mobile. c	New Orleans and Texas. c
Ordinary ....per lb	41	41	41	41
Good ordinary	42	43	44	44
Low Middling	47	47	48	49
Middling	49	50	50	51
Good middling	52	53	54	55

The receipts of cotton at this market for the week ending Nov. 30 were as follows:—

	bales.		bales.
From New Orleans	426	From Charleston	700
Galveston	2,326	North Carolina	2,000
Mobile	4,896	Norfolk, &c.	1,603
Florida	...	Per railroad	7,257
Savannah	5,513	From foreign ports	5

Total for the week	24,731
Previously reported	441,558
Since July 1	466,289
Same time last year	81,815

The exports of cotton were:—

To Liverpool	6,081
Hamburg	614
Havre	387
Barcelona	167
Total for the week	7,249
Previously reported	134,187
Total since July 1	141,436
Same time last year	3,591

NEW YORK, Dec. 6.—The cotton trade is very inactive: middling Upland is quoted at 50 cents per lb.

MARKETS IN THE MANUFACTURING DISTRICTS.

The amount of business doing in cotton goods, this week, has been moderately extensive, and the quotations have been well supported. There has been a good demand for iron, at full prices. Coals have continued brisk, but chiefly for home consumption.

MANCHESTER, Dec. 14.—This market has had a hardening tendency all the week, supported by a considerable business in yarns, in some instances at ⅛d per lb advance, and by a moderate business in cloths at the full rates of last week. India goods have been dull, there being little temptation to ship thence at the present disparity of rates. For the best China makes of shirtings and T'cloths there continues a fair demand, as also for longcloths and domestics for the Levant and South America. To-day, after the non-advancement of the Bank rate, a decidedly improved feeling was apparent, better prices being looked for to-morrow. The home trade and buyers of printing cloths have been by no means active.

BRADFORD.—The wool market has partially recovered from the late flatness. There is more inquiry, and staplers are very firm. A very limited amount of business is still done in yarns, though the inquiry is gradually becoming rather more general. The principal demand is for lustre yarns. There is no actual increase of business in pieces. A good many foreign buyers have been in the market, but their purchases are not large.

LEEDS.—The woollen cloth markets have been quiet. For hairlists in the white cloth hall there was a slow sale, and only a small business was done in heavy fabrics generally. As to prices there was no noticeable change, and the cloth market, as well as the wool market, is decidedly firm.

ROCHDALE.—The flannel manufacturers keep well employed, and their stocks are in a moderate compass, but merchants are

Digitized by Google

purchasing goods with a rather sparing hand. The Yorkshire goods trade partakes of the general quietness, and the call for such was of a very indifferent character. The prices of all kinds of fabrics are very firm, as are those also of both wool and cotton.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW, YORK, Dec. 2.—The market has been in a very feverish and unsettled state. There has been some speculative demand, but the movement was quite feeble. A considerable portion of the arrivals of flour and wheat, as well as of corn and oats, is in an unsound condition. Flour advanced early in the week, on speculative purchases of sound extra State; but the great quantities of unsound Western seeking buyers caused a reaction, and the market closes dull and heavy. Wheat has sold to a fair extent for export, and a few loads have been sold on speculation, but millers have been compelled to buy sparingly, owing to the state of the flour market. Corn has been one or two cents higher, with large export purchases and some speculation, but closes with the improvement lost. The following are the closing quotations:—Flour—Superfine State and Western, $7.80 to $8.10; extra State, $8.30 to $8.70; shipping roundhoop Ohio, $8.85 to $9.10; extra Western, common to good, $8.25 to $11.40; double extra Western and St Louis, $11 $50 to $16; Southern, supers, $9.15 to $10.40; Southern, fancy and extra, $10.50 to $15.75; Canada, common to choice extra, $8.35 to $11.85; rye flour, fine and superfine, $6 to $6.75; corn meal, Jersey and Brandywine, $4.25 to $4.75 per barrel. Wheat—Chicago spring, $1.65 to $1.81; Milwaukee Club, $1.73 to $1.85; red winter, $2 to $2.35; amber State and Michigan, $2.40 to $2.45. Corn—Western mixed, 90c to 96c: Western yellow, $1 to $1.02 per bushel.

NEW YORK, Dec. 6.—The trade for flour, wheat, and corn is dull, on easier terms.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

Very little English wheat has been received up to our market, this week, coastwise and by land-carriage. Really fine samples have moved off steadily, at full quotations; but other kinds have changed hands slowly, at late rates. The fresh arrivals of foreign wheat have been only moderate. Millers have shown no disposition to increase their stocks; hence, the transactions have been on a limited scale, at about stationary prices. There has been a steady sale for malting barley, at full quotations. Grinding and distilling sorts have commanded very little attention. The malt trade has been moderately active, at quite last week's prices. The imports of foreign oats have been extensive; nevertheless, a fair average business has been doing in them, at the late decline in value. Both beans and peas have continued in short supply, and fair request, at full quotations. The sale for flour has been quiet.

The leading continental markets have been firm for most kinds of wheat, at full prices. The supplies of grain on offer are moderately extensive. Barley, oats, peas, beans, and flour have sold freely. There are now over 400 vessels laden with grain, chiefly wheat on passage from the Black Sea and the Sea of Azoff. American advices still bring high quotations for both wheat and flour.

The following statement, showing the extent of the crops of cereal produce in the Northern States of America, in each of the last three years, has recently been published by the Department of Agriculture at Washington:—

	1863. bushels.	1864. bushels.	1865. bushels.
Wheat	179,404,036	160,695,823	148,552,829
Rye	20,782,783	19,872,975	19,543,905
Barley	11,368,155	10,632,178	11,391,286
Oats	173,800,575	176,690,064	225,252,295
Corn	451,967,959	530,581,403	704,427,853
Buckwheat	15,806,455	18,700,540	18,331,019
Potatoes	100,158,670	96,256,888	101,032,095
Total	953,288,632	1,013,429,871	1,228,501,282

In Scotland, there has been a steady feeling in the demand for wheat and other kinds of produce, at full prices.

The Irish markets have been fairly supplied with most descriptions of produce. On the whole, the trade has ruled steady. The shipments to England have been tolerably extensive.

At Mark lane, to-day the supply of English wheat on sale was very moderate; the trade, however, was slow, at Monday's currency. Foreign wheat was in fair supply, and slow request, at late rates. Barley—of which there was a tolerably large supply in the stands—met a slow sale at late prices. Malt was dull, at late rates. Oats—of which there is a large importation—were dull, and rather lower in price. Beans and peas ruled firm, at full currencies. Flour moved off slowly, at late rates.

The state of the floating trade is thus reported by Mr George Dornbusch:—Arrivals at ports of call since last Friday have been limited to only three cargoes of maize. The trade has been quiet. Wheat 1s lower. Sales:—11 arrived cargoes, viz., Ghirka Taganrog, 43s to 43s 10½d; Odessa, 44s 6d and 45s; Nicolaieff, 43s 6d; Marianopoli, 45s per 492 lbs; Banat from Trieste, 42s 6d per 492 lbs. Maize very quiet, only 3 arrived cargoes sold: Venice, 32s per 492 lbs; Bulgarian and Krail, 30s and 31s 3d per 480 lbs. Barley: 1 cargo Taganrog on passage, B.L. Nov., 25s per 400 lbs for Continent. In rye, beans, and millet-seed, nothing doing. Oats, 18,000 qrs Banat from Trieste, Dec. to Feb. shipment, sold at 23s per 304 lbs. Linseed, Calcutta, on passage, August-September shipment, 66s to 67s 9d per 410 lbs L.A.T.

The London averages announced this day are:—

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—The market has been steady, and prices unaltered. A moderate inquiry prevails from the refiners, but they are not extending their production on account of the relatively low value of dry goods, and the increased quantities of beet sugar offering. Until prices of all kinds more closely approximate, the quotations of cane growth are not likely to improve much. About 1,537 casks West India sold in three days. Barbadoes by auction obtained 34s 6d to 39s 6d. Grainy Demerara obtained 35s 6d to 38s 6d; Berbice, 39s to 42s 6d per cwt. The landings last week were 2,360 tons; the deliveries 3,200 tons, leaving the stock 81,915 tons, against 111,900 tons in 1864 at the same date.

Mauritius.—Several parcels of low quality have sold privately, at full prices, and 4,278 bags by auction partly sold: brown, 28s 6d to 32s 6d; low yellow muscovado kind 33s 6d per cwt. Grainy and crystallised bought in.

Bengal.—1,830 bags offered by auction were chiefly bought in: date sorts, 29s 6d to 32s 6d; black, 27s to 27s 6d; Gurpatta, 33s 6d to 35s. 1,900 bags low date sort are reported privately at 30s per cwt.

Foreign.—There have not been any public sales, and a limited business done by private contract.

Refined.—Dry goods are in steady demand at unaltered quotations.

RUM.—Several sales have been effected at full quotations, including Demerara at 1s 8d to 1s 9d. 300 casks Mauritius, just landed, at 1s 7d per proof gallon. Good to fine qualities of Jamaica are in demand at the late advance.

COCOA.—Grenada has sold freely on lower terms. Nothing of importance has been done in Trinidad. 407 bags Bahia offered by auction were bought in at 44s to 46s per cwt.

TEA.—The new season's congous have continued in fair demand, and business has been done at prices rather under the highest attained for the early arrivals. On Tuesday, 1,354 packages Indian growths sold at about the current valuations.

COFFEE.—A portion of the plantation Ceylon recently landed has met with buyers upon fully previous terms, and the market still presents a very firm appearance. 815 casks 677 barrels and bags were sold as follows: pale and fine ordinary, 76s to 79s; low middling to good, 79s 6d to 85s, up to 90s for superior. 195 casks 1,963 bags native were disposed of: ordinary, 68s 6d to 69s 6d: good to fine ordinary, 70s to 73s 6d. 349 bags Madras sold at 71s 6d to 76s 6d per cwt. The export deliveries continue large, and notwithstanding the very heavy imports, the stock exceeds that of last year by only 1,420 tons.

RICE.—The market is rather quiet, with prices unaltered. White Bengal meets with partial inquiries as the stocks are getting unusually low. Business reported at 15s 3d to 15s 2d. 175 tons Moonghy have been disposed of to arrive at 12s 6d; no allowance for quality. Few transactions reported in soft grain privately. 1,383 bags sea-damaged Necrancie Arracan sold by auction at 10s to 11s 6d per cwt.

Digitized by Google

SPICES.—White pepper has been in good demand at higher prices, and the supply is much reduced. Several parcels have changed hands privately. 336 bags by auction sold with spirit; Singapore, 5⅜d to 5⅞d; Penang, 5⅝d to 5¾d; fine, 6⅜d per lb. The stock is 347 tons, against 475 tons last year, 566 tons in 1863, and 555 tons in 1862 at the same date. Black steady although not active. 640 bags brownish Penang partly sold at 3¼d. 65 cases brown nutmegs chiefly sold, and bold sizes realised higher rates—viz., 3s 9d to 4s 2d; mixed to good brown, 1s 3d to 2s 9d; low taken in at 1s 1d to 1s 2d. 29 cases Penang cloves withdrawn at 1s 3d per lb. Large sales of cassia lignea are declared. 127 bags rough Bengal ginger were sold at 25s. 126 bags African withdrawn, at 41s per cwt.

SAGO FLOUR.—Further speculative business has been done at 15s to 15s 6d per cwt.

SALTPETRE.—Bengal is again inactive. 2,169 bags offered by auction were bought in: refraction 10¼ to 4¼, 24s 6d to 25s 6d per cwt. A limited quantity has sold by private contract.

LAC DYE.—The market is very firm. Various parcels offered by auction sold at 10d to 11½d: ordinary native at 7d per lb.

METALS.—There has been a steady market, with business of moderate extent passing, but not much speculation. Quotations of British copper are quite nominal. Several contracts have been made in foreign at about former rates. Iron is steady. Scotch pig has advanced to 62s 6d per ton mixed numbers. A few contracts have been made in foreign tin: Straits, at 96*l* 10s to 97*l* per ton cash, on short prompt.

HEMP.—Manilla has been less inquired for at the recent high rates, but the holders continue very firm.

JUTE.—There is a firm market, and some large sales have been effected on the spot and to arrive at full prices.

OILS.—The demand for linseed has not improved. Oil for immediate delivery quoted 38*l* 10s to 38*l* 15s; forward delivery, 40*l* to 40*l* 10s. Foreign brown rape has advanced to 55*l*. A considerable business is reported in English brown forward at 52*l*. Cocoa-nut is dull. Cochin, 51*l* 10s to 52*l*; Ceylon, 48*l*. Fine palm, which is scarce, commands 44*l* 10s per ton for fine Lagos. Nothing of interest has occurred in sperm: 117*l* per tun the nearest value.

SPIRITS TURPENTINE.—French drawn has declined to 46s per cwt. under the influence of a good arrival.

LINSEED.—The market is steady, but not much business passing. Calcutta on the spot is worth 67s 6d; Patna and Mirzapore, 69s; and Bombay, 70s. For arrival, 68s is the nearest price of Calcutta, and 500 tons Bombay, November-December shipment, are reported at 70s 3d. A cargo of Black Sea, shipped or shipping, sold at 66s 6d.

PETROLEUM.—Refined Pennsylvanian quoted 3s 6d to 3s 8d. For the first four months of 1866, 2s 11d to 3s per gallon.

TALLOW.—Foreign is rather quiet. This morning, 1st sort Petersburg Y.C., is quoted 49s to 49s 3d; January to March, 49s 3d to 49s 6d; March only, 50s 6d to 50s 9d per cwt.

PARTICULARS OF TALLOW.—Monday, December 11, 1865.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market is firmer to-day. 2,000 bags grainy Madras Jaggery sold privately at 30s 3d. 1,300 bags clayed Manilla, out of condition, at 33s 9d. 1,965 bags Mauritius, offered by auction to-day, partly sold on previous terms, and several parcels West India realised full rates. The week's business amounts to 2,400 casks.

COFFEE steady. The public sales of Ceylon went off without much animation. Native was a shade cheaper. 679 casks 2,085 bags plantation and native chiefly found buyers.

TALLOW.—820 casks Australian, by auction, part sold at 47s to 47s 6d per cwt for good beef. Town unaltered.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar continues very quiet, prices have a tendency to decline. Dutch crushed continues steady, but nothing doing.

DRY FRUIT.—All fruit is remarkably dull for the season, the only article in slight demand being Valencia.

SEEDS.—The seed trade is slack at this season of the year; prices of clover keep firm, and trefoil is rather dearer, but other seeds are steady both in value and demand.

ENGLISH WOOL.—More demand for Down sorts.

COLONIAL WOOL.—No changes since close of late sales.

FLAX.—Market firm.

HEMP.—Market very dull during the week.

SILK.—Market very quiet, but prices much the same; demand limited, as is always the case at the close of the year.

TOBACCO.—The market has presented no change in character, prices remain steady and firm for all descriptions.

TIMBER.—The market overweighted with stock, the docks being so full as to be obliged to refuse laden ships. Prices are generally lower, especially of Swedish deals and fir timber; the exception is in Canadian fine deals, of which the supply is limited, and the prices have improved. American spruce deals are held for better prices. Quebec staves have risen in consequence of the assumed demand for petroleum casks. Teake timber is rather lower, the stock being heavy.

LEATHER AND HIDES.—Since our last report the leather trade has assumed the dull aspect usual in December; and at Leadenhall on Tuesday the same slowness prevailed. The supplies, however, were small, and the only change that can be quoted in prices is a slight reduction in light sole leather.

METALS.—Business has been fairly active in metals all the week. Copper has held a leading position, and a good deal of all kinds has changed hands. Iron is very steady, with rather an upward tendency in prices. Tin keeps firm to quotations, with moderate business. Spelter is buoyant, and again rather dearer to buy. Lead is much inquired for, and higher prices paid. Tin plates are firm at the highest.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	51	6
Fat by ditto	2	6½
Yellow Russia	50	9
Melted stuff	40	0
Rough ditto	2?	6
Greaves	2?	0
Good dregs	6	0

METROPOLITAN CATTLE MARKET.

MONDAY, Dec. 11.—The total imports of foreign stock into London, last week, amounted to 17,450 head. In the corresponding week in 1864 we received 13,802; in 1863, 9,040; in 1862, 4,496; and in 1861, 4,592 head.

Notwithstanding the prevalence of the disease in cattle, and the heavy losses sustained by the graziers in the leading agricultural districts, the supply of beasts on sale here to-day for Christmas consumption was large, and, with some few exceptions, in prime condition. The numbers, it is true, were not quiet equal to some previous years; consequently, the actual weight of meat did not exceed what may be termed a full average, nevertheless, when we consider the great excitement caused by the progress of disease and the amount of stock held in most parts of England, the show was a very good one. In some parts of the country the crop of hay this year has turned out deficient, but it must be admitted that the past has been a most favourable season for the production of live stock. There has been great heat, a fair supply of moisture, an abundance of grass, taking the country generally, and an enormous crop of swedes and mangolds; the only drawback, in point of fact, having been a partial failure of the turnip crop. The unusually high prices realised for stock during the whole of the present year, although we have imported largely from the Continent, have had the effect of securing for metropolitan consumption a larger supply of beasts than was at one time anticipated. The quotations, however, were against the realisation of large profits by the butcher. Although the attendance of both town and country butchers was extensive, the demand for all breeds of beasts was inactive. In some instances, a few very superior Scots and crosses sold at 5s 6d per 8 lbs; but the general top quotations did not exceed 5s 2d to 5s 4d, and a total clearance was not effected. The supply of sheep was moderate. Prime Downs and half-breds were in fair request at full currencies. Otherwise, the mutton trade was rather heavy at a slight decline in price. The highest figure was 6s 8d per 8 lbs. There was a fair show of calves which changed hands slowly at late rates—viz., from 4s to 5s per 8 lbs. The pork trade was far from active, nevertheless prices were supported. The arrivals of beasts from Lincolnshire, Leicestershire, and Northamptonshire comprised 2,500 Shorthorns, &c.; from other parts of England, including Norfolk, 1,300 various breeds; from Scotland, 1,300 Scots and crosses; and from Ireland 300 oxen and heifers.

SUPPLIES.

	Dec. 12, 1864.	Dec. 11, 1865.
Beasts	7030	7530
Sheep	21750	21810
Calves	210	12
Pigs	390	370

THURSDAY, Dec. 14.—Our market to-day was heavily supplied with beasts, in for the most part prime condition. All breeds changed hands slowly, at a decline in the quotations compared with Monday of 2d per 8 lbs. A few very superior Scots and crosses sold at 5s 4d, but the general top figure was 5s 2d per 8 lbs. The show of sheep was tolerably extensive. The demand was heavy, and inferior breeds were rather lower in price. The best Downs realised 6s 8d per 8 lbs. Calves were in moderate supply and fair request at our quotation. The sale for pigs and milch cows was very inactive at late rates.

Per 8 lbs to sink the offal.

COAL MARKET.

FRIDAY, Dec. 15.—Wallsend Haswell 22s—Hetton 22s—Hartlepool 21s 9d—East Hartlepool 21s 9d—Tees 21s 9d—Acorn Close 20s 6d—Byron, 20s 6d—Caradoc 21s 3d—Cassop 21s 6d—Gosforth 20s 6d—Harton 20s 6d—Heugh Hall 21s 3d—Kepier Grange 20s 9d—New Belmont 21s—Pittington 19s 6d—Penshor Primrose 20s 6d—Russell's Hetton 20s 9d—South Kelloe 21s 3d—Tunstall 20s 6d—Buddle's West Hartley 19s—Cowpen Hartley 19s—Hastings' Hartley 19s 3d—Tanfield Moor Butes 16s 3d. Ships at market, 69; sold, 27; gas contracts, 26—53; unsold, 16; ships at sea, 45.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Dec. 15.—The same quiet tone which prevailed in our market during last week still continues, as buyers purchase but sparingly and for the supply of immediate wants only; same time there is no change in prices, holders being very firm in their demands.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Dec. 15.—The market was fairly attended. Wheat and flour slow of sale, and prices are nominally unaltered. Indian corn improving in value and demand good; mixed, 30s. Beans steady. Oats and oatmeal firm, at former rates.

The Gazette.

TUESDAY, Dec. 12.

BANKRUPTCY ANNULLED.

N. Ballard, Farringdon.

BANKRUPTS.

J. Beattie, Stanley road, Ball's pond, attorney—W. T. Bryant, Vale place, Hammersmith road, hairdresser—T. Clark, Victoria grove road terrace, Bayswater, picture dealer—S. T. EPITOME OF RAILWAY NEWS.

TRAFFIC RECEIPTS.—The traffic receipts of railways in the United Kingdom amounted for the week ending the 2nd of December on 12,299 miles, to 648,803*l*, and for the corresponding week of last year, on 11,889 miles, to 610,632*l*, showing an increase of 410 miles and of 33,171*l*. The gross receipts on the 14 principal railways amounted in the aggregate, on 8,808 miles, to 541,852*l*, and for the corresponding week of 1864, on 8,489 miles, to 511,835*l*, showing an increase of 319 miles and an increase of 30,017*l*.

RAILWAY PASSENGERS.—The total number of passenger tickets issued by the railway companies of the United Kingdom last year was 229,272,165. In 1863, it was 204,699,466; in 1862, 180,485,727; in 1861, 173,773,218; in 1860, 163,483,572; in 1859, 149,807,148; in 1858, 139,193,699; in 1857, 139,008,888; in 1856, 129,347,592; and in 1855, 118,595,135.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, Dec. 11.—In the share market to-day extreme dulness prevailed, and all the descriptions closed with a tendency to depreciation. In English railways, Caledonian and Great Eastern declined 1 each, ditto (East Anglian) and Metropolitan District ¼ each, and Great Northern (A stock), Great Western, Lancashire and Yorkshire, North-Western, Midland, North British, North-Eastern (York), North Staffordshire, and South-Eastern ½ each. In colonial, Grand Trunk of Canada further improved ½; ditto (2nd preference) relapsed 1; and Great Indian Peninsula declined ½, Madras (4½ per cent.) 1, and East Indian (J extension) ¼. In foreign, Northern of Buenos Ayres receded 1, Dutch-Rhenish (paid up) ½, Ottoman ¼, and Antwerp and Rotterdam, Namur and Liege, and Lombardo-Venetian ⅛ each. In American, United States (5-20) and Erie shares (paid up) relapsed 1 each, ditto (debentures) declined ¼, and Illinois Central (shares) 1¼. In British mines, Hingston Downs relapsed ¼, and Great Wheal Vor receded ½. In foreign mines, Cobra Copper declined 2, St John del Rey 1, and Kapunda ½.

TUESDAY, Dec. 12.—In the share maket to-day foreign railways were the only description which did not show further depreciation in the closing prices. In English railways, Great Eastern recovered ½; and Glasgow and South-Western declined 1, Manchester, Sheffield, &c., North-Eastern (Berwick), and ditto (Leeds) ½ each, Metropolitan and Great Western (South Wales) ¼ each, ditto (original) and North-Western a further ¼ each, and Midland further ¾. In colonial, Grand Trunk of Canada further improved ¼; and Cape Town and Docks declined 2½, Buffalo and Goderich 2, Demerara 1, Melbourne and Hobson's Bay ½, Great Western of Canada (new) ¼, and Buffalo and Lake Huron ½. In foreign, Lombardo-Venetian recovered ¼, and Antwerp and Rotterdam ⅛; Paris and Mediterranean improved ⅛, and Pernambuco declined ½. In American, Virginia (6 per cent.) receded ½, and Erie shares (paid up) and ditto (debentures) a further ¼ each. In British mines, Wheal Seton declined 5, Margaret 2, East Bassett, North Roskear, and West Caradon 1 each, Chiverton and Great Laxey ½ each, and East Carn Brea and East Grenville ¼ each. In foreign mines, Cape Copper declined ¼, and Colne Copper a further 1.

WEDNESDAY, Dec. 14.—In the share market to-day the amount of business was again small, but the movements in the closing prices, as compared with those of yesterday, showed average steadiness in nearly all the descriptions; in miscellaneous shares the tendency being, however, slightly on the side of firmness. In English railways, Manchester, Sheffield, &c., recovered ¾, and Great Northern (A stock) and North-Western ½ each; Great Eastern relapsed ½; and South-Eastern declined ¼, Lancashire and Yorkshire ½, and North British a further ½. In colonial, Grand Trunk of Canada further advanced ½; and Great Western of Canada declined ½, and Madras (5 per cent.) ½. In foreign, Northern of France improved 1, and Southern of France ½; and Bahia receded ½. In American, United States (5-20) improved ½. In mines, there was no alteration.

THURSDAY, Dec. 14.—In the share market to-day this was the preparation for the settlement in the middle of this month, and the tendency of the movements in the closing prices was towards firmness, the transactions in English railways being chiefly for the account, while those in the other descriptions were about equally divided between money and account. Of the English lines, Lancashire and Yorkshire recovered ¾, Glasgow and South-Western and North-Eastern (Leeds) advanced 1 each, ditto (Berwick), ditto (York), Great Western, and North Staffordshire ½ each, Midland ¼, and Great Northern (A stock) and North-Western a further ½ each.

FRIDAY, Dec. 15.—The railway market was flat to-day, and prices were lower in several instances. Midland stock declined ⅜ per cent., and Great Western, London and North-Western, Lancashire and Yorkshire, South-Eastern, and Great Eastern, ¼.

TO GENTLEMEN SEEKING preparation for Woolwich, the Civil Service, and the Line.—A Graduate of Oxford, who has had long experience in preparing for the competitive and University examinations, and has three students at present, wishes to receive two more. Delightful situation, great educational and domestic advantages, and moderate terms.—Address, L. L. D., 9 Leighton rescent, Tufnell park West, N.W.

Just published, 1s., Illustrated, Second Edition

THE HEAD AND HEART LEGACY.

"Possessed of a Head, and a Heart, and a business education, I should not be grieved did circumstances compel me to take thee by the shoulder, pat thee on the back, bless thee, put £50 in thy pocket, and say to thee, Go, my son, thou art a rich man, wherever thou goest prosperity will be in thy track.'"—HEAD AND HEART LEGACY.

OPINIONS OF THE PRESS.

The book is clear and simple, highly moral in tone, and most encouraging to the young aspirant. It is interesting as a biographical sketch of a life struggle, and contains many observations on men and manners which it would be profitable for every one to know who has the least ambition or desire of having a soul above his buttons, and a good account at the bank."

"This is a work quite sui generis. It is quaintly written, but is full to an overflow of the wisdom of experience and the impulse of virtue. To all who have heads and hearts' we commend this singular 'legacy.'"

"The author of this legacy has put together some very touching stories of his chequered life intending to stimulate the rising generation to good conduct and honourable dealing, by showing how an untaught boy rose step by step to a high position. He enjoins patience and vigilance, honesty and sobriety, in every path of life, and teaches what is so little practised—that a man should do what his hands find for him to do. The lessons are alike honourable to the head and heart of the writer."

"Besides the autobiographical sketch, Pamphilius supplies a variety of spirited literary specimens, the principal of which, however, is an ingenious manual of French Grammar, as used by the author when teacher of the French language, designed for the use of self-instruction."

Any one acquainted with the current literature of the metropolis, or its littérateurs, will have no difficulty in identifying the author of this interesting volume. The pages abound with sensible observations, attention to which will be found absolutely necessary to gain even a moderate share of success in this busy worldof ours."

Ward, Lock, and Tyler, 158 Fleet street; and all booksellers.

PRACTICAL OBSERVATIONS on the CAUSES and TREATMENT of CURVATURES of the SPINE. Third edition, price 6s.

AND

Just published, second edition, price 1s 6d,

CASES and OBSERVATIONS illustrative of the beneficial results which may be obtained by close attention and perseverance, in some of the most unpromising instances of Spinal Deformity; with numerous Engravings. By SAMUEL HARE, F.R.C.S., &c.

"We unhesitatingly commend this work as a truthful and trustworthy statement of the power of scientific surgery and medicine over some of the most grievous hindrances to human activity and industry."—MEDICAL GAZETTE.

"Mr Hare is, we think, a sound and successful practitioner."—MEDICAL CIRCULAR.

"The author has had much success in his plan of treatment, and we are of opinion that the principles on which he acts, in the treatment of these affections, are correct."—LANCET.

"Mr Hare may take credit to himself for having effected much good in the treatment of the cases described."—BRITISH MEDICAL JOURNAL.

London: John Churchill; and may be had of all booksellers.

MERSEY DOCK ESTATE.
LOANS OF MONEY.

THE MERSEY DOCKS AND HARBOUR BOARD hereby give notice, that they are willing to receive LOANS of MONEY on the security of their Bonds, at the rate of Four Pounds Fifteen Shillings per centum per annum interest, for periods of Three, Five, or Seven Years.

Interest Warrants for the whole term, payable half-yearly at the Bankers of the Board in Liverpool, or in London, will be issued with each bond.

Communications to be addressed to George J. Jefferson, Esq., Treasurer, Dock office, Liverpool.—By order of the Board, JOHN HARRISON, Secretary.

Dock office, Liverpool, Nov. 16, 1865.

LOANS ON DEBENTURES.

JOHN BROWN AND COMPANY (Limited).

Capital, One Million, in 10,000 shares of £100 each.

The Directors are prepared to receive LOANS, for periods not exceeding seven years, at five per cent., on security of their DEBENTURES.

The security consists of uncalled capital, to the extent of £600,000, with all the extensive and valuable property belonging to the Company. It affords a most ample and safe investment for trust and other moneys, all the shares being held by responsible persons. Interest payable half-yearly.

Apply to the Secretary, at the Company's Offices, Atlas Steel Spring and Iron Works, Sheffield.

JOHN HEWETT, Secretary.

VIDONIA.—BRUCE'S BEST OLD VIDONIA, an excellent White Wine, 30s per dozen, bottles included. Other Wines as per price list. WILLIAM S LAWTON, 35 Trinity square, Tower hill, E.C.

NUNN'S MARSALA OR BRONTE WINE, 25s per dozen, £7 4s per six dozen, £12 15s per quarter-cask. Rail paid to any station in England. This wine will be found of superior quality, is soft and old, and, though full flavoured, entirely free from heat or the slightest approach to acidity.—THOMAS NUNN and SONS, Wine, Spirit, and Liqueur Merchants, 21 Lamb's Conduit street, W.C. Price lists on application Established 1801

KINAHAN'S LL WHISKY.—DUBLIN EXHIBITION, 1865.—This celebrated old Irish Whisky gained the Dublin Prize Medal. It is pure, mild, mellow, delicious, and very wholesome. Sold in bottles, 3s 8d, at the retail houses in London; by the agents in the principal towns in England; or wholesale at 8 Great Windmill street, London, W. Observe the red seal, pink label, and cork branded "Kinahan's LL Whisky."

FORD'S EUREKA FLANNEL SHIRTS, made from the very finest Australian wool, 10s 6d each, the exact same quality as usually sold at 12s 6d and 13s 6d. A quantity of new patterns, either woven or printed, many exclusively our own, and not to be obtained elsewhere. Country residents should write for the patterns, the Illustrated List, directions for self-measurment, and have three shirts or more sent carriage free.—38 Poultry, London.

NOTHING IMPOSSIBLE.—The greatest and most useful invention of the day, AGUA AMARELLA.—Messrs JOHN GOSNELL and CO., Three King court, Lombard street, perfumers to Her Majesty, respectfully offer to the public this truly marvellous fluid, which gradually restores the human hair to its pristine hue—no matter at what age. The Agua Amarella has non of the properties of dyes; it, on the contrary, is beneficial to the system, and when the hair is once restored one application per month will keep it in perfect colour. Price one guinea per bottle; half bottles, 10s 6d. Testimonials from artistes of the highest order and from individuals of undoubted respectability may be inspected. Messrs John Gosnell and Co. have been appointed perfumers to H.R.H. the Princess of Wales.

NEW THEATRE ROYAL ADELPHI, Sole Proprietor and Manager, Mr B. Webster.

Great Hit of Mr J. Jefferson in the new Drama called RIP VAN WINKLE; or, THE SLEEP OF TWENTY YEARS, written expressly for him, by Dion Boucicault, Esq.

Re-appearance of Mr J. L. Toole.

On Monday, and during the week, ICI ON PARLE FRANCAIS. Mr J. L. Toole, R. Phillips, Billington, Miss Seaman, &c. At 8, RIP VAN WINKLE; or, The Sleep of Twenty Years. Rip, Mr J. Jefferson, supported by Messrs P. Bedford, R. Phillips, Billington, Rogers, Ashley, Eburne, Mrs Billington, Mr a Godsellac. And A PAS DE FASCINATION. Miss Furtado and Mr J. L. Toole. Commence at 7.

ROYAL POLYTECHNIC.—Patron H.R.H the Prince of Wales.—With the other great novelties now in preparation for Xmas some new, startling, and wonderful illusions (J.H. Pepper and Thomas Tobin joint inventors) will be introduced for the first time. N.B.—The usual Entertainments continue as before.—Open 12 to 5, and 7 to 10.—Admission 1s.

KEATING'S COUGH LOZENGES.—A safe and certain remedy for Coughs, Colds, Hoarseness, and other affections of the Throat and Chest. In Incipient Consumption, Asthma, and Winter Cough they are unfailing. Being free from every hurtful ingredient, they may be taken by the most delicate female or the youngest child; while the Public Speaker and Professional Singer will find them invaluable in allaying the hoarseness and irritation incidental to vocal exertion, and also a powerful auxiliary in the production of melodious enunciation.

Prepared and sold in boxes, 1s 1½d, and tins, 2s 9d, 4s 6d and 10s 6d each, by Thomas Keating, Chemist, &c., 79 St Paul's churchyard, London. Retail by all Druggists and Patent Medicine Vendors in the World.

LES TROIS CADAVRES.
MYSTERE.
PAR LE CHEVALIER DE CHATELAIN.

This new work by the Chevalier de Chatelain, which bears upon its title-page, as a motto or epigraph, these two lines from Hamlet:—

There are more things in heaven and earth, Horatio,
Than are dreamt of in your philosophy.

is announced as immediately forthcoming. The work is dedicated

A MONSIEUR W. CHARLES KENT,
Au Charmant Auteur D' "Alethela,"
et de "Dreamland."

Rolandi of Berners street is the publisher.

"MY LIBRARY."

Edited by PAMPHILIUS.
SIXPENNY VOLUMES.
Each Volume complete in itself, uniform in size, and neatly bound, with Ornamental Wrapper.

The object of "MY LIBRARY" is to direct the attention of young men to LITERATURE of a higher standing than that generally published at so low a price—to provide them with a CHEAP, NEAT, PRACTICAL, and PROGRESSIVE LIBRARY, calculated to stimulate to INDUSTRY, ENERGY, PERSEVERANCE, and SELF-DENIAL, for with these virtues there is no eminence to which a man may not aspire, and from the examples deduced he will perceive that a truly enviable reputation is only to be acquired by independency of character, by honesty, consistency, and by spotless integrity, both in public and in private life.

"MY LIBRARY" will be devoted to PRACTICAL and PROGRESSIVE KNOWLEDGE—will be a MIRROR of LITERATURE, SCIENCE, and ART—a multum in parvo—the condensation of the primary aspirations of the great, the good, and practical, whose examples are calculated to engender and animate virtue, to create emulation, and teach the RISING GENERATION to struggle, to endure, to conquer difficulties, or in failure—

"To arm the obdurate heart
With stubborn patience and with triple steel."

"MY LIBRARY" will also be a Magazine of Reference, an INDICATOR to the youthful mind in the choice of books—for the choice of books, like the choice of companions, either tends to ELEVATE or DEGRADE, as books give the same turn to our thoughts and reasoning that GOOD COMPANY does to our conversation.

POPULAR AUTHORS
Will be Engaged upon "MY LIBRARY."

Now Ready.

THE ECONOMY OF LIFE:
SELF-HELP TO PRACTICAL AND PROGRESSIVE KNOWLEDGE.

II.

PATIENT BOYS,
AND HOW BY PATIENCE THEY BECAME GREAT MEN.

III.

In the Press.

GENIUS AND WRITINGS OF
A POPULAR NOVELIST.

OPINIONS OF THE PRESS.

....."The first contains a collection of the wise sayings and doings of ancient and modern philosophers, and numerous hints, gained by the author's own experience, as to the way to get on in the world, which form a multum in parvo of moral instruction of a marvellous nature. The second number is equally replete with wisdom and instruction."—BELL'S LIFE.

....."Pamphilius writes with so much Christian feeling, and in such an agreeable and conversational style, that his new serial cannot fail to meet with approbation and success."—NEWS OF THE WORLD.

....."If succeeding volumes are as well handled and as pertinent to their subjects as the two before us, the work, as a whole, is certain to become popular. As a proof of our own appreciation, we cordially recommend 'My Library' to the notice of our readers, and all who have youths to instruct."—ERA.

Ward, Lock, and Tyler, 158 Fleet street; and 107 Dorset street, Salisbury square.

SHAKSPEARE.

John Murray, Albemarle street.

DR. LIVINGSTONE'S NEW WORK.
With Map by Arrowsmith and numerous Illustrations, 8vo, 21s,

A NARRATIVE OF AN EXPEDITION TO THE ZAMBESI AND ITS TRIBUTARIES; and of the Discovery of Lakes Shirwa and Nyassa, during the Years 1858-64.
By DAVID and CHARLES LIVINGSTONE.

"Dr Livingstone has found, according to this interesting volume, a wide and new field for commerce, emigration, and civilisation. Whether the European emigrating wave can be, sooner or later, induced to flow in that direction, is a question that time only can solve. The explorer, at all events, is again gone forth to clear away more obstacles, the greatest of which, in the way of civilisation, is the Portuguese settlement, which is an obstacle that a greater hand than the Doctor's must eventually sweep down from its bad eminence. When this and something more has been effected, there will be nothing in the climate or on the soil that need affright excursionists, and our grandchildren may take return tickets to Lake Nyassa, with leave to stay a week at the cataracts of Mosioatunya."—ATHENÆUM.

John Murray, Albemarle street.

A FATHER'S NEW YEAR'S GIFT TO HIS SON.

Price 2s 6d, printed on tinted paper, handsomely bound, with gilt edges,

THE ECONOMY OF LIFE,
AND
PATIENT BOYS.

EXPLANATION.

Animated by a desire to further the interests of the young, and encouraged by private opinion and by the powerful voice of the Press, which affirm that the "ECONOMY OF LIFE" and "PATIENT BOYS" (two works which inaugurate "MY LIBRARY") are admirably adapted to stimulate youth to exertion and awaken in them a laudable ambition * * * "that the 'ECONOMY OF LIFE' is an invaluable practical Guide for youth," * * * "that the advice and illustrations and reflections given make it a multum in parvo of moral instruction of a marvellous nature," * * * "that the maxims for the Government of Life, with practical illustrations, cannot fail to be highly profitable to the young, and that adults may benefit largely by their perusal," * * * "that the advice and illustrations are equally apt and conclusive, and calculated to have a life-long influence upon our children," * * * "that we heartily commend these books to parents and preceptors, deeming them well adapted to influence to most excellent ends all who may study them," * * * "that it is seldom that so much good sense is seen in so small a compass," * * * "that the author does not lecture his pupils, but endeavours to entice them into the good path which shall lead them to honour and respect," * * * "that kindness and good feeling run like veins of gold through every story," * * * "that every page is studded with useful and genial hints and encouraging advice to young men," * * * "that the 'ECONOMY OF LIFE' and 'PATIENT BOYS' must prove a boon to the rising generation."—Encouraged by such powerful voices, and by private opinion that if the "ECONOMY OF LIFE" and its companion, "PATIENT BOYS," were produced in a neat form they would be useful on the drawing-room table for casual perusal, as well as on the shelves of the library for a book of reference, we have been induced to reprint them, and place within moderate reach a handsome volume as a New Year's Gift from a FATHER to a SON, a GUARDIAN to his WARD, or a SCHOOLMASTER to his PUPIL.

EDITOR.

Ward, Locke, and Tyler, 158 Fleet street.

Eden Colvile, Esq.,

who being eligible offer themselves for re election, and of an auditor in the room of Jacob Quixano Henriques, Esq. resigned. Also for the election of two Directors, in the room of Thomas Naghten, Esq., deceased, and John Bloxam Elin, Esq., resigned.

William Rennie, Esq., and Jacob Quixano Henriques, Esq., offer themselves as candidates for the vacant directorships, and Spencer Henry Curtis, Esq., offers himself as a candidate for the vacant auditorship.

Proprietors are requested to take notice of the following provisions of the Charter, viz.:—

I. Every proprietor intending to become a candidate, or to propose some other proprietor as a candidate for the vacant offices of director or auditor, must within ten days from the date hereof, signify by some writing under his or her hand, to be left within the same ten days at this office, either his own intention to become a candidate, or the name and place of abode of the candidate intended to be proposed by him or her.

II. A list of candidates, with the names of the proprietors (if any), by whom they are proposed, will be exhibited in this office 14 days prior to the date of election.

III. No proprietor will be entitled to vote at this meeting, unless his or her name shall have been registered at least three calendar months prior to the date of election.

The Transfer Books of the Corporation will be closed on the 20th December, and re-opened on 16th January, 1866.—By order of the Court of Directors,

C. A. CALVERT, Secretary.

PROSPECTUS.

The present project is to conduct to Rome the water from the famous and never failing springs at Arsoli, known as the Aqua Marcia and Regina Aquarum of the ancient Romans. This water has been proved by incontestible analysis to be free from all impurities; it possesses moreover the further immense advantage of reaching to the top floors of the highest houses in Rome—a level unattainable by the existing imperfect supply.

Rome, though ornamented with numerous fountains, is, perhaps, worse off for pure drinkable water than any other city of its size in Europe. One-half of the houses are entirely without water; and, in addition to this, the present supply from the Felice and from the Paolo is unfit for drinking purposes, so that the Aqua Marcia cannot fail to command an immediate sale.

Water in Rome is treated as a property, and dealt with in the same way as land or houses. The demand for it is extraordinary. The present selling price of the freehold in an ounce* (the Roman standard of measurement) is upwards of £200. The rent for the same averages from £20 to £25 per annum.

The climate of Rome being for several months in the year almost tropical, water is there an article of luxury as well as of necessity; it is also of the greatest utility for irrigation. These circumstances naturally combine to enhance the price.

An exclusive concession of the Aqua Marcia has been obtained from the Pontifical Government, giving every possible facility to the present scheme, which is calculated so materially to benefit the Eternal City. The concession comprises the absolute freehold in the waters, and a lease for 99 years of the lands, aqueducts, and works.

The concessionaires, who have expended large sums of money in plans and studies, have agreed to convey to this Company the concession, with all the property, rights, and privileges before mentioned, for the sum of £50,000. They also undertake to pay all preliminary expenses connected with the introduction of this project, reserving for their remuneration one-fourth of the surplus profits of the Company, after the payment of 10 per cent. annual dividend to the shareholders.

Plans, estimates, &c., have been prepared by the engineer with the utmost care and accuracy; and the Directors have received offers from responsible contractors to execute the works at the engineer's valuation.

The springs at Arsoli yield a continual supply of upwards of 3,000 ounces of water. It is proposed at once to construct works adequate for the conveyance of the whole of this amount of water to Tivoli, whence upwards of 1,500 ounces in the first instance will be conveyed to Rome by iron pipes; the other 1,500 ounces will be brought as the demand arises.

Careful investigations show that the actual present demand far exceeds 1,500 ounces. It is proposed only to sell only one-half of this quantity, which at the lowest price of an ounce, viz., £200, would give a return of upwards of £150,000, and the rental of the remaining 750 ounces would yield an income of £15,000 per annum. It is calculated that the profits from the sale of water will give a large bonus to the shareholders; while the income derived from the rent of water will give at the same time a continuing annual dividend of upwards of 10 per cent.

In addition to this result it must be remembered that 1,500 ounces will remain to be conveyed from Tivoli to Rome, the cost of which would be considerably within the balance of the capital. Assuming that from the increased supply there would be a depreciation in price of even 50 per cent., so that the price of an ounce of water fell from £200 to £100, and the rent for the same from £20 to £10, the result of the second operation would be most highly profitable.

Notwithstanding the absolute sale of the water, the Company are empowered by the terms of the concession to levy, for maintenance of the works, a tax of £1 5s per annum on every ounce of water disposed of.

A large proportion of the first issue of shares has been applied for in Rome, principally by shareholders in the Anglo-Romano Gas Company. This latter Company has been in operation 12 years with most successful results, it has paid large dividends, and its shares now stand at a high premium.

In all cases where no allotment is made, the deposit will be returned in full,

The operations of the Company will comprise the objects mentioned in the memorandum and articles of association, which, together with an authenticated copy of the concession, may be inspected at the offices of the solicitors to the Company.

Prospectuses and forms of application for shares may be obtained from Sir Charles D. Crosley, broker to the Company, and at the offices, 1 New Broad street.

* An ounce of water is the amount which will flow during 24 hours through a tube of the diameter of 17-32 of an inch with a regulated pressure.

ITALIAN IRRIGATION CANAL COMPANY (CANAL CAVOUR).

Notice is hereby given, that the Half-yearly Interest on the Share Capital of this Company, at the rate of six per cent. per annum, will be payable on and after 1st January, 1866.

LIEBIG'S EXTRACT OF MEAT COMPANY (Limited). — ("Extractum Carnis Liebig.")—Registered under the Companies' Act, 1862.

Capital £500,000, in 25,000 shares of £20 each. It is not intended to call up more than £14 per share. Payments to be spread over the following periods:—Deposits—£1 on application, £4 on allotment. Calls—£4 payable 2nd April, 1866; £2 10s payable 2nd July, 1866; £2 10s payable 2nd November, 1866; total, £14. Payments will be received in advance of calls, and interest allowed thereon at six per cent. per annum. Six per cent. per annum is to be paid to the shareholders on all capital actually paid up before any division of profit, and the Directors receive no remuneration until such six per cent. is provided for. 12,500 shares having been taken privately, and 3,500 being reserved for South America, only 9,000 shares remain for allotment in England and on the Continent.

DIRECTORS.

E. Boutcher, Esq. (Messrs Boutcher, Mortimore, and Co.), London.

Joseph Sawyer, Esq., Public Accountant, 173 Fenchurch street, London.

ABRIDGED PROSPECTUS

The object of this Company is to manufacture on a large scale the pure and genuine "Extractum Carnis Liebig" (Liebig's Extract of Meat), with the assistance and under the immediate control of Baron Liebig—in those countries where meat is unusually cheap, principally the River Plate and Brazils, where the average price of a full grown ox is about £2—and for that purpose to take over the business and entire property of the Fray Bentos Company, established some years since at Fray Bentos, on the River Uruguay, and at Antwerp. That Company under Mr Gilbert's very able management has achieved a very great success, viz., the manufacture in the River Plate, on a large scale, and as an entirely new branch of industry, of Liebig's Extract of Meat of the purest and best quality.

Taking the present average price of cattle in the River Plate and Brazils, and calculating the cost of manufacture on a large scale, based upon the experience and results of the working at Fray Bentos, it is very confidently expected that on the probable annual minimum production of the three manufactories of 1,000,000 lbs of extract, the profit at 4s per lb will amount to about £200,000 per annum on the paid-up capital of £350,000.

The production in 1866 will probably be at least 600,000 lbs, in 1867 about 800,000 lbs, and in 1868 about 1,000,000 lbs.

Detailed prospectuses may be obtained at the Company's temporary offices, 43 Mark lane; and of the bankers, brokers, and solicitor.

Notice.—Dealers or capitalists who are shareholders will have a preference in the supply,

---

METROPOLITAN DISTRICT RAILWAY COMPANY.

Notice is hereby given, that the interest at the rate of 6 per cent. per annum will in future be paid half yearly, on the 1st January and 1st July.

On Monday, the 1st of January next, a proportionate dividend of the interest accruing since the 13th September last will be paid at the office of the Registrar of the Company, 27 Austinfriars.

Provisional Scrip Certificates to bearer must be forwarded to the Registrar at the above office, in order that the dividend warrants may be duly prepared.

F. RITSO, Registrar.

27 Austinfriars, E.C.

COLMAN'S PRIZE-MEDAL MUSTARD

Bears their Trade Mark, the "BULL'S HEAD," on each Package.

It was the only Mustard which obtained a PRIZE MEDAL at the GREAT EXHIBITION, 1862. Their Genuine and Double Superfine are the Qualities particularly recommended for Family Use.

Retailed in every Town throughout the United Kingdom.

J. and J. COLMAN, 26 CANNON STREET, LONDON.

HUBBUCK'S PATENT WHITE ZINC PAINT

Is the most durable and beautiful paint known, does not stain or discolour with the atmosphere of large towns, and by their process, which is patented, is cheaper than White Lead.

It is especially adapted for painting Iron, as, by virtue of a semi-galvanic action, it enters the pores and forms an amalgam of the two metals, which protects the Iron from decay or incrustation. It should be used instead of Red Lead, which is proved to be destructive to Iron exposed to Salt Water.

ADULTERATIONS.—Some Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Baryte, in proportions varying from ten to thirty per cent. No workman can produce good work with such material. Those who have obtained the Patent White Zinc Paint from Grinders who have not adulterated it, will never willingly use any other Paint for their best work.

Each Cask of Pure White Zinc is stamped—

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT and VARNISH WORKS, 24 LIME STREET.

"For public schools, and all rooms occupied by children, there will now be no excuse for using poisonous paints. Parents have remarked, that their children on returning from the country to newly-painted houses have suffered in health. The reason is evident—the breath extracts the insidious poison from paint, and the lungs draw in the deadly vapour."—JOHN BULL, September 14, 1850

R. SMITH, Manager.

IMPORTANT ANNOUNCEMENT.—JOSEPH GILLOTT, METALLIC PEN MAKER to the QUEEN, begs to inform the commercial world, scholastic institutions, and the public generally, that by a novel application of his unrivalled machinery for making steel pens, he has introduced a new series of his useful productions, which, for the excellence of temper quality of material, and, above all, cheapness in price, must ensure universal approbation and defy competition

Each pen bears the impress of his name as a guarantee of quality; they are put up in boxes containing one gross each, with table outside, and the fac-simile of his signature.

At the request of numerous persons engaged in tuition, J. G. has introduced his warranted school and public pens, which are especially adapted to their use, being of different degrees of flexibility, and with fine, medium, and broad points, suitable for the various kinds of writing taught in schools.

Sold retail by all stationers and booksellers. Merchants and wholesale dealers can be supplied at the works, Graham street, Birmingham; at 91 John street, New York; and at 37 Gracechurch street, London.

TEETH AND PAINLESS DENTISTRY.—Messrs LEWIN and SIMEON MOSELY and SONS, 30 Berners street, Oxford street and 448 Strand, opposite Charing Cross Railway Station.

Their painless artificial teeth are unequalled for economy, durability, comfort, and all purposes of articulation and mastication. Operations of every kind being unnecessary, the most nervous patient can be supplied without fear of pain or inconvenience.

Consultation free. Teeth from 5s. Sets from 5 to 25 Guineas, warranted.

For the efficacy, utility, and success of their system, vide LANCET.

GLENFIELD STARCH, Awarded the PRIZE MEDAL, 1862. This unrivalled Starch is USED in the ROYAL LAUNDRY, and Pronounced by Her Majesty's Laundress to be the FINEST STARCH SHE EVER USED. HER MAJESTY'S LACE DRESSER declares it to be the BEST SHE HAS TRIED, and the above Award, by some of the most Eminent Scientific Men of the Age, CONFIRMS ITS SUPERIORITY.

WOTHERSPOON and CO., Glasgow and London.

THOMAS TURTON AND SONS, Manufacturers of CAST STEEL for cutters, punches, taps and dies, turning tools, chisels, &c. CAST STEEL piston rods, crank pins, connecting rods, straight and crank axles, shafts, and forgings of every description. FILES marked T. Turton. Superior to any other make. (See results of trial in the TIMES, July 26, 1851.) TOOLS of all kinds, for engineers, railways, contractors, &c., &c. EDGE TOOLS marked Wm. Greaves and Sons. Electro-Boracic steel, warranted to wear out three tools made of cast steel. DOUBLE SHEAR STEEL, BLISTER STEEL, SPRING STEEL, GERMAN STEEL. Springs, buffers, and cast steel tyres for locomotive engines, railway carriages, and waggons. SHEAF WORKS and SPRING WORKS, SHEFFIELD.

London Warehouse, 35 Queen street, City
Paris Warehouse, 10 Rue du Grand, Chantier.
New York Store, 102 John street.

Where the largest stock of steel, files, tools, &c., &c., may be selected from.

NEW OPERA AND FIELD GLASS and the Reconnoitrer Glass, price 10s 10d (sent free). This "TOURIST'S FAVOURITE," through extraordinary division of labour, distinctly shows small windows ten miles off, landscape at 30 miles, Jupiter moons, &c. The Marquis of Carmarthen—"The reconnoitrer is very good." Earl of Breadalbane—"I find it all you say, and wonderfully powerful for so very small a glass." Earl of Caithness—"It is a beautiful glass." "Rev. Lord Scarsdale approves of it." Lord Gifford—"Most useful." Lord Garvagh—"Remarkably good." Sir Digby Cayley—"It gives me complete satisfaction, and is wonderfully good." Captain Sandey, Royal Small Arms Factory, Enfield, "found it effective on the 1,000 yards range." F. H. Fawkes, of Farnley hall, Esq.—"I never before met, although I have tried many, a glass combining so much power, for its size, with so much clearness." THE FIELD—"We have carefully tried it at an 800 yard rifle range against all the glasses possessed by the members of the corps, and found it fully equal to any of those present, although they had cost more than four times its price." NOTES AND QUERIES—"What intending tourist will now start without such an indispensable companion to a pleasure trip?" The celebrated Hythe Glass shows bullet marks at 1,200 yards, and men at 3½ miles, 31s 6d. All the above glasses, respectively bearing the registered Trade-Marks, "Salom," "Reconnoitrer," and "Hythe," are only to be had direct from Salom and Co., 98 Princes street, Edinburgh. No agents of any kind anywhere.

ALLSOPP'S PALE OR BITTER ALE.—Messrs SAMUEL ALLSOPP and SONS beg to inform the Trade, that they are now registering orders for the March Brewings of their Pale Ale in Casks of 18 Gallons and upwards, at the Brewery Burton-on-Trent; and at the undermentioned Branch Establishments.—

LONDON	At 61 King William st, E.C.

AUDITORS—Messrs Chadwick, Adamson, M'Kenna, and Co., 27 Great George street, Westminster.

BROKERS.

Messrs J. Hutchinson and Sons, 15 Angel court, Throgmorton street. | Messrs J. and A. Scrimgeour 18 Old Broad street.

TEMPORARY OFFICES—40 Old Broad street, E.C.

ABRIDGED PROSPECTUS.

The object of this Company is the purchase and extension of the sugar plantations and the business of the well-known firms of Messrs Cavan, Lubbock, and Co., and Messrs William Burnley Hume and Co.

The estates and real securities to be transferred to the Company by the vendors are in Demerara, Berbice, Trinidad, and Barbados. The estates are fertile, well situate, and in a high state of cultivation. They are provided with an ample supply of Coolie, Chinese, Portuguese, and Creole labour.

The imports of the two firms in sugar alone have for the last three years averaged over 46,000 hogsheads per annum.

The vendors will transfer to the Company, free of any claim for good-will, their large and profitable commission and agency business, which has yielded in net commissions, on the average of the past three years, an amount exceeding £80,000 per annum, and is capable of being greatly extended.

The terms of the purchase have been discussed and settled with the vendors, after very careful examination into the returns and profits of each firm, and after obtaining independent valuations and reports on the several properties. These inquiries were instituted and conducted by Messrs Chadwick, Adamson, M'Kenna, and Co., and by directors entiely unconnected with the two firms, before they agreed to join the proposed Company.

The vendors are only to be paid the mere value, thus ascertained, of the estates, plant, machinery, stores, stock, and advances, which will amount to about £675,000, and by instalments as follows:—

£225,000, or one-third, in 10,000 shares of the Company, to be credited as paid up to the extent of £22 10s per share.
£225,000, or one-third, in debentures, bearing interest at 5 per cent.
£225,000, or the balance, in cash by instalments in two years.

To meet the above payments, and to provide the requisite working capital, it is estimated that the calls will be required to be made as follows:—

December, 1865, £5 per share (being the amount of payments on deposit and allotment).
April, 1866, £2 10s per share.
July, 1866, £2 10s per share.
January, 1867, £5 per share.
January, 1868, £5 per share.

The Directors confidently estimate that the net profits of the business of the Company, taking into consideration the revenue from the real estate, for the ensuing five years, will be equivalent to from fifteen to twenty per cent. per annum on the paid-up capital of the Company.

Applications for shares must be made in the form annexed to the prospectus, and must be accompanied by the payment of £1 per share to the bankers of the Company.

Payment of deposit may be made to the bankers of the company; or at the branches of the National Provincial Bank of England; and the branches of the Royal Bank of Scotland.

Prospectuses and forms of application for shares may be had on application to the bankers, solicitors, auditors, or stockbrokers, or at the temporary offices of the Company.

THE COLONIAL COMPANY, LIMITED.

Notice is hereby given, that the LISTS of APPLICATIONS for SHARES in the above Company will be CLOSED in London, this day, Saturday, the 16th inst., and in the Provinces and Scotland on the 19th inst.—By order.

40 Old Broad street, City, Dec. 16th, 1865.

WESTERN GRAMMAR SCHOOL, Brompton, S.W., in union with King's College, London.—The system pursued at this school is eminently practical, and calculated to prepare pupils for the competitive examinations and the various pursuits of life. Three pupils successfully passed the Oxford Local Examinations this year. The Head Master takes a few boarders.—For terms and prospectus apply at the school.

KEATING'S PALE NEWFOUNDLAND COD LIVER OIL. The Finest Imported this Season.

This VALUABLE MEDICINE having of late years come into such general use, and being, moreover, so extensively prescribed by the most eminent practitioners both in town and country. Mr Keating can with the greatest confidence recommend this Oil as being perfectly pure, nearly tasteless, and free from adulteration, having been analysed, reported on, and recommended by Professor Taylor, of Guy's and St Thomas's Hospitals, Dr Scott, M.D., L.R.C.P., F.L.S., &c., and Dr Edwin Payne, M.D., L.R.C.P., M.R.C.S., who, in the words of the late Dr Pereira, says that "The best Oil is that which is most devoid of colour, odour, and flavour, characters this will be found to possess, being purely of hepatic origin, a point of great weight with regard to its therapeutic value."

Sold in half-pints, 1s 6d; pints, 2s 9d; quarts, 5s; and five-pint bottles, 12s 6d, imperial measure, by Thomas Keating, Chemist, 79 St Paul's churchyard, London.

Published by John Clements, Little Fulteney street, price 7½, New Work on the **PURE DENTISTRY, AND WHAT IT DOES FOR US.** By A. ESKELL, Grosvenor street, W. Sold by Simpkin and Marshall, and may be had of all booksellers.

SAUCE.—LEA AND PERRINS' WORCESTERSHIRE SAUCE.
This delicious condiment, pronounced by connoisseurs is prepared solely by Lea and Perrins.
"THE ONLY GOOD SAUCE."
The public are respectfully cautioned against worthless imitations, and should see that Lea and Perrins' names are on wrapper, label, bottle, and stopper.
Ask for LEA AND PERRINS' SAUCE.
*** Sold wholesale and for export by the Proprietors Worcester; Messrs Crosse and Blackwell; Messrs Barclay and Sons, London; &c., &c., and by Grocers and Oilmen universally

DEANE'S TWO-HOLE BLACK PENS which are unequalled for the durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped.
"G. and J. Deane, London bridge,"
and the box, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed.
"G. and J. DEANE's Two-Hole Black Pens, 46 King William street, London bridge."

THE ANGLO-AUSTRIAN TREATY.

THE new treaty between England and Austria is an example of a new sort of treaty. It is a one-sided treaty. The old notion of a commercial treaty is, upon free-trade principles, an absurdity. According to it, the contracting parties made, as the phrase went, "mutual concessions"; that is each said to the other, "I will take your products if you will take my "products"; it was supposed to lose by what it parted with, and to gain by what it received. We have now learned better. International trade is a course of mutually advantageous dealings; the removal of any impediment from the commodities of either party is advantageous to both, for it enables each to receive, consume, and enjoy more of the commodities of the other.

The only danger of a commercial treaty is a financial danger. It is that the remissions it makes may empty your treasury, though they will augment your trade. But in the Anglo-Austrian treaty England has given up no revenue at all. There are no *figures* on our side of the contract. The only stipulation of a large or substantial sort is a "favoured "nation" clause; we are bound to treat the products of Austria as we treat the products of any other country. But this stipulation is not formidable. We now treat all nations alike: we have no commercial antipathies and no commercial sympathies. "We do as we would be done by" to all other nations. We sell as much as we can to them, and we buy as much as we can from them. We should have acted thus to Austria without saying we would, and so we lose nothing by saying we would. And we have promised nothing else of moment; we can tax Austrian corn or Austrian wine just as freely, just as much, and just as little after the treaty as before the treaty.

Austria has contracted to lower the duties on our manufactures to 25 per cent. *ad valorem*, which is a great gain to our manufacturers in comparison with the present rates. The details of the tariff yet remain to be arranged, and will of course require considerable care, but the basis has been settled, and it is one which will augment our commerce with Austria in an important degree. She will buy more of us because the preventive tariff is relaxed, and must sell more to us because she must pay for what she buys. Both the English consumer and the English producer will accordingly benefit.

It is not of course meant or intended that all manufactures should be taxed up to the maximum. The tariff of Austria is now in a very complicated state; it is a provisional tariff, and has allowances and complications very unlike a sound and simple finance. Till the tariff is settled in detail, it is impossible to specify details. But this much may be confidently said, that English traders will not be injured by the treaty, but benefited by the treaty. The duties they have to pay will certainly not be greater. and in all likelihood will be less than they were.

It may be asked, what is the motive of Austria in making these concessions? The answer is. she wants to benefit her own subjects. Her present rulers understand the wealth of nations. They know that it is her interest to buy all she can where it can be bought cheapest and made best. In cases where England is that best and cheapest country (happily a great class of cases), this treaty will enable her to do what she ought to do, and what will benefit herself. And this is the sole kind of commercial treaty which England either ought to contract, or wishes to contract, either with Austria or with any country soever.

AMERICAN FINANCE.

THE report of the Secretary of the Treasury, just delivered to Congress, is, perhaps, the most remarkable of the many remarkable documents which the American civil war has suggested. The most curious peculiarity is its contrast to European ideas. People in Europe have been arguing whether or not the interest on the United States debt would be paid, whether the American Government would not go on to issue more and more "greenbacks," more and more irredeemable currency. In the face of the European controversy Mr McCulloch goes down to Congress and proposes to redeem all the "greenbacks," to pay all the national note currency now out, and to devote *forty millions sterling annually* to the payment of the interest on the debt, and to the liquidation of the principal. No such bold propositions have ever, we believe, been offered to any nation at the end of a great war—a war of the first magnitude. In 1815 our Government had no currency of its

Digitized by Google

own to reform; the depreciated notes were bank notes, and, perhaps, it was fortunate that it was so; but on the matters with which it had to deal the English Government did not act as the American Government. It made no vast effort, it proposed no vast effort, to pay off the debt; it abandoned all idea of a surplus revenue, it took off the income tax and what other taxes it could, and it abolished the "sinking fund," which it had maintained during the war and while it was useless, at the beginning of peace, and just when there would have been real money for it. Whether the Americans will effect more than the English, we do not say, but at any rate they have plans more equal to their great place. Whatever the nation may do, their Finance Minister, at least, hopes for large schemes and aims at great ends.

The American Secretary's message runs into innumerable topics, all of great importance, and great interest, but a paper as long as his,—and his is very long,—is needful to follow him fully, even to half of them. We only wish to show our readers, in brief, with what realities and with what prospects this great war now concludes. And we follow the Secretary's own division in separating the matter into three heads—the Taxation, the Debt, and the Currency.

First, as to the taxation. An Englishman regards finance not with that fond and half-romantic feeling with which the happy statesman at the head of a new country casts up in prophecy its unbounded resources, but with the patient and carefulness of an old world where labour is difficult, where much of it is ill paid, where failure is easy, where success *after* failure is all but impossible. The Americans, with unequalled, though untried resources, are in the place of justified hope; we, with less resources, but after many trials, ought at least to have an enriched experience and an instructed caution.

What, then, are the facts? The outgoing side of the last year's accounts of the United States is stupendous, more than 200,000,000*l* (above three times the ordinary expenditure) to be spent on the War department alone, and the other expenses were great too. Civil government costs much when a new internal revenue of vast magnitude is in the course of organisation, and a blockade over an immense coast must create great naval outlay. The figures are :—

EXPENDITURE OF UNITED STATES for the Year ending* 30th June, 1865.

	£
Civil service	8,953,110
Pensions and Indians	2,851,704
War department	206,264,676
Navy —	24,513,554
Interest on public debt	15,479,542
Total expenditure	258,062,586

Probably the largest sum any nation has spent in twelve months. The largest we ever spent was in the year 1814, 106,832,000*l*, of which 76,780,000*l* was for war and other outlay, and the rest 30,052,000*l* for interest on debt. The Americans have a perceptible pride in the money they have spent, and it is impossible to wonder at it.

They may well be proud of being able to find that money. How it has been raised is for many purposes most material; that manner may affect the nation in many incalculable ways for good and for evil. But for the present purpose that manner is not at all material. The national effort, the national destruction of wealth, *the capital the country had to find*, is the same. The army was paid, armed, and fed; the cost of subduing the South was defrayed. Whether the capital so required was abstracted by loans or taxes is upon this general view immaterial. It was abstracted; it was taken from the nation, and the soldiers were paid and clothed with it.

The money was found thus :—

TAXATION AND LAND SALES.

	£	£
Customs	16,985,652	
Land	199,310	
Direct tax	240,114	
Internal revenue	41,192,842	
Miscellaneous resources	6,595,656	
		65,913,574
Loans		172,972,698
Reduction of balance in Treasury		19,176,324
		258,062,596

* The figures here and elsewhere are given at 4s to the dollar. The value of the currency has fluctuated so much that a retrospect of the war at the true exchange of the day would be a task of infinite labour.

It cannot be said that this is a very good specimen of financial management. At the crisis of the nation's destiny, the painful effort, the effort by taxes, ought to have borne a larger proportion to the easy effort—the effort by loans. Still it may be said that the Federal taxation is between four and five times what it was in 1860; the effect of the war has been to quadruple, and more than quadruple, the taxation of the country. The proportion of the present taxes to the late outlay is small, but the proportion of the present taxes to the old taxes is large, and what is more material than any comparison, the money was, in fact, obtained—obtained at home in this way.

What we have to ask is, now that the crisis is past, now that the war is over, how will America now stand? The year ending June 30, 1866, next June, is naturally so complicated with temporary expenditure and the outlay incident on the conclusion of the war, that it is not very instructive. It is half way between the past war and the coming peace, and so does not bring out the salient points of either. But happily, according to the American custom of giving three years' figures at once (one year wholly past, another a quarter over, and a third wholly to come), Mr McCulloch puts before us a budget for the year ending June, 30, 1867, and it is as follows :—

INCOME.	£	£
Customs	22,000,000	
Internal revenue	55,000,000	
Lands	200,000	
Miscellaneous resources	4,000,000	
		79,200,000
EXPENDITURE.		
Civil service	8,433,118	
Pensions and Indians	3,521,928	
War department	7,803,482	
Navy department	8,796,490	
Interest on public debt	28,308,412	
		56,863,430
Surplus		22,336,570

Supposing all the war taxes kept on, and to yield an augmented income in the now peaceful country with the addition of the South, and by revised adjustment and improved collection.

Each of these suppositions is, of course, open to discussion and doubt. What the South will become no one in Europe ventures clearly to foretell; all the best of us are dubious—the very best, perhaps, very dubious. How much the income of the country will grow is matter of conjecture, though doubtless it will grow much; and how many taxes, and what sort of taxes, the American democracy will bear, it would be childish now to investigate. Nothing but experience can decide questions so large and so complex as these.

But it is after all upon these questions that the success of Mr McCulloch's great proposal depends. As to the debt, he proposes to spend on interest and principal 40,000,000*l* annually; but he must first get this 40,000,000*l*. The above accounts no doubt give it him, but will those accounts be verified?

We have no doubt that the United States (if the South goes well) will be amply able to pay 70 or 80,000,000*l* of taxation. Their economic position is the best the world has ever seen. The productiveness of their industry is greater than the productiveness of any industry ever was before. The best working race earth has ever known is coming into the greatest opportunity of profitable labour the world has ever afforded. But will it endure to pay so many taxes? Every one must see the grave doubts which beset the subject.

First, sooner or later, the South must come back to Congress, and whatever good effect that return may have socially, it is hardly possible it should have a good effect financially. The South must long be poor; it always was poor in comparison with the North; it produced for export some great staples—one great staple above all—but its self-contained wealth was small. It was not like the wealth of Pennsylvania, or the wealth of New York. But after the great losses of life—of its best lives both for war and production—after the break-up of its whole former system of production—it is impossible that for years the South should be otherwise than very poor. She will pay what she pays with difficulty. And it is hardly possible to doubt that she will pay what she pays with reluctance. She is beaten in war, but it is much to ask her to pay those who overcame her. This debt is greatly held in the New England States, and other warm Union States. But

Digitized by Google

is it possible that the *dis*-Union States should wish to pay such creditors? Their lives are ruined, their friends and relatives killed, their best property gone, and you ask them for years to come to make such exertions as no nation has ever made in order that the infliction of these calamities may be repaid. No nation has ever yet paid for its own subjugation, and we do not expect the South will begin. Sooner or later its members will come back to Congress—sooner or later they will vote against high taxation.

The West, too, cannot like high taxation. It does not hold near as much of the debt as the Old States in the East. It detests high Customs duties, which cripple foreign trade, which are so much protection to the Eastern manufacturer, which are so much additional difficulty placed in the way of European purchases of what they wish to sell. The West will (as time goes on) object to the easiest part of the taxation —the taxation of imports—because much of their real effect is to take from one section of the United States and to give to another section; to put the money of the Western farmer into the pocket of the Eastern manufacturer; what the Western man buys will be dearer because of the duty, and what he sells to Europe will be less because of the duty. Nor will any State—reasoning upon the assumption that American human nature is like European human nature—be anxious for, agitate for, taxation. A dislike of paying money is one of the most universal parts of man's nature. And an American tax-payer pays money unpleasantly. Their internal Revenue Act is the most excruciating instrument of torture we know. It taxes nearly everything and (we hardly exaggerate) every act, every cognisable act of commercial life. The administration at Washington has discovered its defects. Mr McCulloch complains of the number of little imposts which yields nothing, but which cost much and harass much,—a Government Commission is sitting to examine the subject and suggest reforms. But no Commission will make 55,000,000*l* of excise duties, of internal revenues, at all agreeable,—can render them anything but torments to the commercial and to the consuming community.

Congress, too, is, for the present state of American politics, an untried power. During the war the President was Dictator, and by their President it is in vain to deny that the American people did great things. They found typical men—sufficient but not more than sufficient exponents of the greatness that was in them. But what will their Parliament be? Will that work right in times of calm as their President worked right in times of storm? No man can answer these doubts, and it is therefore that we state them. When in money matters the data of calculation do not exist, uncertainty is of all things the most prudent.

There are three great forces against high taxation, and there is only one in favour of it. One is (and we are the last to speak lightly of it, though it is not the dry sort of motive which is easily described in our style) the sensibility of a democracy for great ideas. After what has happened, it is impossible to say what Northerners would not do for their union. They have a sentiment about it different from any we feel, different from any which is felt in Europe, but which is inestimably powerful. Mr McCulloch trades, so to say, on this feeling. He wishes to attract the imaginations of his countrymen by a magnificent finance. He thinks it "poor" to make provision for mere interest. He asks for a large annual reduction of the principal—such a reduction as has never elsewhere been made. This is, doubtless, to English notions, showy finance; but if you have to teach the minds of a large, busy, scattered people, a theatricality may be necessary. When all is over, the American debt will be 600,000,000*l*, and (almost all borrowed in four years) they are going to pay 40,000,000*l* a year in interest and principal. These are great figures, whatever comes of them.

We have left ourselves little space to speak of Mr McCulloch's last burden,—the currency. And yet there is much to be said about it. We can only now strictly indicate how the matter stands, and must return to all details hereafter. The first, the most prominent, and, when examined, most important part of Mr McCulloch's currency views, reads to an Englishman almost like a jest, or like nonsense. He says the issue of irredeemable currency of greenbacks is part of the "war power." This President is, by Article III. sec. 2 of the Constitution, declared to be "Commander-in-Chief of the "Army and Navy of the United States," and this, it seems, gives him power to issue a paper currency. It is what English lawyers would call a "large construction," but still so Mr McCulloch tells us. And though no legal fiction can be more strained, the principal object, like that of most legal fictions, is good. There must be somewhere a power to do at a great crisis the things needed by that crisis. The United States Constitution did not provide this expressly and by name; it was made under what is supposed, but falsely supposed, to be the doctrine of "the English Constitution," under the doctrine of "checks and balances," and in accordance with that doctrine it nails all parts of the State down to a specific task. Each bit of machinery has its own bit of work, but there is no single superlative power. There is no power like with us, an Act of Parliament at a crisis, to break through all cobwebs, and put everything right. But a shrewd observer has said,— "Whatever document an Anglo-Saxon people are compelled to obey, they will find something sensible in it." The Americans have found a provision for temporary omnipotence in their Constitution, though it would have astonished the makers of that Constitution to know it was there. This is the "power of the Commander-in-Chief," the "war power." This gives him a right in ancient phrase "to see that the "Republic comes to no harm." This power it is that gives the right at a crisis to issue Government notes.

And this alone. Now that the war is over, all the powers of the Constitution return to their defined limits. Each power has certain words in the Constitution which *make* it, and it cannot go beyond them. The only words in the Constitution about the currency are in article I. and section VIII., which gives the Congress power to "coin money and regulate "the value thereof," but there is nothing giving authority to *emit* paper there.

The American paper currency is as follows:—

	£
United States notes and fractional currency...	90,843,000
Notes of National Banks.....	37,000,000
Notes of States Banks.....	13,000,000
	140,843,000

The United States notes are the "greenbacks," the exceptional currency issued, so to say, by right of war. The national banks are a creation of Mr Chase's. Before the war each State had its currency based on its own laws and its own usages; and the currencies, therefore, were of all sorts and degrees of quality. In New York the notes were well secured; in others they were ill secured. Mr Chase, acting on the clause which gives the Government power to "regu- "late the value" of the currency, founded one single currency for the whole Union. He created national banks, whose notes are secured everywhere in the same war, and which were to circulate, and do circulate, throughout the whole Union. The limit of these national bank notes is 60,000,000*l*, and they have, therefore, 23,000,000*l* more to issue.

Mr McCulloch boldly proposes to fund the 90,000,000*l* of "greenbacks," which will give him between 4,000,000*l* and 5,000,000*l* more to pay in the way of interest annually *beyond what is allowed in the above accounts*. He will go up to the legal limit of 60,000,000*l* of national bank notes, so that he will deal with the entire volume of the currency thus:—

	£
Present currency	140,843,000
Less "greenbacks" retired	90,843,000
	50,000,000
Add national notes remaining to be issued...	23,000,000
	73,000,000

which is an immense reduction. The amount, however, is still largely in excess of the old issues before the war. The old issues in 1860 were in round numbers 200,000,000 dols, or 40,000,000*l*, so that there the present augmentation of paper is enormous, and after every contemplated reduction will be very great.

The true aim of the American reformers of their currency is very clear. They must try with the utmost speed to return to cash payments. There is no security for the equivalence in value of coin and paper, except the interchange of coin and paper at the will of the holder. The holder of the paper is the person who creates that equivalence. If you give him a right to ask for coin for his paper, depend on it the value of the paper will not be less than the value of the coin; at the slightest shade of depreciation, the holder of the paper will demand coin to get the difference. But there is no other check. Fancied limitations of quantity are but conjectural estimates of what a country requires; they contain no self-corrective. It is the

Digitized by Google

power in each noteholder to get gold and silver for his note that enforces the equivalence of that note to gold and silver.

In order to approach specie payments, it is necessary first to reduce the quantity of depreciated currency, and day by day to raise its value; next, to accumulate a reserve of the precious metals, bearing some proportion or being some fixed part (economists differ as to these points) of the actual circulation. But these are great efforts. The creation of an adequate reserve is by far the least difficulty of the two. A depreciating paper currency, to use an American phrase, "lubricates the "wheels of commerce." Every day the commercial class—the borrowing class—feels its liabilities lightened; it sells its goods for more, and only the same fixed sum goes to its creditors. But an *appreciating* currency, a currency growing dearer, has the very opposite effect. Every day a merchant sells his goods for less; what comes in is smaller and smaller, but his bills do not diminish; his liabilities are identical. An extra issue of paper is a bounty to the mercantile class, because it is in general a borrower; a contraction of paper is a penalty on the mercantile class, for it takes from them and gives to the lender.

At the very time, therefore, that they are asked to pay unusual taxes, the commercial classes of America will be subject to unusual though most just and necessary pressure. What course will be taken as years go on cannot be foreseen. America, in finance, and in much else, is a "great unknown;" at all events, to others, and in no inconceivable degree to herself. A bolder and grander proposal than Mr McCulloch's no one ever made; what Congress will decide on it, Congress *en masse*, scarcely one individual of Congress, if one, yet knows.

Our limits prevent us this week from giving as we intended the entire tables of Mr McCulloch's message *in dollars*. We will do so next week.

WILL HUNGARY BE RECONCILED OR NOT?

THE exact position of the negotiation between the Emperor of Austria and Hungary—for it is a negotiation though conducted under constitutional forms—appears to be a little misapprehended. The warm reception given to the Emperor's speech, a reception due partly to the pleasure Hungarians feel at their escape from the attitude of passive resistance, partly to their sense of the kingliness of the speaker, blinds observers a little to the immense difficulties still to be overcome. The Hungarians have all along demanded two concessions as essential to re-establish the *régime* of constitutional law. Of these one is the right of their country to exist as a constitutional kingdom, separate and complete in itself, with a self-existent Parliament, and not bound to ally itself with Austria more intimately than that Parliament shall choose. To this position the Emperor in his speech, uttered to the Diet on the 14th instant, assented with a cordiality which was equally welcome and unexpected. His Majesty fully recognised the legal power of the Diet and the autonomy of the kingdom, and took his stand on the Pragmatic Sanction, the great treaty, as we may call it, under which the father of Maria Theresa, in consideration of her acceptance as Sovereign, confirmed the liberties of Hungary. He conceded the union of the dependencies of Hungary with the kingdom—a very sore point with Hungarians—and even admitted that if, on the one hand, there had been a "stubborn assertion of right," on the other there had been also some "perversion" of that right. Of course such an acknowledgment, made by a Sovereign who spoke perfect Hungarian, and who even amidst that crowd of magnificent nobles must have looked a kingly though worn figure, excited much enthusiasm, and that part of the subject may be considered settled. Hungary has regained her autonomy as kingdom, and her relation to the Empire must be determined by arrangement. But before that arrangement can be commenced, there is another question at least as serious to be decided. The Emperor makes one condition with the Diet before he will consent, by going through the ceremony of consecration, and uttering the oath, to reaccept his position as constitutional monarch, The laws of 1848, he says, must be revised, and the point is the extent of the revision. Those laws which are legally, as he admits, in force, having been sanctioned by the Emperor Ferdinand, among other things assign the whole control of the Executive to the Viceroy or Palatine, and establish Ministerial responsibility. The Emperor desires, or rather demands, that both these arrangements shall be revised, or, as he says, "transformed." On the Viceroyalty the Hungarians will probably give way, or come to some compromise, such as the occasional residence of the Sovereign in Pesth. Now that the Emperor acknowledges that Hungary must not be sacrificed to Germany, there is no particular advantage in making the Palatine so strong, simply because he lives in Hungary, and the King may, if he likes, be his own Viceroy. Ministerial responsibility is, however, in Magyar judgment, essential to freedom, and they are exceedingly unlikely to surrender it even in form. At the same time, if maintained, it must be conceded to the Austrian Diet also; and the Empire is, in fact, transformed into two constitutional monarchies. It is doubtful whether the Kaiser quite intends that, and the point is, how far he will be prepared to go. He may content himself with the uncontrolled direction of foreign affairs, and in that case the Hungarians would probably make a compromise with their King. He understands foreign affairs better than they do: it is not unconstitutional to entrust them to him alone, as we practically did to William the Third. and although he has interests which are not Hungarian, still the stoutest Radicals see that if they are to be defended by the Empire, they must share its fate. Canada, for example, is none the less free because the Imperial Government retains the power of dictating its foreign policy. But, then, it is also possible that the Emperor may demand more than this, may require a "revision" favourable to the "rights as ruler" which he speaks of, may, while allowing the right of the Diet to decide, require its decision to be executed only through him and a cabinet of his servants. Authority is very dear to the Hapsburgs, and the difficulty of creating any Federal Legislature strong enough to overawe a responsible Cabinet will seem to any statesman almost insuperable. Supposing New York, for instance, to be governed by a State Premier instead of a State Governor, the difficulty of transmitting him an order from Washington would be indefinitely increased, for he would always be in accord with the popular assembly, and one of the unfailing qualities of such bodies is pertinacious obstinacy. In fact orders would have to be sent not to an individual but to a sovereign legislature, and sovereign legislatures a thousand years old can seldom be persuaded to receive orders. The Emperor, therefore, may resist, claiming, for example, unchecked power over the army, and if he does, it is even yet not impossible that negotiations may once more be broken off.

We trust that before such a catastrophe is accepted every form of compromise may be considered both by the Emperor and M. Deak, who acts as Hungarian plenipotentiary, for the matter is of European importance. Day by day the conservative statesmen of Europe perceive more clearly the mischievous effect of the paralysis which has fallen upon the Austrian Empire, and which can be cured only by hearty reconciliation with Hungary. That paralysis suspends the public law of Europe by rendering aggressive coalitions once more possible. If Austria were strong, for example, Belgium would be safe, for England and Austria together could guarantee her independence, while Count von Bismark would be compelled to increase Prussian territory by conciliating the populations of the minor states instead of simply over-riding them. Austria has an interest in almost every territory now menaced in Europe, and as long as she is powerful she acts as a permanent repression upon the vague, but strong ambitions, which threaten Belgium, Holland, Turkey, Bavaria, and Greece, and which seriously impede the establishment of a settled peace. If the Emperor can by any compromise whatever so arrange affairs that Hungary will heartily help him, he will at once be strong. M. Deak has, we believe, already intimated an opinion that, in that case, Hungary ought to guarantee her share of the original debt, which would make a loan once more possible, the Diet would vote any number of soldiers really demanded by the interests of the whole monarchy, while the Hungarian regiments in the service could be trusted implicitly, and one-fourth, at least, of the Austrian army set free from garrison duty. The Emperor, in fact, who could not now move an army without risk of a national bankruptcy, would at once be enabled to move and keep on foot for any external campaign an army of 100,000 men. That is an enormous addition of power, but to gain it the reconciliation must be more than formal, and, in spite of many hopeful signs, we cannot but

Digitized by Google

think that the difficulties which impede a cordial arrangement have been underrated.

They are all the greater, because the Emperor is not at liberty to make just as many concessions as he sees fit. If he, for example, could abandon the Federal idea, govern in Hungary as King, and in Austria as Emperor, he himself in fact becoming the single nexus of the monarchy, many obstacles would disappear; but this is precisely the policy his German subjects dislike. They desire centralism of some kind, believing that if a central body is once established, their culture and weight as members of another Federation will enable them to bear rule. Moreover, if Hungary secures absolute autonomy, and there is no Federal bond, Bohemia will ask for the same, and Gallicia, and the hereditary States, and all the multiform provinces of the Empire. That would be a return to the system of 1815, without the imperial autocracy to act as a centripetal force, and Austria would in a year or two be as powerless as at present. There is no way out of the dilemma save conciliation, and it is not clear that even conciliation will tempt Hungarian Liberals to consent to a central Legislature.

NEW ZEALAND PROVINCIALISM AND ITS FINANCIAL CAUSES.

Among the many powerful causes of the political and financial anarchy with which the colony of New Zealand is now threatened, none is more curious and more important than a certain financial arrangement suggested, though not we think imposed, by the not very successful New Zealand Constitution Act, passed in 1852, of which Sir John Pakington, we think, had the principal credit. There is no danger to which this colony has been and remains liable nearly so great as the disorganising provincialism—the equivalent of the State-Rights principle, as it is called in the United States—which the separate interests of the various settlements, and especially the separate interests of the northern and southern island, were certain to cherish. National pride, the feeling created by a common history and common traditions, the confidence in the Central Government called forth by experience of its trustworthiness and power, can never exist in the scattered portions of a new colony. The settlers going out fresh from England to carve out a new individual destiny for themselves, must be expected to be far more taken up with local affairs, and far less interested in the machinery of the common Government, than citizens of an old and highly-organised community, which has long ago constructed for itself a kind of ideal character and personality in the character and conduct of its Government. If then it was expedient—as we think it was—to try and bind together the new settlements in the islands of New Zealand into a single political federation, great care ought to have been taken on every side not to give the local or provincial municipalities too much, and the Central Government too little power. Yet, from the first, we believe, almost every mistake was made which could possibly have been made in the direction of strengthening the provincial organisations and weakening the central organisation. The consequence is that, from 1852 to the present time, the colonial party (as the party in favour of a strong central power is termed) has had a hard fight of it to keep the provincial party, the party which tries to paralyse the heart in order to strengthen the limbs of the colony, in any degree in check. The recent resignation of the Weld Ministry—a Ministry which had honestly adopted the policy laid down by Parliament and Mr Cardwell of dispensing with English troops and settling their quarrel with the Maories by their own unaided exertions—and the accession of Mr Stafford to power, really mean the defeat, temporary we will hope, of the colonial party by the provincial party,—for Mr Stafford, though formerly one of the Centralists, has deserted recently to the provincial anarchists, and is indeed nearly their only leader of account. But we do not purpose here to go into the general issue between the two parties, but only to point out the very curious and certainly unforeseen and unintended effect of one of Sir John Pakington's financial provisions in the New Zealand Constitution Act of 1852, tending most unfortunately to augment, and that, too, very powerfully, the temptation, already only too strong, to pursue what we have called the ultra-provincial or anti-colonial policy.

The sixty-sixth section of the New Zealand Constitution Act provided as follows:—

"After and subject to the payments to be made under the "provisions hereinbefore contained, all the revenue arising "from taxes, duties, rates, and imposts levied in virtue of "any Act of the General Assembly, and from the disposal of "waste lands of the Crown, under any such Act made in "pursuance of the authority herein contained, shall be subject "to be appropriated to such specific purposes as by any Act "of the said General Assembly shall be prescribed in that "behalf; and the surplus of such revenue which shall not be "appropriated as aforesaid shall be divided among the several "provinces for the time being established in New Zealand "under or by virtue of this Act, in the like proportions as "the gross proceeds of the said revenue shall have arisen "therein respectively, and shall be paid over to the respective "treasuries of such provinces for the public uses thereof, and "shall be subject to the appropriation of the respective pro-"vincial Councils of such provinces."

Now, at first sight there does not seem much danger, nor anything but fairness in this provision. It seems to mean only that, after defraying the expenses of the national Government, surplus revenue shall be applied to the benefit of the different settlements included within the general Government in proportion to their taxation. Probably this is all that it strictly does mean. We do not suppose that it could be contrary to the legal meaning of the clause if the surplus revenue of one financial year were appropriated at the beginning of the next financial year to the extra, or hitherto unauthorised, expenditure of the *past* year. But whether or not this be strictly within the meaning of the clause—and we believe it is, as there is nothing in the clause to limit the *time* in which the General Assembly may appropriate the revenue of the year to the year in which the revenue is raised—the clause at once suggested to the Provincialists a most welcome mode of robbing the Central Government to enrich and stimulate the separate settlements. It has at all events been interpreted by some of them to mean that all the excess of revenue over authorised expenditure vests, as soon as the financial period ends, in the Provincial Governments. Now, of course, it constantly happens that the Central Government is compelled to vary its actual expenditure in the course of the year from the plan originally proposed in the estimates. For example, in the last financial statement the New Zealand treasurer announced that he had spent *on authorised items* of expenditure less than he had received power to spend by no less than 143,000*l* in a total estimated expenditure of 953,718*l*. or 15 per cent. less than was estimated. But then, unfortunately, on *unauthorised* items of expenditure (items not included in the estimates) he had spent 161,610*l* *more* than he had estimated, or about 17 per cent. of his whole revenue, too much. Had the Government been allowed at the opening of the session to devote this surplus revenue to the surplus expenditure, the balance would have been nearly restored. But the practice, if not the theory, has been enforced by the Provincialists, that the savings on *authorised* expenditure are surplus revenue, immediately vesting in the Provincial Governments, while the excess of expenditure, above what is authorised, remains to be provided for by the Assembly in any way in which it pleases to provide for it,—which is too often by *loan*. The effect of this is that the Provincial Governments spend on themselves what the Central Government really wants in order to meet its obligations, and thus run the Central Government into contracting needless debt to get it out of the immediate difficulty. Or, as the colonial treasurer very lucidly puts it in his statement to the House:—"The consequence of all this has "been to add to the embarrassments of the general Government; "nor could it well have been otherwise, when we consider "that notwithstanding the Government of the colony may be "left with a yearly debt, it has been annually called upon to "hand over to the provinces a considerable surplus. It is a "most charming arrangement, by which the senior partner pays "over to his juniors a large amount of dividends at the end of "each year (just as if large profits had accrued), to be appro-"priated by them individually as they may think fit; whilst "the bills of the firm lie overdue, the joint credit suffers and "provisions for the liabilities of the past year has to be made "out of next year's income; or worse still, by going on the "market to borrow."

The extent to which this disorganising and corrupting process has proceeded in New Zealand cannot be understood without remembering that when the Constitution Act was passed, the revenue referred to in the clause which we have cited embraced all the *territorial* revenue,—the revenue got by the sale of the

Digitized by Google

unsettled land in each settlement. Now it seemed, at least superficially, more natural and fair that each of the settlements should as far as possible reap the benefit of the revenue raised by the sale of its own land, and while this territorial revenue was included in the general revenue disposed of by the vote of the Assembly, it was in some degree natural that there should be a vigorous struggle to get as much of it back to the settlement in which it originated as possible. But by an Act passed in 1856, the territorial or land-sale revenue was made an extraordinary branch of revenue, and its proceeds immediately given back to the Provincial Governments without being touched by the Central Government. And yet, since then, the Provincial party have been practically intent upon plundering the *Customs* revenue of the colony for provincial purposes, in the manner we have indicated, by seizing all the savings in the authorised expenditure for their own purposes even when they were compelled to provide for the unauthorised expenditure by loan. Mr Fitzherbert states the matter thus :—

"I have before me a comparative return (Return No. IV.), "showing the annual amount of unauthorised expenditure and "distributable surplus (in excess of the three-eighths Cus- "toms) extending from 1858 to 1865; which shows that "whilst the unauthorised expenditure has reached the amount "of 206,913*l* during the last seven years, the surplus (in ex- "cess of the three-eighths Customs) distributable to the pro- "vinces during the same period has amounted to 243,489*l*. "And when it is recollected that the House of Representa- "tives has already directed a portion of this unauthorised "expenditure to be carried to Loan Account; and that it "is perhaps not too presumptuous to assume that this Com- "mittee will sanction the proposal to deal with the remainder "in the same manner; it must, I think, be evident that the "operation by which the colony, out of the so-called surplus "or overflowing of its ordinary revenue, has distributed to "the provinces nearly a quarter of a million, whilst it was "making other provisions by loan for its own excess of ex- "penditure during the same period, is altogether anomalous "and indefensible."

The return referred to in this extract is the following :—

COMPARATIVE RETURN showing the Annual Amount of Unauthorised Expenditure and Distributable Surplus (in excess of $\frac{3}{8}$ths Customs), beginning with the year 1857–8.

	Surplus distributable at end of year (in excess of $\frac{3}{8}$ths Customs). £ s d		Unauthorised Expenditure. £ s d
1857–58	6,201 14 10	.....	1,165 13 1
1858–59	9,944 14 7	.....	9,008 12 6
1859–60	*36,040 17 0	.....	26,363 8 6
1860–61	4,827 3 5	.....	1,805 16 5
1861–62	44,681 6 3	.....	1,672 5 4
1862–63	59,935 11 9	.....	5,287 1 2
1863–64	60,508 9 0	.....	36,117 19 10
1864–65	21,349 11 0	.....	125,492 15 8
Totals	243,489 7 10	.....	206,913 12 6

* The 36,040*l* of Surplus Revenue was paid over to the provinces, and the amounts of Unauthorised Expenditure of the three preceding years was provided for by special loan, "The Debentures Act, 1860," and made recoverable out of future surplus revenue, hence 1860–1 the surplus is reduced to 4,827*l*.

The reference here to the three-eighths of the Customs requires explanation. Three-eighths of the yield of the Customs revenue have recently been regularly devoted by colonial legislation to the necessary expenses of provincial government, and it is only the "surplus revenue" *in excess of this sum* that Mr Fitzherbert is anxious to save from the rapacity of the provincial party. Another instructive return shows that during *three* years, the provinces had had *in all*—adding the regular three-eighths of the Customs revenue to the "surplus revenue" gained in the rather illicit fashion we have described—no less than 659,677*l*, of which more than *half*, namely 338,525*l*, was really not wanted for the purposes of provincial governments, and was available for public works and for stimulating generally the prosperity of the settlements. So that if only the three-eighths of Customs revenue, regularly assigned to the Provincial Governments, were paid them, the whole necessary expenses of provincial governments would be more than defrayed, and a good deal left over also for public works. But not content with this, the provincial party actually covet what is, in effect, needful to the credit of the general Government, and prefer plunging the general Government deeper and deeper into debt to resigning a shilling which they can legally lay hold of for local purposes.

One reason, no doubt, why the Weld Government have been forced to resign, was that they sought, partially at least, to remedy this great evil. They did not attempt to interfere with the principle of assigning a regular quota of the Customs revenue to the provincial governments, though they wished to diminish it, but they did propose to carry surplus revenue to next year's revenue account, and subject it to appropriation, instead of making a dividend of it among the provinces,—and hence their great unpopularity.

We have still hopes that Mr Weld's Government may return to power and carry its measures, for a time at least. After raising (*without* including the territorial revenue) so large a sum as 4*l* 9s 11d per head of the population,—and proposing to raise a still larger sum to meet the urgent demands of the Government,—the Weld Government cannot at least be charged with indifference to the colonial credit, and it is a great misfortune for the colony that in passing the New Zealand Constitution Act the British Parliament has, inadvertently, put so strong a weapon into the hands of the Provincialists, who care little for colonial credit in comparison with stimulus to local improvements.

CARLISLE MEMORIAL REFUGE FOR FEMALE CONVICTS.

TO THE EDITOR OF THE ECONOMIST.

SIR,—It is well known that for very many years great difficulty has been experienced in the disposal of our female convicts. The Royal Commissioners on Penal Servitude reported in 1863 their belief "that charitable and religious "societies are the only means whereby the dangers which "always await a female convict on her discharge from prison "can be lessened." It was in evidence before them that these societies had, in Ireland, for many years proved extremely beneficial.

Towards the end of 1864 a deputation waited upon Sir George Grey, and obtained his consent to the formation of institutions for female convicts, which should be intermediate between the prisons and liberty, and to which they should be licensed under the 10th clause of the Penal Servitude Act of 1864.

A committee (of which I became the honorary secretary) was at once formed, funds were raised, a large house (No. 6 Queen square, Bloomsbury) was taken, adapted and furnished, and in August the first inmates were admitted. In memory of the statesman under whose auspices its prototype was framed in Ireland, the new institution was named the "Carlisle" Memorial Refuge.

It is essential to the success of such an establishment that it should be placed under the charge of private energy and benevolence—the Government contributes towards the current expenditure, and very properly retains the right of inspection; but resigns the entire management to a private Committee.

The object of the promoters of the Refuge is by a special training to prepare the women for service; and to induce the public to co-operate in obtaining their employment.

With this end in view, they have assimilated the discipline as nearly as possible to that of an ordinary large household, rather than to a public institution.

All signs of coercion and restraint are obliterated as far as is consistent with safety. A lady is appointed to act as mistress of the house, and to her and her three assistant-superintendents, the convict inmates stand in the relationship of servants.

A certain number are told off in rotation to perform the domestic service of the house, and the remainder are employed at laundry and needle work.

There are no punishments for misconduct. The women are under ordeal to test their fitness for restoration to liberty, ill-behaviour is therefore a sign of their unfitness, and necessitates their reconsignment to prison by a forfeiture of their Tickets of Licence.

The short period during which the Refuge has been opened has gone far to show its value. Thrown on their own resources almost as completely as they would be in an ordinary household, the women soon lose the helpless dependence which a prison invariably generates, and acquire self-reliance and self-control; discipline is maintained without the slightest antagonism between the superintendent and the convicts; and the offers of employment for literates already received from the visitors of the "Refuge" indicate that its establishment is likely to prove extremely beneficial to the country.

The limited space of a letter will not admit of my entering

Digitized by Google

more minutely into the details of management; but I most earnestly desire that a very close inspection should be made into the arrangements, which are based on strict economy, and, I believe, are well calculated to secure the object in view.

It is very probable that eventually the Carlisle Memorial Refuge will prove self-supporting; but at the present time some assistance is required. It will, I think, be generally felt, that the burden and expense of such an undertaking, the first of the kind which has been tried in Great Britain, ought not to fall, as it has hitherto fallen, on a small number of persons; and I believe that by making the case known, we shall obtain the aid which is most certainly required, and which, as Honorary Secretary, I shall most thankfully receive. —I am, Sir, your obedient servant,

WALTER CROFTON,
Hon. Sec., Carlisle Memorial Refuge.

The Close, Winchester, December 18, 1865.

Foreign Correspondence

(FROM OUR OWN CORRESPONDENT.)

PARIS, Friday.

The *Moniteur* has published the following return of the Bank of France, made up to the 21st inst. The return for the previous week is added:—

DEBTOR.	Dec. 21, 1865. f c		Dec. 14, 1865. f c
Capital of the bank	182,500,000 0	.....	182,500,000 0
Profits, in addition to capital	7,044,776 2	.....	7,044,776 2
Reserve of the bank and branches	22,105,750 14	.....	22,105,750 14

The Bank return, compared with that of last Thursday, shows a decline of 27,283,000f in discounts, and of 16,150,000f in the circulation of notes, and an increase of 13,659,000f in the coin and bullion, and one of 7,563,000f in deposits. This return is not satisfactory in a commercial point of view, but it has given pleasure to Bourse speculators, as the less the money employed in ordinary commerce, the more there is for speculation.

In the early part of this week the Bourse was depressed, and yesterday there was a marked fall in most securities, on account of the adverse vote of the Italian Chamber of Deputies to the Ministry on a financial question, and the belief that the Cabinet would in consequence resign. But to-day a better tone has prevailed. The following are the quotations. The great rise in the two Spanish railways will be noticed; it is owing to the expectation that the Spanish Government has at last seen the necessity of doing something for the companies.

The New Ottoman Loan, undertaken by the Ottoman Bank and the Credit Mobilier, has greatly occupied financial circles since my last. The formal announcement of it was not made until the day after my letter was despatched, but the conditions of it are precisely what I was able to state to you. The contractors for the conversion of the Turkish debt have, through their representative in this city, Mr Merton, published a notification in the newspapers to the effect that the giving in guarantee of the loan, of the taxes on sheep in Roumelia and the Archipelago, and, after 1868, of certain Syrian revenues, is null and of no effect, inasmuch as the Turkish Government had previously undertaken that they should return to the general revenues of the State, which are guaranteed to the holders of the 5 per cent. stock. "Any act which may otherwise dispose of them," said the notification, "cannot be executed, and must be considered as null." It added, —"The sort of encroachment against which we wish to reassure the public is of secondary importance, but it is right to point it out at once, in order to prevent graver measures, and to denounce in advance its complete nullity." The same gentlemen have also addressed a letter to the Paris Committee of the Ottoman Bank, in which they say, in substance, the same thing, and add:—"We therefore protest in the most formal manner, in the name of the holders of the 5 per cent. stock, against an assertion which may lead to the supposition that the Imperial Ottoman Government endeavours to lessen their national pledge; and we declare, besides, that if any act whatsoever, emanating from the Ottoman Government, authorises the Ottoman Bank to make such an employment of funds, that promise to be null and of no effect, as disposing of a right already irrevocably alienated."

The Paris Committee of the Ottoman Bank and the Credit Mobilier have not vouchsafed any direct reply to this vigorous attack, because they have, it appears, legal advice that the guarantees given to them are not in opposition to, and do not encroach on, those previously accorded to Mr Laing and his friends. But they have induced the Embassy of the Sublime Porte in this city to repeat the announcement already made at London, that all the revenues of Turkey set apart for loans shall be paid into the Ottoman Bank, and besides to make the following advertisement:—"In answer to publications made by the representatives of Mr S. Laing, the Ottoman Government confines itself to declaring that it only took the resolution to issue the new loan, because it was perfectly in its right in so doing; that the loan is not contrary to any preceding laws; and that the guarantees given to it have been legally conceded."

In spite of this demonstration of the Ottoman Embassy, the money market has not received the loan with much favour, and the regular adversaries of the Credit Mobilier, who are numerous and powerful, have done all they can to create difficulties to it. In addition, the turn Italian affairs have taken is not calculated to facilitate it. But notwithstanding all this, it is, I understand, considered certain that the loan will be completely filled up; the subscriptions in the provinces being quite large enough to compensate for the backwardness of Paris.

On Saturday last the remark was made in the Paris correspondence of the ECONOMIST that it appeared singular to many persons no public appeal should have been issued in this City for subscriptions to the shares of the new company (limited) of Charles Laffitte and Co., although the bank of that name is established at Paris. On Monday there appeared in almost all the newspapers advertisements of the company, but it was notified that subscriptions would only be received up to Monday afternoon for Paris, and Wednesday for the provinces. This late announcement, combined with the short period allowed for subscribing, seems to show either that the directors of the company do not wish for French support, notwithstanding the bank is entirely French, or that counting on the repute the firm enjoys they calculated that French people would be so eager to invest that a few hours would suffice to receive subscriptions for the shares to be reserved for them.

M. Leonce de Lavergne and M. Courcelle-Seneuil have appeared before the Commission on Banks. The opinions they expressed were, it is hardly necessary to say, in accordance with those set forth in their writings. Both are favourable to liberty being established in the matter of banks of issue, as it is in other trades; but the former thinks that public opinion in France is hardly ripe for such a measure, and he accordingly recommends the revival of departmental or regional banks.

The treaty of commerce between England and Austria is to be followed by one between Austria and France. This last one is most needed, as the direct trade between the two countries is deplorably small. In 1864 it consisted only of 24,587,899f of im-

Digitized by Google

ports, and 7,027,714f of exports, and from these items deduction must be made for goods in transit. No doubt a certain portion of the trade which France does with the Zollverein is for Austria, but that will not make a very material addition to the preceding figures.

The Company de Magasins Publics et Generaux of Bordeaux notifies that it will require payment of a call of 50f from 20th to 31st January next.

The Chamber of Commerce of Havre having remarked that the publication of the daily transactions in different sort of goods are not always exact, has resolved that the Committee of Brokers shall publish one under their own responsibility.

The Eastern Railway Company is to pay from 2nd January the coupons of the bonds of the Montereau, Strasburg to Bale, Dieuze, and Ardennes lines, with which it is amalgamated.

The Company d'Eclairage au Gaz et des Hauts Fourneaux et Fonderies de Marseille et des Mines de Portes et Senechas, advertises the payment from 2nd January of Coupon No. 5.

The Credit Mobilier announces from the 2d January the payment of interest on shares or bonds of the companies with which it is connected:—On its own shares, 25f for "nominatives," or 24f 30c to "bearer;" Southern Railway, 20f or 19f 60c on shares, and 7f 50c or 7f 30c on bonds; Immobiliere, 12f 50c or 12f 20c on shares, and 7f 50c or 7f 30c on bonds; Ports de Marseille, 15f bonds; Transatlantic Company, 12f 50c or 12f 10c shares, 12f 50c or 12f 20c bonds; Ottoman loan of 1863, 15f bonds; Entrepots et Magasins Generaux, 15f or 14f 57c shares; Vieille Montagne, 12f 50c bonds; Omnibus Company, 25f or 24f 27c shares, 12f 50c bonds; Cordova to Seville Railway, 10f shares, 7f 50c bonds; Austrian railways, 12f 50c shares; Russian railways, 12f 50c shares; Spanish Credit Mobilier, 30f shares; Italian Credit Mobilier, 24f shares; Imperial Ottoman Bank, 12f 55c shares.

The Company des Minerais de fer Magnetique de Mokta-el-Hadid, which was founded under the auspices of the Societe Generale, is to pay from 2nd January 8f 85c on shares on which 250f are paid, and 17f 70c on those which are entirely paid up.

The shareholders of the Lead Mines and Founderies of Pontgibaud are informed that the dividend of 1864-5, was paid at 20f per share, in a general meeting held on the 15th, and that it is now payable. Part of the shares of this company are in English hands.

The company of the Docks et Entrepots of Marseilles will distribute from 2nd January, 9f 37½c interest, to the 31st, on shares paid up to the amount of 375f, and 12f 50c on those on which all calls have been paid.

The Parisian Gas Company announces the payment, from 2nd January, of 12f 50c as the second half-year's interest on bonds.

The South of Austria, Lombardy, and Central Italy Railway Company is to pay 7f 50c as half a year's interest on bonds. The payment is to take place from the 2nd January.

The Meridional of Italy Railway Company advertises the payment, on and after 1st January, of 10f 40c per share, being interest at the rate of 5 per cent. to the 31st Dec.

The Victor Emmanuel Railway will pay, from 2nd January, 14f 70c per share, being a half-year's interest.

The following is the market report:—

FLOUR.—Sales have not been active at Paris, but there is firmness in prices. Yesterday the quotations were 48f 50c to 53f the sack of 157 kilogs. Six marks, current month, were 52f to 52f 25c; four months of January, 53f 25c. Type Paris, current month, 32f 25c the 101 kilogs.

WHEAT.—At *Paris*, yesterday, choice white was 28f the sack of 120 kilogs; choice red, 27f 50c; first quality, 26f to 26f 75c; ordinary, 25f to 25f 50c.

COTTON.—The sales at *Havre*, in the week ending Friday, were 7,963 bales, the greater part Asiatic, and the arrivals 9,047, of which about half were from England. The stock was estimated at 29,650 bales. The closing quotations were 2f to 3f higher for United States sorts, up to and including very ordinary, 5f higher for Broach, up to and including ordinary; other qualities unchanged. Low New Orleans was, consequently, 270f the 50 kilogs; good ordinary quality in Broach, 220f; in Tinnevelly and Madras, 220f; in China, 215f; in Jumel, 275f. This week the market has been calm. Yesterday, New Orleans, 250f to 262f 50c; America, 260f; sawginned, 220f; Oomrawuttee, 200f; Madras, 212f 50c; and for delivery, 195f; Rangoon, 175f.

COFFEE.—The market was calm at *Havre* in the week ending Friday, but prices were firm. 500 sacks Hayti Port-au-Prince, 85f the 50 kilogs, in bond; 681 Gonaives, 85f to 88f 50c; 1,125 Rio, not washed, 67f to 78f; 500 Bahia, 69f; 400 Ceara, 88f to 90f. By auction, some damaged were sold. The arrivals were about 12,000 sacks. This week, Port-au-Prince, 85f 50c and 85f 75c; Cape, 86f; Rio, 71f and 76f; San Thomé, 80f 50c to 107f 50c (the last duty paid): Gonaives, 89f. At *Bordeaux*, last week, 900 sacks La Guayra grages at (it was said) 95f the 50 kilogs; 100 Rio, not washed, 78f; 100 washed, 85f; 100 Mysore, 121f 50c. Some different sorts of damaged were sold by auction. This week, Rio, washed and unwashed, Mysore, and Jacmel, at prices not given: Salem, 135f, At *Nantes*, last week, some sales of damaged. Nothing done this week. At *Marseilles*, last week, 400 sacks San Domingo, 84f; 2,178 sacks Rio, 71f 50c to 86f; and by auction, 2,337 sacks Brazil, 67f to 77f 75c; 204 ditto, low quality, [60f 25c to 61f 50c; also some damaged. This week, a cargo of Mocha, at (it was said) 127f 50c; San Domingo, for delivery, 84f. By auction, Rio, 70f to 76f.

SUGAR.—Calm prevailed at *Havre* in the week ending Friday. 460 casks Havana, 33f to 34f the 50 kilogs, No. 12 in bond: 400 bales Reunion, for delivery, 52f 25c, bonne quatrieme, duty paid. The arrivals were 1,279 bales beetroot. This week, French West India, 50f, bonne quatrieme; Havana, No. 12, 33fr. At *Bordeaux*, last week, 3,951 sacks Reunion, to take at Nantes, 52f 25c, bonne quatrieme; in French West; India there was a sale for delivery, but the details were not made known the nominal quotation was 50f 50c, bonne quatrieme. No sales this week. At *Nantes*, last week, 20,578 sacks Reunion, 51f 75c, bonne quatrieme; 3,951 for Bordeaux, at 53f 37½c on sample, equal to 52f 25c, bonne quatrieme; some French West India usine, 59f, and second jet, 52f 50c. This week, usine, 48f 50c, and 52f 50c on sample. At *Marseilles*, last week, 300 casks French West India, 30f 50c, bonne quatrieme of Havre. Prices firm, notwithstanding limited transactions. This week no sales, last prices firmly maintained.

INDIGO.—The demand at *Havre*, in the week ending Friday, was regular: 40 chests Bengal, the greater part at 50c above the estimates, and 7 serons Guatemala at prices not mentioned. The arrivals were only 2 chests. No sales this week. At *Bordeaux*, last week, 10 chests Bengal, 22 Kurpah, and 42 Madras, at established prices, the first two sorts firm. This week, Madras at prices not stated.

HIDES.—At *Havre*, last week, 250 Monte Video salted saladeros heavy, 61f 50c the 50 kilogs, 10,000 Buenos Ayres salted ox, part at 52f 50c to 53f, part at prices kept secret; 160 Rio Grande dry, 62f 50c; 400 ditto salted cow, 44f 50c; 1,910 ditto ox, 50f 50c to 54f; 595 Rio Janeiro salted cow, 38f; 1,455 ditto ox, 52f; 400 Pernambuco salted, 44f; 1,000 horse, Rio Grande, 41f 50c, and 45 bales and 1,000 pieces kid La Plata, 13f to 14f the dozen. There was also the public auction mentioned last week. The arrivals were about 21,000. This week, Monte Video dry, 67f 50c; salted ox, 52f to 61f 50c; cow, 45f and 45f 75c; Rio Janeiro ox, 52f; cow, 38f; Pernambuco salted, 43f 50c; Valparaiso drysalted ox, 78f; Calcutta calf, 70f; Buenos Ayres salted ox light, 49f 50c; ditto cow, 45f 75c.

WOOL.—The sales at *Havre*, in the week ending Friday, were 5 bales Buenos Ayres unwashed, 2f 17½ the kilog; 40 Monte Video lamb, 1f 45c; 30 Monte Video sheepskin, 1f 60c. At public auction, 1,167 bales Buenos Ayres unwashed were sold, out of 2,328 offered; merinos fetched 170f to 240f the 100 kilogs: prima, 165f to 225f; secunda, 150f to 210f; tertia, 182f 50c to 187f 50c; quarta and quinta, 92f 50c to 177f 50c; lamb, 130f to 210f; other sorts, 87f 50c to 210f; washed, 220f to 357f. Of Monte Video, 369 bales, out of 819 offered, were sold: merinos, 220f to 330f; prima, 180f to 220f; secunda, 140f to 212f 50c; tertia, 135f to 170f; quarta and quinta, 140f to 170f: other sorts, 142f 50c to 167f 50c; washed, 260f. Of Rio Grande, 29 bales sold out 70 offered: unwashed, 110f to 177f 50c; washed, 95f to 235f. There were also sold 6 bales Santiago washed, 230f; 35 Chili unwashed, 70f to 182f 50c; 22 Peru ditto, 100f; 117 Russia washed, 325f to 525f; 15 different sorts, 60f to 430f. In sheepskins, 124 bales La Plata unwashed went at 105f to 180f; also some damaged. The arrivals were about 300 bales. This week, La Plata washed, 360f, duty paid; Portugal unwashed, 130f; Monte Video sheepskin unwashed, 127f 50c to 147f 50c; La Plata lambskin, for delivery, 145f.

TALLOW.—At *Havre* the market was calm in the early part of the week ending Friday, but was active at improved prices in the latter part on account of news from Paris. The sales altogether were 200 pipes La Plata, disposable, 56f 50c to 58f the 50 kilogs, 420 for delivery, 57f to 59f. The arrivals were 286 casks Russian. No sales this week. At *Paris*, yesterday, the 100 kilogs, octroi duty included, were 122f 20c.

SPIRITS.—At *Paris*, yesterday. 3-6 first quality, 90 deg., disposable, 43f the hectolitre. At *Bordeaux*, the day before yesterday, 3-6 Languedoc, 86 deg., 54f; 3-6 beetroot, first quality, 90 deg., 51f.

COMMERCIAL AND MISCELLANEOUS NEWS.

The following returns, published by the Veterinary Department of the Privy Council, and having reference to the cattle plague, do not profess to give the total number of cases which have occurred in Great Britain, but only those which have been ascertained from the official information received from Inspectors, whether appointed by the Clerk of the Council or by the local authorities. The divisions of England are those of the Census. Column I. only records the cases reported as having commenced during the weeks indicated by the headings; "back" cases being added to column II.:—

[Census Divisions.]	I. Number Attacked.			II. Result of reported Cases from the Commencement of the Disease.

Subjoined is a report of the Calcutta money market, under date, Nov. 7:—There has been no further advance in bank rates, and the rise in the value of money has been somewhat checked by the large supplies of specie received chiefly from China. Though the demand both for the cotton districts and the rice ports will soon be great, it is not unlikely that, owing to the serious injury caused to the rice and jute crops with

Digitized by Google

the stoppage of all sowing of oil-seeds, &c., throughout the greater portion of Lower Bengal, in consequence of the long-continued drought, the drain of silver to the interior during the next few months will be much less than usual at this season. Government Securities—There was a steady advance in 5½ per cents. till the 27th ultimo, when they stood at 9-8 premium, since which they have been steady at 9-8 to 9-12, while 5 and 4 per cents. are 1 to 1½ per cent. above our last quotations; but to-day the market is very dull. Exchange—The rate for first-class 6 months' sight paper after advancing to 2-1 3-16 fell to 2-1 1-16, but has rallied; business to a considerable extent has been done at 2-1⅛, and one of the banks has sold to-day at 2-1¼. The following are the Bank returns of Oct. 24 and Oct. 31:—

Liabilities.	Oct 24.	Oct 31.
Proprietors' capital, paid up	£2,200,000	£2,206,060

Cash and currency notes at head office	2,363,340	2,827,820
Cash and currency notes including Treasury balance at branches	1,388,685	1,315,934
	6,626,121	7,029,977

Writing from Madras on the 13th ultimo, Messrs Dymes and Co. thus allude to the state of money affairs at that port:—Money—The high rates of interest and exchange lately ruling attracted a large quantity of specie to this market, and we have now an easier money market, with a reduction in the banks' rates for accommodation of one per cent. all round. Present rates are 11 per cent. for loans on Government securities, and 13 per cent. discount on three months' sight private bills. At the next meeting of the directors of the Bank of Madras we look for a further reduction. Government Paper—The advance in Calcutta and the increasing ease in our money market has naturally affected our prices, and we quote all securities higher. Five-and-a-half per Cents., 9½ to 10 premium; Five per Cents., 3¾ to 4 premium; and Four per Cents., 10 to 11 discount. Bombay has not yet responded, but this is accounted for by lightness in the money market there. Exchange—At the commencement of the fortnight, document bills were freely offered at 2-1⅛, and clean credits to 2-1 7/8, both at six months' sight. Since then rates have declined and close for this mail at 2-1½ for the former, and 2-1¼ to 2-1⅜ for the latter. A further fall is imminent. The banks' advertised drawing rate has not been altered at 2-0¾ for six months' sight bills. Sovereigns—English, 10-4 rs each, and Australians 10-3-6 rs each.

Annexed is a portion of the bullion circular issued at Hong Kong by Messrs Sharp and Co. on the 1st November:—Gold—The arrivals have been only $290,000 worth, half of which is in transit; the export has been $500,000, including the shipment per Baroda on the 15th instant, and excluding those to leave to-morrow. The market has gradually risen to an extreme rate in consequence of the small supplies. Silver—Imports, $110,000 worth; exports, $380,000. The inquiry has been steady, and very little now remains on sale. Dollar Currency—Our largest supplies have been from Shanghai, and altogether represent $1,290,000. The amount sent away is $840,000. Clean coin has been done at a slight advance on last mail's quotations. Discounts and Mortgages—Money on fair security is worth 8 per cent.; mortgages have been negotiated at 9 per cent. on good properties. Exchange—Sterling has fluctuated but little during the mail, and closes as before. Rupees are slightly lower, with a very moderate business. Shares—Considerable sales of Hong Kong and Shanghai Bank shares have been made at quotations; other shares have been quite neglected. Closing quotations:—Clean Mexicans, ⅜ per cent. prem.; gold leaf, $23 per tael; sovereigns, $4.50 each; discounts, 8 per cent.; Hong Kong and Shanghai Banking Company shares, 6 per cent. prem.; Hong Kong and Whampoa Dock Company, 40 per cent. prem.; Hong Kong Union Dock Company, par; Hong Kong Gas Company, 30 per cent. prem.

The following is a statement of deposits and coinage at the Mint of the United States, Philadelphia, during the month of November, 1865:—

Deposits.		dols c
Gold deposits from all sources		1,009,760 19

BANK OF ENGLAND.

(From the GAZETTE.)

An Account pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 20th day of December, 1865.

ISSUE DEPARTMENT.

	£		£
Notes issued	27,693,345	Government Debt	11,015,100
		Other Securities	3,634,900
		Gold Coin and Bullion	12,043,345
		Silver Bullion	...
	27,693,345		27,693,345

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	9,891,100
Rest	3,238,206	Other Securities	21,627,853
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	7,375,655	Notes	7,831,735
Other Deposits	14,090,236	Gold and Silver Coin	329,064
Seven Day and other Bills	422,455		
	39,679,752		39,679,752

THE OLD FORM

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	20,784,065	Securities	31 615,953
Public Deposits	7,375,855	Coin and Bullion	13,872,409
Private Deposits	14,090,236		
	42,250,156		45,488,362

Dated the 21st December 1865. W. MILLER, Chief Cashier.

The balance of Assets above Liabilities being 3,238,206l, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

A DECREASE of Circulation of	£228,354
An INCREASE of Public Deposits of	294,519
A DECREASE of Other Deposits of	169,646
An INCREASE of Government Securities of	50,000
An INCREASE of Other Securities of	12,223
A DECREASE of Bullion of	148,994
An INCREASE of Rest of	16,810
An INCREASE of Reserve of	42,846

The little change apparent in the figures of the Bank return just issued are not favourable. Gold continues to leave the country, and notwithstanding the reflux of coins from the provinces, there is under the head of coin and bullion a decrease of 148,994*l*. The reserve shows the small increase of 42,846*l*. The private deposits have been slightly reduced, and there is a trifling advance in the amount of private securities.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1855:—

At corresponding dates with the present week	1855.	1862.	1863.	1864.	1865.
	£	£	£	£	£
Circulation, including bank post bills	19,230,978	20,150,398	20,273,799	19,669,007	20,764,065

Digitized by Google

In the corresponding week of 1855, the news had been received of the fall of Kars. The Madrid Credit Mobilier had been formed.

In 1862, the King Ferdinand of Portugal had intimated his refusal to become a candidate for the Throne of Greece. The universal suffrage for the election of a King in Greece had terminated in favour of Prince Alfred. News had been received of the defeat of the Federals at Fredericksburg, in Virginia.

In 1863, the proclamation of the King of Denmark recalling soldiers on furlough had been issued. The King's message, closing the Rigsrad, had been read by the Minister-President. Notice had been given of the evacuation of Holstein by the Danish troops. The German representative bodies had issued an appeal to the nation on the Schleswig-Holstein question. Austrian troops had arrived at Hamburg. Prussia had given notice to quit the Zollverein in order to secure liberty of action with regard to pending negotiations. The reply of the Emperor Napoleon to the address of the French Senate had been published, as well as the circular on the proposed congress. The Greek National Assembly had postponed discussion on the Ionian Islands. Insecurity was increasing in Athens and in the provinces. The message of President Lincoln had been published. The message of the Confederate President Davis had been received.

In 1864, the message of President Lincoln had come to hand. He stated that an attempt to negotiate with Davis would not result in any good, and that the Southern people could have peace by laying down their arms and submitting to the national authority. Fresh disturbances had taken place at Tunis. The Spanish Cortes had been opened. The Bank of France rate had been reduced from 5 to 4½ per cent., and that of the Bank of Holland from 6½ to 6 per cent.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1855, a deficiency of 6,962,666*l*; in 1862, a deficiency of 5,808,717*l*; in 1863, a deficiency of 8,699,319*l*; and in 1864, a deficiency of 5,826,678*l*. In 1865, the deficiency is 7,537,617*l*.

Discount and Money Market.—The absence of pressure for discount this week has been favourably interpreted. The demand for remittances to India has not increased, and the firmness of the market there in Manchester goods is also looked on as a favourable sign. The large orders for American securities prevent the shipment of coin from America, but as they are chiefly from Germany, we are indirectly affected only, and some explanation is afforded on the subject of the rates of interest prevailing on the German exchanges, which formerly were maintained at a constant lower rate than that in force in London. The terms of the open market are still held at about the Bank minimum, and there is no greater disposition to take long-dated bills except at increased rates. Nevertheless, money is rather easier, owing, perhaps, to the precautionary measures generally adopted a week or two back. The arrivals of gold have strengthened the market for the moment, although withdrawals for the continent continue.

On Wednesday, at the biddings at the Bank of England for 350,000*l* Government bills on India, the proportions allotted were:—Calcutta, 225,800*l*; Madras, 24,200*l*; and to Bombay, 100,000*l*. The minimum price was unaltered at 1s 11½d on Calcutta and Madras, and 1s 11¾d on Bombay. Tenders on Calcutta and Madras at 1s 11½d will receive about 62 per cent., and those on Bombay at 2s 0¼d about 13 per cent. Above these prices allotments were made in full.

The financial agent of the Republic of Venezuela has issued another paper in defence of his Government. He seeks to convey the impression that a Government need not be bound by the conventions of its predecessor to the public creditor; and he states that his Government repudiates no claims. It may be deemed unnecessary to enter upon a discussion with him on either question. If each following Government were in any country to disregard the engagements contracted previous to its existence, the most utter insecurity would result; and in this particular case relating to the Government of Venezuela, we have proof of our assertion in the equal depreciation in the value of the 1861 and the 1862 loans; on one of which the dividend is paid, while on the other it is still overdue. If the Goverument of Senor Guzman repudiate no claim, let it at once fulfil its obligations to the creditors of 1862. We confess ourselves unable to appreciate the attempt at reasoning displayed, and we trust that the Venezuela Government will pause ere it persevere in conduct devoid of the very earliest principles of common honesty.

An important meeting of the Venezuelan bondholders was held to-day, and the following resolutions were passed:—

RESOLUTIONS.

1. To adopt the resolutions proposed in the report.

Resolutions.

Whereas, a decree has been issued and duly published by the Government of Venezuela, under date of the 1st of November, 1862, of which the second paragraph is to the following effect:—"When in payment of import dues, paragés may have to be given, the importers will issue them separately for the 55 per cent. in favour of the Custom House, and of the agent or agents of Messrs Baring Brothers and Co., which will be paid in cash."—

It is resolved to give notice to the merchants at La Guayra and Puerto Cabello, that such 55 per cent. are the property of the British bondholders, and that in conformity with the aforesaid decree, they are to pay the same to the agents of Messrs Baring Brothers and Co., and to no other persons, otherwise they will be held responsible for their deviation from the above order.

Resolved—With a view of obtaining justice from the Government of Venezuela, to call upon the Committee of the Stock Exchange not to admit the introduction of the shares of any Venezulan Company upon the London market, until a satisfactory arrangement shall have been made by the Government of Venezula with the British creditors.

Resolved—Whereas the Government of Venezuela have not fulfilled the obligations entered into towards the British bondholders in the agreements of 1859 and 1862; and whereas the benefits conferred by those agreements have been unjustifiably withdrawn; it is hereby declared that the British bondholders are entitled, and they hereby claim, to be placed in the position occupied prior to the unfulfilled contract of 1859, whereby the Active Bonds re-acquire their original right to a maximum dividend of 6 per cent. and the Deferred Bonds to a maximum dividend of 3 per cent, and whereby the bondholders claim the sum of 214,000*l* in cash, instead of the 6 per cent. bonds issued in 1862.

Resolved—To request Messrs Baring Brothers and Co. to apply to the Government of Venezuela to deposit, in conformity with the decree of the 3rd of December, 1864, the proceeds of the 55 per cent. of Customs dues at La Guayra and Puerto Cabello, in the hands of mutual trustees.

Resolved—To convey to the Right Honourable the Earl Russell the best thanks of the Venezuelan bondholders for his Lordship's exertions in their behalf, and to express a hope that his Lordship, in his present position of Prime Minister, will continue to voudhsafe his powerful support to their cause.

Resolved—To invite Messrs Baring Brothers and Co, and the committee to request the favour of an interview with the Right Honourable the Earl of Clarendon, in order to bring under his Lordship's consideration the unjustifiable proceedings of the Government of Venezuela against their British creditors, and to solicit his Lordship's active intervention for the redress of their grievances.

Resolved—To request Messrs Baring Brothers and Co. and the committee to continue their joint efforts to bring about a satisfactory settlement of their claims upon the Government of Venezuela, and to take such measures as they may deem advisable under the circumstances to protect the interests of the bondholders; and to submit at a public meeting any plan they may desire to recommend for an adjustment of their claims, to the consideration and ratification of the bondholders."

Resolved—That the warmest thanks of the Venezuelan bondholders are due, and hereby gratefully conveyed to G. J. Göschen, Esq., M.P., R. W. Crawford, Esq., M.P., and Baron Lionel de Rothschild, M.P., for the important service rendered to their cause by supporting their appeal to Earl Russell, and especially for the cheerful and ready manner in which, at the excited and busy period of the City elections, they devoted their time and attention to the incerests of their constituents."

2. To empower the committee to carry the foregoing resolutions into execution at such time as may seem most advisable to them.

3. To reject the proposition made by Senor Guzman, offering 15 per cent. of the general Customs instead of the 55 per cent. of Puerto Cabello and La Guayra.

4. That the bondholders will consider any payment on the part of the Venezuelan Government on account of the dividends on the Venezuelan debt, as a proof of their honest intentions.

5. To empower the committee to add to their number, and to appoint sub-committees whenever it should be found necessary to do so.

6. That as it appears from the accounts published in the report of the Venezuela committee, that the committee of Spanish American bondholders have accepted the sum of 1,000*l* from the Government of Venezuela, the bondholders have no longer any confidence in the committee of Spanish American bondholders, and request them to resign their functions.

The Imperial Ottoman Bank has advertised the Ottoman 6 per cent. loan of 1865, for 6,000,000*l*, at 66 per cent., in 300,000 bonds of 20*l* (500f) each; repayable at par in twenty-one years by half-yearly drawings, in the usual manner, and bearing interest at 6 per cent. per annum, payable 1st January and 1st July. The provisional scrip is to be equally negoti-

Digitized by Google

able in London and Paris. The instalments are payable as under :—

	£	s	d		£
On application	1	0	0	per bond of	20
On allotment	3	4	0	—	—
On 6th February, 1866	3	0	0	—	—
On 6th April, 1866	3	0	0	—	—
On 6th May, 1866	3	0	0	—	—
	13	4	0		

The revenues especially assigned by the Turkish Government to the dividend and sinking fund of this loan are :—1. The sheep taxes of Roumelia and the Archipelago, valued at 560,000*l* per annum ; the collection of which is to be made by the contractors of the loan. 2. The yearly produce of the copper mines of Tokat, valued at, 100,000*l*. 3. The revenues (which will be free in 1868) assigned to the payment of the Syrian indemnity bonds, amounting to 260,000*l*—920,000*l* per annum.

Annexed are the current discount charges on paper of various dates :—

30 to 60 days	6	per cent.
3 months	6	per cent.
4 months	6	per cent
6 months—Bank bills	6½	per cent.
6 months—Trade ditto	6½ 7	per cent.

Money for short periods in the Stock Exchange on Government securities has been offered to-day without finding many takers, at from 4 to 5 per cent.

The following are the rates allowed by the joint stock banks and discount houses for deposits :—

Joint Stock Banks	*4½ per cent.
Discount houses at call	4½ per cent.
Do. with seven days' notice	5 per cent.
Do. fourteen days	5¼ per cent.

* At the London and Westminster 3½ per cent. only on sums below 500*l*

Bullion.—No operations are reported at the Bank to-day.

The following rates of discount were those current at the chief continental cities :—

	Bank Rate. Per cent.	Open Market Per cent.
Paris	4	4
Vienna	5	5
Berlin	7	6½
Frankfort	5½	5
Amsterdam	6	6
Turin	5	4½ 5
Brussels	6	5½
Madrid	9	...
Hamburg	...	5½
St Petersburg	6	6½ 7

The alterations in the Bank of France returns, published this week as compared with the previous account, are as follows :—

	£
INCREASE.	
Cash in hand	546,660
Advances	24,000
Current accounts	300,000
DECREASE.	
Bills discounted, not yet due	1,090,000
Notes	660,000
Treasury balance	188,000

ENGLISH GOVERNMENT STOCKS.—Want of business, the overloaded state of the market, and uneasy apprehension concerning money, contributed to the dulness and decline of quotations during the greater part of the week. The rather more cheerful aspect of monetary affairs has, however, yesterday and to-day improved the tone slightly ; but there is still the same absence of animation. The purchases of the Government broker appear to have ceased some days back ; and save some little disposition to sell Consols for the fall, an operation that after all requires considerable caution, there are few speculative transactions. Prices are, nevertheless, far from buoyant, and an improvement is almost always followed within a short period by a new relapse. The firmness of the other markets, owing in great measure to the breaking up of the Bank Court without the announcement of any alteration in the discount rate, has had scarcely any effect on Consols, which remain quiet at 87⅝ to 87¾ for January account, and 87 to 87¼ for money. New Three per Cents. and Reduced, 87⅜ to 87½. India Five per Cent. stock, 102½ to 102¾.

Exchequer bills, for March and for June, remain steady, at 6s to 2s discount. India bonds, 14s to 19s prem.

FOREIGN STOCKS.—Most foreign securities have improved during the past two days, owing to the more favourable appearance of the money market. Greek bonds have risen, and the Turkish loans of 1858 and of 1862 are also better. The following are the quotations of stocks dealt in to-day :—4½ per Cent. Brazilian, 67 to 68 ex div. ; 5 per Cent. ditto, 1865, 75 ; ditto scrip, 1⅝ to 1⅞ pm. 4½ per Cent. Chilian loan, 74 to 76. 7 per Cent. Egyptian, 92 to 93 ; ditto, 1864, 91½ to 92. 5 per Cent. Greek, 15¾ to 16¼. 5 per Cent. Italian, 76¾ to 77½. 3 per Cent. Mexican, 24⅞ to 25⅛ ; ditto, 1864, 22½ to 23. New Grenada, 13¾ to 14¼ ex div. ; 2 per Cent. ditto, 30 to 31. 3 per Cent. Portuguese, 46⅞. 5 per Cent. Russian, 1862, 88½ to 89½ ; 5 per Cent. ditto, 1864. 92½ to 93½. 5 per Cent. Sardinian, 72 to 74. Spanish Certificate, 15⅜ to 15⅝. 6 per Cent. Turkish, 1854, 88½ to 89½ ; ditto, 1858, 69½ to 70½ ; 6 per Cent. 1862, 72 to 72½ ; ditto, 1863, 67 to 69 ; ditto, 1865, 42¾ to 43¼. Italian 5 per Cents, 64¾ to 65¼.

French 3 per Cent. rentes are quoted from Paris this evening at 68.22 for money, and 68.37 for the account.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks on last Friday and this day :—

RAILWAYS AND OTHER SHARES.—The approach of the Christmas holidays, bringing with them increased traffic returns, has led to greater firmness in the railway markets, which have mostly recovered from their former depression. In some there has been considerable improvement. Great Northern stocks, Midland, and Metropolitan have been foremost in the advance ; but prices are nearly all good, with a more than average amount of business doing. South-Eastern stock has fallen, owing to unfavourable rumours concerning the dividend. Caledonian stock, compared with the quotations of last week, has risen 3½ per cent. Great Northern stocks are both ½ per cent. lower. Great Western is 1½ per cent. lower. Lancashire and Yorkshire is 1 per cent. higher. London and Brighton stock is 1 per cent. lower ; London, Chatham, and Dover 1 per cent. higher. London and Blackwall, 2 per cent. higher. London and North-Western, ¾ per cent. higher. London and South-Western has declined ½ per cent. Metropolitan stock has risen 2 per cent, Midland, 1¼ per cent. South-Eastern has fallen ½ per cent.

Indian stocks are rather dull, with less business than is usual at this period of the year.

In foreign railway shares there are few operations to note.

In miscellaneous shares, Hudson's Bays hold firm. Peel River shares have also been improving for some time back. Credit Mobilier rather lower, while General Credit and International Financial have triflingly improved.

Subjoined is the usual list of the closing prices of the principal railway shares on last Friday and this day :—

RAILWAY DIVIDENDS.—The directors of the Dutch-Rhenish Railway announce a provisional dividend on account of the first half of the current book year of 10s per share on the 16*l* paid shares, and of 1*l* on the fully paid shares.

A dividend of 15f per share and 7½f on their debentures has been declared payable by the Royal Portuguese Railway Company.

SETTLING DAYS.—Thursday, the 28th instant, has been fixed by the Committee of the Stock Exchange as a special settling day in the shares of the Chontales Gold and Silver Mining Company (Limited); to be officially marked.

FOREIGN EXCHANGES.—There was no alteration in rates, but the tendency was a little weak.

BULLION.—The following is the weekly circular of Messrs Pixley, Abell, and Langley on the transactions in bullion during the week, and in Indian rupee paper:—

Gold.—Since our circular of the 14th inst. the following amounts of gold have come to hand:—5,000*l*, per China, from Nova Scotia; 7,000*l*, per City of Baltimore, from New York; 15,000*l*, per Allemania, from New York; 276,000*l*, per Kent, from Melbourne. These arrivals have not been sufficient to supply the demand for export, and accordingly about 227,000*l* in bars and coin have been withdrawn from the Bank. The Shannon takes 2,500*l* of gold to the West Indies, the Nyanza 52,000*l* to Alexandria, and it is expected that a further large amount of sovereigns will be sent from here on Saturday next, the 23rd inst. The Messageries steamer, which left Marseilles on the 19th inst., took 269,160*l* to Alexandria.

Silver.—The price remains as quoted by us, 61-16d to 61⅛d per oz standard; buyers at the former, sellers at the latter rate. Our market has been quiet, as scarcely any business has been done here for Calcutta. Inquiries for the Bombay steamer leaving Southampton on the 27th inst. have, however, made the rate somewhat firmer to-day. The Shannon has taken 2,200*l* to the West Indies, and the Messageries steamer, from Marseilles, 232,000*l* to India and China.

Mexican Dollars.—The dollars by the French packet brought to this market realised 59⅞d per oz, having been taken for refining purposes. The market is exceedingly quiet and without inquiries. The rate remains as quoted.

Exchange on India for banks' drafts at 60 days' sight is for Bombay, 2s to 2s 0⅛d, and for Calcutta and Madras, 1s 11⅞d to 2s; drafts at sight, 2s 0⅜d to 2s 0½d. The Council drafts of yesterday were allotted as follows:—To Calcutta and Madras at 1s 11⅞d, 62 per cent.; and to Bombay at 2s 0⅛d, 13 per cent., the allottments on 6th December being 18 per cent. to Calcutta and Madras at 1s 11⅞d, and 13 per cent. to Bombay at 2s 0⅛d

India Government loan notes are unaltered in price. The 5½ per Cents. are 107 to 109; the Five per Cents., 100 to 102; and the 4 per Cents., 87 to 89.

Quotations for Bullion.—Gold—Bar gold, 77s 9½d per oz std, last price; ditto, refinable, 78s per oz std, last price; Spanish doubloons, 74s to 74s 6d per oz; South American doubloons, 73s 9d to 73s 10d per oz; United States gold coin, 76s 8½d per oz, last price. Silver—Bar silver, 5s 1 9-16d to 5s 1 5-8d per oz std; bar silver, containing 5 grs gold, 5s 1⅞d per oz std; Mexican dollars, 4s 11⅞d per oz, last price; five-franc pieces, 4s 11⅜d per oz, last price. Quicksilver, 8*l* per bottle; discount, 3 per cent.

FAILURES AND MERCANTILE EMBARRASSMENTS.—The stoppage of Messrs Fryer and Co. of London and Sydney is announced by the advices from Australia. Their liabilities are stated at 30,891*l*, and assets at 14,900*l*.

Mr Commissioner Holroyd will hear a petition for the winding up of the Gurnett and Mosely Gold Mining Company on Friday, the 12th proximo.

Creditors of the Levant Mineral Company (Limited) are requested to send in the particulars of their claims to the secretary by the 31st instant.

PUBLIC COMPANIES.—The payment of interest at the rate of 6 per cent. per annum is announced for the past year by the International Land Credit Company.

The shareholders of the late Delhi Bank Corporation (Limited) held a meeting on the 20th October last in Delhi, and agreed to the proceedings of the London meeting on the 9th June last. The bank is to be registered as a London bank, and the 50*l* shares divided into 2 of 25*l* each.

The Provincial Bank of Ireland announce the payment of a dividend for the half-year now ending at the rate of 4 per cent. with an extradordinary dividend of 30s on each 100*l* share and 12s on each 10*l* share.

At the meeting of the Ceylon Company on Tuesday the amount available for dividend was stated at 13,551*l* 10s 7d. An interim dividend at the rate of 10 per cent. per annum with a bonus of 2½ per cent. on the capital represented by the old shares, was declared payable free of income tax on the 21st inst. 4,332*l* 2s 3d is carried to new account.

A dividend at the rate of 6 per cent. per annum for the half-year free of income tax was declared at the meeting of the Indian Carrying Company on the 19th inst.

On the 15th inst., at the meeting of the Pontgibaud Silver Lead Mining Company in Paris, a dividend of 20f per share was declared payable at the office of the London agency, after the 20th inst.

At the general meeting of the Library Company, Limited, on Wednesday, dividends of 7½ per cent. and of 6 per cent. were declared payable on the preference capital of the company.

The annual meeting of the National Bank of Scotland was held on Thursday, at Edinburgh. The net profits were stated at 132,140*l*. The usual dividend at the rate of 10 per cent. was declared with an extra dividend of 1 per cent. The balance 22,140*l* was carried to rest, now 258,058*l* 15s 8d.

At the half-yearly meeting of the Canada Company, a dividend of 1*l* per share, free of income tax, was declared.

MISCELLANEOUS.—The amount at the disposal of the agents of the 1865 loan applicable to the redemption of bonds at par on the 2nd of January proximo is 256,200*l*.

Messrs Baring and Co. have received on account of New Granada dividends a remittance of 601*l* 9s 6d from San José de Cucuta.

The General Credit Company announce the receipt of 36,159 dols 5c as follows, on account of the Venezuela 6 per cent. loan of 1864:—Per statement No. 37, Cuidad Bolivar, 585 dols 9c.; No. 38, 8,819 dols 10c; No. 39, 10,011 dols 61c; No. 40, 312 dols; No. 55, from La Guayra, 8,338 dols 7c; No. 66, from Puerto Cabello, 5,753 dols 4c; No. 67, 2,840 dols 61c.

The numbers are published of 225 bonds of the Sardinian 5 per cent. loan of 1851 to the value of 36,000*l* having been cancelled.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about ½ per mille premium, and the short exchange on London is 25.12½ per 1*l* sterling. On comparing these rates with the English Mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is about 2-10ths per cent. dearer in Paris than in London.

The course of exchange at New York on London for bills at 60 days' sight is about 109 per cent. At this rate there is no profit on the importation of gold from the United States.

The Commercial Times.

POST OFFICE ANNOUNCEMENTS.

Arrangements have been concluded under which patterns and samples of merchandise addressed to Belgium may be forwarded, on the 1st January next and thenceforward, by the route of Calais (if specially so directed) under the same general regulations as by the direct mail via Ostend. Packets of patterns, &c., so addressed, will be liable to the following rates of postage, which must be paid in advance by means of postage stamps, viz.:—Not exceeding 4 ounces, 4d; above 4 ounces and not exceeding 8 ounces, 8d. No packet exceeding 8 ounces in weight can be sent, as a pattern, to Belgium.

On the 1st January next, and thenceforward, the altered scale of weight recently applied to letters sent within the United Kingdom, progressing by one rate for each half-ounce throughout, will be extended to letters addressed to the undermentioned colonies and other places, viz.:—Canada, New Brunswick, Nova Scotia, Prince Edward Island, Newfoundland, Sierra Leone, Gambia, Gold Coast, Lagos, any foreign port on the West Coast of Africa, Vancouver's Island, British Columbia, the Falkland Islands; Gibraltar, Malta, Alexandria, Cairo, Suez, by packet via Southampton; Labuan, Hong Kong, or any other port in China or Japan, either via Southampton or via Marseilles. Under this regulation, a letter for any of the places mentioned, if weighing more than one ounce, but not exceeding one ounce and a half, will be chargeable with three rates of postage; and if exceeding two ounces, but not exceeding two ounces and a half, will be chargeable with five rates of postage, and so on.

COMMERCIAL EPITOME,

FRIDAY NIGHT

The supply of English wheat on sale at Mark lane to-day was very moderate, yet the trade ruled quiet, at Monday's currency. In foreign wheat sales progressed slowly, at low rates. All descriptions of spring corn were in but moderate request; nevertheless, Monday's quotations were steadily supported. The flour trade was quiet, on former terms. This week's imports amount to 2,500 quarters of wheat, 3,990 barley, 6,910 oats, 1,330 sacks and 310 barrels of flour.

At Liverpool, this morning, wheat, flour, and maize sold slowly, at Tuesday's quotations. At Wakefield, the trade for wheat, as well as spring corn, was quiet, at late prices.

There has been only a moderate business transacted in the Liverpool cotton market, the sales amounting to 59,000 bales, of which the trade have taken 38,000 bales, speculators 8,000, and exporters 13,000 bales; quotations remain unchanged since Friday last. To-day's stock is estimated at 352,750 bales. The imports this week amount to 63,000 bales. The tone of the market throughout the week has been quiet, the latest American accounts being considered rather against the article, still prices have been firmly maintained.

Advices from New Orleans are to Nov. 29. The arrivals of cotton since the 24th inst. had amounted to 10,267 bales, whilst the clearances had been 7,311 bales. The stock in warehouses and on shipboard, not cleared, was 130,612 bales. The latest quotation was 51 to 52 cents per lb for middling quality.

The cotton trade at Charleston, at latest date, was dull, at 44 to 45 cents for middling, and 80 to 165 cents for Sea Island. The total receipts since the opening of the season, including the stock then on hand, were 32,649 bales, whilst the exports had been 29,901 bales.

At Memphis, on the 6th inst., the demand for cotton ruled heavy, at 42 to 43c for stric middling, and 44c for good quality.

From Madras, we have postal intelligence to Nov. 14. During the preceding fortnight, the value of cotton had fluctuated considerably, Western produce having realised as much as 242 rupees, but subsequently declining to 222 rupees per candy

Digitized by Google

The latest quotations were as follows:—Western, 12¾d; Salem and Coimbatore, 12¼d; and Tinnevelly, 14½d per lb. The following table of shipments is from Messrs Dymes, Cartwright, and Co's circular:—

EXPORTS of COTTON from MADRAS in TEN MONTHS.

	Great Britain. cwts.	France. cwts.	Elsewhere. cwts.	Total. cwts.
In October, 1865	92,840	798	292	93,930
In previous 9 months	354,322	7,553	2,280	364,155
Total for 10 months	447,162	8,351	2,572	458,085
Against same period 1864.....	263,989	15,809	2,557	282,355
— — 1863.....	359,720	33,192	5,688	398,600
— — 1862.....	206,439	10,671		217,110
Against the whole of 1864 ...	297,237	15,810	2,560	315,607
— — 1863 ...	422,101	35,177	6,741	464,019
— — 1862 ...	234,745	11,475		246,220

Advices from Alexandria are to Dec. 16. The cotton trade at that date was quiet, at about stationary prices. Fair open-ginned produce was quoted at 23½d per lb, free on board, light canvas. Freight to Liverpool was ¾d per lb.

The markets for most descriptions of colonial and foreign grocery produce has ruled steady during the week; the transactions have been to a fair average extent, and the tendency of prices has been rather in an upward direction. Raw sugar, especially, has exhibited firmness, and fine qualities are the turn dearer than on Friday last. Coffee and cocoa have ruled firm; but in the market for rice, there has been a great want of activity. Tea has been in fair request, at last week's currency.

It having been suggested that the trade would be greatly benefitted if the cocoa auctions were confined to one day in the week, a resolution was proposed and carried unanimously at the Commercial Sale Rooms yesterday, "That Wednesday, when practicable, be the sale day for cocoa, and that the time shall not be earlier than half-past two, but as soon after as the coffee sales are concluded."

Last week, duty was paid in London on 1,061,199 lbs of tea, whilst the export for the week ending Dec. 14, amounted to 235,282 lbs, making a total of 1,296,481 lbs, against 1,481,880 lbs last year. From leading Chinese ports, we learn that the demand for tea had considerably improved; the inquiry for shipment to Great Britain, America, and Australia had been extensive, and the recent fall in prices had been fully recovered. The export to Great Britain since June 1 had reached 69,205,200 lbs, a decrease of 10,477,800 lbs, as compared with last season, the quantity shipped in the corresponding period last year having been 79,683,000 lbs.

Advices from Colombo are to Nov. 18. The market for coffee during the previous fortnight had been very active, considerable business having been transacted both in plantation and native produce. The quotations were as follows:—Plantation coffee, 12s 9d to 13s per bushel; native ditto, unpicked, 43s; picked and dried, 49s 6d per cwt. According to Messrs Shand and Co.'s circular, the total shipments, from Oct. 1 to Nov. 12, were 28,712 cwts against 16,504 cwts last year; 45,466 cwts in 1863; and 52,334 cwts in 1862.

The wool trade has been very quiet; nevertheless, both home-grown and colonial qualities of produce have changed hands at full prices. Hemp, flax, jute, and coir goods have commanded extreme rates.

From Melbourne we have intelligence to Oct. 25. The wool trade, at that date, was somewhat active, the season having been reopened with the arrival of about 700 bales of the *new* clip, chiefly from Queensland, of which, however, the greater portion was in the grease. The total shipments of wool, from Oct. 25, 1864, to Oct. 25, 1865, were 132,293 bales, against 119,787 bales in 1863-4, being an increase of 12,506 bales. The prices current were as under:—Greasy, inferior to ordinary, 7d to 9d: ordinary to average, 9d to 10d; good to superior, 11d to 1s 1d; d tto ditto (cross breed), 1s 1d to 1s 2d. Fleece, inferior to ordinary, 1s 3d to 1s 5d; ordinary to average, 1s 5d to 1s 8d; good to superior, 1s 9d to 2s. Scoured, ordinary, 1s 4d to 1s 7d; good, 1s 8d to 1s 10d; superior, 1s 10d to 2s per lb.

In silk, a very moderate business has been transacted. Both European and Asiatic descriptions, however, have steadily supported previous quotations.

At Shanghai, from Oct. 11 to Oct. 25, the silk trade was much quieter. The settlements during that period barely amounted to 1,000 bales, the bulk of which was Tsatlee produce. As regards prices, however, the market exhibited great firmness, the quotations having improved to the extent of 15 to 25 taels per picul. The total shipments since the opening of the season had been 28,326 bales, against 14,823 bales last year. The unsold stock was estimated at 1,800 bales, against 4,000 bales last year; 11,000 bales in 1863. The following were the quotations at latest date:—Tsatlee chop No. 1, 33s 2d to 33s 5d; ditto, No. 2, 32s 1d to 32s 4d; No. 3, 31s to 31s 3d; market, No. 3, 29s 11d to 30s 8d; No. 4, 28s 8d to 29s 4d; No. 5 and common, 26s 4d to 28s 8d; Taysaam, chop No. 1, 28s 3d to 28s 10d; No. 2, 26s 10d to 27s 2d; No. 3, 25s 9d to 26s 4d; No. 4, 5, and common, 21s 7d to 25s 3d; Yuenfa, No. 1, 28s 3d to 28s 10d; No. 2, 26s 10d to 27s 9d; No. 3, 25s 9d to 26s 4d; No. 4 and common, 23s 2d to 25s 3d; Hainings, 22s 8d to 28s 3d per lb., all charges paid to England at the rate of 6½d per tael.

The silk trade at Yokohama at latest date was very firm, and an advance of 30 dols per picul took place in prices. The stock in hand was only 1,700 bales.

English copper has been reduced 10*l* per ton. The market for Scotch pig iron has been somewhat excited, and prices have fluctuated to some extent, viz., from 64s 3d to 63s 6d cash, mixed numbers. Other metals are firm in price.

The oil trade has been quiet; lin eed oil is selling at 38s 6d per cwt, on the spot; but most other descriptions are steady in price. Tallow is dull, at lower prices—P.Y.C being quoted at 48s 6d per cwt, on the spot.

During the week ending Dec. 9, the market for cotton goods at New York was very quiet, and although the total transactions were very limited, prices, almost generally, ruled tolerably firm. Woollen goods were in but moderate request, at late rates. In grocery produce, with the exception of coffee, there had been a great want of animation, whilst nearly all descriptions of provisions moved off heavily at reduced currencies. Breadstuffs had been in fair demand for export, but at lower prices; the stock of flour was estimated at 400,000 barrels. In the money market, very little activity was apparent; the quotation for the best short-dated paper was 7 to 8 per cent., the bankers' rate for money deposited on call being 7 per cent. The fluctuations in the premium on gold were from 45⅝ to 48⅛ per cent., the lowest quotation being the closing price of the week. The stock of bullion held by the banks on the 2nd inst., amounted to 2,686,220*l*, against 2,468,710*l* on the 25th ult, and 2,490,000*l* on the 18th. The balance in the Sub-Treasury at the same date was 15,551,920*l*. The shipments of specie from Jan. 1 to Dec. 2, amounted to 5,462,920*l*; against 2,109,280*l* last year; 8,484,830*l* in 1863; and 11,152,780*l* in 1862. The imports of dry goods, for the week ending Dec. 1, were valued at 398,800*l*; against 45,660*l* in 1864; and 218,680*l* in 1863.

THE COTTON TRADE.

LIVERPOOL—Dec. 22.

Cotton has been in fair demand throughout the week, and the market generally steady, though freely supplied. In Sea Island, the sales have been large at full prices. In American, the business has been to a considerable extent daily, but a decline has been submitted to of about ¼d per lb in the middle qualities. Brasil is in fair request, but barely supports last week's quotations. For Egyptian, there has been a moderate inquiry, without much change in prices, but fair and good and fair open are ¼d to ⅛d per lb lower. Smyrna remains unaltered in value. The quantity of East India offering has been rather limited, especially in the good qualities, which become every day scarcer; there is, however, only a very partial advance in price, while the lower grades barely support previous quotations. China and Japan are in fair demand, at higher rates.

The transactions to arrive have been to a moderate extent during the week, without much change in prices; the latest quotations are this day, for American, barely middling, per steamer from New York, 20⅜d per lb; Pernam and Paraiba, firsts, at sea 21½d; Ceara, fair, at sea, 21½d; Maranham, fair, at sea, 21½d; Egyptian, fair new open, ship named, 23½d; ship named and December shipment, 23⅜d; Dharwar, fair, ship named, 17⅜d; Dhollerah, fair new, from quay, 17¼d; Rangoon, fair, ship named, 13d; Bengal, fair, ship named, 11⅜d; ship or ships named, 12d; shipment, December or January, and December sailing, 12d; good fair, early January sailing, 12¼d per lb.

The sales of the week amount to 58,920 bales, including 7,730 on speculation, and 13,080 declared for export, leaving 38,110 bales to the trade. The sales to-day will probably amount to about 15,000 bales, with a firm market.

NEW YORK—Dec. 9.

Dull accounts from Liverpool, excessive receipts here, dullness and decline in cotton goods, and, finally, the fall in gold, have conspired to produce extreme dullness and depression in our cotton market. With respect to deliveries at the ports, a considerable falling off may now be expected at the Atlantic ports, and over the railroads from the West ; but at New Orleans an increase may be counted upon. The Red river will soon be in navigable condition, and the shipments from Memphis will now be down instead of up the Mississippi. We close with a dull market at the following quotations :—

	New York Classification. Upland. c	Florida. c	Mobile. c	New Orleans and Texas. c
Ordinary ....per lb	40	40	40	41
Good ordinary	41	41	42	42

MARKETS IN THE MANUFACTURING DISTRICTS.

For the time of year, a full average business has been passing in manufactured goods, the stocks of which continue only moderate. Rather large transactions have taken place in iron, at extreme quotations. Wool has sold at very full prices ; whilst coals have changed hands freely, at steady currencies.

MANCHESTER, Dec. 21.—The market has continued steady without large individual transactions, but with a fair total amount. Low yarns have been sluggish, and in a very few cases the turn weaker, especially those numbers which enter into the production of India goods. Fine yarns, on the contrary, from 60's upwards, have advanced 1d to 2d per lb, with a good demand from Yorkshire and Scotland, chiefly for the supply of American markets. Cloths continue in the same position as before, stocks being light, but the enhanced cost of production operating as a serious bar to extensive trade. The best China makes continue scarce and wanted, but the purely India makes are much neglected, owing to the latest unfavourable telegrams from Calcutta.

BRADFORD.—There has been a fair inquiry for wool, but transactions have been small, and entirely unspeculative. Good lustre wools are still most wanted, especially wethers. The finest class of Down wools are also in request. Some improvement is noticeable in the demand for 30s yarns. Spinners of lustre yarns are very busy, and find a continued inquiry, especially for 36s and 40s. The market for pieces is quiet. The continental trade is unusually flat. Prices are firm.

CORN

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Dec. 9. - The market has been dull and declining, and the business limited. The receipts, as usual towards the close of the season, are liberal, and various causes have contributed to

Digitized by Google

a pressure to sell. Still the decline in prices has not been so marked as the extreme dulness. Flour has been very dull and heavy. The receipts have been very large both by canal and rail, and the impossibility of obtaining storage has caused irregular parcels to be forced off at very low prices, and the tendency has been steadily downward. A few thousand barrels have been taken for the English market, but not sufficient to exert any influence. The stock in store and afloat is now estimated as high as 600,000 barrels, while the deliveries by rail and coastwise are, and bid fair to continue, equal to the wants of the market. It would seem, therefore, that exports must be stimulated in order to clear the surplus off the market. Wheat has not been without export demand, but at prices two or three cents below the views of holders. The deliveries are but moderate, and prime samples are well held. The sales the last two or three days have been at lower prices; but it would be impossible to go on at current quotations. A large proportion of the choice spring on the market is held at $1.85 to $1.90. Corn has been done and closed lower. The following are the closing quotations:—Flour—State, superfine brands, $7.10 to $7.40; ditto, extra brands, $7.90 to $8.10; ditto, choice brands, $8.15 to $8.50; Ohio, common brands, $8.40 to $8.70; ditto, fancy brands, $8.75 to $8.80; ditto, good and choice extra brands, $8.90 to $10.15; Michigan, Indiana, Wisconsin, &c., $7 to $8.20; Genesee, extra brands, $8.60 to $11.75; Missouri, $12 to $15; Canada, common, $8 to $8.25; Canada, good to choice extra, $8.30 to $11.40 per barrel. Wheat—Chicago spring, $1.50 to $1.75; Milwaukee Club, $1.65 to $1.78; red winter, $1.80 to $2.25: Corn—Western mixed, 88c to 95c; and Western yellow, 96c to 98c per bushel.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

Coastwise and by land-carriage, the arrivals of home-grown wheat up to our market, this week, have been very moderate, but in improved condition. Both red and white samples have changed hands slowly; yet previous rates have been supported. The imports of foreign wheat have been limited. Really fine parcels have been held firmly, at full quotations; but the business doing in them has been only moderate. Inferior kinds have commanded very little attention. The show of barley has been tolerably extensive. Fine malting parcels have realised full currencies, with a fair demand. In grinding and distilling sorts the transactions have been on a limited scale, on former terms. There has been only a limited inquiry for malt, and the quotations have been with difficulty supported. A full average quantity has been brought forward. Oats have been in good supply and moderate request at the late decline in value. Owing to large supplies from abroad, beans have sold heavily, at 1s to 2s per quarter less money. The demand for peas has fallen off, and the currencies have receded 1s to, in some instances, 2s per quarter. The flour trade has been quiet, on former terms.

Advices from most of the continental markets are to the effect that wheat has continued firm in price, with a fair demand for export. All kinds of spring corn have changed hands freely, at full quotations. In America, wheat and flour are still held at high currencies.

In Scotland wheat has sold to a moderate extent, on former terms. Barley and most other articles have realised steady prices.

The Irish markets have been fairly supplied with produce, for which the demand has ruled steady, on former terms.

Considerable progress has been made in out-door farm labours, and the young wheats are looking remarkably well.

At Mark lane, to-day, the supply of English wheat on sale was very moderate. Both red and white qualities, however, sold slowly, at Monday's currency. Foreign wheat was in but moderate request, at late rates. Barley sold heavily, at late prices. Malt was dull on former terms. For oats, there was only a moderate inquiry, at late rates. Beans and peas were dull at the recent fall in their value. Flour moved off slowly, at late rates.

The trade has been very quiet this week, and no arrivals at ports of call until within the last two days, when 58 in number have been reported, viz., 34 wheat, 14 maize, 2 barley, rye, 2 oats, 3 linseed, 1 cottonseed. In the absence of business in wheat and maize, prices are almost nominal. The only reported sales are as follows:—Berdianski, 44s 3d; Ghirka Odessa, 42s 3d per 492 lbs. Maize—3 arrived cargoes; Ibrail, 29s 6d and 30s; mixed American, 30s 3d per 480 lbs; mixed American, on passage, 32s per 480 lbs. Peas—1 arrived cargo from Montreal, 38s 6d per 504 lbs. Linseed—Calcutta, arrived, 66s 3d to 67s per 410 lbs; on passage, 68s: Bombay, shipped or to be shipped, 70s 3d per 416 lbs. Cottonseed—Alexandria, shipping, mixed old and new crop, 8/ 10s per ton.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—There has been a much better demand from the refiners, with a large business doing in West India. Yesterday, quotations were rather higher. Brown sugars have met an active demand, at a partial recovery of 6d per cwt, the sales including several parcels low Jaggery and Manilla. Barbadoes, by auction, realised 33s to 39s; grainy Demerara 41s to 44s. Transactions in West India in three days, 2,680 casks. The deliveries continue upon a moderate scale, being 2,930 tons last week; leaving the stock at the close, 81,020 tons, against 109,915 tons in 1864.

Mauritius.—7,000 bags have sold by private contract. Soft brown, 29s to 32s; grainy, 36s 6d to 38s per cwt.

Bengal.—1,289 bags offered by auction partly sold: bright yellow Gurpatta date, 35s 6d; Dulloah, 30s to 33s 6d per cwt.

Madras.—8,000 bags grainy Jaggery have sold at 30s to 30s 3d. 370 tons afloat at 30s 6d. A parcel of low at 28s 9d. 4,000 bags low quality on the spot at 28s 6d per cwt.

Manilla.—6,200 bags clayed have sold at 34s to 34s 3d. 6,000 bags unclayed at 30s to 30s 6d.

Other Foreign.—650 bags French beetroot realised 35s by auction. Two floating cargoes of Brazil are reported sold for the continent, but the particulars do not transpire.

Refined.—The market is steady, with rather more inquiry, at prices which could not be obtained last week.

MOLASSES.—A parcel of Antigua has sold at 14s 6d per cwt.

RUM.—A demand prevails for West India, and 40 puncheons Penang have sold at 1s 6d per proof gallon.

COFFEE.—The market has not shown any material change, but some of the plantation Ceylon, offered by auction, went upon rather lower terms. 927 casks 1,841 barrels and bags chiefly sold at 76s to 84s 6d; good, 87s. 92 casks 1,628 bags native went steadily at 69s 6d to 72s 6d. 270 bales Mocha realised 97s 6d to 99s for long berry, being a decline on late nominal rates. 602 bags East India part sold, including fine Mysore, at 90s 6d to 91s 6d. A floating cargo of Rio is reported for the Mediterranean at 53s 6d, and one of St Domingo, at the close of week, at 64s per cwt, for a near port.

Digitized by Google

COCOA.—A few parcels of foreign have sold privately. At auction, 55 bags Trinidad part sold at 65s to 80s for greyish red to fine; 79 bags Grenada were bought in at 60s; 50 bags Caraccas at 85s; and 117 bags Surinam at 65s for grey, and 78s for red.

TEA.—By private contract a moderate amount of business is doing in new season's congou. The public sales on Tuesday and Wednesday contained 16,174 packages, and 13,080 packages sold, chiefly "without reserve." Towards the close prices were frequently in buyers' favour.

RICE.—At auction, 2,611 bags sea-damaged Necrancie Arracan sold by auction at 10s 6d to 12s. 2,527 bags middling white Dacca grain realised 13s 6d to 14s. 250 tons Moonghy, to arrive, at 12s 6d per cwt, landed. Soft grain descriptions are dull. 1,000 bags new Necrancie Arracan have sold at 12s per cwt.

IMPORTS and DELIVERIES of RICE to Dec. 16, with STOCKS on hand.

	1865.	1864.	1863	1862.

SAGO.—217 boxes bold medium were taken in at 22s 3d per cwt.

CASSIA LIGNEA.—4,350 boxes offered by auction partly sold and established lower quotations, from 89s to 97s per cwt. 3,200 boxes were withdrawn.

OTHER SPICES.—White pepper is firm with little offering. A single lot of fine Siagapore realised 6¾d. 1,818 bags Penang part sold at 3¼d for West Coast. 450 bags Malabar part sold at 3¾d to 4d cash. 2,843 Zanzibar cloves partly sold at 3d to 3¼d per lb. 682 bags Bengal ginger found buyers: sound at 25s; damaged at 22s 6d to 23s 6d per cwt. A sale of 180 bags Singapore white pepper has been made at 5¾d per lb; no allowance for damaged.

SALTPETRE.—The market is unsettled and rather quiet. 2,200 bags Bengal bought in last week, have sold: refraction 9 to 3½, 24s to 25s 3d per cwt, according to conditions, including part stained. 1,000 bags also reported: refraction 5½ to 4, at 25s per cwt, full prompt.

IMPORTS and DELIVERIES of SALTPETRE to Dec. 16, with STOCKS on hand.

COCHINEAL.—At the public sales on Wednesday there were 1,270 bags offered, which sold at full rates to 1d advance: Honduras silver, 2s 11d to 3s 5d; black, 3s 4d to 3s 10d; Teneriffe silver, 3s 3d to 3s 5d; black, 3s 6d to 4s 9d per lb. 850 bags were Teneriffe grain.

SAFFLOWER.—170 bales Bengal sold at rather higher rates, from 4*l* 17s 6d to 7*l* 15s for ordinary to fine quality.

OTHER DRYSALTERY GOODS.—Bengal turmeric, offered by auction, partly sold at 24s per cwt. Gambier is very firm.

SHELLAC.—There has been a better demand, and a good business done, including D.C. orange, at 115s; ditto afloat, at 117s 6d per cwt.

METALS.—The markets are devoid of animation. Smelters have taken off half the advance recently fixed upon English copper. The demand is not active, but sales continue to be made in foreign. Spelter has been quiet. Several sales of Straits tin have occurred at 96*l* to 98*l* per ton, according to date of prompt. British iron is steady. Scotch pig further advanced to 64s 6d cash. Shipments from Glasgow are large.

JUTE.—There has been a good business done for arrival, chiefly at 19*l* to 31*l* per ton, which are rather higher rates.

MANILLA HEMP is held very firmly, but not much business doing.

OILS.—Linseed has become quiet and the nearest value on the spot is 38s 3d. Rape is steady. Cocoa-nut remains inactive. Fine Lagos Palm commands 44*l* 10s to 45*l* per ton. Fish oils are unchanged.

LINSEED.—There is less business doing. Petroleum—American refined is dull at 3s 6d per gallon.

TALLOW.—The market is inactive. 1st sort new Petersburg Y.C., 48s to 48s 3d; January to March 48s. March only, 49s per cwt. These prices are lower in all positions.

PARTICULARS OF TALLOW.—Monday, December 18, 1865.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The public sales were confined to West India, which went of at full quotations. 714 casks sold, making the week's business 3,393 casks. 50 tons common Madras Jaggery have sold afloat at 28s 6d. 100 tons clayed Manilla on the spot at 34s per cwt.

COFFEE.—The sales were chiefly E.I., of which 1,747 bags sold at steady prices, including Munzerabad mountain and Cannon's Mysore.

RICE.—1,364 bags middling Dacca sold at 13s 6d to 14s. 682 bags Ballam taken in at 13s per cwt.

TALLOW.—Town reduced to 50s 9d. At auction, 186 casks Australian were sold. Beef at 46s 3d to 46s 9d per cwt.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar has slightly improved this week—in some instances prices are better. In Dutch crushed, H.R. No. 2, have been sold for forward delivery, at 30s 9d barrels. Market unchanged.

GREEN FRUIT.—The market continues good, and sales have been of an extensive character. Some cargoes of oranges from St Michael, Terceira, Fayal, Valencia, and Sicily, sold by Keeling and Hunt at public sale, were taken freely by the trade. Lemons without alteration. Nuts of all kinds in demand, and the supply of fruit for the Christmas consumption has been of an extensive character, but not increased beyond the wants of the public.

FLAX.—Market firm.

HEMP.—Market steady, and a steady business doing this week.

SILK.—Market rather quiet, but prices very firm.

TOBACCO.—There has been an improved demand for good and fine American for home trade, and coloury descriptions difficult to obtain at present quotations. A fair amount of business was transacted for exportation. Other growths were taken to a considerable extent, and, with few exceptions, at an advance on previous rates.

TIMBER.—No change during the week; the Canadian imports are selling well. Those from the Baltic would be more depressed in prices if the sale were urged at this season.

LEATHER AND HIDES.—There is no change to report in the state of the leather trade: the amount of business done during the week has been limited in extent, without alteration in prices. On Tuesday, at Leadenhall, the supply of fresh leather was small, and but little business was transacted.

METALS.—The metal market is steady, with mostly a fair business doing. Copper was reduced by the smelters on the 18th inst. by 10*l* per ton, but it was merely bringing their quotations to the market value. A steady market now exists. Iron is well maintained. Tin finds a regular demand for consumption. Lead is buoyant, and spelter rules very firm. Tin plates still tend upwards in price.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	50	9
Fat by ditto	2	6
Yellow Russia	49	9
Melted stuff	39	0
Rough ditto	21	0
Greaves	2	6
Good dregs.....	6	0

METROPOLITAN CATTLE MARKET.

MONDAY, Dec. 18.—The total imports of foreign stock into London, last week, amounted to 18,637 head. In the corresponding week in 1864 we received 10,361; in 1863, 6,793; in 1862, 3,767; in 1861, 3,641; in 1860, 3,456; in 1859, 3,374 head.

There was a moderate supply of foreign beasts on sale here to-day. The show of sheep was large; but the general quality of stock was only middling. Sales progressed heavily, on lower terms. Considering that the great market was held here on Monday last, the number of English beasts exhibited here to-day was large, and in prime condition. All breeds were very dull and 2d per 8 lbs lower than last week, and at which a demand was not effected. The top figures for Scots and crosses were 5s to 5s 2d per 8 lbs. There was a full average number of sheep in the pens in generally speaking middling condition. Good and prime breeds moved off slowly, at 2s per 8 lbs less money. Inferior breeds sold at reduced, but irregular, quotations. We have to report a dull sale of calves—the supply of which was limited—on easier terms. The top price was 5s per 8 lbs. We had a full supply of pigs on offer. The demand was very inactive, on easier terms.

SUPPLIES.

	Dec. 19, 1864.	Dec. 18, 1865.
Beasts.....	3163	5090
Sheep.....	15350	21040
Calves	65	510
Pigs	350	560

THURSDAY, Dec. 21.—There was a large supply of beasts on offer here to-day, in fair average condition. All breeds met a dull sale, at a decline in the quotations, compared with Monday, of from 2d to 4d per 8 lbs. Scots and crosses sold at 4s 8d to 4s 10d per 8 lbs. Sheep, the show of was seasonably good, moved off heavily, at 2d to 4d per 8 lbs less money. The best downs changed hands at 6s 4d per 8 lbs. The demand for calves was in a depressed state, and prices gave way 4d per 8 lbs The top figure was 4s 8d per 8 lbs. Pigs were very dull, and 2d per 8 lbs cheaper than last week. In milch cows next to nothing was doing.

Per 8 lbs to sink the offal.

HOP MARKET.

BOROUGH, Friday, Dec. 22.—We have to report a firm trade for hops. The amount of business doing is very moderate; nevertheless, all qualities support late prices. New Mid and East Kents, 80s to 190s; New Weald of Kents, 70s to 126s; New Sussex, 60s to 115s; Yearlings, 95s to 135s per cwt.

POTATO MARKETS.

BOROUGH AND SPITALFIELDS, Friday Dec. 22.—The supplies of potatoes on sale are tolerably large. Most qualities move off slowly, at the annexed quotations:—Kent and Essex Regents, 70s to 100s; Yorkshire ditto, 60s to 100s; Flukes, 100s to 110s; Rocks, 55s to 60s; Scotch Regents, 45s to 70s; Dunbar ditto, 70s to 90s per ton.

HAY MARKETS.

THURSDAY, Dec. 21.—The various markets are well supplied; and the trade is dull, on easier terms.

	Smithfield.	Cumberland.	Whitechapel.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Dec. 22.—There is no change to notice in our market, which has continued very quiet owing to the proximity of the Christmas holidays, and we do not expect that much will be done now until after the turn of the year.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Dec. 22.—The market thinly attended. Wheat, slow sale at nominally Tuesday's prices. Flour dull. Indian corn, moderate demand at 6d per qr decline. Beans steady. Oats and oatmeal barely support former rates.

The Gazette.

EPITOME OF RAILWAY NEWS.

TRAFFIC RECEIPTS.—The traffic receipts of railways in the United Kingdom amounted for the week ending the 9th of December on 12,299 miles, to 644,578*l*, and for the corresponding week of last year, on 11,889 miles, to 608,164*l*, showing an increase of 410 miles and of 36,414*l*. The gross receipts on the 14 principal railways amounted in the aggregate, on 8,808 miles, to 539,266*l*, and for the corresponding week of 1864, on 8,489 miles, to 510,364*l*, showing an increase of 319 miles and an increase of 28,902*l*.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, Dec. 18.—In the share market to-day the amount of business was not large, but most of the descriptions closed with a tendency to better prices. In English railways, North-Western, Midland, and Metropolitan recovered ¼ each; ditto (new) improved ⅛, Great Eastern (East Anglian) ⅓, Lancashire and Yorkshire ¼, and Blackwall 1, and South-Eastern declined 1¾, Great Western (Newport) 2⅛, ditto (Hereford) 1, ditto (original) and North British a further ⅓ each, and Great Northern (A stock) further 1½. In colonial, Grand Trunk of Canada advanced 1 and Madras (5 per cent.) ½. In foreign, Dutch-Rhenish (of both descriptions) improved ⅓ each, Northern of France a further ⅓, Sambre and Meuse a further ¼, and Lombardo-Venetian a further ⅛. In American, United States (5-20) improved 1½, Illinois Central shares ⅓, and Erie (debentures) ¼. In foreign mines, Cobre Copper were finally quoted 1 better, and Don Pedro North Del Rey ⅛ worse.

TUESDAY, Dec. 19.—In the share market to-day scarcely more than a nominal amount of business has been transacted, and there was no material average alteration in the closing prices of either of the descriptions. In English railways, Caledonian improved ½, and Metropolitan further 1½; South-Eastern recovered ¼, and Great Northern (A stock) ⅓; ditto (original) and Brighton declined ⅓ each, Great Western (Oxford) ⅔, and Midland (Birmingham and Derby) 1; and ditto (original) and North-Western relapsed ¼ each. In colonial, Cape Town and Docks advanced 2½, Great Indian Peninsula ½, and Great Western of Canada shares (of both descriptions) ⅜ each. In foreign, Great Luxembourg and Northern of Buenos Ayres improved ⅛ and ⅓ respectively; Lombardo-Venetian relapsed ¼, and Dutch-Rhenish receded ⅛. In American, Erie debentures further improved ¼, and Illinois Central shares relapsed ¼. In mines, Great Laxey declined ½, and St John del Rey 1; and Don Pedro North del Rey recovered ⅛.

WEDNESDAY, Dec. 20.—In the share market to-day the tranctions were few, but, with the expection of foreign railways and British mines, the several descriptions closed with a firm tendency. In English railways, North-Western and Midland recovered ¼ each; Great Western and Blackwall advanced 1 each, North Staffordshire ½, Lancashire and Yorkshire ¼, Metropolitan a further ½, South Eastern further 1½. In colonial, Grand Trunk of Canada (4th preference) improved 1, Buffalo and Lake Huron ⅛, and Dutch-Rhenish a further ⅛, and Great Western of Canada (paid up shares, a further ¼. In foreign, Sambre and Meuse declined ⅛, and Dutch-Rhenish a further ⅛. In American, Illinois Central (shares) recovered ⅛, and United States (5-20) advanced ⅛, Erie shares (paid-up) ¼, and ditto (debentures) a further ¼. In British mines, Clifford Amalgamated declined ½, North Wheal Crofty ¼, and Drakewalls ⅛. In foreign mines, Cape Copper improved ¼.

THURSDAY, Dec. 21.—In the share market to-day all the home description closed with a firm tone, and in the others there was no material average alteration. In English railways, North British advanced 2, ditto (Edinburgh, Perth, &c.) and Midland (Birmingham and Derby) 1 each, Great Northern (A stock) ½, and Metropolitan (new) ⅛; ditto (original) further improved ½, North-Western, and Lancashire and Yorkshire ¼ each, and Caledonian 2; and Glasgow and South-Western and South Devon declined 1 each. In colonial, Great Western of Canada improved a further ⅛, ditto (new) and Grand Trunk of Canada ½ each, and ditto (4th preference deferred) 1. In foreign, Great Luxembourg improved ⅛, and Northern of France receded ⅛, and Sambre and Meuse a further ⅛. In American, United States (5-20) relapsed ¼. In mines, Chiverton advanced ½, and Fortuna ⅛.

FRIDAY, Dec. 22.—There was not much business in the railway market to-day, but the tendency continues favourable. South-Eastern, Great Western, Great Eastern, and Lancashire and Yorkshire stocks were in demand, and improved ¼ to ⅜ per cent. Canadian railway securities ruled steady, at the closing quotations of yesterday.

The imports of the precious metals during the week ending D ec. were :—Gold, 95,613*l*, silver, 119,218*l*. The exports were :—Gold 491,054*l* silver, 12,297*l*.

TO GENTLEMEN SEEKING preparation for Woolwich, the Civil Service, and the Line.—A Graduate of Oxford, who has had long experience in preparing for the competitive and University examinations, and has three students at present, wishes to receive two more. Delightful situation, great educational and domestic advantages, and moderate terms.—Address, L. L. D., 9 Leighton rescent, Tufnell park West, N.W.

Just published, 1s., Illustrated, Second Edition

THE HEAD AND HEART LEGACY.

"Possessed of a Head, and a Heart, and a business education, I should not be grieved did circumstances compel me to take thee by the shoulder, pat thee on the back, bless thee, put £50 in thy pocket, and say to thee, Go, my son, thou art a rich man, wherever thou goest prosperity will be in thy track.'"—HEAD AND HEART LEGACY.

OPINIONS OF THE PRESS.

The book is clear and simple, highly moral in tone, and most encouraging to the young aspirant. It is interesting as a biographical sketch of a life struggle, and contains many observations on men and manners which it would be profitable for every one to know who has the least ambition or desire of having a soul above his buttons, and a good account at the bank."

"This is a work quite sui generis. It is quaintly written, but is full to an overflow of the wisdom of experience and the impulse of virtue. To all who have 'heads and hearts' we commend this singular 'legacy.'"

"The author of this legacy has put together some very touching stories of his chequered life intending to stimulate the rising generation to good conduct and honourable dealing, by showing how an untaught boy rose step by step to a high position. He enjoins patience and vigilance, honesty and sobriety, in every path of life, and teaches what is so little practised—that a man should do what his hands find for him to do. The lessons are alike honourable to the head and heart of the writer."

"Besides the autobiographical sketch, Pamphilius supplies a variety of spirited literary specimens, the principal of which, however, is an ingenious manual of French Grammar, as used by the author when teacher of the French language, designed for the use of self-instruction."

Any one acquainted with the current literature of the metropolis, or its littérateurs, will have no difficulty in identifying the author of this interesting volume. The pages abound with sensible observations, attention to which will be found absolutely necessary to gain even a moderate share of success in this busy world of ours."

Ward, Lock, and Tyler, 158 Fleet street; and all booksellers.

PRACTICAL OBSERVATIONS on the CAUSES and TREATMENT of CURVATURES of the SPINE. Third edition, price 6s.

AND

Just published, second edition, price 1s 6d,

CASES and OBSERVATIONS illustrative of the beneficial results which may be obtained by close attention and perseverance, in some of the most unpromising instances of Spinal Deformity; with numerous Engravings. By SAMUEL HARE, F.R.C.S., &c.

"We unhesitatingly commend this work as a truthful and trustworthy statement of the power of scientific surgery and medicine over some of the most grievous hindrances to human activity and industry."—MEDICAL GAZETTE.

"Mr Hare is, we think, a sound and successful practitioner.'—MEDICAL CIRCULAR.

"The author has had much success in his plan of treatment, and we are of opinion that the principles on which he acts, in the treatment of these affections, are correct."—LANCET.

"Mr Hare may take credit to himself for having effected much good in the treatment of the cases described."—BRITISH MEDICAL JOURNAL.

London: John Churchill; and may be had of all booksellers.

A FATHER'S NEW YEAR'S GIFT TO HIS SON.

Price 2s 6d, printed on tinted paper, handsomely bound, with gilt edges,

THE ECONOMY OF LIFE, AND PATIENT BOYS.

EXPLANATION.

Animated by a desire to further the interests of the young, and encouraged by private opinion and by the powerful voice of the Press, which affirm that the "ECONOMY OF LIFE" and "PATIENT BOYS" (two works which inaugurate "MY LIBRARY") are admirably adapted to stimulate youth to exertion and awaken in them a laudable ambition * * * "that the 'ECONOMY OF LIFE' is an invaluable practical Guide for youth," * * * "that the advice and illustrations and reflections given make it a multum in parvo of moral instruction of a marvellous nature," * * * "that the maxims for the Government of Life, with practical illustrations, cannot fail to be highly profitable to the young, and that adults may benefit largely by their perusal," * * * "that the advice and illustrations are equally apt and conclusive, and calculated to have a life-long influence upon our children," * * * "that we heartily commend these books to parents and preceptors, deeming them well adapted to influence to most excellent ends all who may study them," * * * "that it is seldom that so much good sense is seen in so small a compass," * * * "that the author does not lecture his pupils, but endeavours to entice them into the good path which shall lead them to honour and respect," * * * "that kindness and good feeling run like veins of gold through every story," * * * "that every page is studded with useful and genial hints and encouraging advice to young men," * * * "that the 'ECONOMY OF LIFE' and 'PATIENT BOYS' must prove a boon to the rising generation."—Encouraged by such powerful voices, and by private opinion that if the "ECONOMY OF LIFE" and its companion, "PATIENT BOYS," were produced in a neat form they would be useful on the drawing-room table for casual perusal, as well as on the shelves of the library for a book of reference, we have been induced to reprint them, and place within moderate reach a handsome volume as a New Year's Gift from a FATHER to a SON, a GUARDIAN to his WARD, or a SCHOOLMASTER to his PUPIL.

EDITOR.

Ward, Locke, and Tyler, 158 Fleet street.

FORD'S EUREKA FLANNEL SHIRTS, made from the very finest Australian wool, 10s 6d each, the exact same quality as usually sold at 12s 6d and 13s 6d. A quantity of new patterns, either woven or printed, many exclusively our own, and not to be obtained elsewhere. Country residents should write for the patterns, the Illustrated List, directions for self-measurment, and have three shirts or more sent carriage free.—38 Poultry, London.

EDUCATION IN GERMANY.—ANGLO-GERMAN ESTABLISHMENT, Bonn-on-the-Rhine, founded in 1847.—Herr THOMAS prepares Young Gentlemen for the Army, Navy, Civil Service, and Mercantile pursuits. German and French only are spoken in the establishment, where the Pupils enjoy all the comforts of an English home. The highest references given.—For particulars, apply to the Director, THEODORE THOMAS, Baumschule Allée, Bonn.

WESTERN GRAMMAR SCHOOL, Brompton, S.W., in union with King's College, London.—The system pursued at this school is eminently practical, and calculated to prepare pupils for the competitive examinations and the various pursuits of life. Three pupils successfully passed the Oxford Local Examinations this year. The Head Master takes a few boarders.—For terms and prospectus apply at the school.

DEANE'S TWO-HOLE BLACK PENS which are unequalled for the durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped.
"G. and J. Deane, London bridge,"
and the box, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed.
"G. and J. DEANE'S Two-Hole Black Pens, 46 King William street, London bridge."

KEATING'S PALE NEWFOUNDLAND COD LIVER OIL. The Finest Imported this Season.
This VALUABLE MEDICINE having of late years come into such general use, and being, moreover, so extensively prescribed by the most eminent practitioners both in town and country, Mr Keating can with the greatest confidence recommend this Oil as being perfectly pure, nearly tasteless, and free from adulteration, having been analysed, reported on, and recommended by Professor Taylor, of Guy's and St Thomas's Hospitals, Dr Scott, M.D., L.R.C.P., F.L.S., &c., and Dr Edwin Payne, M.D., L.R.C.P., M.R.C.S., who, in the words of the late Dr Pereira, says that "The best Oil is that which is most devoid of colour, odour, and flavour, characters this will be found to possess, being purely of hepatic origin, a point of great weight with regard to its therapeutic value."
Sold in half-pints, 1s 6d; pints, 2s 9d; quarts, 5s; and five-pint bottles, 12s 6d, imperial measure, by Thomas Keating, Chemist, 79 St Paul's churchyard, London.

VIDONIA.—BRUCE'S BEST OLD VIDONIA, an excellent White Wine, 30s per dozen, bottles included. Other Wines as per price list.

SAMPLES SENT FREE OF CHARGE.
CHARLES WARD AND SON,
(Established upwards of a Century), 1 Chapel street West,
MAYFAIR, W., LONDON.

NUNN'S MARSALA OR BRONTE WINE, 25s per dozen, £7 4s per six dozen, £12 15s per quarter-cask. Rail paid to any station in England. This wine will be found of superior quality, is soft and old, and, though full flavoured, entirely free from heat or the slightest approach to acidity.—THOMAS NUNN and SONS, Wine, Spirit, and Liqueur Merchants, 21 Lamb's Conduit street, W.C. Price lists on application Established 1801

KINAHAN'S LL WHISKY.—DUBLIN EXHIBITION, 1865.—This celebrated old Irish Whisky gained the Dublin Prize Medal. It is pure, mild, mellow, delicious, and very wholesome. Sold in bottles, 3s 8d, at the retail houses in London; by the agents in the principal towns in England; or wholesale at 8 Great Windmill street, London, W. Observe the red seal, pink label, and cork branded "Kinahan's LL Whisky."

ALLSOPP'S PALE OR BITTER ALE.—Messrs SAMUEL ALLSOPP and SONS beg to inform the Trade, that they are now registering orders for the March Brewings of their Pale Ale in Casks of 18 Gallons and upwards, at the Brewery, Burton-on-Trent; and at the Branch Establishments.
Messrs ALLSOPP and SONS take the opportunity of announcing to private families that their Ales, so strongly recommended by the medical profession, may be procured in Casks and Bottles, and on Draught, genuine, from all the most respectable wine and beer merchants and licensed victuallers, on "ALLSOPP'S PALE ALE" being especially asked for.

GOOD NEWS FOR FRENCH WINE DRINKERS.
TO THE EDITOR OF THE ECONOMIST.
Sir,—Your frequent and persistent advocacy of a more general use of light and pure wine leads us to hope that you will allow us to make a few remarks upon this subject, conceiving as we do that the measures we are about to adopt will have an important influence not only upon the prices but upon the consumption of FRENCH WINES in this country.
Hitherto the consumption of the finest of these wines has been almost prohibitory in consequence of the excessive prices at which they have been retailed: the difference which always exists between the importers' price and the price to the consumer is far too great, the extent and variety of the profits so numerous, that by the time the wine reaches the cellars of the consumer it becomes not only fabulously dear, but as it has been aptly expressed, "a rare and expensive luxury."
In order to encourage the consumption of these wines, and to bring within reasonable limits the prices of other growths suited to this market, we have just concluded a contract with one of the three houses announced at the commencement of 1864, as the sole purchasers for 10 years of the produce of the vineyard, for a minimum quantity of 12,000 dozen of the first growth Chateau Margaux, of world-wide reputation; this contract will run over the whole period of our friends' interest in this wine, and will commence with the vintage of 1863, of which there is now bottling at the Chateau about 1,900 dozen, and which we are prepared to offer to the public at the unprecedentedly low price of 63s per dozen, including duty and all charges to this country; the corks will, as is usual when bottled at the Chateau, and as a guarantee of its genuineness, be branded "CHATEAU MARGAUX, VISCOMTE AGUADO, premier Vin, 1863.
Our reasons for offering this fine Wine at so low a price is that while it leaves us a fair profit as Merchants, we are anxious to show the public that even the finest Wines may by judicious enterprise be retailed at far lower prices than for many years have been customary in this country.
French Wines to be really popular in this country must not only be good in quality but reasonable in price, and we venture to predict that with a little further concession on the part of Mr Gladstone—giving Wine imported in bottle the same advantage in point of duty as that imported in wood—that the quantity of French Wines consumed in this country will in the course of the next ten years increase threefold, and will then still be far short of what it might and no doubt will be.—We are Sir, your obedient Servants,
H. R. WILLIAMS AND CO.
Crosby Hall, 32 Bishopsgate street within, London, E.C., Dec. 19th, 1865.

NO MORE GREY HAIR.—MELANOGENE, the superlative dye of Dicquemare, senior, Rouen, for instantaneously dyeing in any shade of colour the hair and the beard, without danger to the skin, and free from smell. This Dye is superior to all that have been employed hitherto.—Manufactory at Rouen, Rue St Nicholas 39; Depot for London, Messrs HOVENDEN and SONS, 5 Great Malborough street, W., and 93 and 95 City road, E.C.

NEW OPERA AND FIELD GLASS and the Reconnoitrer Glass, price 10s 10d (sent free). This "TOURIST'S FAVOURITE," through extraordinary division of labour, distinctly shows small windows ten miles off, landscape at 30 miles, Jupiter moons, &c. The Marquis of Carmarthen—"The reconnoitrer is very good." Earl of Bresdalbane—"I find it all you say, and wonderfully powerful for so very small a glass." Earl of Caithness—"It is a beautiful glass." "Rev. Lord Scarsdale approves of it." Lord Gifford—"Most useful." Lord Garvagh—"Remarkably good." Sir Digby Cayley—"It gives me complete satisfaction, and is wonderfully good." Captain Sandey, Royal Small Arms Factory, Enfield, "found it effective on the 1,000 yards range." F. H. Fawkes, of Farnley hall, Esq.—"I never before met, although I have tried many, a glass combining so much power, for its size, with so much clearness." THE FIELD—"We have carefully tried it at an 800 yard rifle range against all the glasses possessed by the members of the corps, and found it fully equal to any of those present, although they had cost more than four times its price." NOTES AND QUERIES—"What intending tourist will now start without such an indispensable companion to a pleasure trip?" The celebrated Hythe Glass shows bullet marks at 1,200 yards, and men at 3½ miles, 31s 6d. All the above glasses, respectively bearing the registered Trade-Marks, "Salom," "Reconnoitrer," and "Hythe," are only to be had direct from Salom and Co., 98 Princes street, Edinburgh. No agents of any kind anywhere.

DR DE JONGH'S
(Knight of the Order of Leopold of Belgium)
LIGHT-BROWN COD LIVER OIL, Prescribed by the most Eminent Medical Men as the safest, speediest, and most effectual remedy for CONSUMPTION, CHRONIC BRONCHITIS, ASTHMA, COUGHS, RHEUMATISM, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS,
Is incomparably superior to every other kind.
Dr EDWARD SMITH, F.R.S., Inspector of Poor Laws, Late Physician to the Hospital for Consumption and Diseases of the Chest, Brompton, in his Work on "Consumption," writes: "It is impossible in private practice to determine whether the Oil which we prescribe is genuine Cod Liver Oil or not, and hence we think it a great advantage that there is one kind of Cod Liver Oil which is universally admitted to be genuine—the Light Brown Oil supplied by Dr de Jongh."
Dr BARLOW, Senior Physician to Guy's Hospital, states: "I have frequently recommended persons consulting me to make use of Dr de Jongh's Cod Liver Oil. I have been well satisfied with its effects, and believe it to be a very pure oil, well fitted for those cases in which the use of that substance is indicated.
Sold only in capsuled Imperial Half-Pints, 2s 6d; Pints, 4s 9d; Quarts, 9s; by respectable chemists.
Sole Consignees,
ANSAR, HARFORD, and CO., 77 Strand, London, W.C

MERSEY DOCK ESTATE.
LOANS OF MONEY.

THE MERSEY DOCKS AND HARBOUR BOARD

hereby give notice, that they are willing to receive LOANS of MONEY on the security of their Bonds, at the rate of Four Pounds Fifteen Shillings per centum per annum interest, for periods of Three, Five, or Seven Years.

Interest Warrants for the whole term, payable half-yearly at the Bankers of the Board in Liverpool, or in London, will be issued with each bond.

Communications to be addressed to George J. Jefferson, Esq., Treasurer, Dock office, Liverpool.—By order of the Board, JOHN HARRISON, Secretary.

Dock office, Liverpool, Nov. 16, 1865.

THE MERCHANTS COMPANY (Limited).

The Board of Directors of this Company have this day made a Call of Five Pounds a Share, payable on or before the 15th day of January next, at Messrs Prescott, Grote, and Co.'s, Threadneedle street.

The Directors have much pleasure in informing the shareholders that the Company has commenced business under very favourable auspices, and they have every reason to believe that the prospects held out in the prospectus of the Company will be fully realised.

In answer to many inquiries they beg to state that they do not anticipate that any further call beyond the present will be required.—at any rate not during the ensuing year,—but in deference to the wishes expressed by numerous shareholders they have decided on receiving prepayments of an additional £5 per share, making £15 paid up, from shareholders who may express a wish to avail themselves of this option on or before the 15th January next.

The minimum guaranteed interest of 10 per cent. per annum will then be payable from the 15th proximo, on the amount of £15 per share thus paid up;—such prepayments must be made to the Secretary who will give special receipts for the same.—By order of the Board,

J. LANGTON BUTCHER, Secretary.

25 Old Broad street, London, 19th Dec., 1865.

ENTIRE DESTRUCTION BY FIRE OF COMPTON HOUSE, LIVERPOOL.

An immense square block of buildings, formed by one side of Church street, Basnett street, Tarlton street, and Leigh street, containing extensive Drapery, Jewellery, Ship Outfitting, House Furnishing, Cabinet Furniture, and other Departments, of the value of £300,000, entirely destroyed to the bare walls, with the exception of the Seven MILNERS' SAFES, which brought the Books Jewellery, Cash, Deeds, and other valuables almost unscathed out of the terrific pandemonium. For particulars see Liverpool papers of December 4th, 1865.

MILNERS' PHŒNIX SAFE WORK, Liverpool;

28 Market street, Manchester
30 Queen street, Hull.

BURGLARY IN MANCHESTER.

TOWN HALL, MANCHESTER, May 31st, 1864.

Gentlemen,—I am instructed by Sir E. Armitage, the Chairman of the Waterworks Committee, to inform you that your Patent Strong Holdfast Safe (supplied by you about ten years ago, for the custody of the cash in the Waterworks Office, at the Town Hall) successfully resisted the attacks of burglars on Friday night last. It is believed that the thieves must have been at work for many hours, as they left several broken instruments behind them. A locksmith was employed for upwards of five hours on Saturday in trying to open the Safe, in which he broke and spoiled all his tools, and, after repairing them, he only succeeded in doing so after upward of four hours' additional work on Monday, when the valuable contents of the Safe were found perfectly secure.—I am, Gentlemen, yours respectfully,

T. H. G. BERREY.

Messrs Thos. Milner and Son, Phœnix Safe Works, Liverpool.

The reimbursement of these bonds will be made at the rate of 500f, or 20l, on withdrawal of the original security, from 2nd January, 1866, at the banks and in the moneys hereinafter designated:—

At Vienna, by the Bank of Credit: Trieste, by MM. Morpargo and Parente; } in Austrian money according to the authentic rate on Paris on the day of reimbursement.

Paris, by MM. de Rothschild Frerès;
Frankfort-sur-Mein, by MM. M. A. de Rothschild and Sons;
Geneva, by MM. Lombard-Odier;
Milan, by M. C. F. Bro't;
Bologna, by MM. R. Rizzoli and Co;
Venice, by MM. J. Levi and Son; } in francs.

Berlin, by MM. S. Bleichroder, in thalers calculated at 3f 75c;

London, by MM. N. M. de Rothschild and Son, in £ sterling.

On all the bonds drawn and above designated, no more interest will be paid from 1st January, 1866.

Vienna, Dec. 14.

ITALIAN SOCIETY OF THE MERIDIONAL RAILWAYS.

The General Direction has the honour to inform the shareholders that from January 1, 1866, interest at the rate of 5 per cent. per annum due on December 31, 1865, will be paid at the following banks, after previous presentation of coupon No. 6, that interest being 10 francs 40 centimes per share on which 500 francs have been paid.

At Florence, at the Central office of the Company.
At Turin, by the Italian Credit Mobilier.
At Naples, at the National Bank.
At Milan, by Mr Jules Belinzaghi.
At Genoa, at the General Bank.
At Leghorn, by Messrs M. A. Bastogi and Son.
At Paris, at the Bank de Credit Industrial and Commercial.
At London, by Messrs Baring Brothers and Co.

Florence, December 11, 1865.

EAST INDIAN RAILWAY COMPANY.

Notice is hereby given, that the Eighteenth Half-Yearly General Meeting of the East Indian Railway Company will be held at the London Tavern, Bishopgate street on Friday, the 29th day of December, 1865, at one o'clock p.m. precisely, in conformity with the Company's deed of settlement.—By order of the Board,

D. I. NOAD, Secretary.

East Indian Railway House, Alderman's Walk, New Broad street, London, 30th Nov., 1865.

NORTH-EASTERN RAILWAY.—

FOUR-AND-A-HALF PER CENT. PREFERENCE STOCK, 1865.

The Directors are prepared to issue at par further amounts of the above stock.

Allotments will be registered in the Company's books free of expense, and interest will commence from the date of payment of the money.

Further information may be obtained from the Secretary, to whom applications are to be sent.

J. CLEGHORN, Secretary.

York, December, 1865.

METROPOLITAN DISTRICT RAILWAY COMPANY.

Notice is hereby given, that the interest at the rate of 6 per cent. per annum will in future be paid half-yearly, on the 1st January and 1st July.

On Monday, the 1st of January next, the proportion of interest accruing since the 13th September last will be paid at the office of the Registrar of the Company, 27 Austinfriars.

Provisional Scrip Certificates to bearer must be forwarded to the Registrar at the above office, in order that the dividend warrants may be duly prepared.

F. RITSO, Registrar.

27 Austinfriars, E.C.

EAST LONDON RAILWAY COMPANY.

The INTEREST PAYABLE by the Contractors on the shares and scrip of this Company for the HALF-YEAR ending 28th December inst., will be PAID on and after the 5th January.

Interest warrants will be forwarded to the registered proprietors. The holders of scrip will be required to lodge their certificates, accompanied by receipts for payments thereon, with the registrar, at the offices of the Company, 26 Old Broad street, London, E. , three clear days prior to payment.

The transfer books will be closed from the 28th December to the 4th January, both days inclusive.

J. B. DAVISON, Registrar.

London, Dec. 20, 1865.

ATLANTIC AND GREAT WESTERN RAILWAY.

NEW YORK DIVISION, FIRST MORTGAGE BONDS, PENNSYLVANIA DIVISION and OHIO DIVISION, SECOND MORTGAGE BONDS. Interest payable 1st January at the Consolidated Bank (Limited). The Coupons from the above Bonds will be PAID on MONDAY, the 1st January, at the rate of 4s to the dollar, and must be left two clear days at the office of the Company, 5 Westminster chambers, Victoria street, Westminster, S.W., previously for examination. If sent by post a cheque for the amount will be remitted.

5 Westminster chambers, Victoria street, Westminster, Dec. 16, 1865.

ATLANTIC AND GREAT WESTERN RAILWAY.

NOTICE TO BONDHOLDERS.

In conformity with the terms on which the First Mortgage Bonds of the Pennsylvania section of this railroad were issued to the public, the Third Annual Drawing of 4 per cent. of the gross amount of these Bonds will take place at the office of Messrs E. F. Satterthwaite and Co., 38 Throgmorton street, in the presence of Mr Grain, Public Notary, on THURSDAY, January 18, 1866, at ONE o'clock precisely.

The authorised issue is as under, viz.:—

				dols.
2,000	bonds of	1,000	dols each.....	2,000,000
600	—	500	—	300,000
2,000	—	100	—	200,000
				2,500,000

Four per cent. of each denomination will be drawn on the above day, and the bonds so drawn that have been issued in London, will be paid off at the rate of £225 for every 1,000 dol bond; £1:2 10s for every 500 dol bond; and £22 10s for every 100 dol bond, on presentation at the Company's office, 5 Westminster chambers, Victoria street, Westminster, on and after 2nd April next, in addition to the coupon due on that day, after which all interest will cease.

On payment the drawn bonds will be cancelled in the presence of a public notary.

Offices, 5 Westminster chambers, Victoria street, Westminster.

Will be published on the 6th of January and continued weekly, price 6d.

THE LIVERPOOL AND LONDON and GLOBE FIRE and LIFE INSURANCE COMPANY.

Offices—1 Dale street, Liverpool; 20 and 21 Poultry, 7 Cornhill, and Charing cross, London.

PROGRESS OF THE COMPANY SINCE 1850.

Year.	Fire Premiums. £		Life Premiums. £		Invested Funds. £
1851.....	54,305	...	27,157	...	502,824
1856.....	222,279	...	72,781	...	871,061
1861.....	360,130	...	135,974	...	1,311,905
1864.....	742,674	...	236,214	...	3,212,300

JOHN ATKINS, Resident Secretary, London.

Life claims are payable in thirty days after they are admitted.

Fire policies falling due at Christmas should be renewed by the 9th of January.

NORWICH UNION FIRE OFFICE.

The full benefit of the reduction of duty to 1s 6d per cent. is given to insurers effecting policies with this Company.

By this reduction and the BONUS SYSTEM of the NORWICH UNION, the cost of insurance is reduced to a minimum amount.

EXAMPLES of PREMIUMS REDUCED BY BONUS.

No. of Policy.	Sum Insured. £	Annual Premium. £ s d	Reduced Premium now payable. £ s d
441,411 ...	92,540 ...	222 4 4 ...	120 19 2
450,156 ...	12,000 ...	63 0 0 ...	35 0 0
484,173 ...	6,800 ...	35 14 0 ...	19 16 8
503,975 ...	5,000 ...	7 10 0 ...	4 6 4

The rates of premium are in no case higher than those charged by the other principal offices giving no bonus to their insurers.

The duty paid to Government for the year 1863 was £84,152 11s 9d; the amount insured on farming stock was £10,202,272.

For prospectuses apply to the Society's offices, 29 Fleet street, E.C.; and Surrey street, Norwich.

THE LONDON ASSURANCE

(Incorporated by Royal Charter A.D. 1720),
For FIRE, LIFE, and MARINE ASSURANCES.
Head Office—No. 7 Royal Exchange, Cornhill, E.C.
West-end Office—No. 7 Pall Mall, S.W.

Bonamy Dobree, Esq., Governor.
Patrick F. Robertson, Esq. Sub-Governor.
Richard Baggallay, Esq., Deputy-Governor.

Robert Gillespie, Esq.	William B. Watson, Esq.
Harry George Gordon, Esq.	

West-end Office,—Henry Kingscote, Esq.

FIRE DEPARTMENT.

Special Notice.—The Directors are now prepared to issue policies insuring every description of Property at the reduced duty of 1s 6d per cent. per annum. Insurances now due will have full benefit of the reduction.

Notice is also hereby given to persons assured against Fire that the Renewal Receipts for insurances due at Christmas are ready to be delivered, and that such insurances as shall remain unpaid after Fifteen Days from the said Quarter day will become void.

Fire Insurances effected at moderate rates upon every description of property.

Damage caused by explosion of gas made good.

Commission allowed to brokers and agents effecting foreign and ship insurances against Fire.

LIFE DEPARTMENT.

This Corporation has granted Assurances on Lives for a period exceeding One Hundred and Forty Years, having issued its First Policy on the 7th June, 1721.

Two-thirds of the entire profits, without any deduction for expenses of management, are allotted to the assured. This arrangement will be found to be more advantageous to the policy holders, than an apparently larger proportion of the profits, subject to the expenses of management.

MARINE DEPARTMENT.

Marine Insurances are effected at the head office the Corporation. JOHN LAURENCE, Secretary.

The INVESTOR'S MANUAL *is now sold separately, price 9d stamped, 8d unstamped. If taken as a* SUPPLEMENT *to the* ECONOMIST, *it remains at its former price, 6d. In addition to the information formerly given, it gives a concise summary of the Reports of the Companies for the present year as will enable Investors to judge of their position.*

THE GREAT ADVANTAGE OF AN EARLY ACTION ON THE PART OF THE BANK OF ENGLAND.

IT is much to be regretted that the Bank of England did not raise the rate of discount a fortnight ago. It is almost of as much importance that the policy of the Bank should be calculable as that it should be good; and then, according to all common calculation, the rate was to have been raised. It is of essential importance that the Bank policy should be *uniform;* what is uniform is intelligible; its reasons, its motives, sink into the popular mind. One of the greatest of our recent politicians has laid down that "the first, second, and "third thing to an English statesman is to be intelligible;" it is at least equally the first, second, and third thing with the policy of the Bank of England The peculiarity of the late policy of the Bank of England—the precise quality in which it differs from its old policy—is the promptitude of its action. In old times it tried to get the money back after it had gone—after it had left the country. But its policy during the last four years has been to keep the gold before it goes. On this occasion, however, it departed from that policy. It has during the last fortnight permitted a large sum of gold to leave the country, which it now finds would be very convenient to it, and which it wishes to attract back. A fortnight since we earnestly pressed the matter on its attention, and what has happened has exceeded our anticipations. We did not expect that the whole of our recent imports of gold would be taken for exportation: we only expected that a large part of it would be so taken; but, in fact, the whole has gone.

The error of the Bank is probably to be accounted for on two grounds. First, they expected a return of coin from the provinces.. But in a growing state of trade our metallic circulation is in a state of constant though irregular augmentation; and to calculate on sovereigns returning from the country is to calculate on that which is least likely to happen when money is most wanted. When trade is stagnant the coin will return; when trade is brisk, the coin may not return. Secondly, it is believed that the Bank feels "a delicacy" in raising the rate at the end of the quarter, while the Government deposits put Lombard street more than usually under its government. But "delicacy" in money matters is mostly a pleasant name for mistake. The Bank of England is charged with a duty of the gravest magnitude; it keeps the *sole bullion reserve* of England, and this duty it ought to perform without even thinking of lesser considerations.

We cannot at all agree with those who attribute the present dearness of money to the Act of 1844. The reply is to look at the Bank accounts without thinking of the Act of 1844. To read them as they are given at the commencement of our City article in the "old form," it there appears that we have only 13,403,000*l* for all purposes. This is the single fund in the country of unused money. Speaking broadly, but speaking practically, everybody but the Bank of England uses up every sixpence they have; all bankers in the country keep their balances in London,—generally at the bill-brokers, and on securities; they have no bullion. They have cash to use in their till, but nothing else. The London bankers do the same; they keep, indeed, a balance at the Bank of England; they have a claim on the Bank bullion, but they have no bullion of their own. Looking to the enormous transactions of this country,—her exports and imports growing almost daily in magnitude, her commerce year by year depending more and more for its prosperity on a multitude of complex and secret causes,—is so small a sum of real cash at all more than enough, or even is it enough?

We have had a great lesson during the last four years, and we are still learning it. We used to think that a bad harvest was our one great danger; that it, and it alone, would cause a sudden drain on our bullion. The events of 1857 ought to have taught us better. The drain for silver to pay for Indian produce, then substituted for Russian produce, was one of the causes which produced that panic. But we did not learn this lesson from the events of 1857, it was buried under more conspicuous causes. But lately we have seen it alone and unconfused. Secession in America has disordered our money market as much as any bad harvest ever did or can. We had

Digitized by Google

a "cotton drain" acting for four years. We ought, therefore, to know that in a complex commerce such as ours, any great political confusion may at any moment give rise to a new trade, and that new trades—especially new trades with semi-barbarous nations—take cash, draw real bullion in amounts and with a speed we had no notion of when our trade was small and its range limited to a few nations.

It is commonly said that France does with less bullion than we do. But the fact just now at least is otherwise. The Bank of France has 17,600,000*l*, and the credit system of France is altogether undeveloped and trifling as compared with that of England. The same liabilities against which the bullion in the Bank of France is a reserve are almost infinitely less than those against which the bullion in the Bank of England is a reserve. The foreign liabilities are greatly less too; the English commerce and the English loan fund are both so much larger than the French, that we are liable on a sudden to be asked for sums which would frighten Paris bankers. The Paris rate of discount is no guide for ours, because the demands upon it are less sudden, less various, and less intense.

We observe in some minds a very odd jealousy at the amount of bullion. They think that the less bullion we say that as a rule and as a standard we will keep—the less will be the rate of discount. This is not so. If we say in 1865 that 15,000,000*l* is to be the standard quantity, and then in 1866 let it down to 10,000,000*l*, in 1868 when the matter is all over, we shall be, as far as the rate of discount goes, just where we were at first. We shall have spent 5,000,000*l* of bullion on some commodities, and we shall have those commodities, or such of them as we have not eaten; but we shall be as near our bullion *limit* as before if bullion begins to go; we must raise our rate, to prevent our getting to 9,000,000*l*, just as we used to raise it to prevent our getting to 14,000,000*l*. The low limit has all the permanent inconveniences of the high, and this besides—that after all it may be ineffectual. Our internal system of credit—our internal system of foreign payment—may want more than the smaller reserve; it may want as much as the larger reserve.

We are very far, therefore, from agreeing with those critics who excuse the Bank for raising their rate because "they "are compelled by the mischievous Act of 1844." We think that if there were no such Act, a wise policy would induce them to do just the same. We blame the Bank, not for raising the rate too soon, but for omitting to raise it till it was too late.

There is another reason for blaming them,—and this is peculiar to Sir R. Peel's Act. At the close of every quarter a large amount of notes goes out to the *non*-banking classes. Under the "old form" this is a mere transfer from one liability to another. The deposits are less and the notes more. But under Sir R. Peel's Act, if at the close of the quarter the banking reserve of notes is low, the loss of these notes may be very material. We have before shown that the Bank ought to manage so that it should not be material. They ought to accumulate such a reserve during the middle of a quarter as to be independent of this outgoing of notes. It is not good banking to impose sudden restriction to compensate for calculable diminutions. If a fortnight since the Bank rate had been raised so as to retain the bullion which has since left England, the banking reserve could not have been too low: now it may be too low.

As to the future, we should not have much misgiving if a portion of the recent supplies had been retained in England by prompt and timely action. We should then have almost certainly been strong enough to meet any foreign drain that is at all likely. Now we are not equally certain; still, we *hope* no further advance may be necessary. Our grounds are two.

1st. That for reasons we hope soon to explain the trade of the country presses much more on its capital in the later part of the year than the earlier; in consequence of which November is always called a dismal month in Lombard street, and the turn of the year is often hailed as if it were an era of deliverance.

2ndly. That the export of silver to the East, though it will doubtless be considerable, will nevertheless not be immediate. Experience has shown that the exporters will wait a little, if they can, when the rate is high; and as they have just remitted so much, it is likely that they can. They will not force on another rise unless they are pressed.

That the export of coin will still be large is evident from the following table just published:—

IMPORTS of FOREIGN COTTON in Ten Months ending Oct. 31.

	1863.		1864.		1865.
	£		£		£
From United States	460,458	...	1,604,378	...	2,534,992
Bahamas and Bermudas	2,071,871	...	3,924,267	...	1,379,338
Mexico	1,262,645	...	2,428,008	...	2,599,739
Brazil	1,689,213	...	3,650,451	...	2,935,654
Turkey	543,440	...	1,575,791	...	919,099
Egypt	6,599,293	...	11,438,506	...	10,546,019
British India	22,051,712	...	29,183,930	...	18,555,442
China	1,545,833	...	5,174,553	...	1,509,235
Other Countries	1,450,700	...	3,119,031	...	2,920,046
Total	37,675,165	...	62,098,915	...	43,899,564

It is true that the amount to be paid for is much less than in 1864, but it is more than 1863, and in all the early part of 1864 the payment for the cotton crop of 1863 made money very dear. Although on the 30th Dec., 1863, we had

	£
Coin and bullion	14,362,605
Notes and coin in banking department	8,886,575

Yet the rate of discount was as follows during all the early part of 1864:—

	Per Cent.
January 2	7
January 16	8
February 16	8
February 20	7
March 5	6
March 19	6
April 2	6
April 16	7
May 7	9
May 21	8
June 4	7
June 24	6

It is much, therefore, if money do not become dearer. We hope it will not, but no one can be sure. The days of really cheap money are too distant for us to see them.

THE INVESTOR'S MANUAL OF THIS MONTH.

WE beg to direct particular attention to the INVESTOR'S MANUAL for this month. As it is the close of the year, this number contains a record of the highest and lowest price of all securities during the year, as well as during the month. It therefore contains, in the same line, the two principal facts in the history of each security during the past year, which it would be difficult for an ordinary person to find out, and which he could not find out without a reference to all the Stock Exchange lists published in this period.

THE MINISTERIAL CRISIS IN ITALY.

IT would interest our readers little were we to discuss the relative merits of parties or factions in the Italian Parliament which have few clear or important differences of principle or policy to distinguish them from each other, or to give utterance to conjectures as to the probability of this or that politician arriving at such power as is conferred by office, when the very names we should specify are known but to few in England, and their opinions and capacities to still fewer. It will be more to the purpose if we give a short sketch of the actual position of affairs there which has led to the resignation of the late Ministry, and which will have to be faced and dealt with by whatever combination of public men may succeed them. It appears that La Marmora, the head of the last Cabinet, has been deputed by the King to attempt the formation of a new one, and that from this new one Sella, the late late Minister of Finance, will certainly be excluded. It was, indeed, mainly his schemes and his manner of forcing them on the Chamber which led to the defeat and the resignation of his colleagues.

The newly-elected Chamber met towards the close of last month. It presented two or three rather remarkable and embarrassing features. In the first place it was incomplete, since, from a variety of causes, nearly 80 seats have still to be filled up; and the mode in which they will be filled up, and the effect of the class of men who will be chosen upon the relative strength of parties, will be considerably influenced by the recent proceedings in the Chamber. In the next place, some of the best known and the most esteemed deputies, who have sat in the Italian Parliament almost from the beginning of its existence, either lost their seats or were elected by bare majorities. The section of which Minghetti

and Peruzzi were the chiefs, the *Consorteria* as they were termed, suffered severely. The party of action gained considerable strength when compared with their position in the last Chamber. The clerical party carried about 16 elections, but influenced and damaged a far larger number. They adopted a very iniquitous policy, and acted it out with great craft and unity of purpose. Where they had no chance of returning their own candidate, they threw their whole weight into the scale of the worst candidate they could find, with the view of discrediting the Chamber they could not hope to guide, and of embarrassing the Government which was necessarily hostile to their schemes. The most disreputable man or the most violent man was next best to a devoted son of the Church or an emissary of the Ex-King of Naples. It cannot be concealed that all these influences combined have succeeded in returning a Chamber which gives great dissatisfaction and uneasiness to every true friend of Italy. The Liberals still showed a very large majority; but unhappily the Liberals were by no means a compact or united party; any many of them were rivals and bitter foes of the actual Government, of whose *personnel* they disapproved, and from much of whose secondary policy they differed. The Ministers were neither popular nor strong. General La Marmora was much liked and respected, but he has little or nothing of the statesman about him, and of political tactics he has no experience or idea; while Signor Sella, though well informed and well meaning, was utterly unequal to the solution of one of the most difficult problems ever set before a Minister of Finance. In fact, both La Marmora and Sella felt their inadequacy: they were prepared for defeat; they scarcely shrunk from it; latterly, indeed, they even seemed to court it.

Before a Chamber constituted as we have described, Sella brought forward perhaps one of the most injudicious budgets ever presented to a popular assembly. He brought it forward two or three months earlier than he need have done, and at a time when he must have been aware that it would influence, unfavourably for the Government, the still pending elections. Not content with this, he opposed the wishes of the Chamber in reference to the postponement of a matter of financial administration as to which he was probably right, but where his obstinacy and imperiousness were clearly out of place. In short, he seemed determined to force on a crisis, and a trifling heat of temper, on the part of La Marmora on the one side and the Deputies on the other, led to a scene of some violence and confusion: Ministers were beaten on a virtual vote of confidence, and resigned in consequence. The details of the crisis are unimportant. Practically the Ministry were turned out because the finances of the State were in terrible disorder, because no one had the least confidence in Signor Sella's capacity to set them right, and because his financial statement and proposals were alike startling and incompetent.

The balance of revenue and expenditure showed an annual and apparently constant deficit of ten millions sterling. Loans had been resorted to so freely, and cost so much, that it would obviously have been injurious and discreditable to have recourse to them so soon again, and would have amounted to a confession of incapacity and despair. You may borrow to meet a temporary want; you may borrow two or three times in quick succession, provided at the same time you can show that every year is bringing your budget nearer and nearer to an equilibrium; but to go on borrowing when your deficit is permanent is disreputable, and soon becomes impossible. The confiscation of church lands and monastic revenues had already been carried as far as was desirable at present. Yet, in some way or other, an equilibrium must be at least *approached*. No one saw this more clearly than Signor Sella, and no one ever stated it more broadly. Now, there are three ways of equalising revenue and expenditure:—You may reduce expenditure; you may increase taxation; or you may render existing taxes more productive by reduction or by an improved method of collection. Of these three modes Sella had hitherto tried the second to the utmost possible limit, and had utterly failed. He proposed, in his new budget, to try the first mode also; but he never seems to have given, at any period of his career, a thought to the third—the mode which we in England have of late years found so effective. The difficulty lay here: the interest of the debt of course could not be reduced; the guarantee to railways could not be touched; the pension list or "dead "weight" could not be meddled with; public works it was desirable rather to push forward than to check. There remained only the army, the marine, and the civil services, on which important reductions could be effected. But if the *whole* army and navy had been laid down at once, the saving would only just have met the actual deficiency. The utmost, therefore, that could be proposed was to save about two millions by extensive military economies;—and this the Government resolved to do. In the large sums now wasted in the mal-collection of the revenue, it does not appear to have occurred to them to make any reduction.

The Italian financiers seem to have no conception of the rich vein which lies in judicious *reductions* of taxation. They have little faith and little courage; and, having no margin, dare venture on no experiment. On the contrary, whenever they find themselves short of funds, their first and usually their only idea has been to double existing taxes or to lay on fresh ones. Sella, or his predecessor, increased the income-tax before the first year's yield had been collected, and increased it, we believe, a second time not long afterwards. The duty on tobacco was greatly raised last year; and in his new budget Sella nearly took away the breath of all economists and fiscal authorities by proposing to raise *four* millions sterling by a tax on the grinding of flour, to be levied at the mill. Anything at once more injudicious, more unpopular, more utterly at variance with all modern doctrines of financial policy, could not be conceived. Yet the Minister had been contemplating it for months; he had clung to the scheme with singular obstinacy; he had been warned that, if he brought it forward, it would inevitably be defeated, and that he and his colleagues must fall with it. But he persisted, and thus in a manner committed political suicide.

It is in the third of the several modes we enumerated that the equilibrium of Italian finance must, we are satisfied, be sought and may be found,—in the better collection of existing imposts, namely, not in the imposition of new ones. A few months ago we gave some flagrant instances of the extent to which taxes are evaded in Italy, especially in the Southern Provinces; and of course the heavier they become the more are they evaded. It is scarcely too sanguine to believe that if the Customs, the succession duty, the stamp duties, and the income tax were rigorously levied and honestly paid, there would in three years be no deficit to supply. But evasion has become a habit and a system, and no determined effort is made to punish the habit and break down the system. Officials aid it; authorities wink at it; lawyers are paid to manage it; Customs officers are bribed to support it;—and all the time the Ministers, perfectly cognisant of the facts, look on in what seems almost helpless imbecility. Whether the new Ministry will contain any man of mental and moral vigour enough to grapple with the fatal mischief, we cannot say. Certain it is that the last Cabinet contained no such man; nor have we heard any one say with confidence that such a man is to be found in all the Chamber, or in all the country. Yet one such financier with something of the moral ascendancy of Cavour, might set matters right probably in a single Parliament. But he must have determination, he must have peace, and he must be backed by the entire Liberal party in the House.

BRITISH NORTH AMERICA.

RECIPROCITY AND CONFEDERATION.

It seems to be tolerably certain that the Reciprocity Treaty between Canada and the United States will really come to an end in March next, in pursuance of the twelvemonths' notice given by the Washington Government at the instigation of Congress. The Finance Minister of Canada (Hon. A. T. Galt) has quite recently undertaken a diplomatic mission to Washington, with the principal object of at least laying the basis of a new and modified treaty, but it is understood that his efforts have been fruitless. The treaty has been abrogated in obedience to the blind and selfish doctrine of that Protectionist party in the States who, if not effectually put down in time, are certain to sow the seeds of future secession not in the South only, but in the much more formidable West. These people say that the treaty is bad for the States, because they buy more commodities of Canada than they sell to it! As if the object of all foreign trade was not to obtain as many imports as possible, leaving the foreigner to get paid (and he will take good care of that) as he can. The States want the timber, wheat, furs, and minerals of Canada, and the treaty, by its bonding clauses,

Digitized by Google

enables them to procure these commodities in the easiest way. But Canada it seems—for the allegation is disputed—does not buy anything like an equivalent of the manufactures of the States. Supposing this to be so, all that can be said is that the States are worse manufacturers than this or some other country, and that the Canadians, like sensible traders, go to market where the best goods are to be had at the smallest price. A little more care and impartiality would perhaps enable the Anti-Treaty party at Boston and elsewhere to discover that United States articles cannot even command so near a market as Canada, because the manufacturers who produce them shut themselves up from the sharpening and invigorating influence of all foreign competition whatever. Mr Morrill and his high tariff is fast securing for them the distinguished honour of being able to find customers only amongst the unfortunate persons who are not allowed to buy of anybody else.

The Washington politicians seem to have expected that under the alarm of losing the Treaty, Canada would consent to adopt as high a tariff as the States. They are entirely and almost ridiculously mistaken. In real truth the abrogation of the Treaty by the sole action of the States confers a great advantage on Canada. If under present circumstances the Treaty was worth anything to either side, it was worth far more to the community on the South than to that on the North of the British frontier. A river, lake, and land line of a thousand miles is obviously indefensible against smuggling. High import and excise duties in Maine and Michigan, and low import and excise duties in Canada and New Brunswick mean, of course, that some very large proportion of the dutiable articles in the States will be imported into or produced in Canada, and smuggled southward. The harbours of Quebec and Montreal will be filled with ships bringing tea, sugar, spices, silks, and luxuries for Boston, Chicago, and Cincinnati; and the Canadian traders will grow rich and the Canadian revenue will prosper prodigiously out of the war taxation of their neighbours. Extra Custom houses are silly. They only add to the expense of the Government, and render the smugglers more ingenious. The latest illustrative story is that from one of the Canadian towns, there has been a large recent increase in the funerals in some neighbouring cemetery just over the border. These excited suspicion, and when the next coffin was examined it was found to be closely crammed with silks, brocades, and laces.

Now, if Canada of its own motion had stepped forward to annul the Treaty, the selfish motive would have been so plain as to justify forcible remonstrance on the part of the States. The Americans would have said, and with great reason, "We accuse you, our nearest and weakest neighbour, of taking advantage of the protection of Great Britain to inflict upon us great wrong. A civil war has compelled us to tax our people heavily, and you immediately place yourself in the position of growing rich out of our misfortunes. We will not endure it." The insane folly of the Morrill faction has saved Canada from this difficulty. Like the besotted carpenter on the sign-board in Hogarth's picture, they have deliberately sawn in two the only prop which sustained them.

The policy of Canada, with its hands now set completely free by the course of policy pursued at Washington, is abundantly plain. Import and excise duties should be cut down in all possible directions, and the deficiency made up by a house duty, and by a scheme of stamp and licence duties. Further,—confederation with New Brunswick and Nova Scotia should be urged forward, so that the whole of British North America may practically adopt the same tariff and the same principles of fiscal policy. With Confederation, would be secured the Intercolonial Railway from Halifax to Quebec—that is to say—Canada would obtain in Halifax a port of the first class on the Atlantic, open all the year to vessels of the largest size.

The basis of Confederation settled at Quebec in October, 1864, was defeated, or more properly postponed, by the refusal of New Brunswick at the general election of March last to accept the conditions agreed to by its representatives at the Conference. The Tilley Administration were turned out, and were succeeded by men wholly hostile to union with the other Provinces. The Governor, also, was an Anti-Unionist. But upon him, during a short visit to England, Mr Cardwell found means of producing an impression decidedly more in accordance with the wishes of the Colonial Office, and accordingly Mr Gordon has re-entered upon his Government with ideas of the English type. Discussion has been busily plied up and down the province, and with such effect that when, a few weeks ago, a vacancy occurred in the representation of the largest county in New Brunswick, the identical Unionist candidate, defeated by several hundred votes in March last, was now returned by a majority, of a still greater number of votes, over an eminent Anti-Confederation opponent; and this event, among others, is considered to render certain the early return of Mr Tilley and his friends to power.

When that event comes about we should advise the Confederationists not to be too positive in their adherence to the Quebec Convention as it now stands. Fundamentally it is right and sound, but Canada will have to make concessions to the maritime provinces.

The refusal of the States to renew the Reciprocity Treaty is one of the greatest chances ever presented to the people of our North American dependencies; and if they fail to take advantage of this choice opportunity in a shrewd and sagacious spirit, they will do far more to alienate the goodwill and respect of this country than all the efforts of all the preachers of the doctrine of Colonial abandonment.

THE FINANCES OF TURKEY.

Exactly five years ago we made an attempt to warn the public against the unwise degree of confidence which it seemed inclined to place in Turkish securities. M. Mirès was offering a loan for the Divan, "secured" upon special branches of the Turkish revenue, and our object was to point out, what would seem to be simple enough, the worthlessness of mortgages on which the creditor has not the power to foreclose. Every borrowing State pledges all its property and all its revenue to repay its debts, or rather to pay continuously and regularly the interest on its debts, and the "assignment" of any special branch of revenue is simply a delusive form of words. Suppose, for example, a loan is secured on the Customs revenue of Constantinople, and the Divan is unable or unwilling to pay the interest, are the creditors to seize on the Custom houses of a great capital and levy the duties by their own authority? They have not the power, and their Governments, though they have the power, will be as little inclined to declare war by issuing a special distraint, as to declare war by making a general demand for the reimbursement of private creditors. The Customs revenue is part of the general revenue, and if the latter is unavailable, so also will the former be. One would think this was very elementary finance, but experience proves that investors are really "taken," as they say, by promises which have no more meaning than an East India merchant's advertisement that he will cash his bills out of his profits upon the shipment of sugar.

Since that time, the Turkish Government has by no means improved its financial position, and the ominous telegram recently received, stating that the Divan had discussed the propriety of suspending the payment of interest, induces us once more to warn investors to look very closely into the nature of the security they hold. It is very difficult indeed for them, unless they live in London, and are familiar with the City, and understand the information usually afloat there, to ascertain the precise value of private or joint stock securities. So much depends on individuals, so much on facts which scarcely pass beyond the manager's room, so much on accident, that even the best informed find their calculations sometimes baffled. But the difficulties in the way of a judgment on the value of a foreign loan, though by no means slight, are not of this character. It is not possible for a country clergyman in Dorsetshire to form a sound opinion upon the security of shares in a financial company doing a risky business, or a contract company doing a dangerous business, or a mining company with unexplored mines, or an insurance office just started, but it is possible for him to form a sound opinion on the value of many foreign stocks. He knows the facts as well as the men on 'Change,—who are always liable to trust delusive "pri-" vate information,"—and he has certain general principles to guide him. Those principles are, we take it, very much like these. The safest foreign stock is that which is raised by a Government very stable, public in its financial proceedings, disinclined to war, habituated to meet expenditure by taxation instead of loans, clearly able to raise taxes if it will, and little liable to be affected by the mere will of individuals. All those conditions meet together only in Great Britain and Holland, and conse-

Digitized by Google

quently their Consols stand highest in favour in the market of the world. Two of them at least are wanting in France, and consequently French Consols, which from the peculiarly small amounts in which they are held, are probably as safe from repudiation as any securities in the world, never quite attain the English level. One of them, at least, the desire to meet expenditure by taxes, is still supposed in Europe to be wanting in the United States, and stocks based upon security in some respects better than any ever offered, are still, therefore, in comparative discredit. But every one of these conditions, except the first, is wanting in the case of Turkey, and one more which may prove more important than them all. The Sultan's Government is, we admit, a reasonably stable one. It is not probable that Turkey will be revolutionised in such a way as to destroy its liability to pay its debts within any time about which it is necessary or expedient to calculate. If conquered by a civilised power the debt would be safer than it is now, and no class in Turkey is yet strong enough to upset a dynasty protected by Europe, and by the semi-religious reverence of the dominant caste. But though the Government is stable, its financial proceedings are not public. They are apparently public, that is long budgets are published from time to time, but there is no proof that these budgets are accurate. On the contrary there is proof that they are not, that Turkish accountants make great mistakes, that some principles of finance are misunderstood, that some large expenditures are concealed, that some liabilities are not reckoned to debit, that in short it is possible, as M. Reuter informs us this week, that the budget should present a surplus where there is really a deficiency. No concealment can be so perfect or so dangerous, as that which is secured by apparent but inaccurate publicity. As to war, although the Turkish Government is, by its political position, almost neutralised, it still has the financial disadvantages of warlike tendencies, the Sultan spending avowedly unnecessary sums upon the army, upon iron-clad steamers, and upon rifled cannon. So far from being habituated to meet expenditure by taxes, it frequently meets even the interest on its loans by fresh loans, having this very month raised 6,000,000*l* at excessive interest, in order to meet the burdens caused by its last financial "conversion." Indeed, it is probable that the statesmen of the Divan are not even unwilling to borrow, but willing, looking upon a demand for a loan as the most easy and painless of all financial operations. As to the power of raising taxes, we frankly admit that it may be considerable, for Turkey possesses great resources; but then it may also be inconsiderable, for there is no proof that these resources can be made available in cash. There does not probably live the man who could give even an approximate idea of the revenue Turkey could raise, and the only analogy is not encouraging. She raises now about 18s a head. The Government of India, with its irresistible strength and industrious people, find it difficult to raise more than 6s a head. Above all, Turkey, more than any nation in the world, more for instance than Russia, or China, or Persia, is liable to be affected by the caprice of an individual. The Czar must in finance be controlled by his own knowledge, the Regent of China cannot step out of a certain customary routine, the Shah could not offend seriously the mighty family clique which administers his provinces. But the Sultan is unchecked by any substantial power operative in finance. If he chose to order fifty ironclads, they would be ordered, and he would not know that he could not pay for them. His predecessor really did something almost as absurd as this in his mania for building. Half a dozen Councils at least of various kinds have been established in Constantinople, to give Western Europe the impression that a scientific system of finance was about to be introduced, and in one budget, if we remember rightly, the Sultan was put upon an allowance, called, after Western precedents, a Civil List. But if the Board, or Council, or Syndicate—the latest name—were to intercept an order for expenditure, it would be exiled, while the Minister who suggested that the Sultan had exceeded his allowance would probably be put to death. Investors forget that the Sultan being Caliph, obedience to his order is a religious duty which the majority of his agents, all Turkish soldiers, and all Turks of the lower order, would unhesitatingly carry out. If he chooses to waste, he can waste, and nothing informs him where waste begins or ends. He is, in his own idea, a great monarch, and he orders ironclads with an indifference to expenditure which would seem to Mr Gladstone, with the British Treasury at his back, simply incredible.

Above all, Turkey is not civilised, or, in other words, a financial collapse would not paralyse the Government of Turkey. In a civilised State, bankruptcy is dreaded by rulers with almost exaggerated alarm as the sure precursor of revolution; but in an uncivilised State, it means only a safe robbery of the public creditor. Suppose the Divan suddenly to pay the interest on the debt in inconvertible paper, what would happen to the Sultan? Simply, an inability to borrow again, to which necessity he would not look forward. Foreign creditors would be ruined, and diplomatists would remonstrate, but no fleets would be moved, and the Sultan would not be menaced by one power without another offering him support. In Turkey itself the paper would be bought up at a heavy discount by great officials, and then forced on the provinces at par, in payment for houses and estates and jewels, and then everything would go on as before. The army would be paid as it was before loans were heard of in the Divan; or if it were not, would be quartered on the people with orders to pay itself. The State would be just as strong, the Sultan just as completely protected from external discomfort, trade just as profitable and as irregular as ever. Nothing in fact would happen as it would happen, say in Italy, and the best guarantee for honesty, the fear of the consequences of not being honest, is entirely absent. If, under such circumstances—and we have understated the case—speculators like to deal in a stock which, if safe, is the most profitable in Europe, we have nothing to say; but quiet investors in the country will do well to ponder the facts, and ask themselves why when Great Britain can borrow at 4 per cent., the Turkish Government is compelled in its own bazaars to offer 15.

THE VALUE OF A GRADUATED SCALE OF PUNISHMENT FOR CRIME.

The Capital Punishment Commission have not issued a very able report; nor is it, perhaps, very likely that any Commission composed of all kinds of men holding very opposite views on a question involving a great many different speculative principles should be able to agree on anything like a line of argument calculated to convince the public, or should concur, indeed, in anything beyond a few practical recommendations. At the same time, though the report is not very able, its main suggestion is, we think, useful, and we are glad that the Commissioners have not been able to concur in recommending the abolition of capital punishment for the highest crimes. There is nothing which is of more importance, or less insisted on and less carefully attended to in the English criminal law, than something like a systematically graduated scale of punishment for crimes ranging between the most venial which it is necessary to punish publicly, and the most heinous. If the punishment of death were abolished altogether, it would almost entirely destroy this rough scale of criminality as it represents itself to the imagination both of the public and the criminal. One most valuable,—perhaps in many respects the most valuable—result of affixing given penalties corresponding in painfulness or dreadfulness to the public estimate of the guilt of the crimes which entail them, is that this does roughly but impressively answer to a rude and vague sort of feeling of justice in the minds of those likely to commit those crimes, and also gives a certain fixity of colour to the degree of condemnation passed upon them by society. If it is social opinion which fixes the scale, yet the scale once fixed reacts upon social opinion, and prevents to some extent the *gustiness* to which it is liable on all subjects on which its feeling is not clearly and strongly recorded. Now, without the punishment of death, we should have no power of thus expressing, what undoubtedly the public feel, the sense of a very great gap between the guilt of a man who maliciously and treacherously plans the murder of another, and crimes against anything less than his life. Without the punishment of death you are limited to various terms of imprisonment, the differences between which do not at all adequately express the feeling either of the public or of criminals themselves as to the great chasm in guilt between such a crime as that of Palmer's and such a crime as that of Roupell's or Redpath's. Of course no sensible man would deny that special circumstances may easily be conceived

Digitized by Google

which would raise a very much less crime to a far higher degree of guilt than many even of very foul murders; but that is only saying what every one knows, that all human justice is very imperfect and rough, and can only consider the external conditions of guilt, and cannot even trace them back any distance towards their origin. But in spite of this necessary rudeness and imperfection in all human justice, it is no doubt a very good influence for the imagination of criminals, and of all who are in any danger of becoming criminals, that these rough moral judgments of society should be written up in the big letters, as it were, of comparative penalties, answering to the general estimate formed of different kinds of guilt. Unquestionably, for example, the appointment of a special and extreme form of punishment, sharply distinguished from all other punishments, for premeditated crimes of the worst dye, does help to make even criminals feel that such crimes are, even in a life of crime, a lower deep, to be avoided by all who try to preserve any sort of regard, however small, for the feelings of the society in which they live. Abolish the punishment of death, and this expressive power of the whole range of penalties is contracted at once; for, crimes which are punished only by different periods of penal servitude—periods too often varying quite as much with the disposition of the judge as with the character of the offence—will cease to be as sharply discriminated by the classes likely to commit them as they are now. A common burglar often shudders at the thought of premeditated murder, and how much of this dread of deeper crime may not be due to the broad distinction attached by the law to the different degrees of heinousness of the two offences,—for, as is well known, the dangerous classes think to a great degree of the crimes it is possible they may commit in *terms*, so to say, of the punishment to which they are liable. The range from two or three months up to "a lifer," or the gallows, represent to them in some rude way moral degrees in crime,—and the great step between imprisonment for life, and the extreme penalty, really represents a great difference of feeling in criminals towards the degrees of guilt which render them liable to the two punishments. Any change which should rob society of the power to impress thus with a peculiar mark of extreme abhorrence certain of the most malignant crimes, would be, we believe, a very great evil,—and an evil exactly in the same direction as that of the old excessive severity,—namely, that by leaving only one kind of penalty for almost all degrees of guilt, the law would lose such hold as it has on the conscience; or at least by losing all appearance of just discrimination between crime and crime, will lose all the large power which it gains by reflecting the *comparative* shades of public feeling towards different crimes.

If there be anything in the view we have taken, the proposal of the commission to distinguish more clearly than the law at present does between unpremeditated and premeditated murder is clearly right. In fact, the former offence, though one so dangerous to the peace of society that it is absolutely necessary to brand it with a disgraceful punishment in order to secure that self-control which the dread of such disgrace gives, is, in fact, very often the act of men of comparatively spotless lives,—comparatively spotless, we mean, as compared with those convicted of minor crimes like those against property. The moral difference between a carefully premeditated murder and an unpremeditated murder of hot passion (even though the latter be not within the legal definition of manslaughter), is often greater than that between any two other crimes whatever—the latter often involving not more guilt than other acts of passion, which do not come within the notice of the law at all, and the former usually involving more than any other sort of crime. It is simply absurd, therefore, to keep the punishment of death for the latter, if it is to carry, as it ought to carry, the emphasis with it of expressing the highest abhorrence of which society is capable. It would be as grave a mistake to continue to punish offences so different with the penalty suitable for the worst of the two, as it would be to punish them both with the penalty suitable for the lighter offence of the two. It is a more complete and systematic *graduation* in our punishments which we want; and, therefore, the very reason why it would be a fatal error to knock off the extreme punishment altogether is also as good a reason for taking all crimes which are not of the deepest possible dye, out of the class which are punishable by that penalty. The Commission has done good service, we think, by proposing to lighten the punishment for unpremeditated murder, and by doing so will greatly diminish the prejudice which people who judge only by particular cases feel for capital punishment altogether. If we had never seen any capital punishment inflicted for any but clearly premeditated murders, such as those by Palmer, Catherine Wilson, and the like—if murderers of the same class of criminality as Wright had never been executed under the same law—we should probably have scarcely heard the cry against capital punishment except from a few theorists. We heartily approve, therefore, of the recommendation of the Commission that the question of malice shall be separately put to the jury, and that no person shall be liable to capital punishment who is not found by the jury to have committed a *malicious* murder—that is, a murder malignantly premeditated. With this change once effected, we trust the foolish cry against this exceptional punishment for malignant and exceptional crimes may soon die away.

ESPARTO GRASS.

THE important position which the lately discovered article of petroleum has rapidly taken in commerce is very interesting in itself, as suggesting how quickly the discovery of any new principle of motion would exercise an important influence on the present state of our industry. Another discovery has lately been made, which, though of less importance than that of petroleum, is still so interesting in character, and so useful as regards an important article of manufacture, that we think our readers will be glad to receive the following information on the subject.

We allude to the discovery lately made of the applicability of the Atocha, or as it is called in Spain "esparto," to the manufacture of paper. Mr Lloyd, of the Walthamstow Paper Mills, is stated to have had a great share in the merit of this discovery; and Mr Mark, the British Consul at Malaga, has drawn up an interesting report on the subject, which has lately been made public in the commercial reports.

This grass is the produce of waste lands,—it requires no expense in cultivation and little in collecting. It is best propagated from the roots and not from seed. It is perennial and propagates of itself, and improves by a regular yearly gathering if plucked with sufficient care. Mr Mark has devoted great care in his endeavours to ascertain the climate and soil which are favourable to the development of the plant; and it appears that the Atocha requires a decidedly hot and dry climate,—that it grows equally well in the plains and in the mountains to a moderate elevation,—and that as regards soil it flourishes both in calcareous and argilaceous soils, or when these soils are blended in the form of marl.

The greatest quantity is shipped from the provinces of Almeria and Marcia; but it is found, though in less abundance, in all the Southern Provinces of Spain. It is also said to be plentiful in some parts of the opposite Coast of Africa, and shipments are made from Oran to England.

Prior to the discovery of its being available for the manufacture of paper the esparto had been used in Spain as fuel, in the manufacture of ropes for mining and rigging, and for making baskets and matting. But the discovery of the valuable properties of the grass has made a complete revolution in the districts where it grows. Fortunes have been realised by individuals who were the proprietors of the land which produce it. The price has more than doubled, and is now estimated by Mr Mark at 4*l* 2s per English ton on board. The greater part of the exports have as yet been directed to England, where in the brief space of three or four years the article has become a requisite of the highest importance, 160,000 tons having been, as it is said, imported into England in that period; and Mr Mark estimates the present rate of annual export at 50,000 tons.

Mr Mark anticipates that even at its present enhanced price the Spanish grass will take a place with cotton, hemp, and wool as one of the staple and essential bases of manufacturing industry, and if this anticipation should be realised, in addition to the valuable resource which it seems likely to prove to our paper manufacturers, it will form an important element in trade between this country and Spain,—indeed we already learn that our shipowners have largely profited by a discovery which has enabled them to find freights for their vessels employed in conveying coals and machinery to the mining districts in Spain, and which had hitherto, in the majority of cases, been under the necessity of returning to England in ballast.

CHAMBERS OF COMMERCE.

In a report of a dinner given last week by the President of the Liverpool Chamber of Commerce, at which Lord Stanley was present and spoke at some length, his Lordship is reported to have spoken as follows:—"The "question may be asked—'What are Chambers of Commerce "intended to do'? My answer is—'They serve as authorita- "'tive exponents of commercial opinion.' It is not always "easy either for the Board of Trade or for the House of "Commons to pick out the best individual opinions on mer- "cantile matters. It is the misfortune of men engaged in "public life that we are apt to hear only those opinions "which are most noisily expressed, and which I need not tell "you are not always the most influential or the wisest. "Well, then, local discussions serve to form local opinion, "and if any measure is proposed hostile to the interests of "commerce, the protesting powers of the united Chambers of "Commerce may be valuable."

On the abstruse and difficult questions of political and economical science, human knowledge advances slowly. Those sciences themselves are necessarily founded on generalisations from collections of facts. How difficult those generalisations are, and how liable to error, may be gathered from the fact that thirty years ago the Chamber of Commerce whose proceedings are now before us, had it then been in existence, would certainly have advocated the maintenance of both the Corn Laws and the Navigation Laws.

Our defective generalisations, however, are not altogether to be attributed to incorrect deductions from the facts before us, but to a great extent to the imperfectness of our information upon the facts themselves. The well-known saying, that "nothing is more fallacious than figures except facts," is merely an illustration of the same truth, that we cannot build a sound and stable edifice upon imperfect foundations. We may even go so far as to say that upon almost all questions of economical science, if we could only obtain a collection of statistics showing the practical working of every proposed scheme, the selection of the soundest and best would be no more difficult or doubtful than a question of arithmetic. The difficulty lies in the circumstance that we generally get the statistical results of the present state of things only, and that the effects of any alteration, until such alteration is actually put in operation, are to be learnt only by a difficult and doubtful process of induction.

What, then, is the sphere of Chambers of Commerce in guiding public opinion to correct solutions of commercial questions? Mainly and primarily, we reply, the collection of the most complete and accurate information that can be obtained as to the facts on which any theoretic conclusion must be founded. Except so far as they are to be obtained from the returns of the public revenue, the facts on which economical science is based, and on which commercial legislation should be founded, can only be collected by local bodies, and to that duty we apprehend the first and chief attention of local Chambers of Commerce should be directed.

The collection of facts, and the drawing of deductions from those facts, are, however, different duties, The former will always be best discharged by weak bodies, but the latter will always be most safely entrusted to the profoundest thinkers, wherever they may be found. For what Lord Stanley calls "*local opinion*" we entertain a very small value; for anything that can be justly included in the designation of *local knowledge*, we entertain a very high value. No more striking proof can be given of the fallacy of supposing that local opinion is a safe guide upon national questions of local importance than the before cited instance of the repeal of the Navigation Laws, vehemently opposed as it was in Liverpool, which of all places in the kingdom has most profited by that measure. We shall, no doubt, be answered by an appeal to the case of the repeal of the Corn Laws, which originated from a local opinion in Manchester, the district which has in the result most benefited by the change. But the case of the repeal of the Corn Laws, so far from being opposed to, on the contrary, well illustrates, the view we maintain as to the strength and weakness of local opinion. The Liverpool local opinion against the repeal of the Navigation Laws was based on unsound reasoning, and was overruled, to the advantage of Liverpool, by the influence of thinkers in other parts of the country. The Manchester local opinion in favour of the repeal of the Corn Laws was based on sound reasoning, and ultimately prevailed, not because it was the local opinion of Manchester, but because, and only when, the rest of the community became convinced of the soundness of the reasoning on which it was founded.

A nation is merely an aggregate of individuals, and anything that tends to the cultivation of individual thoughts, tends to the advancement of national knowledge, and in that relation, as well as in the collection of facts, Chambers of Commerce may do good service,—firstly, by cultivating the habit of accurate thought upon the results of the facts they have collected; and secondly, by affording a better scope for the circulation and advocacy of the thoughts of individuals that is supplied by any other machinery. It is given to comparatively few to take an active part in public life, or to circulate their thoughts with advantage by means of the Press, and the contributions of thought of many such men that would be otherwise lost, are collected and made available for the public service through the medium of Chambers of Commerce and other like associations. Every community, mercantile or otherwise, has a public opinion of its own, which is of some value to the rest of society; but such opinion is not only more clearly and definitively expressed, and more prominently brought forward through the medium of an association, but is also by the very process of discussion cleared of many errors and made much better worth expressing and bringing forward than it would otherwise have been. Whilst, therefore, it seems to us of comparatively very little importance to register the vote of Liverpool, or the vote of Manchester, or the vote of Bristol on any particular question, we do greatly appreciate the importance of having an authorised body to collect the best and most accurate information that can be obtained in Liverpool, Manchester, or Bristol on any such questions, and also the importance of having the habit of accuracy of thought on such questions cultivated in Liverpool, Manchester, and Bristol by discussion in public associations formed for the purpose.

BOARD OF TRADE RETURNS.

The returns issued by the Board of Trade, embracing the first eleven months of the present and two previous years, give the value of the exports of British and Irish produce and manufactures as follows:—

	£
1863	132,135,308
1864	148,340,865
1865	150,832,344

In November only, the shipments were valued as under:—

	£
1863	12,758,323
1864	12,065,213
1865	15,567,742

The value of the goods and produce imported in the first ten months was:—

	£
1863	156,561,228
1864	181,283,856
1865	160,909,954

The annexed return shows the increase and decrease in the real value of the principal articles imported in the first ten months of the current year, compared with the same period in 1864:—

Articles.	1864. £	1865. £	Increase. £	Decrease £
Coffee, raw	3,018,504	3,566,098	547,594	...
Wheat	9,421,770	7,635,335	...	1,786,435

Brandy	4,884,662	4,494,752
Sugar—Refined and candy cwts	200,403	198,859
Unrefined—Equal to white clayed	91,579	33,942
Not equal to white clayed but equal brown clayed	1,498,316	1,037,054
Not equal to brown clayed, but equal to brown Muscovado	2,547,636	1,431,812
Not equal to brown Muscovado		813,182
Total unrefined	4,137,531	3,285,990
Sugar—Molasses	152,414	258,516
Tea lbs	89,655,223	78,678,304
Tobacco—Unmanufactured	56,245,511	72,420,862
Manufactured and Snuff	3,716,707	3,390,071
Wine—From British Possessions gals	77,644	117,500
Holland	160,472	170,662
France	1,244,554	1,157,953
Portugal and Madeira	4,095,391	4,340,710
Spain and the Canaries	7,435,529	6,592,105
Italy—Naples and Sicily	296,106	193,553
Other countries	485,397	499,616
Mixed in bond	667,315	650,112
Total of wine	14,462,408	13,762,211

THE PAPER CIRCULATION, DEBT, REVENUE, AND EXPENDITURE OF THE UNITED STATES.

THE paper circulation of the United States, on the 31st of October last, was substantially as follows :—

	dols	c
1. United States notes and fractional currency	454,218,038	20
2. Notes of the national banks	185,000,000	0
3. Notes of State banks, including outstanding issues of State banks converted into national banks	65,000,000	0
Total	704,218,038	20

On the 31st day of October, 1865, since which time no material change has taken place, the public debt, without deducting funds in the Treasury, amounted to $2,808,549,437 55c, consisting of the following items :—

	dols	c	dols	c
Bonds, 10-40s, 5 per cent., due in 1904	172,770,100	0		
Bonds, Pacific Railroad, 6 per cent., due in 1895	1,258,000	0		
Bonds, 5-20s, 6 per cent., due in 1882, 1884, and 1885	659,259,600	0		
Bonds, 6 per cent., due in 1881	265,347,400	0		
Bonds, 5 per cent., due in 1880	18,415,000	0		
Bonds, 5 per cent., due in 1874	20,000,000	0		
Bonds, 5 per cent., due in 1871	7,022,000	0		
			1,144,072,100	0
Bonds, 6 per cent., due in 1868	8,908,341	80		
Bonds, 6 per cent., due in 1867	9,415,250	0		
Compound interest notes, due in 1867 and 1868	173,012,141	0		
Seven-thirty Treasury notes, due in 1867 and 1868	830,000,000	0		
			1,021,335,732	80
Bonds, Texas indemnity, past due	760,000	0		
Bonds, Treasury notes, &c., past due	613,920	9		
			1,373,920	9
Temporary loan, ten days' notice	99,107,745	46		
Certificates of indebtedness, due in 1866	55,905,000	0		
Treasury notes, 5 per cent., Dec. 1, 1865	32,536,901	0		
			187,549,646	46
United States notes	428,160,569	0		
Fractional currency	26,057,469	20		
			454,218,038	20
			2,808,549,437	55

The following is a statement of receipts and expenditures for the fiscal year ending June 30, 1865 :—

	dols	c	dols.	c
Balance in Treasury agreeably to warrants July 1, 1864			96,739,905	73
Receipts from loans applicable to expenditures	864,863,499	17		
Receipts from loans applied to payment of public debt	607,361,241	68		
			1,472,224,740	85
Receipts from customs	34,928,260	60		
Receipts from lands	996,553	31		
Receipts from direct tax	1,200,573	3		
Receipts from internal revenue	209,464,215	25		
Receipts from miscellaneous sources	32,978,284	47		
			329,567,886	66
			1,898,532,533	24

EXPENDITURES.

	dols	c	dols	c
Redemption of public debt			607,361,241	68
For the civil service	44,765,558	12		
For pensions and Indians	14,258,575	38		
For the War Department	1,031,323,360	79		
For the Navy Department	122,567,776	12		
For interest on public debt	77,397,712	0		
			1,290,312,982	41
Total			1,897,674,224	9
Leaving a balance in the Treasury on the 1st day of July, 1865, of			858,309	15

The receipts for the year ending June 30, 1867, are estimated as follows :—

	dols	c	dols	c
From customs	100,000,000	0		
From internal revenue	275,000,000	0		
From lands	1,000,000	0		
From miscellaneous sources	20,000,000	0		
			396,000,000	0

The expenditures, according to the estimates, will be :—

For the civil service	42,165,590	47		
For pensions and Indians	17,809,644	23		
For the War Department	39,017,416	18		
For the Navy Department	43,982,457	50		
For the interest on public debt	141,542,063	50		
			284,317,181	88
Leaving a surplus of estimated receipts over estimated expenditures, of			111,682,818	12

Agriculture.

THE CATTLE PLAGUE.

THAT which we apprehended on the first appearance of the visitation of a new disease amongst our cattle has well nigh come to pass. Panic has taken possession of the agricultural mind upon the subject, and Government is urged to the most extravagant action in restraint of all dealings with neat stock. Inspectors have been appointed in infected districts, whose conduct is deemed by most to be arbitrary, and often rash, while by others they are alleged to be the main agents in spreading the disease, by going from farm to farm, without the precaution of change of dress and ablution, which are said to be necessary after attending on diseased animals. It is possible, however, that these evils may be exaggerated, for so alarmed has the agricultural public become in reference to the "plague," that it is somewhat difficult to arrive at any fair estimate on the subject. The point to which we most desire to point attention in regard to this disease is the comparatively small effort which appears to be made in any quarter to discover or apply remedies. It is reasonable enough for a farmer who suspects disease to slaughter a beast fit for the butcher before it has become unsaleable, and so to avoid a total loss. But that can apply only to a small number of cases, for by far in the majority of instances the slaughtered animal is quite valueless, and the advisers of indiscriminate slaughter insist also on the immediate burial of the carcase. In the present emergency, we confess to much disappointment at the demeanour of our veterinary practitioners, who for the most part seem to have lost their heads, and to have abandoned even the attempt to treat the disease curatively. From many of the leading members of the profession better things might fairly have been hoped, but they seem to be carried away by a current of—shall we say ignorance?—which they ought to have withstood, or at least to have subjected to the test afforded by a steady and practical examination of the disease and the medical treatment of the animals affected. We have no doubt the disease will eventually be found amenable to medical treatment, or at least that premonitory symptoms may be observed and early remedies will be successfully adopted. Something, too, of the conditions under which cattle are found to be most susceptible to the malady might usefully occupy the attention of the veterinary practitioners, who seem now to be throwing up their hands in utter despair.

With a view to give a more useful direction to the just feelings of apprehension this disease has given rise to, we may refer to a few of the remedial efforts which have been made. Thus, Mr James Caird, the Earl of Albemarle, and other noblemen and gentlemen have formed an Association for "the trial and preventive treatment of the cattle plague by the homœopathic method." This treatment had been applied with "a certain amount of success" in Holland, and therefore "a fair and full trial" of that method seemed desirable.

The following directions, intended mainly for non-professional persons, have been promulgated by the Society:—

"1. Preventive Medicine.—Arsenicum album; dose, 10 drops of the third dilution daily, given in a table spoonful of water. If a large herd is to be treated, mix 12 drachms in two quarts of water, and give one table spoonful of the mixture for a dose. This should be given to all cattle in the infected district and its neighbourhood, and to all cattle which have been exposed to infection.

"2. In case of an attack, send for the nearest veterinary surgeon practising homœopathy, or one who will undertake to carry out the treatment. If neither of these are within reach—it being of the utmost importance to lose no time—as soon as the animal shows the first symptoms, which generally are swelling and redness of the nostrils, hanging of the head, alteration of the natural heat of the ears, horns, and skin, diminished appetite—and in cows, redness of the vulva or bearing, and diminution of the milk, give belladonna, 10 drops of the third dilution in a table spoonful of water every two hours for 24 hours, and if the animal gets no worse, continue this medicine for two or three days or longer, only giving the dose every four hours, or, as the symptoms decline, every eight hours.

"3. If the Attack Increases in Severity.—Should unfavourable symptoms appear after this medicine has been given 24 hours, then give arsenicum album (third dilution) 10 drops every three hours. These symptoms are as follow:—Great and irritating discharge from the nostrils; shivering, with alternate cold and heat of surface, great thirst, feeble pulse, loss of muscular power, inflammation and swelling of the eyes, with great secretion of tears; dribbling of mucus from the mouth, with red spots on the gums and roof of the mouth; foul breath, with or without great looseness of the bowels; slimy evacuations, with very offensive smell; tenderness and indications of pain in the belly.

"4. Supervention of other Symptoms.—If, during the course of the disease, the muscles of the shoulders and hind quarters twitch and jerk, the animal has a staggering gait, and a paralytic appearance of the limbs on getting up, with vesicular spots, like small blisters, in the mouth and nostrils, give rhus toxicodendron, third dilution, 10 drops in a tablespoonful of water every three hours, and if improvement sets in, continue the medicine; if no improvement, after 24 hours, return to the arsenicum.

"5. When the Lungs are Affected.—If the lungs appear to be more affected than any other organ, the breathing quick and difficult, with wheezing and rattling in the windpipe and frequent cough, give phosphorus, third dilution, 10 drops every three hours, for 24, 36, or 48 hours; after which return to the arsenicum.

"6. Symptoms like 'Hove' occur.—If the animal appears as if 'hove,' with oppressed breathing and groaning as the chief symptoms, give ammonium causticum, 10 drops, third dilution, every two hours, till these symptoms abate.

"7. For Weakening Diarrhœa.—Sometimes, although the animal is recovering, a weakening diarrhœa continues or sets in—give phosphoric acid (third dilution), 10 drops three times a day.

"8. External Bathing and Washing.—The nose, mouth, eyes, and vulva to be washed three or four times a day with tepid water.

"9. Diet.—In the Acute Stage.—Abstain from giving ordinary food, and give only gruels of oatmeal or farinaceous substances. Grains and distiller's wash on no account to be given during any period of the disease. In the Convalescent Stage.—Return very gradually to ordinary food. Hay and green food to be sparingly given.

"10. Supplementary Directions.—The greatest cleanliness, careful attention, and nursing of the sick animals are absolutely necessary. Litter and dung to be frequently and carefully removed—the use of MacDougall's disinfecting powder is strongly recommended. The farmer or his bailiff should superintend the giving of the medicines at the proper time, as cattle are often lost from inattention to this point. Great care should be taken to prevent any communication between the sick and healthy animals. Animals that are recovering should be kept separate from he healthy, as the discharge from the nose, mouth, and eyes continues for some time, and may convey infection."

The Edinburgh committee of medical men and veterinarians have made some practicable suggestions which are too long for our columns, and comprise, besides general directions as to food, maintenance of heat, state of the bowels, &c., of diseased cattle, a diaphoretic and stimulant treatment; (2) acid treatment; (3) restorative treatment, without drugs; and (4) prophylactic treament.

We shall probably revert to this subject.

The return of the Bank of France shows to-day an increase of 31,545,000f in the discounts compared with last week, and of 20,266,000f of the notes in circulation:—a decline of 4,322,000f in the coin and bullion, and of 15,606,000f in the deposits. Notwithstanding the increase in the rate of discount at London, the

Digitized by Google

Bank of France directors keep theirs at 4 per cent. As the Bank has 443,860,000f in the precious metals, to 879,683,000f of notes and 264,200,000f of liabilities, it will not be obliged to modify its rate, unless a demand on its resources should come from England.

The Bourse has been greatly agitated during the past week, partly by the news from America and Italy, partly by the ill success of the Ottoman loan, and partly by speculators having once again lost their faith in a *campaign de hausse*. To-day the increase of the discount at London has increased the general anxiety. The quotations are as follow:—the decline in Credit Mobilier, Turkish, Mexican 1864, and Spanish railways should be specially noticed:—

The annual report of the Minister of Finance on the state of the finances has been published. It is very characteristic of His Excellency M. Fould, being plain, precise, matter of fact, with not the slightest attempt at rhetoric, and announcing no grand scheme of financial regeneration. Briefly summed up, it runs thus:—The deficit of 1864 will be about 50,000,000f, and it is owing principally to the new law on sugar, which, as is known, allows credit for the payment of duties on the portion of that article destined to be refined and exported afterwards, and at the same time relieves the Treasury from the preturbation occasioned by the restitution of drawbacks. The amount which, in consequence of this law, could not be counted in the receipts of 1864, was 34,000,000f. The rest of the 50,000,000f is made up by a decline of 3,700,000f in the sum expected from indirect taxes, of 8,000,000f in the annulation of credits, and of a sum in the sale of Crown lands. For 1865 the Minister had calculated on a surplus of 7,312,000f, but it will be reduced by a credit of 4,000,000f for unforeseen expenses of the Marine Department, and by a loss of 2,542,000f in the sale of the Mexican stock, given by the Mexican Government in payment of its debt to France. But though the anticipated surplus disappears, an equilibrium in the budget is hoped for. As to 1866 it is not yet possible to give precise figures, but the Minister calculates that there will be a surplus of some importance, and he says that it will be employed in public works. For 1867 he counts on a reduction of 30,000,000f in the expenditure of the War, Marine, Finance, and other departments; against which sum, however, must be set certain augmentations, leaving a balance of 26,500,000f. To this sum the Minister adds another which he expects to get from a reorganisation of the Caisse d'Amortissement; so that in definitive he counts a favourable balance of 92,700,000f. Of that balance he proposes to take 90,000,000f for different public undertakings, comprised in what is called the extraordinary budget, and to add thereto for the same purpose 25,000,000f of the indemnity from Mexico, 16,666,666f of the amount to be paid by the Algerian Company for its privilege, and 4,330,000f from other sources;—total, 135,996,666f. Finally, the Minister states that the floating (unfunded) debt, which on the 1st January was 808,000,000f, has fallen to 772,000,000f, and that in it Treasury bills have fallen from 208,000,000f on the former date to less than 100,000,000f.

Such, broadly stated, are the principal points in the Minister's report. It will be observed that His Excellency announces a modification of the Amortissement or sinking fund. Hitherto the practice has been to inscribe in the budget a large sum annually (it is 184,000,000f for the present year) for that fund towards the paying off the national debt; but the embarrassed state of the finances has prevented the employment of it for that purpose. It has consequently swelled the buget without producing any practical utility,—the peculiar mode of keeping public accounts in this country requiring it to be put down in the budget of expenses as voted to the Caisse d'Amortissement, and in the budget of receipts, because it does not go to that establishment. The Minister proposes to suppress the item altogether as it now stands, and no doubt he does well. And for the old nominal sinking fund he advises a new one, of which he thus describes the basis:—"To charge the Caisse d'Amortissement with certain temporary expenses destined to decrease and finally to disappear, and to ascribe to it revenues calculated to augment. There will result from the balance of charges and resources an excess of about 18,000,000f, which can be taken from the ordinary budget without altering the equilibrium. To this revenue, which will augment annually, will be added other guarantees and other resources, which may permit the Caisse d'Amortissement to employ in the first year 30,000,000f in paying off the national debt." You will observe that this is not at all clear, and doubtless the Minister has his reasons for being obscure. Indeed, he says that he is not more explicit, because the project is now under examination by the Council of State. According to common report, what His Excellency proposes is to make over to the Caisse all the revenue that can be got out of forests, the tax on railway passengers, and the future property in railways, which are to revert to the State somewhere about 1945; throwing on it, in return, the responsibility of paying the interest on secondary lines of railway which the Government has guaranteed. The Minister says in favour of his scheme, whatever it may be:—"The reconstitution of the sinking fund, so favourable to the future of our finances, is the more useful and opportune, as it is a protest against the facile and dangerous doctrines which tend to charge imprudently the future for the advantage of the present." If it really makes that protest, which was much needed in presence of the plan of raising a huge loan for public works conceived by the Minister of Commerce, and of the system on which Prefect Haussmann acts in the city of Paris, the Minister's scheme will do good. But after all, a clear surplus in solid cash of revenue over expenditure every year, would be a far more efficacious way of reducing the national debt than any sinking fund combination, however ingenious it may be. A sinking fund is, however, a great hobby among French financiers; and perchance it is as much to silence their complaints at the suspension of the old one as for anything else, that M. Fould concocts a new one.

On the whole, the report has been favourably received. No doubt it is disagreeable to the public to read that there will be a deficit for 1864 and only an equilibrium for 1865, when a surplus had been promised for each year; and perhaps they do not place implicit confidence in the favourable balance which is presented to them for 1866 and 1857, inasmuch as "unforeseen circumstances" may cause it to melt away as they have the anticipated surpluses of years preceding. But what has principally pleased the public in the report is, that it proves that the Minister honestly and earnestly labours to reduce expenditure, and to make both ends meet. It follows that if the state of the finances is not better than it is, the fault is not his; and that if that state is not worse, the credit belongs to him.

M. Isaac Periere has been heard before the Superior Council of Commerce, which is making the investigation about Banks and Currency. According to an analysis of his evidence, which has been published, he, among other things, said that the system of cheques and transfers appears to him destined to take great extension in France, without in any respect checking a large use of bank notes, as it has done in England. He affirmed that if the circulation of notes does not increase in that country, it is owing to the restrictions imposed on the Bank of England, and he predicted a reaction against the Bank Act. He said that there are inconveniences both in one sole bank of issue, and in several; but that it might be possible to unite the advantages of both. He did not think the capital of the Bank of France sufficient, and he held that it ought to be disposable, so as to be employed in preventing or delaying rises in the rate of discount. He maintains that the Bank runs no risk of loss, and that, therefore, it has no need of a guarantee capital. He held that the Bank of France pays too much attention to the state of its till, and that it is not bound to follow the variations of interest of the Bank of England. As the Bank of France has a monopoly, he was of opinion, he said, that the Government has the right of imposing on it a maximum rate of discount, and he suggested that it should be 4 per cent. M. Passy, an ex-Minister, has also been examined by the Council. He was not favourable, he said, to paper money, and thought that banks of deposit, like the joint stock establishments of London, were more useful than banks of issue. He held that whether there should be one or several banks of issue in a country, depended on the territory, one sufficing where the extent was small and communications easy, and several being necessary where, as in Russia, they are the reverse. He approved, on the whole, of the constitution of the Bank of France, but thought that it ought not to make advances on deposit of securities, and ought to be limited in its issues. The capital of the bank, he said, was one of guarantee, and ought not to be employed in discounts, and he held that variations in the rate of discount are inevitable. M. Dumon, another ex-Minister, declared himself in favour of one bank of issue, and of having the capital of the Bank of France invested.

The Credit Mobilier and the Ottoman Bank have not published any account of the result of the subscription for the new Ottoman loan of 6,000,000l opened by them; but it is understood to have fallen considerably short of what was expected not only in Paris, but in the provinces. A notification has been issued, requiring the payment of the second call of 75f before the 2nd of January.

Digitized by Google

In order to facilitate by the public the acquisition of the Mexican bonds of the second series (those representing the conversion of the 1864 Six per Cent. loan) the Comptoir d'Escompte offer them at 345f, of which only 45f are to be paid at once, and the rest at intervals to the 20th July next. The payment of the first-mentioned sum gives the right to participation in the lottery of 2nd January next, in which prizes of 500,000f (20,000*l*) and other large sums are to be gained.

The dividend of the Bank of France for the second half of 1865 has been fixed at 76f, and is to be paid from the 2nd January. The dividend of the first half of the year was 78f. In 1864 the two dividends were 200f, in 1863 165f.

The Credit Foncier has fixed its first dividend for 1865 at 12f 50c per share, and is now paying it.

The Credit Agricole makes a call of 75f, and announces the payment of 5 per cent. on calls paid up, being 5f 62½c per old share, and 3f 12½c per new one.

The Lyons to Mediterranean Railway announces the payment on and after the 2nd January of interest on the bonds of the different lines with which it is amalgamated. The amount varies from 7f 30c up to 27f.

The Gas Company of Messrs Lebon of Paris, which lights foreign towns as well as French, announces the payment of 30f per bond as interest of the second half of 1865.

The General Gas Company of Belgium, which also lights several foreign as well as Belgian towns, among the former Prague and Leghorn will be able to distribute this year a dividend of 32f per share, which is equal to 9.14 per cent. on the calls paid up.

The Neapolitan Gas Company is to pay after the 1st January coupon No. 5, of 15f as interest on bonds. This Company is in great part French, and is represented at Paris by Messrs Parent, Schaken, and Co.

The Austrian Credit Foncier is, from the 2nd January, to pay 10f per share on account of dividend for 1864-5. A great many of the shares of this Company are held in France.

At the meeting of the shareholders of the Libourne to Bergerac Railway, a report of a committee recommending the adjournment of the approbation of the accounts presented was approved of, and a new meeting was fixed for the 20th January next. The discussions were of a very violent character.

A report was spread at the beginning of the week that the Spanish Government had been under the necessity of postponing for two months the payment of its dividends on the Interior debt, due the 2nd January, and it produced a very bad effect on the Bourse. But a telegraph despatch from Madrid affirms that the dividends will be paid at the usual date. It is not certain, however, that this despatch emanates from official authority.

A correspondent inquires if there be not an error in the item coffee in the table of imports from England into France in 1864, inserted in the ECONOMIST of the 16th December, that item representing the value of the total import at 9,473,573f, and that of the quantity taken for consomption at 10,695,957f. The answer is that the figures are correctly given; and the explanation is that the consumption includes part of the stock in bond at the beginning of the year, as well as the import during the year. For this reason, it occasionally happens that the consumption of an article, for a given period, stands at a higher figure than the imports; in the table, to which your correspondent refers, sugar, for example, as well as coffee, does so. I thought this fact was so well known that, in compiling the table, I did not consider it necessary to attach an explanatory note to the items of sugar and coffee.

According to an official return, the quantity of beetroot sugar made from the beginning of the season, on the 1st September to 30th November was 125,456 tons, which was 39,020 more than in the corresponding period of last year. The stock in the manufactories at the end of November was 22,046 tons of finished sugar, and there were 24,781 tons in course of fabrication. In the entrepots there was an additional stock of 16,426 tons of made sugar.

Subjoined is the market report:—

FLOUR.—Owing to Christmas, business has not been active in any market, and, generally speaking, prices have a downward tendency. At *Paris*, yesterday, the quotation was 48f 50c to 53f for the sack of 157 kilogs; six marks, current month, were 52f 50c; four months of January, 53f 25c to 53f 50c. Type Paris, the 101 kilogs, 32f 25c.

WHEAT.—At *Paris*, yesterday, the quotations were the same as last week; choice white, 28f the sack of 120 kilogs; choice red, 27f 50c; first quality, 26f to 26f 75c; ordinary, 25f to 25f 50c.

COTTON.—At *Havre*, in the week ending Friday, the sales were 3,666 bales, about half of them Asiatic, and the arrivals 12,292, of which 6,571 were from England. The stock was estimated at 33,460 bales. The closing quotations were 5f lower for United States, Kurrachee, Tinnevelly, Madras, and all Surats, except sawginned, which remained unchanged. No change in other sorts. Low New Orleans was consequently 265f the 50 kilogs; good ordinary in Broach, 215f; in Tinnevelly, Madras, and China, 215f; in Jumel, 275f. This week the market has been very calm, and yesterday New Orleans was 242f 50c to 262f 50c; Peru, 265f to 270f; Ingelghaut, 225f; Tinnevelly, 215f; Madras, 212f 50c to 218f; Coconada, 195f; Bengal, 165f; Rangoon, 175f and 170f; China, 210f.

SUGAR.—The sales at *Havre*, in the week ending Tuesday, were 700 sacks French West India, 50f the 50 kilogs, bonne quatrieme, duty paid; 135 casks Havana, 33f to 34f, No. 12, in bond; 160 at 36f, on sample. The arrivals were 9,300 sacks and some casks. This week, French West India, 50f, bonne quatrieme; 51f 50c, on sample. At *Nantes*, last week, 3,400 sacks Reunion, 52f, bonne quatrieme; some French West India usine, 48f 50c to 52f 50c, on sample. This week, Reunion, 52f bonne quatrime; sales large. At *Bordeaux*, last week, there was no sales. The nominal quotations were French West India, 50f to 50f 50c, bonne quatrieme; Reunion, 53f 50c to 54f, ditto. Nothing done this week. At *Marseilles*, last week, 600 casks Havana, by Spanish ship, 32f, No. 12 of Holland. No sales this week.

COFEEE.—The demand was regular at *Havre*, in the week ending Friday. 400 sacks Hayti Port-au-Prince, 84f to 85f 75c the 50 kilogs, in bond; 150 Gonaives, 89f; 43 Cape, 86f; 200 Rio not washed, disposable, 71f to 81f; 245 Rio washed, 95f to 95f 50c; 2,400 Capitania for delivery, at prices kept secret; 400, 72f to 73f; 41 Cazengo, 78f; 500 San Thome, 80 50c to 81f; 470 ditto, for delivery from Lisbon, 81f; 80 disposable, 107f 50c, duty paid; 102 Guatemala, at prices kept secret. Some damaged Gonaives and Porto Cabello were sold by auction. The arrivals exceeded 12,000 sacks. This week Gonaives, 87f 50c; Rio washed, 90f; San Thome, 81f; Ceara, 86f. At *Bordeaux*, last week, 75 sacks Mysore, at established prices; 400 at 116f, 100 at 120f, 110 at 121f; 15 casks Santiago, 104f; 5 Caracoly, at prices not stated; 175 sacks Rio washed and not washed, at established prices; 75 washed, 87f 50c; 94 ditto, at established prices; 2,700 sacks Jacmel, at prices kept secret. No sales this week. At *Nantes*, last week, no sales; and none this week. At *Marseilles*, last week, 1,500 sacks Rio, 73f; 6,000 fardes Mocha for delivery, 127f 50c; 2,000 sacks San Domingo, for delivery, 84f. By auction, 125 sacks Rio, 70f to 76f; 168 ditto, 70f to 71f 50c. Nothing done this week.

INDIGO.—Business was rather active at *Havre*, in the week ending Friday: about 50 cheets Bengal at 40c to 58c above the estimates; 27 serons Guatemala at prices kept secret. The arrivals were 18 chests. This week, Bengal at a premium of 50c and 60c. At *Bordeaux*, last week, 37 chests Madras, 4 Vellore, 10 Kurpah at established prices. No sales this week.

HIDES.—At *Havre*, in the week ending Friday, 356 Monte Video dry, 67f 50c the 50 kilogs; 4,100 La Plata salted, 49f 50c for light; 52f to 61f 50c for the rest; 3,450 cow, 45f to 47f; 240 calf, 40f; 639 Rio Grande dry, 80f; 700 Rio Janeiro salted ox, 52f; 700 cow, 38f; 2,500 Pernambuco salted, 43f 50c; 250 Valparaiso drysalted ox, 78f; 2,062 Buenos Ayres horse, 41f 25c to 41f 75c; 100 Calcutta calf, 70f. Also some damaged by auction. The arrivals exceeded 17,000. This week, Rio Grande salted ox, light, 43f to 44f; cow, 46f; Monte Video salted cow, T.Q., 44f 50c and 46f to 47f; Buenos Ayres dry cow, 96f; salted cow, 47f 50c; Rio Janeiro salted cow, 37f 50c and 38f; Chili dry and drysalted, 61f.

WOOL.—At *Havre*, in the week ending Friday, 274 bales Buenos Ayres unwashed, part at 1f 15c to 2f 20c the kilog, the rest at prices kept secret; 162 Monte Video unwashed, 2f 5c; 14 ditto washed, 3f 30c; 2 La Plata washed, 3f 60c; 54 Portugal unwashed, 1f 30c; 50 bales Monte Video sheepskin, 1f 27½c to 1f 47½c; 24 lambskin, Buenos Ayres unwashed, 1f 45c. The arrivals were nearly 1,000 bales. This week, La Plata lambskin (still born) unwashed, 152f 50c the 100 kilogs; Buenos Ayres unwashed, 210f.

TALLOW.—Calm prevailed at *Havre*, in the week ending Friday. 5 demi-pipes La Plata, disposable, 59f the 50 kilogs, duty paid; 100 ditto, for delivery, 50f 75c. The arrivals were about 700 casks. This week, La Plata, 57f. At *Paris*, yesterday, the 100 kilogs, octroi duty included, 121f 45c.

SPIRITS.—At *Paris*, yesterday, 3-6 first quality, 90 deg., was 44f the hectolitre. At *Bordeaux*, the day before yesterday, 3-6 Languedoc, 86 deg., 53f; 3-6 beetroot, first quality, 90 deg., 50f.

Correspondence.

BANKS OF ISSUE.

TO THE EDITOR OF THE ECONOMIST.

SIR.—Will you allow me space in your columns to ask your correspondent, "A Glasgow East India Merchant," to explain the following sentence, which occurs in his letter on "Banks of Issue":—"The vicious principle that the notes of one particular joint stock bank may be tendered by a debtor to a creditor tends to drive coin out of the country, to be brought back at great charge, distributed unequally over the general community, instead of at the expense of the particular bank which, by exercising its monopoly in a particular manner for its own profit, induced the coin to be exported." Of course the "particular Bank" is the "Bank of England;" that is plain enough, but not so the "particular manner" in which they conduct their business. Truly, if such grievous consequences, as he asserts, arise to the community from this "particular manner," the sooner it is altered, without a day's delay, the better. In the meantime, may I be allowed to suggest to your correspondent what the "particular manner" of the Bank of England, as a bank of issue, in my opinion really is. They are simply the conductors of a "paper mint," and their duties in that respect are as distinct from their business as discounters and bankers as they are from the gold mint in Tower hill. For making this paper equivalent to gold, they receive as remuneration the interest of the Government debt and the three millions odd of other securities, against which they are allowed to issue, and the profits arising from the difference in the buying and selling price of bullion, *and no more*.

Nothing can be more mischievous and more obstructive to a right understanding of the Bank of England's real character as a bank of issue, according to the conditions of the Act '44, than to confound its duties in that respect with its duties as a banker. They cannot *now* be assailable on any other ground; but, at the

Digitized by Google

same time, whatever may be said with justice against the Bank of England as bankers, might be as frequently urged against the other large capitalists of the city whose discounting powers are nearly as large, and whose influence is nearly as great. I have watched the movements of bullion for many years, but have failed to recognise the phenomena your correspondent alludes to. Should you deem this worthy of insertion in your paper, I trust your correspondent will favour me with the explanation I ask for.—I am, sir, your most obedient servant, W. G.

London, 20th Dec., 1865.

TO THE EDITOR OF THE ECONOMIST.

SIR,—The two letters in your paper of 16th current treat from different points of view a question which will be better understood when more thoroughly discussed in the light of recent experience. Your correspondent "F." treats the Bank of England, not as a large joint stock bank possessing a certain Government monopoly, and thereby earning, at the expense of the community, large dividends for its shareholders, but as a department of the Government.

He overstates his case in representing Bank of England notes as being "issued by the Queen in Parliament on the credit of "the State, in payment of certain State obligations, which are "thereby virtually cancelled."

The State obligations held by the Bank of England are not cancelled, but bear interest, and the Bank sells them, buys them back, and borrows money on the security of them from other money dealers, from time to time. The State obligations held by the Bank of England are just the same as the State obligations held by other banks. We free-traders allege that it would be beneficial to the commonwealth if other banks that invest the whole or a portion of their paid-up capital in State obligations were also allowed, if they choose, to issue notes to the extent of these obligations and of the coin held by them. But such notes not to be a legal tender. A failure to pay them in coin on demand at the place of issue to constitute a declaration of insolvency, and no bank to be allowed to follow the bad example of the Bank of England of continuing in business after having once suspended specie payments. It is an evil to the community when a Government either immediately through a bank, or directly by means of greenbacks, declares unfulfilled promises to pay coin to be equivalent to its actual payment.

After free-trade principles have been adopted to the extent of allowing other banks to issue better notes than those of the Bank of England, on securities analogous to those on which its issues are based—viz., Government securities and specie—the further question can be considered, *What are the best securities, in the interest of the community, on which the issue of bank notes should be based?*—I am, &c.,

A GLASGOW EAST INDIA MERCHANT.

COMMERCIAL AND MISCELLANEOUS NEWS.

The following returns, published by the Veterinary Department of the Board of Trade, and having reference to the disease amongst horned cattle in this country, do not profess to give the total number of cases which have occurred in Great Britain, but only those which have been ascertained from the official information received at this office from Inspectors whether appointed by the Clerk of the Council or by the local authorities. The divisions of England are those of the Census. Column I. only records the cases reported as having commenced during the weeks indicated by the headings; "back" cases being added to column II.:—

The annexed report of the Calcutta money market is dated Nov. 21:—We have no alteration to quote in the value of money, for though in the bazaar it seems to be rather tight, there is enough in European circles to supply present requirements of trade, and rates of discount are likely to remain steady for a time. Government securities maintained their value till about the 15th, when prices began to droop, and since then there has been a fall of about 8 annas from our last quotations: to-day we quote 5½ per cents at 9 premium. The share market has been exceedingly quiet. Exchange has been buoyant, and large transactions have taken place at 2s 1 1/16d for 6 months' sight bank paper, but within the last few days business has been done at 2s 1⅛d to 2s 1 1/16d. The following are the bank statements for Nov. 7 and Nov. 14:

Liabilities.	Nov. 7.		Nov. 14.
Proprietors' capital, paid up	£2,200,000	...	£2,206,060
Reserve fund	172,603	...	172,103
General treasury balance at head office	1,069,160	...	969,782
Do. at branches	757,014	...	599,956
Other deposits at head office and branches	2,661 891	...	2,810,543
Bank post bills, &c.	53,664	...	18,609
Bank notes outstanding	21,649	...	21,408
Sundries	68,800	...	89,453
	7,009,781	...	6,882,354
Assets.			
Government securities, investment No. 1	£505,933	...	£505,933
Loans on Government securities at head office and branches	1,189,588	...	1,224,878
Accounts of credit on ditto	84,263	...	86,380
Mercantile bills discounted at ditto	1,070,794	...	1,214,589
Dead stock ditto	40,919	...	41,108
Stamps ditto	1,084	...	1,049
Balances with other banks	32,078	...	12,456
Sundries	20,224	...	19,886
Treasury reserve in coin at head office	369,180	...	269,782
Cash and currency notes at head office	2,373,475	...	2,296,802
Cash and currency notes including Treasury balance at branches	1,322,262	...	1,209,439
	7,009,780	...	6,882,352

Via the Persian Gulf, the following communication, dated Dec. 21, has been received:—7-lb shirtings, 7r 14a. Exchange on London, 2s 1⅛d Freights, 45s. The rate of discount has been raised 1 per cent.

Messrs Stoehr and Prieger write as follows, from Bombay, under date Nov. 28, in reference to the state of money affairs at that port:—Money has been in even greater demand than during the preceding fortnight, but, as it is expected that the steamer now due will bring us 86 lacs in silver, and as we received last week 20 lacs from China, greater ease is looked for. Exchange has fluctuated between 2s 1½d to 2s 1⅝d for bank bills, and 2s 1⅝d to 2s 1½d for first class credits. Closing rates are: bank bills, 2s 1 5/16d to 2s 1⅝d; credits, 2s 1 7/16d to 2s 1½d; documents, 2s 1 3/16d to 2s 1½d, but there are scarcely any buyers to be met with, as the expected supplies of silver have not yet come to hand. A telegraphic despatch, dated Dec. 22, says:—Manchester goods firm and advancing. Cotton advancing. Dhollerah, 440 rupees. Shipments of cotton during the week, 35,000 bales. Exchange on London, 2s 1 7/16d. Government securities—Four per Cents., 88¾; ditto, Five per Cents., 103; ditto, Five-and-a-Half per Cents., 108¼. Freights, 35s.

As regards the state of the money market at Madras during the fortnight ending Nov. 27, Messrs Dymes and Co. write as follows:—On the 14th instant, the banks' rates for discounts and loans were reduced 1 per cent., and on the 21st a further reduction of 1 per cent. was established. Present rates therefore stand at 9 per cent. for advances on Government securities, and 11 per cent. for discount on private bills at three months' sight. There is now little or no demand for money at the Bank of Madras, and as the excitement in the cotton and import markets has for the time ceased, we look for a further reduction very shortly. Madras Bank shares have not fluctuated much in value during the fortnight, and we continue our quotation of 88 premium for the old stock, and 85 premium for the new. Government Paper—Prices to-day show but little change, when compared with those ruling a fortnight since, and during the interval, there have been no fluctuations of importance. The increasing ease in our money market must affect these securities. We quote 5½ per Cents., 9½ to 10 prem., 5 per Cents, 8¾ to 4 prem., and 4 per Cents., 10 to 10½ discount. Exchange has fallen considerably, fully 1 per cent. The Monsoon weather, which has interrupted shipments of cotton, as well as the advice of the severe fall in this staple at home have lessened the demand for accommodation at the exchange banks, and we quote for this mail, 6 months' sight document bills 2-1 5-16, and 6 months' sight credits at 2-1⅛. The banks' drawing rate remains unaltered at 2-0¾ for 6 months' sight bills. Sovereigns—English rs 10-4-0 each, and Australians rs 10-3-0 each.

Annexed is a portion of the circular relating to bullion movements at Hong Kong during the fortnight ending Nov. 15, published by Messrs Sharp and Co.:—Gold—The imports have been chiefly en route from Shangai; and with no adequate supply to meet the demand, the price has again advanced: the arrivals have been $200,000 worth; the exports $390,000, including the shipments per Emeu on the 1st instant, and excluding those to leave to-morrow. This steamer takes but a small quantity from Hong Kong. Silver—Both bar silver and sycee have been eagerly availed of for remittance. Imports amount to $380,000, against $280,000 exports. Dollar Currency—Arrivals $960,000; exports, $570,000. The current still sets towards this, and our exports have been all southwards. A few sales of clean dollars have been made at our quotation, but not for shipment. Discounts and Mortgages—The Indian drain is beginning to be felt, and money is scarcer and dearer; short first class loans have been done at 7 and 8 per cent. and mortgages at 10 per cent. Exchange—The scarcity of money, together with the more favourable advices from England, have at last affected our sterling exchange, which has gradually risen throughout the fortnight to 4s 7d; closing, however, rather weaker. Rupees have slightly receded since the advice of higher rates for sterling in Calcutta and Bombay. Closing quotations:—On London, 6 months' sight, 4s 7d: ditto, 1 month's sight, Government bills, 4s 5½d; on Calcutta, 3 days' sight, 217½ rs; on Bombay, 3 days' sight, 217 rs; on Shanghai, bank, 60 days' sight, 74 tls; ditto, credits, 45 days' sight, 74 tls; ditto, private, 30 days' sight, 74 tls; on Ningpo, 30 days' sight, 75 tls; on Foochow, 15 days' sight, ¾ per cent. dis.; on Amoy, 15 days' sight, 1¾ per cent. dis; on Singapore, 15 days' sight, ½ per cent. prem.; on Saigon, 15 days' sight, 2 per cent. dis.; bar silver, 17 dwts B, 11 per cent. prem.; sycee, 9 per cent. prem.; clean Mexicans, ⅛ per cent. prem.; gold leaf, $23.25 per tael; gold bar, Pekin, $22.80 per tael; sovereigns, $4.50 each; discounts, bank short, 7 per cent.; ditto, loans on produce, 10 per cent.

Mr James Low has issued the following annual statement, showing

1864	2,041,854	6,175,270			
1865	487,725	3,594,960	Total	17,005,143	43,517,408
Total.....	15,529,663	109,922,124			

This table shows a large falling off in 1865 in the shipments of specie to the East, which is attributable mainly to the great fall in the price of cotton. The diminution, however, is not really so large as it seems, if regard be had to the gradual diversion of this bullion trade from English to Mediterranean ports, chiefly Marseilles. The Messageries Imperiales steamers alone have taken from Marseilles this year 2,285,165*l* in gold, and 2,392,987*l* in silver.

The following are the last monthly returns of the Irish banks of issue for the four weeks ending the 9th inst. :—

	Circulation authorised by certificate.	Average Circulation during the month.		
		5*l* and upwards.	Under 5*l*.	Total.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

AN ACCOUNT pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 27th day of December, 1865.

ISSUE DEPARTMENT.

	£		£
Notes issued.....	27,339,675	Government Debt	11,015.100
		Other Securities	3,684,900
		Gold Coin and Bullion	12,689,675
		Silver Bullion	...
	27,339,675		27,339,675

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	9,891,100
Rest	3 254 074	Other Securities	22,507 314
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	8,544 343	Notes.....	6,877,840
		Gold and Silver Coin.....	713 427
Other Deposits.....	13,235.938		
Seven Day and other Bills.....	402,326		
	39,989,681		39,989,681

THE OLD FORM

The above Bank accounts would, if made out in the old form, present the following result :—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills).....	20 864.161	Securities	32,495.414
Public Deposits	8,544 343	Coin and Bullion.....	13,403,102
Private Deposits.....	13.235 938		
	42,644,442		45,898,516

Dated the 28th December, 1865. W. MILLER, Chief Cashier.

The balance of Assets above Liabilities being 3,254,074*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

An INCREASE of Circulation of	£80,096
An INCREASE of Public Deposits of.....	168,488
A DECREASE of Other Deposits of	854,298
No change in Government Securities.	
An INCREASE of Other Securities of.....	879 461
A DECREASE of Bullion of	469.307
An INCREASE of Rest of	15,868
A DECREASE of Reserve of	569,532

The return of the Bank of England for the week is under every head unfavourable. The increase in the Government deposits usual at this period of the year is almost counterbalanced by the withdrawal of 854,298*l* in the private deposits. There is also the considerable increase of 879,461*l* in the private securities. The large arrivals of gold have not sufficed for the market requirements, which have involved the withdrawal of 469,307*l* from the Bank coffers; and the draft on the reserve amounts to 569,532*l*.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1855 :—

At corresponding dates with the present week	1855.	1862.	1863.	1864.	1865.
	£	£	£	£	£
Circulation, including bank post bills	19,503,528	20,516,435	20,686,538	19,810,435	20,864,161

In the corresponding week of 1855 less belief in the prospect of peace was expressed, and the money market remained in a sensitive state owing to the sustained general demand.

In 1862, the news from New York had, in the absence of a formal reply to the despatches of our Government, received a more favourable interpretation. The inquiry for money continued active. Large imports of bullion were arriving, owing to the cessation of cotton shipments to England in the altered condition of the American trade.

In 1863, the resignation of the Danish Ministry had been accepted by the King. The entry of Federal troops into Holstein had commenced, and the Federal Commissioners had issued their proclamation to the Holsteiners. Prince Frederick Augustenburg had been proclaimed Duke in several towns of Holstein. The Duke had announced his accession to the Federal Council and to the European Governments. In Poland fresh convoys of political prisoners had been sent to Siberia, and arrests were still being made at Warsaw. In America the shelling of Charlestown continued. General Longstreet had repulsed the Federal forces. The Bank of Turin had reduced its rate of discount to 8 per cent.

In 1864, news had been received of the capture of Fortress Dalimkote in Bhootan. News had arrived of the capture of the City of Savannah by Sherman, who had routed the Confederate General Hood.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1855, a deficiency of 7,415,348*l*; in 1862, a deficiency of 5,676,893*l*; in 1863, a deficiency of 9,362,612*l*; and in 1864, a deficiency of 6,745,898*l*. In 1865, the deficiency is 9,271,376*l*.

DISCOUNT AND MONEY MARKET.—The few days intervening between last Friday and the Wednesday of the present week, when business after the Christmas holidays was more generally resumed, had sufficed to alter completely the outward aspect of the money market. The whole of the large arrivals of gold just previously received had been taken for export, and a further sum also had been withdrawn from the Bank. There was, however, no pressure, and scarcely more than the usual inquiry which, towards the close of the year, invariably adds animation to the market. The advance in the Bank rate decided upon yesterday took the Stock Exchange almost by surprise, and "out of doors" it was by no means confidently looked for. The Bank of France's return, like that of the Bank of England, is of an unfavourable nature, and shows that the foreign drain for bullion, though less severely felt in France, is pressing upon both countries. The trade employment for money is also greatly more active than it was at

Digitized by Google

the corresponding period of last year, or even a few months back; and it is remarkable that with money at a higher rate than in Paris for a long time back, and at a higher average rate than elsewhere in Europe, the trade of this country should be so flourishing as it at present is. That trade generally is profitable may be confidently assumed; inasmuch as speculation just now is exceptional, and has only a local character. Taking all circumstances into account, there is reason to conclude that money has only risen in value in proportion to the commercial and trading requirements of the community, which are themselves regulated by the profits within, or presumed to be within, grasp. Under this view the greater liberty desired by some of the opponents of the Bank Act of 1844, in the matter of additional note issues upon securities other than gold, would only give a short period of fictitious ease to the money market and facilitate the withdrawal of gold from England. The Indian exchanges lead to the expectation of further exports of the precious metals hence, but the markets for Manchester goods are reported firm. The demand from Asia and from America for our manufactures has never been so active as at the present moment. America, however, is paying Europe in 5-20 bonds and other securities now sought after, because her vast producing power causes a belief in the proximate resumption of cash payments. We also have to increase our purchases of raw cotton, which also means that we must buy that which is offering at a higher price. Looking fairly at the present position of the country, and the extent of our engagements and enterprise abroad, it is easy to foresee active employment for money, and at high rates. As, however, very many of our commitments are new and uncertain in character, it is impossible to predict either the immediate future or the probable fluctuations of the money market during the coming year.

The inquiry for money to-day has been very active, the Stock Exchange settling having added to the customary demand at the close of the year.

Annexed are the current discount charges on paper of various dates:—

30 to 60 days	7 per cent.
3 months	7 per cent.
4 months	7¼ per cent
6 months—Bank bills	7⅜ per cent.
6 months—Trade ditto	7½ 8 per cent.

On the Stock Exchange the rate for short periods on Government securities has been from 7 to 8 per cent.

The following are the rates allowed by the joint stock banks and discount houses for deposits:—

Joint Stock Banks	*5 per cent.
Discount houses at call	5 per cent.
Do. with seven days' notice	5½ per cent.
Do. fourteen days	6 per cent.

* At the London and Westminster 4 per cent. only on sums below 500*l*.

Bullion.—46,000*l* in bar gold have been withdrawn from the Bank for export.

The following rates of discount are those current in the chief continental cities:—

	Bank Rate. Per cent.	Open Market Per cent.
Paris	4	4
Vienna	5	5
Berlin	7	6½
Frankfort	5½	5
Amsterdam	6	6
Turin	5	4½ 5
Brussels	5	5
Madrid	9	...
Hamburg	...	6½ 7
St Petersburg	6	6½ 7

The Bank of France returns just published gives the following results on a comparison with that previously issued:—

	£
INCREASE.	
Bills discounted, not yet due	1,260,000
Notes	810,000
Treasury balance	780,000
Advances	20,000
DECREASE.	
Cash in hand	172,000
Current accounts	224,000

ENGLISH GOVERNMENT STOCKS.—Prices have again relapsed, owing to the aspect of the money market, and business remains very quiet. Consols close at 87 to 87⅛ for money and 87⅛ to 87⅜ for January account. New 3 per Cents. and Reduced, 86⅝ to 86¾. India 5 per Cents., 102½ to 102¾.

There is no alteration in Exchequer bills, which are quoted 6s to 2s discount for both periods. India bonds, 14s to 19s premium.

FOREIGN STOCKS.—The settling took place to-day, but prices have been very little acted upon, as the few open accounts have mostly been carried over. The rates of "continuation" have ruled high. The closing prices of stocks dealt in to-day are subjoined:—5 per Cent. Brazil, 74½; ditto Scrip, 1⅜ to 1⅝ pm. 7 per Cent. Egyptian, 1864, 91 to 92. 5 per Cent. Greek, 15½ to 16. 5 per Cent. Italian, 1865, 77¼. 3 per Cent. Mexican, 24 to 24¼. New Grenada, 13¾ to 14¼; 2 per Cent. ditto, 30 to 31. 4½ per Cent. Peru, 71 to 73. 5 per Cent. Russian, 1862, 88½ to 89½. 3 per Cent. Spanish Deferred, 37 to 38; ditto Passive, 27⅞ to 28⅛; ditto Certificates, 15⅛ to 15⅜. 6 per Cent. Turkish, 1854, 88½ to 89½; ditto, 1858, 69 to 70; ditto, 1862, 71 to 72; ditto 5 per Cents., 1865, 42 to 42¼. 6 per Cent. Venezuela, 1862, 36 to 38.

Tenders will be received at the Bank of England on the 3rd Jan. proximo for 350,000*l* Government bills on India.

The Crown agents for the colonies are prepared to receive tenders on the 9th Jan. proximo for 100,000*l* Mauritius Government 6 per cent. debentures remaining of the loan for 400,000*l*, authorised on the 30th May, 1864, in Mauritius, and since confirmed by the Crown. The principal is repayable in thirty years from the date of issue by a sinking fund.

The closing price of French Three per Cent. Rentes from Paris, this evening, had not arrived at the period of going to press.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks on last Friday and this day:—

RAILWAYS AND OTHER SHARES.—The markets to-day show some improvement, the increased traffic on most of the lines, and the proximate payment of the dividend, operating in their favour. The sudden depression of prices that followed the advance of the Bank rate yesterday, has led to a slight increase of business by rendering the execution of orders from investors more practicable, and the consequent absorption of stock has rendered the markets firmer. Compared with last week's prices there is mostly a slight advance. Caledonian stock has risen ½ per cent. Great Eastern is rather lower. Great Northern is steady, and the "A" stock ½ per cent. lower. Great Western is also ½ per cent. lower. Metropolitan has advanced to 139. Midland is ½ per cent. lower. South-Eastern, after a considerable decline, has improved, closing 74¾ to 75¼.

Indian stocks are still very quiet, with little business doing.

In miscellaneous shares, London Financial have declined. Hudson's Bay remain quiet. Generally there are very few transactions worth noting.

FOREIGN EXCHANGES.—The rate on Paris was rather higher, otherwise rates were held back by the firmness of the market for silver bars.

The Stock Exchange is be closed on Monday, by order of the Committee.

BULLION.—The following is the weekly circular of Messrs Pixley, Abell, and Langley on the transactions in bullion during the week, and in Indian rupee paper :—

Gold.—The arrivals since our circular of the 21st inst. are the Great Britain, from Melbourne, with 498,000*l*; Massilia, from Alexandria, with 3,230*l*; City of Washington, from New York, with 52,000*l*; Scotia, from New York, with 72,500*l*; City of New York, from New York, with 80,000*l*; City of Manchester, from New York, with 50,000*l*; Bremen, from New York, with 40,000*l*. The demand for export has been active, and the whole of the above, together with 147,000*l* withdrawn from the Bank of England, has been sent abroad. The shipments comprise 3,000*l*, per Syria, to Alexandria; and 65,000*l*, per ditto, to Bombay. 60,000 sovereigns were shipped on the 28th inst. from Marseilles by the Peninsular and Oriental Company's steamer, and 10,000 sovereigns on the 29th inst. per steamer of the Messageries Imperiales. Telegrams from Melbourne report the shipment of 347,000*l* since the departure of preceding mail. Details not yet known.

Silver.—A very considerable amount of business has been transacted yesterday and to-day in bar silver and 5-franc pieces for Bombay, chiefly for shipment via Marseilles, the prices being for bars 61⅞d per oz standard, and for 5-franc pieces, 60⅝d per oz. The Syria, which left Southampton yesterday for Bombay, had on board 226,370*l*.

Mexican Dollars.—A sale took place a few days ago at the price of 60¼d per oz; the dollars have been held over for some time for a higher rate than has ruled of late. The market is now cleared of this coin.

Exchange on India for drafts by the banks, at 60 days' sight, may be quoted—Bombay, 2s to 2s 0⅜d; Calcutta and Madras, 1s 11⅞d to 2s 0⅛d. Demand Drafts on Bombay have been in great request the last day or two, and may be called 2s 0⅜d to 2s 0⅝d.

India Government loan notes are dearer, having been in request for remittance to India. We call 5½ per Cents. 108½ to 109½; 5 per Cents. 101½ to 102½; and 4 per Cents. 88 to 90.

Quotations for Bullion.—Gold—Bar gold, 77s 9½d per oz std, last price; ditto, refinable, 78s per oz std, last price; Spanish doubloons, 74s to 74s 6d per oz; South American doubloons, 73s 9d to 73s 10d per oz; United States gold coin, 76s 3d to 76s 4d per oz, last price. Silver—Bar silver, 5s 1 7-8d per oz std; Mexican dollars, 5s 0¼d per oz; five-franc pieces, 5s 0⅛d per oz. Quicksilver, 8*l* per bottle; discount, 3 per cent.

FAILURES AND MERCANTILE EMBARRASSMENTS.—A second dividend of 4s in the pound has been declared on the shares of the Leeds Banking Company. Payment will be made at the end of January. 12s in the pound have now been paid, and a further division of assets is expected.

Mr Samuel Lovelock has been appointed provisional official liquidator of the Neath and Pelenna Colliery Company (Limited).

PUBLIC COMPANIES.—At the meeting of the London and Liverpool Hotel Company, a dividend at the rate of 10 per cent. per annum, free of income tax, was declared out of the available balance of 4,743*l*.

An interim dividend of 10s per share has been declared payable on the old shares of the Royal Ottoman Bank.

A dividend at the rate of 6 per cent. per annum has been declared on the stock of the Commercial Bank of Canada.

The annual meeting of the Oriental Inland Steam Company was held to-day, but as the report and accounts had not been prepared for presentation to the shareholders, the meeting was adjourned.

At the meeting of the Hong Kong Tea Company an interim dividend at the rate of 10 per cent. per annum was declared.

The meeting of the Chubwa Tea Company was held to-day, and an interim dividend at the rate of 10 per cent. per annum declared.

The directors of the Colonial Company (Limited) have made their allotment of shares in the company.

The Hercules Fire and Life Insurance Company (Limited) is about to add to its present business that of Marine Insurance, in which they have secured a business connexion estimated to bring in 50,000*l* a year. The company proposes to confine its operations to goods, freight, &c., and not, as we understand, to insure the bodies of ships, a sort of business in which there is generally less profit. The Hercules Company was established in 1863 as a Fire and Life Insurance Company, and its success has been such as to give the directors full confidence in the success of their new branch of business.

MISCELLANEOUS.—The Nos. of 5,009 bonds of the Lombardo-Venetian Railway Company are published for payment at par, having been drawn publicly by lot at Vienna on the 14th inst.

Forty-four bonds, representing 880*l* of the Italian 5 per Cent. Loan of 1862, have been drawn at Turin, for payment on the 1st January, by Messrs C. J. Hambro and Son.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about ½ per mille premium, and the short exchange on London is 25.12½ per 1*l* sterling. On comparing these rates with the English Mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is about 2-10ths per cent. dearer in Paris than in London.

The course of exchange at New York on London for bills at 60 days' sight is 109¼ to 109⅜ per cent. At this rate there is no profit on the importation of gold from the United States.

Bills with documents attached against indents and consignments for India, vary according to amounts, and the security which they offer.

The Commercial Times.

POST OFFICE ANNOUNCEMENTS

In accordance with the provisions of a convention just concluded with the Austrain post office, mails for Austria will, on the 1st of January next, and thenceforward be forwarded by each French mail; and all letters, &c., for places in the Austrian Provinces or for the city of Belgrade, which are superscribed "via France," or upon which the rates of postage required for their transmission by that route are prepaid, will be included in such mails.

Information has been received from the French post office that, on the 1st January next and thensforward, the prepayment of postage on letters addressed to Tunis and Tangiers, and forwarded via France, will no longer be compulsory. The postage of such letters, at the rate of sixpence per quarter-ounce, may thence forward either be paid in advance, or left to be collected on delivery, at the option of the sender; but letters sent unpaid will be liable to an additional charge on delivery. Letters for Tunis and Tangiers may also be registered, but, in such case the postage must be pre paid at double, the rates for postage chargeable for ordinary letters.

On the 1st January next and thenceforward, the prohibition which now exists to the transmission, as patterns, of articles of intrinsic value by the Post, between the United Kingdom and the colonies, will be withdrawn. Further, the rule, which forbids the transmission through the Post of any article which might injure the contents of the mail bags or the officers of the Post Office, is so far relaxed as to permit the transmission of scissors, knives, razors, forks, steel pens, nails, keys, watch machinery, metal tubing, pieces of metal or ore, and such like, as samples, provided that they be packed and guarded in so secure a manner as to afford complete protection to the contents of the mail bags and the officers of the Post Office, while at the same time the samples may be easily examined. If any packet containing such articles as these be posted, which is found not to be sufficiently guarded, it will be stopped. Samples of seeds and similar articles may also be sent in bags entirely closed, if transparent, so that the officers of the Post Office may satisfy themselves of the nature of the contents. In exception to the rule permitting articles of intrinsic value to be forwarded, it must be understood that such articles cannot be forwarded to any colony in the mails via Marseilles.

On the 1st January next and thenceforward, any letter or packet whatever, with certain exceptions, posted for transmission to any British colony or foreign country, which may be found to exceed two feet in length, or one foot in depth or breadth, will be stopped and sent to the returned letter branch. In the case of packets of books and samples, addressed to France or Algeria, the dimensions must not exceed 18 inches in length, breadth, or depth.

On the 1st January next and thenceforward, the regulations of the pattern post will be extended to the colonies of Queensland, Cape of Good Hope, Natal, and St Helena. No packet of patterns or samples must exceed two feet in length or one foot in breadth or depth, and no packet addeessed to Queensland must exceed three pounds in weight.

AVERAGES OF GRAIN.

The following is a statement showing the quantities sold and the average price of British corn (imperial measure) as received from the inspectors and officers of Excise, conformably to the Act of the 27th and 28th Victoria, cap. 87, in the week ended Dec. 23, 1865:—

	Quantities Sold. qrs bush	Average Price. s d
Wheat	76,126 5	46 8
Barley	84,632 1	32 10
Oats	7,844 5	23 1

COMPARATIVE AVERAGES.

The following is a comparative statement, for the corresponding week in each of the years from 1861 to 1864, of the quantities of British corn sold in the towns from which returns are received under the Act of the 27th and 28th Victoria, cap. 87, and of the average prices as ascertained under the Act 5th and 6th Victoria, cap. 14:—

Corresponding week in	Quantities Sold.						Average Prices.					
	Wheat.		Barley.		Oats.		Wheat.		Barley.		Oats.	
	qrs	bsh	qrs	bsh	qrs	bsh	s	d	s	d	s	d

1864	76,478	5	86,416	2	7,495	3	38	1	28	4	19	9

COMMERCIAL EPITOME,

FRIDAY NIGHT.

The amount of business transacted in produce at Mark lane today was very moderate. The principal inquiry was for fine parcels of barley, which changed hands at full prices. Wheat, both English and foreign, inferior descriptions of barley, including oats, beans, and peas, were in limited request at late rates. This week's imports consist of 3,610 quarters of wheat, 1,570 barley, 21,790 oats, 830 sacks and 2,660 barrels of flour.

During the week, which has been limited to only four business days in the Liverpool market, the demand for cotton has been to a fair extent, the total sales amounting to 48,500 bales, of which spinners have taken 32,000 bales, speculators and exporters 16,500 bales, and there is no alteration in the prices since Friday last. The advance of the Bank rate yesterday to 7 per cent. has tended somewhat to weaken the market, and here and there a parcel has been sold upon easier terms, but upon the whole prices are firmly maintained. The Liverpool stock, having been officially taken to-day, is declared to be 370,275 bales, which shows a small increase upon the former estimated returns.

Advices from New Orleans are to Dec. 13. During the week preceding that date, the cotton trade had been active, on higher terms. Middling quality was quoted at 46 to 47 cents per lb. The stock of produce on hand amounted to 146,000 bales. The following table shows the extent of the receipts and exports of

Digitized by Google

cotton from Sept. 1 to Dec. 5 in each of the last ten years, including the stocks on hand at the close of those periods:—

Year.	Arrivals. bales.	Exports. bales.	Stock. bales.
1865	289,156	231,932	140,463
1864	13,766	12,353	5,988
1863	45,143	38,823	7,981
1862	1,813	1,598	...
1861	1,789	...	11,907
1860	811,661	547,205	338,390
1859	964,107	558,047	434,082
1858	785,614	490,779	325,065
1857	570,973	289,483	288,811
1856	723,238	416,177	314,058

From Mobile, we have intelligence to Dec. 29. Middling quality of cotton at that date was quoted at 46 to 47 cents per lb. The stock on hand was 64,309 bales. The receipts since Sept. 1, including the stock on hand at that date, were 176,607 bales, and the exports, 133,020 bales.

The stock of cotton at Savannah on the 9th December was 11,045 bales. The exports since the opening of the season had been 62,667 bales.

Galveston advices to Dec. 2 report considerable arrivals of cotton at that port, with a very dull market. Middling quality was quoted at 29 to 30 cents per lb, in gold. The receipts of produce since Sept. 1, including the stock on hand at that date, had been 71,800 bales, and the exports 51,626 bales. The stock of cotton was 20,174 bales, against 20,528 bales last year.

Messrs Neill Brothers and Co., having completed their tour through the Southern States, have recently published a circular detailing the result of their investigations. The conclusion they arrive at is that the supply of cotton in those States, from May 1st to Sept. 1st, that is to say, the supply of the old produce on hand on the 1st May, including this year's crop, was from 2,000,000 to 2,100,000 bales. This quantity they estimate to have been the supply in the Southern States during the four months, from May 1st and Sept. 1st. The subjoined tables are from the circular referred to above:—

Supplies of Cotton in the Southern Sates, and deliveries since May 1st, current year:—

	Old.	New.	Total.	Delivered till date.	Estimate interior.
North and South Carolina	90,000	20,000	110,000	60,000	50,000
Georgia and Florida	300,000	30,000	330,000	99,000	231,000
Mobile	360,000	40,000	400,000	222,000	178,000
New Orleans	540,000	60,000	700,000	431,000	269,000
Texas	90,000	100,000	190,000	71,000	118,000
Memphis, Nashville, New York, and all North not already counted	170,000	150,000	320,000		
Of which received at New York	...	...	...	116,000	
Estimated at other points*	...	...	...	90,000	114,000
	1,650,000	400,000	2,050,000	1,090,000	960,000

* Say, stock at Memphis (35,000), Nashville (5,000), receipts at St Louis, Louisville, Cincinnati, and deliveries to spinners at Baltimore, Philadelphia, Boston, and throughout the West.

Postal advices from Bombay are to Nov. 28. As regards the state of the cotton trade during the preceding fortnight, Messrs Nicol and Co. write as follows:—The business transacted, especially for delivery of new crop, has been very large, and there are still buyers in the market for new crop cotton at our quotations. Dhollera, for delivery in April and May next, is quoted at 450 rs; Oomrawuttee, 425 rs; and Broach, 450 rs. Oomrawuttee, however, has been most in demand, as it will be the cotton first in the market next season. Several of the contracts in this description are for delivery in February, whereas in Dhollera the bulk of the contracts are for delivery in April and May, and Broach in March and April. There will be little Broach here of the new crop before the end of March, both this and the Dhollera being more backward than usual on account of the late rains. The total transactions in cotton have been very large indeed; about 8,000 candies are reported on the spot, and 16,000 candies for delivery February to May. In ready cotton, Oomrawuttee has been most in demand at from 385 rs to 400 rs; Dhollera, 410 rs to 430 rs; and sawginned Dharwar, 426 rs to 445 rs; and for delivery, Oomrawuttee also at from 380 rs to 415 rs; Dhollera, 400 rs to 451 rs; and Broach, 400 rs to 450 rs. The stock of cotton here is now much reduced by the late heavy shipments, and the quality of that remaining is very poor. In Broach, dealers have been making contracts, for delivery in February, at 412 rs; March, 395 rs; April, 388 rs; and we now understand that although this cotton will be deficient in quantity and a little later in coming forward on account of the late rains, the quality will be quite up to that of former years. We do not estimate that next season's crop in these districts will be up to the average of the two previous ones, from the fact mentioned in a former circular that a much larger proportion of the land than usual was sown with grain, which at the time of seed sowing offered better prospects to the ryots than cotton.

Current Prices of Cotton at Bombay, Nov. 28.

Freight to Liverpool, 1l 10s to 2l 2s 6d; to London, 1l 2s to 1l 15s per ton.

Via the Persian Gulf, we have intelligence from Bombay to Dec. 22. During the previous week, the cotton trade had been firm, at 15.376d per lb, with freight for Broach; and 15.700d for Dhollerah. Freight to Liverpool was 2l per ton.

Our latest information from Alexandria is dated Dec. 23. At that date, the cotton trade was quiet, but firm. Fair open-ginned produce was quoted at 24.25d per lb, free on board; light canvas. Freight to Liverpool, ½d per lb.

At Madras, during the fortnight ending Nov. 25, the cotton trade was occasionally very inactive, but the market closed with considerable buoyancy, at 12¾d per lb for Western; 11¾d for Salem and Coimbatore; and 14½d per lb for Tinnivelly produce.

During the week, in consequence of the holidays, very little business has been done in colonial and foreign grocery produce. In prices, there is no change to notice. Scotch pig iron has realised 65s 4½d, but has since declined to 64s 4½d cash, mixed numbers. Oils have changed hands to a limited extent, on rather easier terms. P.Y.C. tallow has sold at 48s 6d to 48s 9d per cwt on the spot.

Postal advices from China state that the demand for tea for shipment to Great Britain, Australia, and America had ruled active, at fully late rates. The export to Great Britain since the opening of the season had been 79,405,800 lbs, against 84,759,800 lbs; to the United States, 8,430,000 lbs; against 6,698,100 lbs during the corresponding period last season. Telegraphic advices state that the shipments to Great Britain had amounted to 92,000,000 lbs.

We learn from Colombo that during the fortnight ending Nov. 30, there had been a fair demand for plantation coffee, at 12s 3d to 13s per bushel for medium quality. On the other hand very little business had been done in native sorts, yet prices were very firm, at 43s for unpicked, and 48s 6d to 49s per cwt for picked and dried. The following table of shipments is from Messrs Fryer, Schultz, and Co.'s circular:—

Exports of Coffee from Colombo from Oct. 1 to Nov. 30.

During the fortnight ending Nov. 8, the silk trade at Shanghai ruled quiet, the total settlements being only 500 bales. Tsatlee produce declined in value 15 taels per picul; but in other descrip-

Digitized by Google

tions, no alteration took place. The shipments since July 1 had been 30,288 bales, against 19,465 bales last year. The unsold stock was estimated at 2,500 bales, against 2,000 bales last year; and 10,000 bales in 1863. The following were the prices current, all charges paid to England at the exchange of 6s 2d per tael:—Tsatlee chop No. 1, 32s 7d; ditto, No. 2, 31s 6d; No. 3, 30s 5d; market, No. 3, 29s 4d to 29s 11d; No. 4; 28s 3d to 29s 1d; No. 5 and common, 26s 4d to 27s 9d; Taysaam, chop No. 1, 28s 3d to 28s 10d; No. 2, 26s 10d to 27s 9d; No, 3, 25s 9d to 26s 4d; No. 4, 5, and common, 21s 7d to 25s 3d; Yuenfa, No. 1, 28s 3d to 28s 10d; No. 2, 26s 10d to 27s 9d;. No. 3, 25s 9d to 26s 4d; No. 4 and common, 23s 2d to 25s 3d; Hainings, 22s 8d to 28s 3d per lb.

At Yokohama, from Oct. 16 to Oct. 30, the silk trade was very firm at enhanced rates. The supply of good and fine qualities of produce on sale was small. Maibash and Sincha was quoted at $750 to $880; Ida, $750 to $850; Eichizen, $600 to $620 per picul.

According to Mr Thomas Thorburn's circular, the production of pig iron in Scotland for the current year is 1,164,000 tons, being an increase of 4,000 tons as compared with 1864. The fluctuations in price have been from 50s to 65s 6d per ton. The following table shows the state of the trade for the year:—

	Tons.	Tons.
Production in 1865, per makers' returns		1,135,000
Carron make, computed at		29,000
Stock on hand, December 31, 1864		760,000
	Tons.	1,924,000
Shipments, foreign	360,184	
— coastwise	311,057	
Forwarded per railway	61,259	
Consumed in local foundries	310,000	
— malleable iron works	221,500	
		1,272,009
Stock in warehouse keepers' and makers' stores, December 31, 1865, (including Carron)		652,000

The following statement relates to the trade for Banca tin in Holland, and is from L. Th. Van Houten's circular:—

	1865 slabs	1864 slabs	1863 slabs
Import in December	3,470	11,846	3,362
Previously this year	179,600	161,513	106,768

Unsold stock	93,770	79,404	52,966
Total stock	190,629	146,311	128,504
Quotation, Dec. 22	57¾fl	56fl	68½fl

During the week ending Dec. 16, there was more activity in the market for cotton goods at New York, and business was done occasionally at slightly enhanced rates. For foreign goods there was only a moderate demand; nevertheless, prices ruled firm. Trade in grocery produce was very dull, and the quotations had a drooping tendency. In the provision market there had been considerable firmness, and pork—owing to the backward state of hog packing—had been in active request, at higher prices. In wheat and flour, for export, a fair business had been transacted. The demand for money was only moderate, at previous rates, the lowest quotation being 7 per cent. The fluctuations in the premium on gold were from 144⅜ to 146¾ per cent., closing at the latter quotation. The stock of bullion in the banks on the 9th instant was 3,124,560*l*; and the balance in the Sub-Treasury, 14,164,470*l*. The shipments of specie, from Jan. 1 to Dec. 9, were 5,561,110*l*, against 9,233,780*l* last year; 9,253,270*l* in 1863; and 11,446,600*l*. in 1862. The imports of dry goods, for the week ending Dec. 8, were valued at 377,760*l*, against 60,740*l* last year; 237,670*l* in 1863; and 99,620*l* in 1862.

THE COTTON TRADE.

LIVERPOOL—Dec. 29.

Cotton has been in fair demand, but freely offered throughout the week; the tendency to increased firmness manifested on Friday was checked by advices to the 13th instant, per Scotia, of large receipts at the American ports, and the market closes quietly upon the announcement to-day of the advance of the Bank rate to 7 per cent. For Sea Island there has been a good inquiry, at previous rates. American continues in demand, but the recent imports are placed freely upon the market, and prices have given way fully ¼d per lb. Brazil is heavy of sale, and in Pernam and Maranham a decline has been submitted to of ¼d to ½d per lb. Egyptian is in fair request, and in the early part of the week commanded full rates, but closes without change from Friday last. In Smyrna a fair amount of business has been done, but prices are in favour of the buyer. The scarcity in East India has been very apparent this week, and while the lower grades are decidedly dearer, the better qualities fully support previous quotations. China and Japan are in moderate supply, and command extreme prices.

The transactions, to arrive, have been moderate throughout the week, and the latest quotations were this day, for American, bales middling, at sea, from Charleston, 20¾d per lb; Egyptian, fair new open, January or February shipment, 23½d; Dharwar, fair new, overland, sailed, 18¼d; Scinde, strict fair, December shipment, 12d; Bengal, fair, November sailing, 12d per lb.

The sales of the week (four days) amount to 48,580 bales, including 7,080 on speculation, and 9,430 declared for export, leaving 32,070 bales to the trade.

The sales to-day will probably amount to about 10,000 bales, with a firmer feeling.

The stock of cotton in Liverpool, declared this morning, amounts to 370,275 bales, including 143,722 American, 36 004 Brazil, 31,023 Egyptian, 9,796 West India, 144,759 East India, and 4,971 China and Japan, and proves remarkably correct in the total. It shows an excess in East India, attributable to re-shipments of this description from America, and also to receipts overland, partly included, on arrival, in the Egyptian stock.

LONDON—Dec. 29.

Annexed is a portion of the circular issued this week by the London Cotton Brokers' Association:—Since our last there have only been three days business to note, the Christmas holidays intervening. On Saturday and Tuesday a fair amount of business was done,

Digitized by Google

but the action of the Bank in raising the rate to 7 per cent. has checked operations, buyers looking for lower prices, to which holders decline to accede, though the market closes decidedly quiet, and we make no alterations in our quotations.

NEW YORK—Dec. 16.

The market has been subject to the usual variety of contending influences. To support prices we have had more movement, partly speculative, in cotton goods, a speculative feeling in the raw material, and favourable foreign news leading to a slight export demand. On the contrary, to depress prices, we have had continued heavy receipts at this market, as well as at the Southern ports, scarcity of freight room to Europe, and, most potent of all, the advance in the rate of insurance to five per cent. The severe losses by fire in our cotton warehouses have compelled an advance of premium in self-protection. The fluctuations have amounted to four cents per lb, but the close shows very little change from last week. The following are quotations:—

	New York Classification. Upland. c	Florida. c	Mobile. c	New Orleans and Texas. c
Ordinary per lb	39	39	39	39
Good ordinary	41	41	41	42
Low Middling	46	46	47	48
Middling	49	49	50	50
Good middling	51	52	53	54

The receipts at this market for eight days were as follows:—

	bales.		bales.
From New Orleans	4,184	From South Carolina	1,225
Galveston	2,628	North Carolina	3,376
Mobile	825	Norfolk, &c.	1,857

MARKETS IN THE MANUFACTURING DISTRICTS.

Owing to the holidays, only a limited business has been doing in cotton goods this week, either for home use or export. Prices, however, are firmly supported. There has been rather less passing in iron and coals, at about previous quotations.

MANCHESTER, Dec. 28.—General business has scarcely recommenced since the Christmas holidays. The market has continued steady, and the only feature of importance has been an active demand for China, which sprung up on receipt of letters yesterday, and was extending to-day, when checked by the advance in the Bank rate. The best China shirting, 64 reed, in the market was reported to have been sold at 20s, and good current descriptions at 18s 6d; whilst for T'cloths large offers were made this morning, but which have since been withdrawn. Other goods have shown no movement whatever. Yarns for China and the Continent have sold to a fair amount, but for home manufacture rather slowly, the cost of material being being too high for most fabrics.

BRADFORD.—The transactions in wool have been quite confined to the immediate wants of consumers. Prices have not, however, been affected, and the country holders are not at all disposed to give way. Yarns—Notwithstanding the rise in money, lustre spinners have advanced their quotations, and even now have to refuse orders. There is a little increased demand for twofolds—36's and 40's, but not enough to give any animation to the market. Pieces—There is a steady demand for lenos, glaces, and various fancy fabrics; plain goods are less in request.

LEEDS.—There was scarcely any disposition to purchase, except goods that were offered at a tempting price, and therefore below the general quotations. The market, however, being tolerably free from job lots—a sign that the trade is sound—the goods which changed hands were very small. Most of the mills are keeping holiday. The local woolbrokers are not doing much business, but prices are firm.

LEICESTER.—Very little has been doing in the hosiery trade. In the rural districts trade remains quiet. Worsted yarns are firm, and high prices are quoted. There is no material change in wool, which continues dear. Cotton yarns are unaltered in value. The hosiery and yarn markets are each bare of stock.

BIRMINGHAM.—The country trade has been well sustained, and the pressure of orders on account of America gave an impetus to business in many branches such as has not for a long time been experienced.

DUNDEE.—There has been a renewal of activity in our flax market, and, notwithstanding the holidays, a considerable amount of business has been done in goods on the spot at full prices. Jute continues firm, and the probability of diminution of the supplies causes prices to be well maintained. There is a good demand for linens, and manufacturers are fully employed. Jute hessians are in demand, and prices are exceedingly firm.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Dec. 16.—Flour continues to come forward freely by rail, but there has been a recovery in prices of 25 to 50 cents per bbl for the regular brands. The demand is good, both for export and home consumption. The export demand is quite general, embracing the West Indies and Brazil, as well as the Liverpool market, while the common extra Westerns are taken for the Southern States. Wheat has improved from seven to fifteen cents per bushel. The greater improvement is in the low grades of spring, which have been most depressed. They are taken for export to Great Britain. In the finer grades of red the advance is nearly nominal, as there is only a limited milling demand for them, and choice springs do not bring their relative value. Corn has moved freely for export, and with a decline in freights prices have advanced one cent. The receipts of Western corn have now ceased, and but very small quantities of corn grown on the Atlantic coast is reaching the market. The stock, however, is large. The following are the closing quotations, showing some advance on last week:—Flour—Superfine State and Western, $7.10 to $7.50; extra State, $8 to $8.50; shipping roundhoop Ohio, $8.50 to $8.75; extra Western, common to good, $8 to $10.60; double extra Western and St Louis, $11 to $15; Southern, supers, $9 to $10.25; Southern, fancy and extra, $10.50 to $15.50; Canada, common to choice extra, $8.15 to $11.50; rye flour,

Digitized by Google

fine and superfine, $5.75 to $6.25; corn meal, Jersey and Brandywine, $4.25 to $4.60 per barrel. Wheat—Chicago spring, $1.65 to $1.80; Milwaukee Club, $1.70 to $1.85; red winter, $2 to $2.25; amber State and Michigan, $2.35 to $2.43. Corn—Western mixed, 90c to 97c; Western yellow, 98c to 100c per bushel.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

Owing chiefly to the holidays, the arrivals of English wheat, coastwise and by land carriage, have been on a very limited scale. The show of samples has, therefore, been trifling. The demand, however, for both red and white qualities has ruled somewhat heavy, at about stationary prices. Foreign wheat, the supply of which has not increased, has moved off slowly, at last week's currency. The few parcels of fine malting barley on sale have been disposed of at full quotations. Grinding and distilling sorts have met a dull inquiry, at barely late rates. The malt trade has slightly improved; but no change has taken place in prices. The supply of malt has been seasonably extensive. There has been a fair sale for oats, on former terms. Both beans and peas have met a dull inquiry, at the late decline in value. The flour trade has continued very quiet.

The transactions in produce in the various local markets have been unimportant.

On the Continent, very little wheat has been disposed of on English account. Barley, oats, beans and peas have sold freely, at steady prices. Fair supplies have been on offer. Accounts from America state that the shipments of breadstuffs has rather increased of late.

The various markets are still heavily supplied with potatoes in good condition. The shipments from the Continent have been very moderate for some time past.

The Scotch markets have been scantily supplied with wheat, in which very little business has been transacted, at about stationary prices. In spring corn sales have progressed slowly at previous currencies. In Ireland, very little business has been passing in wheat. For spring corn there has been a fair inquiry. Prices generally have ruled about stationary.

The supply of English wheat on sale at Mark lane, to-day, was very moderate, yet the trade ruled quiet at late rates. Foreign wheat changed hands to a limited extent on former terms. Fine malting barley moved off steadily at full prices; but inferior barley met a slow sale at previous quotations. Oats were in fair supply, and steady request at late rates. Beans and peas were a dull inquiry at former prices. The flour trade was quiet at last week's currency.

The transactions in floating cargoes of wheat off Falmouth and Queenstown have been only moderate, and prices have given way 3d to 6d per quarter. The sale for maize and barley afloat has been restricted, on rather lower terms. Most other kinds of produce have commanded very little attention.

The London averages announced this day are:—

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

MINCING LANE, FRIDAY EVENING.

The colonial markets have been closed this week, and the business by private contract is unimportant. Various public sales are declared for the ensuing week.

SUGAR.—There have not been any sales reported, but the market will re-open on Tuesday, the 2nd proximo. Last week's delivery was only 1,843 tons, and the landings 4,550 tons, leaving the stock at the close 83,760 tons, against 110,700 tons at the same date in 1864. The returns of beet root sugar give 6,535 tons landed, against 1,580 tons last year, and the stock 5,400 tons, against 180 tons.

COFFEE remains firm. Transactions are, however, limited. A float-cargo of Rio has sold at 49s per cwt, for a near port: fair Channel firsts.

RICE.—No sales are reported.

IMPORTS and DELIVERIES of RICE to Dec. 23, with STOCKS on hand.

	1865.	1864.	1863.	1862.
Imports .....tons	49850	63730	57950	10150
Deliveries	57070	70700	76100	65860
Stock	34230	38830	45950	64200

SPICES.—White pepper is firm.

SALTPETRE.—Nothing has been done in landing parcels of Bengal. 300 tons afloat have sold at 26s per cwt, December and January shipment.

IMPORTS and DELIVERIES of SALTPETRE to Dec. 23, with STOCKS on hand.

	1865	1864	1863	1862
Imports .....tons	11550	13400	16570	17400
Deliveries	10800	12950	13230	16740
Stock	8140	7470	7160	3810

TEA.—The market is quiet, trasactions being as usual, partially suspended in consequence of the Christmas holidays. Several arrivals have taken place.

METALS.—A few small contracts have been made in foreign tin. Spelter is rather weaker in price. Scotch pig iron has declined to 64s 6d per ton, mixed numbers, for cash. Copper unchanged, with moderate transactions.

CAMPHOR.—A great deal of speculative business has been done. Japan, 112s 6d to 122s 6d; China, 107s 6d to 112s 6d per cwt.

OILS.—Linseed is rather quiet, at 38*l* per ton.

TALLOW.—The market has been inactive, closing rather lower. 1st sort new Petersburg Y.C., 48s 3d to 48s 6d; March, 49s 3d; October to December, 50s per cwt. Town unaltered.

ADDITIONAL NOTICES.

SUGAR.—The home market for refined is closed owing to the holidays. Nothing doing here in Dutch crushed.

GREEN FRUIT.—An easier market for oranges, which is usually the case after the Christmas demand is supplied. Some parcels of oranges from St Michael, Terceira, Valencia, and Sicily, sold by Keeling and Hunt at public sale, went at a reduction of 1s to 2s per package. No improvement in lemons. Some parcels Almeria grapes withdrawn, the offers not being equal to their value. Nuts of all kinds without alteration. Some cargoes Seville sours arrived and in demand.

ENGLISH WOOL.—More doing, particularly in skin wools.

FLAX.—Market very firm.

HEMP.—Market steady, but not much business doing this week.

SILK.—Market very firm, and a large business doing in Chinas at previous rates.

TOBACCO.—The market continues firm and steady. Business has been confined to limited selections for immediate requirements.

LEATHER.—The trade in leather, since our last report, has been very small, but this being Christmas week no market was held on Tuesday at Leadenhall. There is a fair supply of fresh goods, generally adequate to present limited demand.

METALS.—The year closes with quiet markets, but a firm tone in prices of all metals. Copper has changed hands only on a small scale as usual at this season; a revival is looked for in January. Iron keeps in good demand for all kinds. Tin is steadily maintained. Spelter, lead, and tin plates are all well supported by the position and prospects of the trade, although little of either has changed hands during the week.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	50	9
Fat by ditto	2	6
Yellow Russia	49	9
Melted stuff	39	0
Rough ditto	23	0
Greaves	26	0
Good dregs	6	0

METROPOLITAN CATTLE MARKET.

THURSDAY, Dec. 28.—Only a moderate supply of beasts was on sale here to-day. The few prime breeds on offer were in fair request, at very full prices. Otherwise the trade was inactive, at late rates. The top figure was 5s per 8 lb. The show of sheep was about an average for the time of year. Downs and half-breds sold freely, at extreme rates; but inferior sheep were dull, on former terms. The highest quotation was 6s 4d per 8 lbs. The few calves on offer changed hands slowly, at last week's currency, viz., from 3s 8d to 4s 8d per 8 lbs. Pigs were a dull inquiry, but not cheaper. Milch cows were a heavy sale.

Per 8 lbs to sink the offal.

	s	d	s	d		s	d	s	d
Coarse and inferior beasts	3	2	3	6	Prime Southdown sheep	6	0	to 6	4

HOP MARKET.

BOROUGH, Friday, Dec. 29.—The business passing in our market is very moderate. Prices, however, of all kinds of hops rule firm. Mid and East Kents, 80s to 190s; Weald of Kents, 70s to 126s; Sussex, 60s to 115s; Yearlings, 95s to 135s per cwt.

POTATO MARKETS.

BOROUGH AND SPITALFIELDS, Friday, Dec. 29.—Fair supplies of potatoes are on sale, for which the trade is quiet, at about stationary prices. Kent and Essex Regents, 60s to 80s; Yorkshire Regents, 60s to 85s; ditto Flukes, 85s to 110s; ditto Rocks, 50s to 70s; Scotch Regents, 50s to 75s per ton.

COAL MARKET.

FRIDAY, Dec. 29.—Wallsend, Hetton, 19s—South Hetton, 19s—Hartlepool, 18s 9d—Braddyll's Hetton, 18s—Eden Main, 17s 6d—Hetton Lyons, 17s—Pittington, 16s 6d—Cowpen Hartley, 16s 9d. Ships at market, 54; sold, 13; gas contracts, 21—34; unsold, 20; ships at sea, 70.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Dec. 29.—Owing to the holidays we have had a very quiet market this week, but the little that has been done shows no alteration in price, as holders evince no disposition to accept lower rates.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Dec. 29.—Holiday market. More inquiry for wheat, met freely off the stands at 1d to 2d decline. Since this day week little doing. In other articles prices nominally the same, except corn, which was 6d cheaper.

The Gazette.

TUESDAY, Dec. 26.

BANKRUPTS.

P. S. Bell, late of Prince's terrace, Regent's park, builder—E. Broad, Stratheden villas, Hammersmith—G. T. Thomas, late of Camberwell road, broker—G. Drew, Waterloo road, cowkeeper—H. EPITOME OF RAILWAY NEWS.

TRAFFIC RECEIPTS.—The traffic receipts of railways in the United Kingdom amounted for the week ending the 16th of December on 12,299 miles, to 665,154*l*, and for the corresponding week of last year, on 11,889 miles, to 611,613*l*, showing an increase of 410 miles and of 53,541*l*. The gross receipts on the 14 principal railways amounted in the aggregate, on 8,808 miles, to 556,290*l*, and for the corresponding week of 1864, on 8,489 miles, to 513,811*l*, showing an increase of 319 miles and an increase of 42,479*l*.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

TUESDAY, Dec. 26.—In the share market to-day the transactions were few, and, with the exception of a general tendency to decline in American securities, there was no material alteration of tone in the several descriptions. In English railways, North-Eastern (Leeds) advanced ½, and Lancashire and Yorkshire and Midland a further ¼ each; and South-Eastern declined 1½. In colonial, Punjaub recovered ½; Grand Trunk of Canada further improved 2, and ditto (4th preference) ½; Atlantic and St Lawrence declined 1, Great Western of Canada (new shares) ⅜, and ditto (paid up) a further ¼. In foreign, Great Luxembourg improved ⅛, and Northern of France and Pernambuco ½ each, and Sambre and Mouse declined ⅛, and Southern of France and San Paulo ⅛ each. In American, United States (5-20) relapsed ¾; and Atlantic and Great Western (Pennsylvanian 2nd Mortgage) declined 1, Illinois Central (shares) ½, and Erie Shares (paid-up) a further ½. In mines, West Chiverton advanced 2½, and Grenville declined ¼; Pontgibaud Silver improved ½, and Cape Copper receded ¼.

WEDNESDAY, Dec. 27.—In the share market to-day there was almost an entire absence of buisness, and the variations from yesterday's closing prices were generally adverse. In English railways, Midland relapsed 1, and Lancashire and Yorkshire ¾; and North-Western declined ¾, Great Eastern, Great Northern (A stock), Great Western, and Metropolitan ½ each, and South-Eastern a further ⅛. In colonial, Grand Trunk of Canada (3d preference of both descriptions) advanced 2 each; ditto (origonal stock) relapsed ½; and Bombay and Central India declined ½, and Great Western of Canada (shares of both descriptions) a further ⅛ each. In foreign, Northern of France relapsed 1, and Great Luxembourg ⅝, and Paris and Mediterranean and Paris and Orleans declined ½ each, Lombardo-Venetian ⅛, and Sambre and Meuse a further ⅛. In American, Atlantic and Great Western (Pennsylvanian 1st mortgage) improved 1; and ditto (New York 1st mortgage) and Virginian (6 per cent) declined 1 each, Erie shares (paid up) further ¾, Illinois Central (shares) further 1½, and United States (5-20) further 1½. In mines, Great Wheal Vor declined ½, and Frontino Gold improved ¼.

THURSDAY, Dec. 28.—In the share market to-day, being the preparation for the settlement, the transactions were chiefly for the account, and the closing quotations in English railways and banks were rather higher in some instances, but in foreign and miscellaneous shares the tendency was slightly adverse. Of the English lines, South-Eastern recovered 1½, North-Western ¾, Metropolitan ½, and Lancashire and Yorkshire and Midland ¼ each; and North Staffordshire improved 1, and Caledonian ½. In colonial, Bombay and Central India recovered ½; and Great Western of Canada (6 per cent. bonds) declined 1, ditto (shares of both descriptions) a further ⅛ each, Grand Trunk of Canada a further ½, and ditto (4th preference) ½. In foreign, Mexican declined 1½, Dutch-Rhenish ⅜, and Great Luxemburg and Lombardo-Venetian a further ⅛ each. In American, United States (5-20) recovered ½, and Erie shares (paid up) declined a further ¼, and ditto (debentures) ½. In mines no alteration occurred.

FRIDAY, Dec. 29.—The dealings in British railway securities were upon a limited scale, and prices generally showed no variation compared with those last current yesterday. South-Eastern stock, however, was in strong demand, and experienced a fresh rise of 1¼ per cent.

TO GENTLEMEN SEEKING preparation for Woolwich, the Civil Service, and the Line.—A Graduate of Oxford, who has had long experience in preparing for the competitive and University examinations, and has three students at present, wishes to receive two more. Delightful situation, great educational and domestic advantages, and moderate terms.—Address, L. L. D., 9 Leighton rescent, Tufnell park West, N.W.

A FATHER'S NEW YEAR'S GIFT TO HIS SON.

Price 2s 6d, printed on tinted paper, handsomely bound, with gilt edges,

THE ECONOMY OF LIFE, AND PATIENT BOYS.

EXPLANATION.

Animated by a desire to further the interests of the young, and encouraged by private opinion and by the powerful voice of the Press, which affirm that the "ECONOMY OF LIFE" and "PATIENT BOYS" (two works which inaugurate "MY LIBRARY") are admirably adapted to stimulate youth to exertion and awaken in them a laudable ambition * * * "that the 'ECONOMY OF LIFE' is an invaluable practical Guide for youth," * * * "that the advice and illustrations and reflections given make it a multum in parvo of moral instruction of a marvellous nature," * * * "that the maxims for the Government of Life, with practical illustrations, cannot fail to be highly profitable to the young, and that adults may benefit largely by their perusal," * * * "that the advice and illustrations are equally apt and conclusive, and calculated to have a life-long influence upon our children," * * * "that we heartily commend these books to parents and preceptors, deeming them well adapted to influence to most excellent ends all who may study them," * * * "that it is seldom that so much good sense is seen in so small a compass," * * * "that the author does not lecture his pupils, but endeavours to entice them into the good path which shall lead them to honour and respect," * * * "that kindness and good feeling run like veins of gold through every story," * * * "that every page is studded with useful and genial hints and encouraging advice to young men," * * * "that the 'ECONOMY OF LIFE' and 'PATIENT BOYS' must prove a boon to the rising generation."—Encouraged by such powerful voices, and by private opinion that if the "ECONOMY OF LIFE" and its companion, "PATIENT BOYS," were produced in a neat form they would be useful on the drawing-room table for casual perusal, as well as on the shelves of the library for a book of reference, we have been induced to reprint them, and place within moderate reach a handsome volume as a New Year's Gift from a FATHER to a SON, a GUARDIAN to his WARD, or a SCHOOLMASTER to his PUPIL.

EDITOR.

Ward, Locke, and Tyler, 158 Fleet street.

PRACTICAL OBSERVATIONS on the CAUSES and TREATMENT of CURVATURES of the SPINE. Third edition, price 6s.

AND

Just published, second edition, price 1s 6d,

CASES and OBSERVATIONS illustrative of the beneficial results which may be obtained by close attention and perseverance, in some of the most unpromising instances of Spinal Deformity; with numerous Engravings. By SAMUEL HARE, F.R.C.S., &c.

"We unhesitatingly commend this work as a truthful and trustworthy statement of the power of scientific surgery and medicine over some of the most grievous hindrances to human activity and industry."—MEDICAL GAZETTE.

"Mr Hare is, we think, a sound and successful practioner."—MEDICAL CIRCULAR.

"The author has had much success in his plan of treatment, and we are of opinion that the principles on which he acts, in the treatment of these affections, are correct."—LANCET.

"Mr Hare may take credit to himself for having effected much good in the treatment of the cases described."—BRITISH MEDICAL JOURNAL.

London: John Churchill; and may be had of all booksellers.

WHERE SHALL WE DINE? Go to DEACON'S COFFEE HOUSE, WALBROOK, where the "Economist" and all other newspapers in the world are taken in and file. Directories for every county in England, also for Canada and Australia. Advertisements inserted in any papers English or foreign.—Wm. Howell, proprietor.

N.B.—Lists of Heirs at Law, Next of Kin.

FORD'S EUREKA FLANNEL SHIRTS, made from the very finest Australian wool, 10s 6d each, the exact same quality as usually sold at 12s 6d and 13s 6d. A quantity of new patterns, either woven or printed, many exclusively our own, and not to be obtained elsewhere. Country residents should write for the patterns, the Illustrated List, directions for self-measurment, and have three shirts or more sent carriage free.—38 Poultry, London.

DEANE'S TWO-HOLE BLACKPENS which are unequalled for the durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped,

"G. and J. Deane, London bridge,"

and the ox, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed,

"G. and J. DEANE'S Two-Hole Black Pens, 46 King William street, London bridge."

PROPRIETARY SCHOOL, GRAVESEND.

Head Master, Mr M. GUTTERIDGE, B.A.

The course of study combines the main features of the best middle schools with the distinctive characteristics of our ancient classical schools, and is such as to fit a boy either for business or professional life. It includes the Classics and Mathematics; History, General and Sacred; Geography, Physical and Political; English Grammar and Composition, Spelling and Arithmetic, Drawing and French and the practice of good Handwriting.

Pupils are prepared for the Civil Service Examinations, for the Oxford and Cambridge University Local Examinations, and for Matriculation at the London University.

For terms and prospectuses, apply at the School.

Just published, 1s., Illustrated, Second Edition

THE HEAD AND HEART LEGACY.

"Possessed of a Head, and a Heart, and a business education, I should not be grieved did circumstances compel me to take thee by the shoulder, pat thee on the back, bless thee, put £50 in thy pocket, and say to thee, Go, my son, thou art a rich man, wherever thou goest prosperity will be in thy track.'"—HEAD AND HEART LEGACY.

OPINIONS OF THE PRESS.

The book is clear and simple, highly moral in tone, and most encouraging to the young aspirant. It is interesting as a biographical sketch of a life struggle, and contains many observations on men and manners which it would be profitable for every one to know who has the least ambition or desire of having a soul above his buttons, and a good account at the bank."

"This is a work quite sui generis. It is quaintly written, but is full to an overflow of the wisdom of experience and the impulse of virtue. To all who have 'heads and hearts' we commend this singular 'legacy.'"

"The author of this legacy has put together some very touching stories of his chequered life intending to stimulate the rising generation to good conduct and honourable dealing, by showing how an untaught boy rose step by step to a high position. He enjoins patience and vigilance, honesty and sobriety, in every path of life, and teaches what is so little practised—that a man should do what his hands find for him to do. The lessons are alike honourable to the head and heart of the writer."

"Besides the autobiographical sketch, Pamphilius supplies a variety of spirited literary specimens, the principal of which, however, is an ingenious manual of French Grammar, as used by the author when teacher of the French language, designed for the use of self-instruction."

Any one acquainted with the current literature of the metropolis, or its littérateurs, will have no difficulty in identifying the author of this interesting volume. The pages abound with sensible observations, attention to which will be found absolutely necessary to gain even a moderate share of success in this busy world of oars."

Ward, Lock, and Tyler, 158 Fleet street; and all booksellers.

KEATING'S COUGH LOZENGES.—A safe and certain remedy for Coughs, Colds, Hoarseness, and other affections of the Throat and Chest. In Incipient Consumption, Asthma, and Winter Cough they are unfailing. Being free from every hurtful ingredient, they may be taken by the most delicate female or the youngest child; while the Public Speaker and Professional Singer will find them invaluable in allaying the hoarseness and irritation incidental to vocal exertion, and also a powerful auxiliary in the production of melodious enunciation.

Prepared and sold in boxes, 1s 1½d, and tins, 2s 9d, 4s 6d, and 10s 6d each, by Thomas Keating, Chemist, &c., 79 St Paul's churchyard, London. Retail by all Druggists and Patent Medicine Vendors in the World

Digitized by Google

FLUTES.—THE NEW MODEL

FLUTE (old fingering), for beauty and volume of tone unsurpassed, 3½ gs. and 7 gs. Also a Rudall and Co.'s Prize Medal Flute, about half cost, at Messrs KEITH, PROWSE, and CO.'s manufactory, 48 Cheapside. Just published, Rockstro's "Hints to Flute Players," price 6d.

CONCERTINAS.—AT MESSRS

KEITH, PROWSE, and CO.'s manufactory, 48 Cheapside, may be found, CONCERTINAS, which, for quality and durability, have proved by their long use in India and other extreme climates to be unsurpassed. Prices, first-class, 5 to 15 guineas. Ordinary concertinas two guineas.

HARMONIUMS, BY ALEXANDRE.

—The new church Harmonium, with stops and knee pedals, Venetian swell, and four rows of vibrators, is now being introduced (price 24 guineas, packed and delivered at any London railway station) by the city agents, Messrs KEITH, PROWSE, and CO., 48 Cheapside.

MUSICAL BOXES, BY NICOLE,

FRERES.—Messrs KEITH, PROWSE and CO., direct importers, offer parties seeking really fine, well-tuned Instruments a selection of more than 200 boxes, with all the recently-introduced improvements, from four guineas. The new boxes, with accompaniment of flutes, bells, and drum, should be heard to be appreciated, as the expressive effects upon the ear are exceedingly novel and beautiful.—48 Cheapside.

THE ORGAN ACCORDION

has two rows of vibrators, organ keyboard, three octaves, and is as easily played as the accordion. Any pianist can perform upon it without study. Price from 4 guineas.—KEITH, PROWSE, and CO., 48 Cheapside

ENTIRE DESTRUCTION BY FIRE

OF COMPTON HOUSE, LIVERPOOL.

An immense square block of buildings, formed by one side of Church street, Basnett street, Tarlton street, and Leigh street, containing extensive Drapery, Jewellery, Ship Outfitting, House Furnishing, Cabinet Furniture, and other Departments, of the value of £300,000, entirely destroyed to the bare walls, with the exception of the Seven MILNERS' SAFES, which brought the Books Jewellery, Cash, Deeds, and other valuables almost unscathed out of the terrific pandemonium. For particulars see Liverpool papers of December 4th, 1865.

MILNERS' PHŒNIX SAFE WORKS, Liverpool;
47 Moorgate street, City, London;
28 Market street, Manchester
30 Queen street, Hull.

BURGLARY IN MANCHESTER.

TOWN HALL, MANCHESTER, May 31st, 1864.

Gentlemen,—I am instructed by Sir E. Armitage, the Chairman of the Waterworks Committee, to inform you that your Patent Strong Holdfast Safe (supplied by you about ten years ago, for the custody of the cash in the Waterworks Office, at the Town Hall) successfully resisted the attacks of burglars on Friday night last. It is believed that the thieves must have been at work for many hours, as they left several broken instruments behind them. A locksmith was empolyed for upwards of five hours on Saturday in trying to open the Safe, in which he broke and spoiled all his tools, and, after repairing them, he only succeeded in doing so after upward of four hours' additional work on Monday, when the valuable contents of the Safe were found perfectly secure.—I am, Gentlemen, yours respectfully,

T. H. G. BERREY.

Messrs Thos. Milner and Son, Phœnix Safe Works, Liverpool.

NORTH-EASTERN RAILWAY.—

FOUR-AND-A-HALF PER CENT. PREFERENCE STOCK, 1865.

The Directors are prepared to issue at par further amounts of the above stock.

Allotments will be registered in the Company's books free of expense, and interest will commence from the date of payment of the money.

Further information may be obtained from the Secretary, to whom applications are to be sent.

J. CLEGHORN, Secretary.

York, December, 1865.

METROPOLITAN DISTRICT

RAILWAY COMPANY.

Notice is hereby given, that the interest at the rate of 6 per cent. per annum will in future be paid half-yearly, on the 1st January and 1st July.

On Monday, the 1st of January next, the proportion of interest accruing since the 18th September last will be paid at the office of the Registrar of the Company, 27 Austinfriars.

Provisional Scrip Certificates to bearer must be forwarded to the Registrar at the above office, in order that the dividend warrants may be duly prepared.

F. RITSO, Registrar.

27 Austinfriars, E.C.

EAST LONDON RAILWAY

COMPANY.

The INTEREST PAYABLE by the Contractors on the shares and scrip of this Company for the HALF-YEAR ending 28th December inst., will be PAID on and after the 5th January.

Interest warrants will be forwarded to the registered proprietors. The holders of scrip will be required to lodge their certificates, accompanied by receipts for payments thereon, with the registrar, at the offices of the Company, 26 Old Broad street, London, E., three clear days prior to payment.

The transfer books will be closed from the 28th December to the 4th January, both days inclusive.

J. B. DAVISON, Registrar.

London, Dec. 20, 1865.

AMERICAN RAILROAD AGENCY,

Established for the SALE of First-class AMERICAN RAILWAY SECURITIES, and to offer information acquired by frequent visits to America relative to United States and Canadian Railways. Atlantic and Great Western Railway Mortgage Bonds may be had in amounts from £100 sterling and upwards, with Interest Coupons, payable quarterly, the present price paying nearly £9 per cent. per annum on the sum invested. These Bonds are a safe investment, and full particulars may be had on application.

WILLIAM LANCE, Actuary.

26 Throgmorton street, London, E.C.

AMERICAN RAILWAYS.—LETTER

No. 2.—NEW YORK CENTRAL RAILWAY. This letter gives a full account of the working of the New York Central Railway, the Oil Wells of Pennsylvania, and the Coal Fields of Ohio, as showing the value of the oil and coal traffic upon the Atlantic and Great Western Railway, free on application to William Lance, Actuary and Dealer in American Railway Securities, 26 Throgmorton street, London, E.C.

If sent by post a cheque for the amount will be remitted.

5 Westminster chambers, Victoria street,
Westminster, Dec. 16, 1865.

ATLANTIC AND GREAT

WESTERN RAILWAY.

NOTICE TO BONDHOLDERS.

In conformity with the terms on which the First Mortgage Bonds of the Pennsylvania section of this railroad were issued to the public, the Third Annual Drawing of 4 per cent. of the gross amount of these Bonds will take place at the office of Messrs E. F. Satterthwaite and Co., 38 Throgmorton street, in the presence of Mr Grain, Public Notary, on THURSDAY, January 18, 1866, at ONE o'clock precisely.

The authorised issue is as under, viz.:—

				dols.
2,000	bonds of 1,000 dols each.....			2,000,000
600	—	500	—	300,000
2,000	—	100	—	200,000
				2,500,000

Four per cent. of each denomination will be drawn on the above day, and the bonds so drawn that have been issued in London, will be paid off at the rate of £225 for every 1,000 dol bond; £112 10s for every 500 dol bond; and £22 10s for every 100 dol bond, on presentation at the Company's office, 5 Westminster chambers, Victoria street, Westminster, on and after 2nd April next, in addition to the coupon due on that day, after which all interest will cease.

On payment the drawn bonds will be cancelled in the presence of a public notary.

Offices, 5 Westminster chambers, Victoria street, Westminster.

DR DE JONGH'S

(Knight of the Order of Leopold of Belgium)

LIGHT-BROWN COD LIVER OIL,

Prescribed by the most Eminent Medical Men as the safest, speediest, and most effectual remedy for

CONSUMPTION, CHRONIC BRONCHITIS, ASTHMA, COUGHS, RHEUMATISM, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS,

Is incomparably superior to every other kind.

Dr EDWARD SMITH, F.R.S., Inspector of Poor Laws, Late Physician to the Hospital for Consumption and Diseases of the Chest, Brompton, in his Work on "Consumption," writes: "It is impossible in private practice to determine whether the Oil which we prescribe is genuine Cod Liver Oil or not, and hence we think it a great advantage that there is one kind of Cod Liver Oil which is universally admitted to be genuine—the Light Brown Oil supplied by Dr de Jongh."

Dr BARLOW, Senior Physician to Guy's Hospital states: "I have frequently recommended persons consulting me to make use of Dr de Jongh's Cod Liver Oil. I have been well satisfied with its effects, and believe it to be a very pure oil, well fitted for those cases in which the use of that substance is indicated.

Sold only in capsuled Imperial Half-Pints, 2s 6d; Pints, 4s 9d; Quarts, 9s; by respectable chemists.

Sole Consignees,

ANSAR, HARFORD, and CO., 77 Strand, London, W.C

KEATING'S PALE

NEWFOUNDLAND COD LIVER OIL. The Finest Imported this Season.

This VALUABLE MEDICINE having of late years come into such general use, and being, moreover, so extensively prescribed by the most eminent practitioners both in town and country. Mr Keating can with the greatest confidence recommend this Oil as being perfectly pure, nearly tasteless, and free from adulteration, having been analysed, reported on, and recommended by Professor Taylor, of Guy's and St Thomas's Hospitals, Dr Scott, M.D., L.R.C.P., F.L.S., &c., and Dr Edwin Payne, M.D., L.R.C.P., M.R.C.S., who, in the words of the late Dr Pereira, says that "The best Oil is that which is most devoid of colour, odour, and flavour, characters this will be found to possess, being purely of hepatic origin, a point of great weight with regard to its therapeutic value."

Sold in half-pints, 1s 6d; pints, 2s 9d; quarts, 5s; and five-pint bottles, 12s 6d, imperial measure, by Thomas Keating, Chemist, 79 St Paul's churchyard, London.

Frederick C. Jones, Esq., M.D., Blackfriars.
William Kemp Esq., (Thos. Kemp and Sons), Spital square.
John Rossall, Esq, Dury house, Hadley.
George Walter, Esq., Havelock house, Twickenham.
John Werret, Esq., Temple and Clapton.
(With power to add to their number.)

BANKERS.

Messrs Barclay, Bevan, Tritton, Twells, and Co.

SOLICITOR.

James J. Blake, Esq. (Messrs James J. Blake and Son), No. 5 Arthur street east, London bridge, E.C.

BROKERS—Messrs Brunton and Son, 32 Cornhill.

GENERAL MANAGER AND SECRETARY.

Samuel J. Shrubb.

UNDERWRITER—Arthur Briscoe Nash.

DEPUTY-MANAGER — George F. Argles.

AGENTS.

For China and Japan—Messrs Lyall, Still, and Co.
Bombay—Messrs Stenhouse and Co.
Madras—Messrs Dymes and Co.

The Directors of the Hercules Fire and Life Insurance Company (Limited), considering it highly conductive to the prosperity of the undertaking to add thereto a Marine Insurance branch, find it legally necessary that the old old Company should be merged into a new Company, styled The Hercules Insurance Company (Limited), for the transaction of Fire, Life, and Marine business.

The Hercules was established in 1863 as a Fire and Life Insurance Company, and has received the most unqualified support of the mercantile community. The claims to November 1st, 1865, have only amounted to £5,620 0s 2d.

The original capital of 200,000 shares was fully subscribed, and by the successful working of the Company no call has been made upon the shareholders.

A valuation of the existing business has been made by W. S. B. Woolhouse, F.R.A.S. (Vice-President of the Institute of Actuaries), and upon that valuation it is proposed that the newly registered Company shall take over the assets and liabilities of the old Company on payment of a premium of £10,000, the original shareholders accepting for the premium and assets, paid-up shares in the new Company.

Although the Directors have often been requested by their constituents to open a marine branch, they have felt unwilling to comply until fully satisfied of the unequivocal success of the fire and life departments; this being undoubted, they do not now consider themselves as entering upon any speculative field of action.

The Directors have entered into arrangements which, when carried out, it is believed, will secure an income of over £50,000 per annum from marine premiums.

The advantage of conducting the business of the three great departments of insurance, fire, life, and marine, under one management is obvious.

In the conduct of the marine department the Directors will confine their operations to the insurance of merchandise, freights, &c., experience having shown this to be the most profitable part of the business.

The great wealth of the several old companies transacting fire, life, and marine, and the marked success of the purely marine companies, both ancient and modern, warrant the Directors of the Hercules Insurance Company in the belief that a large dividend may be anticipated.

The present value of this class of property is evidenced by the following table:—

Name.	Established.	Share of	Paid up.	Present Prices.	Div. paid per cent.
		£	£ s d	£ s d	
Indemnity	1824	110	5 13 4	151 0 0	30
Marine.....	1836	100	15 0 0	90 0 0	44
Ocean	1859	25	5 0 0	20 0 0	25
Thames and Mersey	1860	20	2 0 0	8 0 0	20
London and Provincial ...	1860	20	2 0 0	3 0 0	10
British and Foreign	1863	20	2 0 0	4 10 0	10

That there is ample room for the further development of the joint stock principle, as applied to marine insurance, full proof is given by the continuous expansion of our trade, by the fact that so much marine insurance is effected by private underwriters, and by the preference shown for a company's policy, where the subscribed capital is a guarantee understood and appreciated by bankers and the mercantile world.

The subjoined table will show an annual insurable interest in imports and exports, nearly approaching five hundred millions sterling, to which may be added the imports and exports of specie, which have exceeded one hundred millions the last two years.

Imports.	£	Exports.	£
1859	178,825,000	1859	138,440,000
1860	211,414,000	1860	135,843,000
1861	217,108,030	1861	125,115,000
1862	226,692,000	1862	124,138,000
1863	248,980,000	1863	146,486,000
1864	269,246,000	1864	190,436,000

When it is understood that the greater proportion of these vast sums are assured in London, some idea may be formed of the necessity for creating new capital, to guarantee this constantly increasing business, and also of the immense revenue derivable by underwriters, from the commerce of the United Kingdom.

It is anticipated that not more than £2 per share will be required for the efficient working of the Company, viz.:—£1 deposit and £1 on allotment.

The Directors wish it to be clearly understood, that they will only commence the marine branch in the event of the necessary capital being applied for, and that, should no allotment be made the sum paid as deposit will be returned to the applicant in full.

A copy of the articles of association may be seen at the offices, No. 25 Cornhill, and at the offices of the solicitor of the Company.

Applications for shares may be addressed to the bankers, brokers, financial agents, or secretary, and must be accompanied by a deposit of £1 per share.

FOUR HUNDRED THOUSAND POUNDS MAURITIUS GOVERNMENT SIX per CENT. LOAN,

authorised by an Ordinance passed by the Governor in Council on the 30th May, 1864, and since confirmed by the Crown, for the completion of the Government railways in the island of Mauritius. To be raised by the issue of debentures or registered stock, at the option of lenders, secured on the general revenues and assets of the colony, of which the railways themselves, now approaching completion, form valuable portions.—Her Majesty's Principal Secretary of State for the Colonies having directed the undersigned to negotiate, on behalf of the Government of Mauritius, the Loan authorised by the Ordinance above cited, they hereby give notice, that they will be prepared to receive Tenders until 1 o'clock p.m. on Tuesday, the 9th January proximo, for DEBENTURES and REGISTERED STOCK, solely or jointly, to the extent of £100,000, being the last instalment of the Loan.

The debentures will be transferable by delivery, and the stock by deed of transfer, and either will be exchangeable for the other at par, at any time, at the option of the holder, upon conditions which may be known on application to the undersigned.

The debenture bonds and the stock certificates with half-yearly dividend coupons, payable to bearer, attached to each, will be issued in sums of £1,000, £500, £200, and £100, to suit purchasers, but no fractional part of £100 will be created, or subsequently dealt with, in either of these securities.

The principal will be repaid by means of a sinking fund in 30 years from the date of issue, and interest at the rate of six per cent. per annum, commencing from 15th January, 1866, on both debentures and stock, will be paid on the 15th of February and 15th of August in each year.

Principal and interest will be made payable either at the offices of the agents for the Loan in London, or at the Public Treasury in Mauritius, as the lender may select at the time of allotment.

Applications in accordance with the annexed form, addressed "Tender for Mauritius Loan," will be received by the undersigned until 1 p.m. on the 9th January, and then opened at their offices, in the presence of such of the applicants as may be pleased to attend.

The highest tenders will be accepted, whether for debenture or stock, provided the rates offered are not below the minimum, which will be placed in a sealed paper on a table before the tenders are opened.

Tenders at a price including a fraction of a shilling other than sixpence will not be accepted, and in the event of an equality of tenders beyond the amount to be disposed of, a pro rata distribution on such tenders will be made.

Five per cent. of the purchase money must be paid into the Bank of England on the 10th January, and the balance on the 20th of the same month.

Scrip certificates will be issued to purchasers on the production of the Bank receipts for the money, and these will, as soon as possible, be exchanged for Debenture Bonds or Stock Certificates, in accordance with the allotments that may have been made.

Forms of tender may be had on application to the undersigned agents for the Loan.

PENROSE G. JULYAN, } Crown Agents
W. C. SARGEAUNT, } for the Colonies.

Offices of the Crown Agents for the Colonies, Spring gardens, London, S.W., December 27, 1865.

FORM OF TENDER.

To the Crown Agents for the Colonies, Spring gardens, London.

Gentlemen,—I hereby tender for the following portion of the Mauritius Government Six per cent. Loan, authorised by Ordinance No. 15 of 1864, subject to the conditions contained in your advertisement of the 27th December, 1865, viz.:—

Debentures to the extent of £ , for which I undertake to pay at the rate of £ for every £100 in debentures; or registered stock to the extent of £ for which I undertake to pay at the rate of £ for every £100 in registered stock.

London, Nov. 25, 1865.

HOLDERS OF UNCONVERTED TURKISH CONSOLIDIES, &c.,

are hereby reminded that this day Saturday the 30th December is the last day on which the same will be received for CONVERSION into the 5 per Cent. General Debt of the Ottoman Empire.

JAMES MACDONALD, General Manager.

General Credit and Finance Company of London (Limited.) 27 Austinfriars, December 30th, 1865.

GENERAL DEBT OF THE OTTOMAN EMPIRE. CONVERSION OF THE OLD INTERNAL DEBTS.

The public are informed, that the period during which Consolidés and other Turkish Internal Bonds are received for conversion into the 5 per Cent. General Debt of the Ottoman Empire has been extended, on the original terms, to 31st December, after which date the conversion will be definitively closed.

The terms of exchange are at present as follows for Consolidés of the 1st, 2nd, 3rd, and 4th issues:—

For Bonds of £100 Turkish Money, there will be given in exchange Bonds of the General Debt for £121 Turkish Money, equal to £110 sterling, giving at 5 per cent. an Annual Interest of £5 10s sterling, payable in London; or 137½ francs payable in Paris, Amsterdam, or Frankfort.

Notice is likewise given to holders of converted (stamped) Consolidés, in London only, that they can receive New 5 per Cent. Bonds, in exchange for any of the former bearing within the entry stamp any List No. between 1 and 1,365, or for conversion receipts bearing any such number.

Lists can be had at the offices, open for such business on Mondays and Thursdays only, from 11 to 2.

For the General Credit and Finance Company of London (Limited), Agents for the Contractors,

JAMES MACDONALD, General Manager.

Virtue Brothers and Co., Amen corner. London.

"MY LIBRARY."

Edited by PAMPHILIUS.
SIXPENNY VOLUMES.
Each Volume complete in itself, uniform in size, and neatly bound, with Ornamental Wrapper.

The object of "MY LIBRARY" is to direct the attention of young men to LITERATURE of a higher standing than that generally published at so low a price—to provide them with a CHEAP, NEAT, PRACTICAL, and PROGRESSIVE LIBRARY, calculated to stimulate to INDUSTRY, ENERGY, PERSEVERANCE, and SELF-DENIAL, for with these virtues there is no eminence to which a man may not aspire, and from the examples deduced he will perceive that a truly enviable reputation is only to be acquired by independency of character, by honesty, consistency, and by spotless integrity, both in public and in private life.

"MY LIBRARY" will be devoted to PRACTICAL and PROGRESSIVE KNOWLEDGE—will be a MIRROR of LITERATURE, SCIENCE, and ART—a multum in parvo—the condensation of the primary aspirations of the great, the good, and practical, whose examples are calculated to engender and animate virtue, to create emulation, and teach the RISING GENERATION to struggle, to endure, to conquer difficulties, or in failure—

"To arm the obdurate heart
With stubborn patience and with triple steel."

"MY LIBRARY" will also be a Magazine of Reference, an INDICATOR to the youthful mind in the choice of books—for the choice of books, like the choice of companions, either tends to ELEVATE or DEGRADE, as books give the same turn to our thoughts and reasoning that GOOD COMPANY does to our conversation.

POPULAR AUTHORS
Will be Engaged upon "MY LIBRARY."

Now Ready.

I.

THE ECONOMY OF LIFE:
SELF-HELP TO PRACTICAL AND PROGRESSIVE KNOWLEDGE.

II.

PATIENT BOYS,
AND HOW BY PATIENCE THEY BECAME GREAT MEN.

III.

In the Press.

GENIUS AND WRITINGS OF
A POPULAR NOVELIST,

OPINIONS OF THE PRESS.

....."If succeeding volumes are as well handled and as pertinent to their subjects as the two before us, the work, as a whole, is certain to become popular. As a proof of our own appreciation, we cordially recommend 'My Library' to the notice of our readers, and all who have youths to instruct."—ERA.

....."Pamphilius, by the issue of this thoughtful little series of volumes, can hardly fail to win the respect of his readers, or to earn more and more widely their attention and encouragement."—SUN.

....."The wisdom of the ancients is here pleasantly served up, and precepts of golden value preserved to refresh the memory and guide the conduct of man, for 'a precept that has taken root in the heart may change the whole current of man's life.' Youth, as the age for improvement, is especially admonished and addressed. 'The seed of divinity is sown within us, and if the mind is well cultivated the fruit will answer the original: if not, like the nettle, it will run to weeds."—MORNING ADVERTISER.

John Murray, Albemarle street.

Nearly ready. 8vo,

NON-INTERVENTION versus INTERVENTION; or, the Foreign Policy of Great Britain from 1760 to 1865.

By A. G. STAPLETON,
Author of "George Canning and his Times."
John Murray, Albemarle street.

This day is published, 8vo, 6s,

THE IDEAS OF THE DAY ON POLICY.

By CHARLES BUXTON, M.A., M.P.
From 'The Spectator.'

"Let any one who thinks that the old battle between Liberal principles and Tory principles may have been fairly fought out in England without fear of revival, look at Mr Charles Buxton's able and striking array of the conflicting principles of policy still at work in the English mind on all political subjects, and then he will see how little sign there is of any final and absolute agreement even amongst Lord Stanley's favourites—sensible men of moderate opinions—as to the true motives of political action."—SPECTATOR, Dec. 1865.

John Murray, Albemarle street.

BUCKLE'S HISTORY OF CIVILIZATION.

Literature.

THE JOURNALS OF JOHN McDONALD STUART, DURING THE YEARS 1858, 1859, 1860, 1861, and 1862. WHEN HE FIXED THE CENTRE OF THE CONTINENT AND SUCCESSFULLY CROSSED IT FROM SEA TO SEA. Edited from MR STUART'S Manuscript, by WILLIAM HARDMAN, M.A., F.R.G.S. Saunders Otley and Co., 66 Brook street.

MR STUART accounts for the delay in the publication of these Journals by the serious illness that followed his long-continued exertions in the cause of Australian discovery. We are not sure that they have not gained rather than lost by this delay; and by the industry of interested parties in collecting "scraps of information," of which he justly complains. His explorations do not now, it is true, come upon us with the absolute novelty which they might have worn if he had himself forstalled all other sources of information; but, on the other hand, a bare outline of travels such as his, through a country believed to be all but impassable, and the examination of which is certainly beset with difficulties that may well daunt the boldest explorer, only serves to quicken the desire for fuller particulars,—for a more complete knowledge of those minor details that give life and completeness to our conceptions both of the magnitude and importance of the undertaking, and of the claims of the explorer upon our admiration and gratitude. Mr McDonald Stuart's Journals are all that can be desired; simple, forcible, minute without being prolix, aud full of matters of extreme interest, they are only less striking, because happily, less tragic in their end, than those of his predecessors in crossing the Australian Continent, Burke and Wills.

Mr Stuart gained experience in that art of which he has proved himself a master,—the by no means easy art of conducting exploring expeditions in such a land as Australia, under Captain Sturt in 1844. "In this expedit on," writes Mr Hardman in his preface (which, by the by, would have been better if written in a less laudatory tone), "for six months no rain fell; the heat of the sun was so intense that every screw in their boxes was drawn, and all the horn handles and combs split into fine laminæ. The lead dropped from their pencils, their finger nails became as brittle as glass, and their hair and the wool on their sheep ceased to grow. Scurvy attacked them all, and Mr Pool, the second in command, died. In order to avoid the scorching rays of the sun, they had excavated an underground chamber, to which they retired during the heat of the day."

In 1858 Mr Finke (whose name as well as that of Mr Chambers will be always honourably associated with the discoveries they promoted) supplied the means for Mr Stuart's first independent attempt. On this journey he visited the lands to the North-west and West of Lakes Torrens and Gairdner. Here he came upon some good grass lands, but the greater part, especially as he neared the Southern coast, consisted of a "dreadful dreary dismal desert of heavy sand hills and spinifex with mallee very dense, scarcely a mouthful for the horses to eat." This pleasant land was interspersed with salt lakes. Fresh water could only be found at long intervals, and it was with the utmost difficulty that Mr Stuart and his one companion reached the nearest settlement. In the last hundred miles they had only two meals of flour cake, eked out with a few shell fish, some sow thistles and pig-faces (a species of mesembryanthemum) all that the hospitable district offered to its visitors. The scarcity of animal life, indeed, is a marked and unpleasant feature in Australian travelling. The narrow escape of Mr Stuart on this occasion seems to have made a deep impression upon him, for in all his subsequent expeditions we find in him, in a marked degree, that forethought, caution, and fertility of resource in times of difficulty, that are so necessary when leading parties of inexperienced men through unknown and difficult regions.

In the two following years Mr Stuart turned his attention to preparatory investigations before attempting his prime object of ambition—the crossing of the Continent from South to North. He found the country to the North of Lake Torrens well watered with springs and fertile; well adapted for sheep farms, and in some districts, showing indications of gold in quartz rock. This part of Australia had been previously visited by Major Warburton, who has described what Mr Stuart truly calls one of those "remarkable hills that form another strange feature of the mysterious interior." This hill is one hundred feet high above the plain, its top is covered with fine springs of water. Of another set of springs discovered by himself, Mr Stuart says: "There is enough water running to drive a flour mill in two or three places. They are really remarkable springs, such a height above the level of the plains.....From whence do they derive their supply of water to cause them to rise to such a height? It must be from some high ranges to the North-west, or a large body of fresh water lying on elevated ground."

Neither of these suggestions was confirmed by Mr Stuart's personal examination of the North-western regions. As far as he could penetrate, the mountain ranges were, on the whole, insignificant, and the water confined to small lakes, or rather chains of ponds, few of which were permanent; and to springs whose waters were either swallowed up at once, or, after flowing a short distance, were sooner or later absorbed by the soil of the plains. This result continually frustrated Mr Stuart's hopes of finding a permanent stream leading northwards to the Indian Ocean, before reaching the banks of the river Adelaide.

The plains into which these creeks empty themselves "are large boggy swamps with no surface water,"—or "open plains of black alluvial soil covered with grass with deep holes and cracks" and in parts covered with luxuriant forests. If well cleared and drained this land might prove valuable, but the labour required would be immense.

The water that is thus sucked up by the interior levels is given out again near the north shore in a series of springs that make the approach to the ocean very difficult from the extensive bogs they create. Burke could not reach the Gulf of Carpentaria for this cause, and it was only by the greatest determination and skill that Stuart led his party through the treacherous morasses and across the wide and deep creeks that border the mouth of the Adelaide. Of this tract of country he, however, says: "I have no hesitation in saying that the country I have discovered on and around the banks of the river Adelaide is more favourable than any other part of the continent for the formation of a new colony. The soil is generally of the richest nature ever formed for the benefit of mankind, black and alluvial, and capable of producing anything that could be desired, and watered by one of the finest rivers in Australia. This river was found by Lieutenant Helpman to be about four to seven fathoms deep at the mouth, and at one hundred and twenty miles up (the furthest point he reached), it was found to be about seven fathoms deep, and nearly one hundred yards broad, with a clear passage all the way up..... .The grass is in many places growing six feet high, and the herbage is very close." Timber is large and abundant; "there is also a plentiful supply of stone on the low rises suitable for building purposes .....The river abounds in fish and waterfowl of all descriptions.. .....I feel confident that if a new settlement is formed in this splendid country, in a few years it will become one of the brightest gems in the British Crown." The advantages such a settlement offers as a trading station with the Indian Islands is another point dwelt upon by our author. No obstacle, beyond the want of permanent water (and this could be met by the expedient of digging wells along the route), lies in the way of a regular intercourse between the new colony and the already settled districts. It seems more doubtful whether the interior plains can ever be made extensively available for agriculture or sheep farming. The want of regularity in the rain-fall, the long droughts and the occasional heavy floods will prove serious disadvantages to settlers. In the year 1802, no rain fell for twelve months in those central and North of central regions traversed by Mr Stuart; while at the same time in many places the land was so torn by past rains as to present the appearance of ploughed fields after an inundation. Sheep farmers on the Eastern coast are often severely tried by the long-continued droughts, but what they experience is as nothing to those that, apparently, afflict the interior country.

On his fourth journey Mr Stuart,—starting from the most Northern boundary point of his former expedition,—endeavoured to effect a junction between his own discoveries and the known—but imperfectly known—country about the River Victoria on the North-west coast. He reached the centre, and had proceeded nearly two hundred miles beyond, when the hostile appearance of the natives and the reduced strength of his party forced him to return. This was the only occasion on which the natives showed a formidable front to the invaders. They usually contented themselves with dogging their footsteps, laying in wait about their camping places, and firing the grass around them. It would seem, however, that the inhabitants of the central lands are a far superior race to either those of the Northern shore, or those in the more immediate neighbourhood of the settled parts.

"When Mr Stuart reached Adelaide in October, 1860,"—writes Mr Hardman, in one of those running commentaries by which he connects the several Journals into a consistent whole,—"bringing with him the intelligence that he had penetrated as far as the eighteenth degree of South latitude, and had only been forced to retreat by the hostility of the natives,—the South Australian Parliament voted a sum of 2,500*l* for a larger, better-armed, and more perfectly organised party, of which he was to be the leader." After one month's interval, Mr Stuart again started on his previous tracks; he reached and passed in safety the scene of his former discomfiture. The country was now hilly and well supplied with water-courses, while from North-west to North is a large open plain with scarcely a tree upon it. On leaving our last night's camp we passed over three miles of the plain, which is subject to inundation. There are numerous nasty holes in it, into which the horses were constantly stumbling. It is covered with splendid grass, and is as fine a country as I have ever crossed. These plains I have named "Sturt's Plains," after "the venerable father of Australian exploration." These plains, he tells us, have evidently at one time been the bed of a fresh water lake. Beyond the plains were "sandy rises covered with dense scrub"; stretches of black alluvial soil rotten and cracked, not a creek nor watercourse to be seen. On every side did Mr Stuart endeavour to break through the thick scrub, or to find water in the moist boggy soil, but without avail. His provisions were falling short; his horses were worn out. "I had no idea,"

Digitized by Google

he writes, "of finding such an impediment as the plains and heavy scrub have proved to be." Thus, within a hundred miles of the country previously discovered by Mr Gregory, in his descent from the North-west, Mr Stuart was again forced to return. On the 23rd of September he entered Adelaide, on the 21st of October he was at the head of a new expedition, and starting once more on his often-trodden, and by this time familiar, road.

Profiting by his former experience, he no longer attempted to join his own discoveries on to those of Mr Gregory, but giving up, after a few fresh trials, all hopes of reaching the Victoria, he pushed northwards for Van Diemen's Gulf and the River Adelaide. Fortune smiled at last on the indefatigable explorer. He fell in with chains of ponds, with well-grassed lands, with creeks of longer flow and larger dimensions, finally with the River Adelaide itself, until, on the 25th of July, he planted his flag upon the shores of the Indian Ocean, and accomplished the object of years of disappointed hopes and unceasing toil.

On the return journey, the hardships so long and bravely borne proved too much for his constitution. Scurvy in its worst form attacked him. "What a miserable life is mine now!" he exclaims, "I get no rest night nor day from this terrible gnawing pain; the nights are too long, and the days are too long; and I am so weak that I am hardly able to move about the camp." The motion of riding was intolerable to him, yet he had to endure it daily; his legs became black, swollen, and useless; he had to be lifted on to and off his saddle; finally a stretcher was made, on which a perfect skeleton, crippled, nearly blind all day, totally so after sunset, with mouth swollen and black, and a body that already had the smell of the grave about it, he was carried to the nearest outposts of civilisation, after "an absence of twelve months and thirteen days," during which he added more to our knowledge of the Australian continent than any who had gone before him.

Mr Hardman says with truth, that, "without disparaging his brother explorers, Mr Stuart's explorations are amongst the most important in the history of Australian discovery." "Yet he cannot refrain from an attempt at exalting the one at the expense of the other. At page 11 of his preface he writes: "It is important to remark that the attack of the savages which forced Mr Stuart to return occurred on June 26th, 1860, so that he had virtually crossed the continent two months before Messrs Burke and Wills had left Melbourne." We do not know what saving grace is meant to lurk in the word "virtually," but actually the statement is not correct. In 1855 Mr Gregory landing at the mouth of the Victoria, in the North, explored the course of that river, and reached as far South as latitude 20.16°. In 1860, Mr Stuart, coming from the South gained latitude 18.17°. Thus the routes of the two explorers did, it is true, "overlap each other for more than one hundred miles," but parallel lines have a well-known objection to meeting, and it was in trying to connect his own with Mr Gregory's discoveries that Mr Stuart spent much vain and exhausting labour. It was not until he gave up all idea of profiting by the experience of others, and, turning his face North-east, pushed for the extreme North and the mouth of the Adelaide that he succeeded in finding a way through the dense scrub and in rounding the sandy, waterless, hilly country that bounded all his prospects to the North-west.

Mr Stuart then owes little or nothing to the exertions of others. His discoveries are all his own. He crossed the continent at its widest part; he reached the shores of the Indian Ocean, while others had only seen the ebb and flow of tidal rivers across intervening marshes; he has cast more light than any former traveller upon the real nature of the interior; he has done all this (his highest praise) without the loss of a life, and with no serious hardships or sufferings on the part of his followers compared with those he himself endured; he has shown himself a more skilful, prudent, and fortunate, though not a more energetic or devoted leader than Burke, but to the latter and to his brave companions still remains the praise, for which they held life cheap, of being the first to cross Australia from "sea to sea."

Space will not permit us to dwell upon many interesting points in these Journals that well deserve especial attention. We must refer our readers to the volume itself. For the same reason we must refrain from inserting many passages we had marked for quotation, and content ourselves with one of the shortest, but certainly not the least curious, anecdotes of native customs:—

"About an hour before sundown one of the first (natives) that had come, returned, bringing with him three others, two of whom were young, tall, powerful, well-made, and good-looking, and as fine specimens of the native as I have yet seen.....One was an old man, and seemed to be the father of these two fine young men. He was very talkative, but I could make nothing of him. I have endeavoured, by signs, to get information from him as to where the best water is, but we cannot understand each other. After some time, and having conferred with his two sons, he turned round and surprised me by giving me one of the masonic signs. I looked at him steadily; he repeated it, and so did his two sons. I then returned it, which seemed to please them much, the old man patting me on the shoulder, and stroking down my beard; they then took their departure making friendly signs until they were out of sight." This occurred shortly before that attacks of the natives that put the finishing touch to Mr Stuart's ho of crossing the continent on his fourth journey.

We must in conclusion say a few words in praise of the very excellent map accompanying this volume. Mr Stuart's different routes are clearly marked out on it, and the nature of the country is well defined, as far as was practicable on so hurried an expedition. "Unfortunately," remarks Mr Hardman, "the interests of geographical science were lost sight of in the hurry to effect the grand object of the expedition, viz., to cross from sea to sea."

EASTERN EUROPE AND WESTERN ASIA: Political and Social Sketches in Russia, Greece, and Syria, in 1861-2-3. By HENRY ARTHUR TILLEY. London: Longmans. 1864.

THE HEKIM BASHI: or, the Adventures of Giuseppe Antonelli, a Doctor in the Turkish Service. By HUMPHRY SANDWITH, C.B., D.C.L., Author of "The Siege of Kars." 2 Vols. London: Smith, Elder, and Co. 1864.

MR Tilley's "Political and Social Sketches" are extremely slight, and add but little to our knowledge either of Eastern Europe or of Western Asia. They are, however, cleverly put together, with a view to forward one main object, viz., the glorification of Russia and its Government. The emancipation of the serfs, and various other reforms introduced during the reign of the present Emperor, form a sort of bridge, over which the writer endeavours to lead us gently and half unconsciously into a state of philo-Russian sentiment, which is to culminate in a thorough belief in the Emperor's wisdom and goodness, and a corresponding antagonism for his enemies. The way in which Mr Tilley contrives to attribute almost every hopeful or cheering fact in Russian life to some cause in harmony with the Imperial régime, and to represent nearly every discordant social element as connected with anti-Russian influence, is exquisitely ingenious, but it inevitably inspires distrust. We cannot believe that so many of the lights and shadows are so markedly thrown in these directions. In the chapter on Poland this style of representation reaches its height, and appears as unmistakeable pro-Russianism. The chapter is worth reading as a specimen of what can be said on that side, but very few English readers will accept its version of the facts as either just or complete, or will be won by the cold and callous tone in which it is written. The chapters on Greece and Turkey are even less interesting than those on Russia, and are chiefly devoted to a brief record of the anarchical scenes of the last few years. The best things in the volume are some lithographic plates, designed by Scheduvsky, which represent scenes of Russian peasant life with great spirit.

Dr Sandwith's "Hekim Bashi" is a very dull novel, narrating the fortunes, crimes, and final repentance of an Italian doctor in the Turkish service. The author's object is to expose the vices of Turkish society, which are doubtless revolting enough; but a plain statement of facts would have been more useful and readable than this intolerably heavy and disagreeable fiction.

THE LONDON ALMANACK AND COMMERCIAL RECORD.

THIS is an extremely neat almanac, intended to contain information interesting to the commercial world. It is written in rather too "popular" a style, but contains valuable tables on the growth of our trade, the returns from mines, the commerce of the twelve great ports, the influx and efflux of bullion, the rates of discount at the Bank, the price of bread for fifty years, besides the information found in most almanacs. A "History of the House of Rochschild" seems a little out of place in such an almanac, but will interest a great many people who cannot test its accuracy, and the collections of figures seem to have been carefully made. The almanac is a model of getting up.

GENERAL RESULTS OF THE COMMERCIAL AND FINANCIAL HISTORY OF 1864.

THE commercial history of 1864 is a record of the circumstances which have attended the operation of two principal sets of causes—the one set political, the other financial and mercantile. The political causes were—first, the apprehensions produced by the Schleswig-Holstein war during the first four or five months of the year; and secondly, the uncertainties occasioned in August and September and at some later periods by the apparent probability of peace between the Federal and Confederate belligerents in North America.

The financial and mercantile causes were—first, the occurrence of three periods of pressure in the money market, namely, in January and February, when the Bank of England minimum rate of discount was maintained for three weeks at 8 per cent.; in April and May, when the rate was for a fortnight 9 per cent.; and in September and October, when for so long a period as two months the rate was again 9 per cent. In the second place, besides these periods of monetary pressure, there has prevailed once or twice great activity in the formation of new joint stock companies for home and foreign purposes, and also in the introduction of proposals for foreign loans. And in the third place, there has been towards the close of the year an opportunity of learning the actual results in practice of many of the joint stock schemes—banks, discount, finance, and trading companies—set on foot with great *éclat* of promises and premiums in the course of 1863.

The Schleswig-Holstein war occasioned greater disturbance in foreign money markets than in those of this country. Still, so long as it remained in any degree doubtful whether England would do more than offer diplomatic advice, the suspense and uncertainty were perplexing and hurtful. The vote of the House of Commons on the 7th of July absolving by a majority of 18 the Palmerston Ministry from blame as regards their Danish policy, put a final end to the subject; but so early as March or April it had become tolerably certain that neither England nor France would actively intervene in the quarrel.

The apparent rise of a powerful Peace party in the Northern States of America began to attract attention in July, and the acceptance in the following month by the Chicago Convention of propositions favourable to negotiation with the South, justified for some weeks the views of those who held that on both sides there was a desire to put an end to the war. The refusal of General McClellan to become a candidate for the Presidency on the Chicago conditions, and the military success of the Federal arms under Sherman at Atlanta, entirely dissipated the hopes of peace, and secured for Mr Lincoln an almost unanimous re-election. In England, the effect of these events operated in several ways. In the first place, it was necessary to consider the probable effect of peace on the political relations between the Federal States and ourselves, and especially between those States and Canada, as the British possession nearest to them. The extreme language countenanced, if not actually employed, by Federal statesmen on the subject of the Southern cruisers, which from time to time have evaded the vigilance of our police and escaped from English ports, seemed to warrant the inference that, under the pressure of a large army released from civil war, it might be found convenient to launch it against this country. In the second place, the arrival of peace in North America would alter largely, and for some time, no small part of the trading arrangements of this country with many of its most important markets,—as, for example, India, Egypt, Brazil, and of course the whole of North America. It would also place on a new footing the cotton industry at home, the occupations related to that industry, and the prices of the raw material employed.

The first of the three periods of monetary pressure (Jan. and Feb.) was occasioned wholly by the drain of gold and silver to the Levant and India, and for the payment of cotton, and to some extent by the apprehensions arising out of the Schleswig-Holstein war.

The second period of pressure (April and May) was also occasioned by a revival of the cotton drain in a less severe form, but chiefly by disquiet occasioned by the wholesale introduction of new companies, and by the absorption of capital for the purpose of carrying on the enormous mass of enterprises launched during the preceding twelve months.

The third period of pressure (Sept., Oct., and Nov.), was much more severe and protracted than either of those which preceded it. The primary cause was the prospect of early peace in America, the consequent great fall in the value of cotton, and the losses and discredit entailed by that fall upon considerable departments of trade, especially upon the trades centering at Liverpool and Manchester, and upon those carried on with India. There was also in operation, and upon a larger scale than in the earlier months of the year, the undue absorption of capital in new companies and enterprises.

The following table (I.) will show in exact figures the progress of the causes which led to the several periods of pressure :—

I.—Foreign Exchanges, Price of Silver, and Bank of England Rates of Discount—1864.

1	2 London on	3 London on	4 New York on London.	5 Calcutta on London.	6 Stndard Silver in London.	7
	Paris. 3 months' date.	Hamburg. 3 months' date.	60 days' sight.	6 months' sight.	per oz.	Bank of England Rate.

8 Decmbr.	.57	.8¼	240	„ ⅜	„ ½	7
22 „	.52	.7¾	260	„	„	6

We can trace in these columns pretty accurately the commercial history of the twelvemonth, especially in the column (5), which gives the rate of exchange at Calcutta, and in the columns (2 and 3) which give the quotations on Paris and Hamburg. Speaking generally, as the Calcutta quotation fell, thedrain of specie for cotton payments diminished; and as the rate of discount (col. 7) rose, so also were the quotations on Paris and Hamburg rescued from the tendency to decline which has been strongly manifested by them for some time past. The price of silver also (col. 6) follows closely the Calcutta demand.

If to table I. we add the next table (II.), giving for *each month* the *exports* of gold and silver to the East, we shall see still more closely at what precise parts of the year the drain made itself most felt :—

II.—Exports of Gold and Silver to the East per P. and O. Steamers from England.

1864.	Gold. £	Silver. £	Total. £

	2,012,000	6,014,000	8,026,000

The export of treasure from Southampton a few years ago represented by far the larger part of the exports of gold and silver from Europe to the East. During the last four or five years, however, the largest share of the exports took place from Marseilles, and from Gibraltar, Malta, and Suez. The following are the figures for 1863-4 :—

Conveyance.	1864 £	1863. £
P. and O. Steamers from Marseilles	7,777,000	5,788,000
Imperial Messageries from Marseilles ...	7,770,000	3,837,000
P. and O. Steamers from Gibraltar, &c.	553,000	443,000
	16,100,000	10,068,000
P. and O. Steamers from Southampton...	8,217,000	11,386,000
	24,317,000	21,454,000

The months of greatest export were January and February, March and April, and August and September. Whenever the rates of discount were rendered sufficiently stringent, as, for example, in May, and in October and November, there was an immediate diminution of the drain.

There were *fifteen* alterations of the minimum rate of discount at the Bank of England between 21st Jan. and 15th Dec. (1864). In subsequent parts of this paper full details will be found of the condition of the Bank at the dates of these changes. The year began with a minimum rate of 7 per cent. adopted on the 24th Dec. 1863. In May the rate was altered four times, and varied from 7 per cent. to 9 per cent.

There were eleven changes in the rate of discount at the Bank of France (see details at page 33) between the 24th March and 22nd December (1864). The extreme rate was 8 per cent. maintained for ten days in May and for three weeks in October.

It is only necessary to refer in a few words to the total disuetude of the former phraseology which spoke of the increase and diminution of the quantity of bank notes in the hands of the public—that is of the circulation—as the cause of greatest potency in the money market and the markets for commodities. Experience has established beyond all dispute that in this country the moving forces are capital and credit acting through the rate of interest.

The doctrine that a large central reserve of bullion is the only means by which commercial crises can be prevented from assuming their most distressing forms has many advocates among the leading economists of other countries, and the party holding these views has quite recently found an expositor, as impartial and able as he is accomplished and acute, in M. Emile de Laveleye, who, in two articles, entitled "Les Crises Commerciales," in the "Revue des Deux "Mondes" of the 1st and 15th January (1865), has left but little to be added by any writer who may follow him.

After stating at length and with remarkable clearness the actual experience of this country and France in 1864, M. Laveleye says: "According to this exact analysis of carefully "ascertained facts, it is easy to be convinced that commercial "crises are the results of a derangement in the balance of "the external commerce of a country acting on a market "where credit is most largely employed and where metallic "money is economised to the utmost. *All countries which "carry on gigantic transactions with small reserves of gold and "silver, and which have a vast movement of importations and "exportations, must be exposed to these economical perturbations* "This is why England first, and then America, have most "severely suffered from these visitations. France has suf- "fered much less, because up to the present time it has em- "ployed credit in but a limited degree, and has possessed a "vast metallic circulation; but during recent years France "has begun to encounter the perils and vicissitudes of the "money market, because its credit circulation and its external "commerce have very nearly doubled. The countries of the "centre of Europe have almost entirely escaped, because in "them the external commerce is by comparison unimportant "and the employment of credit almost *nil*. Hamburg, although "having discontinued the use of bank notes, has experienced "terrible disasters, because its external trade is enormous "and almost all its operations are conducted on credit. The "more a country expels the precious metals from the channels "of circulation and replaces them by instruments of credit, "bank notes, cheques, warrants, deposits, clearing-houses, "&c., and the more at the same time it develops its rela- "tions with foreign countries, the more it will be exposed to "the periodical return of financial perturbations, because "more easily an unfavourable balance of trade and payments "will disturb all the mechanism of exchanges, and will "require from the managers of credit institutions redoubled "circumspection, prudence, and ability."

It happens, fortunately, that the remarks made by M. Laveleye in this passage to the effect that the countries of the centre of Europe have hitherto escaped in great measure violent perturbations of the rate of interest, admits of being brought to the test of a wide range of facts. M. Maurice Aubry, in his recent work "Les Banques d'Emission et d'Escompte," has ascertained with great care the average annual rate of discount for first-class paper in the nine principal money markets of Europe during each of the ten

Digitized by Google

years 1855-64; and from the elaborate diagrams and tables given by him, the following summary has been constructed:—

III.—AVERAGE ANNUAL RATES (per cent. per annum) of DISCOUNT in the Nine Principal Markets of Europe during each of the Ten Years, 1855-64, as given by M. Maurice Aubry in his work "Les Banques d'Emission et d'Escompte" (Paris, 1864).

Years.	London.	Paris.	Frankfort.	Hamburg.
	per cent.	per cent.	per cent.	per cent.
1864.....	6.98	6.44	3.60	4.38
1863.....	4.24	4.63	3.35	3.33
1862.....	3.80	3.56	3.06	3.13
1861.....	5.26	5.54	3.20	2.44
1860.....	4.17	3.63	2.49	1.98
1859.....	2.73	3.46	3.47	2.15
1858.....	3.23	3.70	3.56	1.91
1857.....	6.55	6.13	4.67	6.30
1856.....	6.08	5.55	4.29	5.22
1855.....	4.88	4.43	3.44	3.25
Average	4.42	4.54	3.50	3.41

Years.	Amsterdam	Berlin.	Leipzig.	Italy.	Vienna.
	per cent.	per cent.	per cent.	per cent.	per cent.
1864	4.85	4.74	5.05	7.70	7.60
1863	3.62	4.08	4.35	5.66	5.83
1862	3.73	4.00	4.00	5.06	5.72
1861	3.07	4.00	4.00	6.31	6.00
1860	3.00	4.00	4.00	4.57	5.00
1859	3.00	4.20	4.80	4.50	5.00
1858	3.75	4.30	4.62	5.29	5.00
1857	4.94	5.76	6.35	6.74	5.21
1856	4.28	4.94	5.05	6.00	6.00
1855	3.20	4.08	4.91	6.00	6.00
Average ...	3.63	4.37	4.70	5.57	5.53

We see in this table the great steadiness of the rate of discount at Frankfort, Berlin, and Leipzig, and also at Amsterdam, as compared with London and Paris.

To recur to the influence exercised by the Bank of England in 1864.—It has been very obvious to careful observers that the action of the Bank rates, especially at the more critical periods, was immensely aided by the operation of the rule adopted by the directors in 1858 to the effect that the Bank would not (except at the usual quarterly periods in anticipation of the dividends) make advances to bill brokers. The effect of that rule in 1864 was to compel the discount houses to provide amply for their own engagements independently of the Bank of England, and to leave the Bank with the disposal of its own resources for the accommodation of the merchants resorting to it direct. In other words, the alteration of the Bank rate told immediately on every part of the money market, and upon no class more powerfully than upon the discount establishments. Another alteration also introduced about 1858 into the practice of Lombard street operated beneficially last year. Prior to 1858 it was the custom, not only among the London, but also among the country bankers, to deposit large amounts with the bill brokers at "call,"—that is, repayable strictly at any time, but virtually assumed by the borrowers to be held somewhat indefinitely. For the last few years this practice has, in many important instances, been so modified, that the loans are made repayable at specified dates, the dates of course being more or less distant, as may suit the convenience of the parties. The effect of the change, however, has been to remove or greatly reduce an element of uncertainty, and a cause, therefore, of miscalculation.

The formation—or rather the projection of New Companies has proceeded in 1864 on even a larger scale than in 1863. Details are given at a subsequent page (see page 36) from which it appears that 282 new companies asking for 106 millions of capital and 12½ millions of deposits were advertised in 1864; against 263 companies asking for 78 millions of capital and 9 millions of deposits in 1863. Besides these 282 new companies there were in 1864 extensions, &c., of old companies involving 35 millions of further capital, and calling for 12 millions in deposits and premiums. So that between the new and old projects of 1864 the public were invited to subscribe 141 millons of capital and pay 24 millions in hard cash as deposits and premiums. In the two years, 1863 and 1864, it seems to be true that the British public have had brought before them joint stock schemes implying the acceptance of future engagements to the amount of at least 200 millions, and present payments for deposits and premiums of about 40 millions sterling. The activity of 1863 and 1864 in this description of enterprise has been equal to twice the figures which represent the same results for the whole of the seven years, 1856-62, during which the limited liability law was in force more or less perfectly. It is, of course, not contended or believed that in two years 200 millions of engagements have been *bona fide* contracted to new companies and new extensions of old companies; nor that 40 millions of actual capital has been paid over to the projectors of these schemes in order to set them in motion. It is quite true, however, that to the extent of some large fraction of these figures the English public have embarked in the last two years in joint stock enterprises; and it does not admit of a doubt that many of the phenomena presented by the money market in 1864, and at the present time, can be explained only by investigating the effects produced by this prodigious and sudden development of a new kind of investment.

The conclusive historical guide, in such an investigation, would be the experience of this country during the great period of Railway Construction in 1846-50—that is, the five years which followed the excited season of 1844-5. During those five years the resources and savings of the mercantile and middle classes were taxed to the utmost to provide the capital required for completing the lines of railway projected in the sanguine days of the mania when people thought much of present premiums, and little of the steady pertinacity with which one call could follow another as the earthworks and buildings proceeded. The effect was that scarcely anybody had a spare sixpence for anything. A man whose means might have prudently afforded 1,000*l* for railway calls spread over five years had bound himself to find 10,000*l*,—and was consequently driven to starve his business and himself—to sell whatever was saleable at the earliest moment, and at any price—to live from hand to mouth—to borrow of every one and lend to none. No wonder that during these dismal five years markets of all sorts were depressed almost beyond former experience, and that enterprise of all kinds, except railway making, was at a standstill:—Now for the qualifications of the comparison as between the 1846-50 and the present time—and these are vital. The continued and almost unrelieved nature of the pressure of 1846-50 arose from the circumstance that railway works once fairly begun must be finished, under the penalty of sacrificing nearly all the previous expenditure. A piece of railway embankment or railway viaduct standing by itself was as useless and unmarketable as the great pyramid. The line must be finished from end to end before it could possibly earn any revenue. The shareholders once in the hands of the engineer and contractor could not withdraw, could not stand still, but must go on. The schemes of the last two years are only to a small extent railways. They are banks, finance and trading companies, hotels, steamship lines, mines, foreign land and investment companies, and the like—schemes for the most part, in which if the shareholders so please, they can stop the whole concern at a week's notice—call in the auctioneer—sell any assets that may be left—take whatever minute dividend the sale may bring—and after indulging in the usual vehement and disorderly meeting which celebrates the break up of a company—retire with the solemn resolution never to lose another farthing at all events in *that* particular sort of venture.

Bearing in mind that happily we are not bound down as were the railway subscribers of twenty years ago, still the financial effects of the excessive joint stock speculation of 1863-4 are precisely the same in kind as those of the excessive railway speculation of 1844-5. At the present time there are thousands of cases of persons in and out of trade who have committed themselves to joint stock engagements greatly beyond their means. Where these errors have been fallen into by merchants, manufacturers, and people in business, the consequences are either a sacrifice of the surplus shares at any price, or a contraction of the ordinary scale of their operations. Hence arises the state of things we have seen for some months past. The public have lost all appetite for new schemes, or rather the surplus capital in the hands of the public waiting to be employed in new schemes has been all absorbed. The markets for most kinds of shares, especially the more recent descriptions, are weak and depressed, because borne down by continuous sales; and failures are fre-

Digitized by Google

quent, in which it appears, on investigation, that the chief cause of embarrassment has been losses on joint stock speculations.

The public have now had the benefit of a year's experience of the Finance companies and Banks started in such profusion in 1863, and they are beginning to discover that the warnings given by prudent people were not unneeded. One or two of the finance companies have apparently established themselves on a sound foundation—that is to say, they have found out a class of customers who want the sort of assistance the companies can give, who can afford to pay for it at high rates, and, what is still more important, can replace the principal at something near the stipulated date. Prior to the monetary pressure in the autumn, a good deal of attention was directed to what were called "finance bills," then to be met with rather abundantly in the London market. These bills came into existence in the following way:—Contractor A came to Company B, and applied for, say 50,000*l* for twelve months on the security of debentures issued by a railway company in process of construction, but expected to be finished and open within nine or ten months. B said in reply, "Yes; we will lend you the 50,000*l*, not in cash, but in our own acceptances to your order at six months. These acceptances you can take into the market and discount, and in that way procure the ready money you require." In other words, the lender B not having 50,000*l* in cash waiting to be employed, but expecting to have it at the end of six months by the collection of some its loans or the sale of some of its assets, desired in the meantime to make a profit by the use of its name and credit. Naturally enough the authorities of the money market refused to encourage this system of lending. A sound bill of exchange is a bill drawn against merchandise sold and delivered, and on its way to the actual consumer, and the price paid by the consumer will provide for the payment of the bill at its maturity. Here the basis of the document is clear and specific. But a "finance" bill such as we have described has no such foundation. It is neither more nor less than a speculation on the state of the money market for six months to come, and upon the degree in which two or three parties, all trading on acceptances and credit, may be able to fit their engagements one into the other. The finance bills, therefore, met with so much discouragement, that for a time they have disappeared, —but only for a time. They will revive by and by, and produce mischief.

The only solid resources of the finance companies are their capital, subscribed and paid up, their deposits, and their reserve fund. The deposits they do or should hold at long notice. If they can obtain a large command of capital in that form, and at moderate rates of interest, and avoid investments at too long dates, they will succeed. But the fabulous dividends of 25 and 30 per cent. must not be expected. The opportunities for making huge lumps of money as commission, &c., occur but seldom. The negotiation of foreign loans is as often a failure as a success; the hostile influences are so many, and the competitors, home and foreign, so keen;—and sooner or later the finance companies who understand their business will become, as is inevitable, a species of institution between a bank and an insurance office.

The New Banks have, on the whole, not done so well as the finance companies. The banks exclusively or most largely dealing in exchange and credits have done the worst. Several of them have formed combinations, and some have disappeared entirely. Still the effect of the banking enterprise of the last two or three years has been to establish several new and prosperous institutions, and not before they were needed by the growing trade of the country. There has been in 1864 further progress in the fusion of the smaller private bankers in London, either with leading joint stock, or with larger private, banks. It is probable that the process will go forward until the number of private banks in London is reduced to under a dozen strong and powerful firms; and assuming these firms to be vigorously managed, they will be able to preserve and attract quite as much business as they can get through.

The stoppage of the Leeds Banking Company on the 17th Sept. (1864) was the most notable failure of the year. The bank itself was of thirty years' standing, had had a large and profitable business, and until within a year or so of the catastrophe had been prudently managed. All sound maxims of business seem to have been then laid aside. It is said that the principal officer found means of allying himself, without the knowledge of the board, with a small knot of reckless men who, aided by the resources and credit of the bank, launched into the most improvident speculations. A short time sufficed to involve the bank past redemption. For a few weeks before suspension, money was raised in the London and other markets by re-discounting local bills and especially the bills of the reckless customers. But this was a process which soon excited suspicion and tended to hasten the final break down. The causes of the failure, stated generally, were precisely the same as in the notorious instance of the Western Bank of Scotland in 1857—that is to say, excessive advances made to a few desperate and penniless gamblers.

In appendix (54) a list is given of the principal Failures in 1864. The names in the last four months of the year are very numerous. In the cotton districts the number of failures of manufacturers and spinners in September, October, and November was about 120, with liabilities of more than a million sterling. In London and Liverpool the proximate cause of failure was in a large class of cases the severe fall in the markets for produce, especially cotton, sugar, jute, rice, and fruit. The almost complete derangement of credit in Spain reacted extensively on English houses connected that country; and the violent fluctuations of exchange at New York, coupled with the vicissitudes of all trading operations in the States and Canada in sympathy with the varying probabilities of peace, produced great loss and uncertainty.

The variations in the Cotton market in 1864 are in themselves a history, and in the elaborate circular quoted hereafter (pages 20 to 26) a very full account of them will be found. There was first a gradual decline from January to April;—then a steady advance to the end of July;—then a rapid fall to the middle of October;—and lastly a marked recovery to the end of December. From July to about the close of October the average fall on long staple cottons was about 30 per cent.; in Smyrna sorts, 47 per cent.; in Dhollera and China, 43 per cent.; and in Bengal, 50 per cent. These extreme rates of depreciation as compared with the highest prices of July were recovered to the extent of nearly one-half before the end of the year. The fall in the prices of cotton yarns and piece goods during the panic in October was as great as in the case of the raw material. In cloth and yarns the fall was rather over 30 per cent. as compared with July.

The circular referred to computes as follows the value of the Raw Cotton imported, the exported, and consumed, in the United Kingdom during the six years 1859-64:—

Years.	Imported. Mln. £	Re-exported. Mln. £	Consumed. Mln. £	Aver. Price. per lb. d
1864	84.0	22.0	53.8	22½
1863	59.0	18.6	44.4	20⅜
1862	31.6	12.0	27.1	14¼
1861	38.7	7.5	31.4	7⅞
1860	34.4	5.1	25.9	5⅜
1859	31.0	3.7	25.4	6¼

It must be borne in mind that these import values are founded on the price of the article at the port of entry, and include therefore the freight, charges, and importers' profit. In 1864, for example, we did not really pay to India, Egypt, and other cotton-producing countries 84 millions sterling for raw cotton. How much we really did pay them cannot be ascertained with any degree of precision from published tables. We may approximate, however, towards it by the employment of another method; and arrive by that method at conclusions which will illustrate some other parts of the case of an interest and importance of their own.

The following table gives in outline the imports and exports of merchandise and gold and silver to India and the Levant (including Egypt) for the four years 1861-4:—

Years.	Imports.		Exports.		Total.		
	India.	Levant	India.	Levant	Imports. Merchn-dise.	Exports. Merchn-dise.	Exports. Gold and Silver.
	Mln. £	Mln. £	Mln. £	Mln. £	Mln. £	Mln. £	Mln. £
1861	26	13	17	6	39	23	10
1862	39	17	17	7	56	24	18
1863	53	22	22	11	75	33	23
1864	60	26	22	14	86	36	23

Digitized by Google

We see from these figures that in 1863 and 1864 an export of 23 millions of treasure sufficed to settle a balance which, on the face of the return, showed an excess of 29 millions in 1863, and 27 millions in 1864, after all exports of goods and treasure were enumerated—that is to say, in 1863 we are put down as having imported 75 millions, and sent away in goods and treasure 56, leaving, as we have just said, an apparent debt of 29 millions unliquidated for that year; and 27 millions unliquidated for 1864. We know, however, from the state of the exchanges, that there is no such large unliquidated demand against this country pressing on the Eastern markets. The explanation consists in the simple circumstance that the value at the foreign port of shipment of the goods sent to this country and put down in our own Customs returns as 86 millions in 1864 was some sum very considerably smaller—so much smaller, indeed, that we were able to balance the account by sending 59 millions sterling of merchandise and treasure combined.

But there is this further point. In four years the imports from India and the Levant have certainly doubled in value. These are countries of exceedingly backward civilisation. Hitherto, the native cultivators have had few wants, and have been so ignorant of the real principles of trade as to regard gold and silver as precious beyond all other things, and as fit only to be buried in secret hoards instead of being sent away as rapidly as possible in exchange for articles of use and enjoyment. A trade, therefore, of imports from these countries suddenly doubled in volume, necessarily implied the transmission of a large part of the price in specie and bullion; and so it actually happened. The average annual export of treasure to India and the Levant for the last five years, 1857-61, was 13½ millions sterling; the average export of 1863-4 was 23 millions. The meaning of these figures is this, that so potent is a free and vigorous commerce to arrive rapidly at a state of things in which trade, even with very backward countries, becomes the barter of one set of commodities for another set of nearly equal exchangeable value, that in the course of two years we have made great progress towards overcoming the tendency of the sudden import of cotton from the East to carry away excessive quantities of gold and silver.

The probability seems to be that in 1865 the action of the Eastern demand for bullion remittances will be on a much more limited scale than in 1863-4; and that the taste already excited in those countries for articles of English production will have laid the solid foundations of a commerce as regular as that with America or France.

We may learn from this extreme case the immense value to the growing commerce of the country of a central cash reserve of sufficient magnitude to bear the loss of a few millions without damaging our system of credit, and raising the rate of interest suddenly and to a high point. We repeat that no precautions can be devised which will under all circumstances prevent financial pressure, or even financial panic—still less which will prevent variations in the rate of interest. But nothing can be plainer than that the most direct means for increasing both panic and pressure is for a country carrying on a vast foreign trade to cripple its central bank in the acquirement and command of an adequate cash reserve.

We have seen that the average annual export of treasure to the East in the two years 1863-4 was 23 millions sterling, against an average of 13½ millions for the five years 1857-61. But apart from the supplies of gold furnished by the new sources in California and Australia, opened fifteen years ago, it is hard to understand in what way the transference of the cotton trade from the Western to the Eastern hemisphere could have been accomplished without producing a commercial convulsion beyond all modern experience. The consignments of gold from Melbourne and San Francisco have constantly come to hand at the most critical junctures, and have enabled us to meet the Eastern demand with a readiness and facility beyond the capacity of any other means of relief.

In appendix (47) ample evidence will be found of the production of gold and silver in the countries of old and new supply during the fifteen years 1849-63. Of that evidence the following table is a summary:—

ANNUAL AVERAGE.—TOTAL PRODUCTION of GOLD and SILVER, in Periods of Years, 1849–63.

Summary of Table (48) in Appendix.

Periods of Years.		Gold. Old Sources. Mln. £	Gold. New Sources. Mln. £	Gold. Total. Mln. £	Silver. All Sources. Mln. £
1849-51	(3)	13.5	10.3	23.9	15.5
1852-6	(5)	14.0	24.7	38.7	16.1
1857-9	(3)	14.6	21.9	36.5	17.1
1860-3	(4)	15.3	18.3	33.5	18.2

NOTE—The total production shown by these figures in the fifteen years 1849–63, is of *Gold* from *old* sources, 215 millions; from *new* sources, 297 millions; *Silver* from *all* sources, 248 millions.

It is plain from these figures that for the last seven years the *new* sources of supply have yielded year by year a diminishing quantity of *gold;* and that the old sources of supply have done little more than maintain the former rate of production. As regards *silver*, the increase throughout the fifteen years has been, if not very great, still so continuous as to represent at present a production 20 per cent. larger than in 1849-51. But in the case of *gold* the present annual production from all sources is 13 per cent. less than in the five years 1852-6.

We should, however, very imperfectly apprehend the problem to be considered if we did not ascertain as far as we can the growth in the number and magnitude of the transactions to be accomplished ultimately in some form employing the command of gold and silver coin; as well as the annual supplies of those metals available for purposes of commerce. As concerns the United Kingdom, we can readily enough learn the progress of our external trade, and for our present object it will not be necessary to go further than the evidence of such progress, as given in the following abstract of imports and exports:—

REAL VALUE of EXPORTS and IMPORTS from and to United Kingdom.
[00,000's at unit end omitted—thus, £160,4 = £160,400,000.]

Year.	British and Irish Produce.	Foreign and Colonial Produce.	Total Exports.	Total *Imports.*
	Mln. £	Mln. £	Mln. £	Mln. £
1849	63.6	not given	not given	not given
1850	71.4	—	—	—
1851	74.5	—	—	—
1852	78.0	—	—	—
1853	98.9	—	—	—
1854	97.2	18.6	115.8	152.4
1855	95.7	21.0	116.7	143.5
1856	115.8	23.4	139.2	172.5
1857	122.1	24.1	146.2	187.8
1858	116.6	23.2	139.8	164.6

We find here an External trade doubled in the last twelve years, and this external trade is, we belive, but a faint representation of the increase of transactions throughout the whole of our domestic industry. But not only has this multiplying process been carried on in these islands:—it has prevailed almost as largely in France,—and the activity that has prevailed in France, and already profoundly modified French society and institutions, has spread over all Germany. It has filled Italy—aroused Spain from its long lethargy—and penetrated even to the remote provinces of Russia. No corner of Europe has remained insensible to the new stir of industry and enterprise. In Turkey, Asia Minor, Egypt, and other countries of the Eastern Mediterranean, the creation of new employments, the appetite for pursuing new avenues to wealth, has become one of the most remarkable circumstances of our time. Before the American war gave to India the largest share of the cotton supply of the world, railways, better modes of government, and the influence of English example and the resources of English capital, had carried India far on the way to be one of the largest trading countries now known. The immense wealth poured into Bombay and Bengal during the last two years has apparently at last broken down most of the barriers to the reception by the natives

Digitized by Google

of thoroughly European notions of commerce. Evidence is collected at a subsequent page (page 32) of the effects produced by the influx of silver into Western India in 1863-4. All these facts are indicative of the enormous addition which has been made during the last fifteen years to the extent and depth of the channels of circulation required to be filled with metallic money in some form or other; and they are also facts which enable us to understand how it is that the addition of, say 300 millions of gold from new sources during those fifteen years, has produced so small an influence on prices. Last year (Supplement to ECONOMIST of 20th Feb., 1864), we discussed some of the causes which, as we believe, explain without any reference to the increased supplies of gold, many of the more important variations in prices since 1849, and further observation and reflection has confirmed us in the conclusions then stated.

We now confine ourselves to a more limited part of the case by presenting in the following table a comparative outline of the Prices of certain leading articles in London on 1st June, 1865, as compared with the prices prevailing at four earlier periods.

WHOLESALE PRICES IN LONDON.—Comparison of Jan. 1, 1865, with Five former periods, stating in per centages the degree in which the prices of 1 Jan., 1865, were HIGHER or LOWER than the prices of the five selected dates:—

1 Articles.	2 Higher than 1 July, 1864.	3 Lower than 1 July, 1864.	4 Higher than 1 Jan., 1864.	5 Lower than 1 Jan., 1864.	6 Higher than 1 Jan., 1861.	7 Lower than 1 Jan., 1861.

This table (deduced from the per centages in page 54) may be read thus:—Cols. 2 and 3 give the differences per cent. higher or lower of the prices on 1st Jan. 1865, as compared with 1st July, 1864. For example: Coffee was 4 per cent. higher; sugar 28 per cent. lower; wheat 6 per cent. lower; and so on, on 1st Jan. 1865, than on 1st July, 1864.

The articles *Raw Cotton*, *Silk*, *Flax*, *Hemp*, *Wool*, and *Tobacco* are omitted for the obvious reason that the derangements of supply consequent on the American war have rendered the prices wholly exceptional.

We read in column 9 of this table the immense fall which has taken place in prices since July, 1857, and in column 7 the marked fall which has taken place since 1st Jan., 1861. We find in column 3 very plain traces of the depression which occurred in the six months preceding 1st Jan., 1865, and led, as we know too well, to many of the commercial shipwrecks of last October.

It is quite true that in columns 10 and 11 we have forcible evidence that the average prices of the six years 1845-50 were in several important instances much lower than at the present time. But this is a result subject to large qualifications. In the course of the present review (page 3) we have shown that 1845-50 was a period of small demand and great stagnation in consequence of the pressure of the railway calls. Besides, the operation of that powerful cause, the six years in question included the Irish Famine, the Commercial Panic of 1847, the French Revolution of Feb. 1848, and the year of war which followed it all over Europe. Hence, the prices of 1845-50, when reduced to an average, present necessarily a low datum line, and convey, therefore, a false impression of the changes of subsequent years.

The truth is, that with the present extended and growing commerce of the world, far more mischief and inconvenience will arise from the effect of what seems to be a continuous gradual decline in the new supplies of gold than from any effects which have flowed or may flow from the Californian and Australian discoveries. One of the chief purposes of civilisation is to assuage human ills by rendering the means of comfort and enjoyment cheap. All science and all enterprise is directed towards cheapness. Political economy has extirpated the belief in all forms of dearness and scarcity as good even for producers. We now understand, and a large part of the world likewise understands, that for a commerce to rest upon the most solid and profitable foundations, it must deal on the largest scale in commodities which command the widest consumption, for the intrinsic reasons that they are cheap and good. There is no limit to the capacity of consumption at some price sufficiently within reach of the great mass of mankind. Pine apples, Tokay wine, Persian silks, Cashmere shawls, strings of pearls, and chairs of ebony, would meet with a demand as large and constant as tobacco and sugar if they could be procured at some price easily within the compass of those who live by the commoner kinds of labour. It is a main end of science and skill which a wholesome civilisation fosters, to find out incessantly new methods of expanding luxuries into enjoyments, enjoyments into comforts, and comforts into necessaries of life, and it is the business of commerce, casting aside all prejudices and trammels, to give to every part of the earth the opportunity of sharing in these benefits with the least delay, and on the most advantageous terms.

I.—CORN AND CATTLE TRADES.

CORN TRADE.

Messrs Horne, Son, and Mac Innes (London) report:—

The year 1864 opened with a high value for money, viz., 8 per cent. on the 20th January, and the rate of discount has fluctuated between 6 and 9 per cent., which point it reached on the 5th May and again on the 8th September; the highest since 9th November, 1857, when the Bank of England's rate of discount was 10 per cent. This money pressure has, of course, had considerable effect in the reduction of the value of grain, although that article has felt it less than most other commercial commodities. We do not, however, attribute the fall in the price of grain so much to this cause as to the large stock of wheat left over in farmers' hands, and to the continued heavy foreign importations which have been met by another good crop of wheat in this country. The weather during the spring and summer months was unusually dry, with a cold temperate and occasional night frosts, until the middle of *July*, when we had a short duration of hot weather. The want of rain caused great complaints *of the serious deficiency of the grass, hay, and root crops, and of the want of water for the cattle*. The wheat plant was said to have received injury when on the bloom, and again when it was setting. After the first week in August, rain came in time to be of some service to the standing crops, and to help the bite of grass for the winter months. Notwithstanding the great deficiency in the above-named crops, stock-keepers have been and still are able to supply themselves with cereals at extremely low rates. The late autumn and winter months have thus far been propitious, and the land was seldom so well cleaned and in better tilth. An average breadth of wheat has been got in, and at present the young plant looks healthy and vigorous.

The circumstances most worthy to be recorded are, the Danish war, the commercial failures (none of which, however, have seriously affected the corn trade), the duty on all grain being made

Digitized by Google

payable from the 1st September by the *cwt*, instead of by the imperial quarter; the cessation of the supplies of grain from *Egypt*, whence we have in latter years received 1,000,000 quarters and upwards, and the nearly total falling off of shipments of maize from America. The *total importations* of all descriptions of grain and flour into the United Kingdom for the year just ended were 12,210,984 quarters, against 15,553,900 quarters in the previous, and 18,942,000 quarters in 1862—the largest on record. The *computed real value* we may take (in the absence of complete Governmental returns) at about 20,000,000*l* only, against 25,800,000*l* in 1863, and 37,748,000*l* in 1862. By the latest published accounts, the estimated quantity of grain now on passage hither as compared with the like date, January, 1864, is of wheat over 50 per cent. *more*, of maize and barley fully 350 per cent. *more*.

Wheat.—We find a greater variation than usual in the 1864 crop as to quantity, quality, and weight in the different counties, according to soil, the heavy lands having greatly the advantage. *Upon the whole*, 1864 *may be safely estimated at an average*, and we have always considered it a full average, as we believe farmers have not made sufficient allowance for its unfavourable comparison with the enormous crop of 1863. The *Northern counties* give the least favourable deliveries, while on the stiff lands of Lincolnshire and Essex and some other counties the yield has been most satisfactory. Millers are better pleased with the *quality* of this crop than they were with the one of 1863. In *Scotland* and *Ireland* about average crops were secured. In *France*, *Italy*, and *Rhenish-Germany*, the crops were well harvested, and although the yield varies greatly, there seems to be no doubt that average crops were grown. *Hungary* had a superior crop both in quantity and quality. *Sweden* and *Denmark* had good crops. *Prussia* suffered by heavy and continued rains at harvest, particularly her Polish provinces, where a considerable portion of her crop was seriously damaged, and the produce under an average. *Spain* had a full average quantity and quality, while *Portugal* was deficient in quantity. *Egypt* has turned her whole attention to cotton and cotton seed, and having become a considerable *importer* of grain has prohibited its exportation. *Russia*, in consequence of great drought, had small crops to the acre; and afterwards, from wet weather, the quality was injured, so that shipments from Petersburg and the Azoff are expected to be inferior to those of last year. The same may be said of the Polish from Odessa, but the Ghirka from this port will be very good and some very fine. The crop on the *Danube* was large, but the condition bad. *American* accounts are more uncertain than usual, but we think it pretty certain that the Western States show a considerable deficiency as compared with the last two years, and that she will materially curtail her supply at present low prices in Europe.

Referring to what we wrote last year, we find our estimate of the wheat crop of 1863 (which was much criticised at the time) nearly as possible borne out by the farmers' deliveries, and the evidently large surplus of old wheat left on hand. We are of opinion that we are at the present moment in much the same position as at this time in 1864 with respect to home supply, but we have more foreign in granary. America will, therefore, be in a great measure our guiding star as to future supplies, and consequently as to future prices; but considering that present low prices are creating an unusually large consumption of wheat, and that considerable quantities have been used as animal food, we think we can take off at the rate of *seven million quarters foreign wheat and flour per annum* up to next harvest, and yet improve somewhat upon present rates. Since January, 1862, prices have fallen continually, with the exception of the short period of excitement during the "Trent affair," and we are now at a lower price than on any previous occasion in the present century, except in October, 1851, viz., 35s 6d, and in February, 1836, viz., 36s. In 1863, we imported 5,575,398 quarters, against 5,406,543 quarters in 1864, of which latter 813,096 quarters came to London. America contributed 14.75 per cent.; Canada, 3.37; Russia, 35.45; Prussia, 32.52; France, 0.91. The year 1864 commenced with an imperial weekly average price of 39s 10d, and closed with 37s 10d. The highest was 41s 1d, the lowest 37s 10d. The annual aggregate average was 40s 4d. Comparing present prices with those at the corresponding period of last year, we find new English has fallen 2s on the average, and old foreign fully 3s per quarter. Stocks of foreign at the various depots are nearly double what they were in January last.

Barley.—In England more than an average breadth was sown, and, although usually grown on light soils, the absence of extreme heat during the continued dry weather in summer, allowed *the largest crop to be collected that probably was ever harvested*. Samples have come remarkably sound, bright, and heavy, and are mostly fit for malting purposes, although rather too "steely," which, however, is a fault to be mitigated by careful treatment, and, upon the whole, maltsters are highly satisfied, especially with that grown in Norfolk and Suffolk. In *Scotland*, a full average breadth was sown, and the crop has proved a bountiful one, with heavy weights; about two-thirds were well got in, but the rest was injured by rain. Prices here have hitherto given no inducement for shipment to this market. The crops in *France* and *Germany* suffered first by drought, and in the latter country afterwards by rain, consequently there has been but little trade thence. Denmark and Sweden had average quantity and quality, but as yet our prices have been so low, that these countries have sent to other markets, particularly to Norway. On the Danube the crops were fully average in quantity, but we see by cargoes already arrived that they were more or less injured by rains, while those in the Turkish dominions were fine. The districts supplying Odessa will send forward a liberal quantity, and the quality is sound and of good colour, but light in weight.

Oats.—Our English crop was secured in fine condition, but the yield per acre *is considerably below an average* in almost every county, and we cannot reckon the total quantity *at more than half an average*. In Ireland, there was a decrease in the number of acres under this crop, but, a dry season being favourable to that country, there was a good produce to the acre, and the quality is satisfactory. In Scotland, the drought affected the quantity, and the rain at harvest the condition and colour, but where farmers were fortunate enough to harvest before or after the wet weather, fine samples have been sent to the market. Sweden secured a good crop both in quantity and quality. Denmark an average in quantity and quality, but when the high rate of agricultural wages is deducted from the present prices obtainable for the grain, the net value to the growers is so small that they have as yet preferred using their crops on their farms. Holland, Hanover, and Oldenburg had full average crops of good quality; Prussia full average, but quality indifferent. In Russia the crops are represented as small in quantity and of poor quality. 1864 opened with an imperial average of 18s 9d, and closed with 19s 1d. The lowest was 18s 8d, the highest 22s 11d. The annual aggregate average was 20s 2d.

Beans and Peas.—Both these crops are of fine quality and condition, but the quantity *to acre was deplorably short, and many fields were not cut at all, as they would not bear the expense*. We believe we are correct in stating the aggregate bean crop to have been barely a third of an average; but that of peas probably fully a third, as the yield of grey and dun was better than that of white. The entire cessation of the supplies of beans from *Egypt*, whence we received into the United Kingdom upwards of 320,000 quarters in 1863, happening at the same time that our home crop was so nearly a failure, would in ordinary seasons have caused an immense rise in the value of this article; but on this occasion the very low price of every other kind of grain has kas kept down that of beans and peas, although their present prices are very high compared with other sorts of grain. The total importation of beans into the United Kingdom was 215,047 quarters, against 488,436 quarters in 1863.

Maize.—In consequence of the cheapness of wheat and potatoes, Ireland has not bought nearly so freely of maize as she has been accustomed to do of late years. This cause, operating at the same time that the high value of money prevented speculation, had the effect of throwing maize into *the hands of our distillers and feeders*, who had hitherto not used it to any important extent. It thus came into competition with barley and other low-priced grain, and in the month of November fell to the lowest price since free trade. *It is now used pretty freely for distillation, as well as for general feeding purposes*. The crops on the Danube were abundant in quantity, but the quality has been injured by heavy rains at harvest. From Odessa we may expect our average quantity, and the quality is described as but little affected by wet. America secured a very bountiful crop of average quality; so we may look forward to supplies thence next summer. The statements put out from that country this time last year were fully justified, for her supplies to this market have fallen from one million quarters in 1863 to an insignificant quantity in the last year. The total importation into the United Kindom in 1863 was 2,980,000 quarters, against 1,470,000 quarters last year.

Potatoes.—This valuable esculent enters so much into general consumption, that it requires attention. Our accounts describe the crops in the United Kingdom as also on the Continent *as about one-third less in quantity and weight* than those of 1863, and below an average of seasons, but the quality is remarkably sound. Prices since last harvest have been from 30 to 40 per cent. *higher* than last year.

SUPPLIES of WHEAT, BARLEY, and OATS, to LONDON, in the undermentioned Years, of which supplies the centesimal proportions were:—

We extract the following passages from a letter in the *Daily News* (October 24, 1864), from Mr Thomas Scott (18 Parliament street, S.W.):—

I have had occasion to visit the following counties during the late harvest, namely:—Middlesex, Essex, Herts, Bucks, Bedford, Oxford, Berks, Gloucester, Somerset, Wilts, Devon, Dorset, and Hants; also Surrey, Sussex, and Kent; and to all those engaged exclusively in agricultural pursuits, as well as to many others, the peculiarities of the season have unquestionably given rise to more reflection than any season that has gone before it within our memories.

It is no exaggeration to say that thousands of my brother agriculturists, who never thought much before, have this year been set a thinking, and will be driven out of their beaten tracks into new courses of action, and new modes of managing land. The first thing to be learned is, that no farmer can now depend on getting his rent and labour exclusively out at the barn-door. The lesson which was taught us at the close of the last century, to cultivate all land, from the valley to the mountain top, for the production of corn, *is being untaught* by the wages of peace and the home consumption of animal food; and when the transition state is passed, with all its changes and losses, what will be the condition of the land? It will be a country of pasture, raising stock on the hills and poorer lands, and fattening them on the plains and the valleys. This will render it more than ever a corn-importing country; but what does that amount to? Simply this; that the whole land will become a rich grazing field, aided by the consumption of foreign corn and cake, and by the fattening of imported lean cattle; the one gradually exhausting the cultivated lands of the Continent, and the other carrying off in their bones the phosphates of its pastures. What, it may be said, is the necessity of so great a change, and what are the inducements to make it? First, then, we cannot otherwise get our wants supplied; and secondly, while the sword of Damocles is hanging over the heads of corn producers, cutting down their profits by dear labour in the cost of production on the one hand, and by low selling prices on the other, the prices of beef, mutton, butter, cheese, and wool, principally the production of grass, *are a third more than any one would have based a calculation on in taking land ten years ago.* Grass, then, is a royal property; it suits our climate, it grows while we sleep, it produces what we require, which no other country can do; it rewards individual owners and occupiers by sure returns, improves with age, and gradually enriches the nation. While, then, much land—not all land—should be land down to pasture, some should be broken up, say, poor down land worth 5s an acre, that can be made to produce a crop of roots to be eaten off by sheep, and when thus improved, kept for tillage, or relaid down worth 20s an acre; also thin-skinned low land covered with pink or sheep-rot grass, that cannot readily be improved by draining and top dressing. There are other soils having much mineral and little vegetable matter in them, such as the corn brash on the lower oolite of North Wilts and South Gloucestershire, where the vegetable constituents have been so effectually destroyed by what is locally called "stifle burning" as applied to arable land, and by "paring and burning" the turf of grass land, that it cannot now be made to produce profitable grass, though it yields good crops of corn and roots. Other lands of good loamy description may also be retained in tillage, as it is well known that under good management they will produce as much beef and mutton, in addition to corn, as they would do if all under grass. To make the inducement to lay down to grass still more evident, look at the following average prices of the produce of pasture and arable land for the last three years:—

	Wheat. s	Potatoes. s	Beef. d	Mutton. d	Butter. s d	Cheese. d
1862	57	190	5	6	1 0	8
1863	46	120	5¼	5⅝	1 2	9
1864	40	50	5¼	6⅛	1 4	11

We find, at the same time, from the only numerical statistics we have, that the live stock in Ireland has *decreased* 667,323 head since 1859, while our total imports have only been 546,127 head, including about one-third calves, showing a difference of 121,196 head, and affording a clear proof that there *is less supply of animal food, with greater ability to buy it than ever existed in this country before.* The great Ballinasloe fair, just closed, confirms this statement; for while in 1863 there was 22,876 head of cattle shown, this year there were 14,444 ditto; showing a decrease of 8,432. The same indications are shown by *sheep stock.* In 1858, 97,779 were shown; in 1863, 73,494 were shown; and this year only 70,072 were shown, indicating a falling off since 1858 of 27,707, and of 3,422 since last year. This, too, has been accompanied by a decrease in the cultivation of cereal crops to the extent of 122,438 acres, enough apparently to influence the price of corn; but it has had no such effect, and never can while all the ports of the world are open to us. It is believed by the best-informed agriculturists that with all the appliances of machinery and imported manures, *the produce of corn in this country has not increased to an appreciable extent within the last ten years;* but no deficiency in home harvests can now have any perceptible effect on prices, and it is, therefore, to increased production alone that farmers must look for remuneration. Let no corn-farmer, then, in future look for high prices, even for the produce of a deficient harvest. The produce of *butter* is another striking illustration of our inability to keep pace with consumption; for the importations have steadily increased, and are now upwards of 560,000 lbs in excess of those of 1859, while the price has risen to a point that makes it felt in every household. The system of yearly tenancy in England has a good deal to do with this result, for it certainly does not induce the permanent improvement and laying down of grass lands—improvements which cannot be removed in a year. The farmer's income tax being assessed on his rent, affords no index to his means; but there is very little doubt that farming capital is *considerably reduced* since the close of the Crimean war, while trade returns have been enormous and its capital greatly increased. So few tenants being bound by leases, it may be asked why they adhere to their farms in adverse times? It is in the natural hope of better, and few will abandon their farms until they have been driven to take the last breath out of the body of the soil, and then many leaseless landlords will be left with exhausted farms on their hands. An equitable lease induces improvements that will carry a tenant through many vicissitudes, but the natural accompaniment of a yearly tenancy is reduced fertility. Seeing how zealously France and other foreign countries are fostering farming emulation, even amongst the highest nobles and landowners, it is no longer politic that we should be blind to our defects.

Looking back at my observations during the months of July, August, and September, on the whole of the crops in the South and West of England, I have arrived at the following result by noticing the state of the crops separately in sixteen different counties, and striking an average. *Wheat* is an average crop, or say 32 bushels per acre, of fine dry quality, much of it having to be cut during the night, when the dew was on, to prevent it shedding; *barley* a sixth over an average crop, or say 56 bushels; *oats* one-third under, or 40 bushels; *beans* two-thirds of a crop, or 36 bushels; *peas* half a crop, or 22 bushels; *tares* two-fifths of a crop, or 16 bushels; *hay* (clover and meadow) half a crop, or 18 cwt, and no second cutting has been obtained off meadow land for rowen hay, nor for seed off clovers, the light aftergrowth in both cases having been consumed by stock; *saintfoin hay*, grown on chalk and corn brashes, four-fifths, or 32 cwt; *hops* five-sixths, or 5 cwt (some in Kent are total failures, and have not been picked); *potatoes* two-thirds of a crop, say 4 tons of very small, but generally sound tubers; *Swedes* are about a sixth of a crop on the land where the plants have been allowed to stand, or 4 tons; but one-half the land sown with this important crop has been ploughed up, and the roots on the remainder are very small, woody, and inferior in quality. *Mangel* is about half a crop, or say 14 tons. *Clover* seed is about one-fourth, derived entirely from the first cutting, as no second, usually appropriated for seed, has been obtained almost anywhere. Rye-grass seed will be nearly a full crop.

II.—COLONIAL AND TROPICAL PRODUCE.

TEA, SUGAR, COFFEE, RICE, TOBACCO, &c.

Messrs Arthur Capel and Co. (London) report:—

Tea.—As regards tea, we have again to report, in 1864, a very unsatisfactory state of affairs as far as *importers* are concerned. The stock at the beginning of the year was a very full one, whilst the arrivals have been nearly, if not quite, equal to our deliveries; the consequence has been *that our market has been over supplied, and there has been a constant pressure to sell.* The trade have been very cautious buyers throughout, whilst in rare instances has there been any relief from speculation, *and the result has been a very serious loss to importers.* Notwith standing this, and the adverse accounts sent out from this side to China, more eagerness has been displayed this season in hurrying forward teas than has ever been known before,—the total of export for the first six months of the season reaching

Digitized by Google

90,000,000 lbs, and at prices which must again entail heavy losses. As long as this system of *hurrying forward shipments early in the season goes on*, we fear there is no hope for any rally in our markets, as the trade will not hold the stocks they used to do, finding their advantage in moderate holdings, owing to the rapidity with which they can renew their supplies. *Thus the onus of holding the stock is thrown mainly on importers*, who, to compensate themselves, should look to a low range of prices in China, it being very difficult to get speculators into the market, as it is often found that, owing to its hurried preparation for an early market in China, tea loses its quality by keeping, and that thus any advance in the market is lost by the deterioration which has taken place in the article.

The home trade *shows a steady increase in consumption*, although not to the extent we had hoped during the early part of the year, the increase, which was 2,471,830 lbs for the first six months, only amounting to 3,250,000 lbs for the year. This falling-off may perhaps be attributed less to increased consumption than to the trade, owing to the very high rate of money, reducing their duty-paid stocks to the lowest point possible. Taken throughout, the year has been a difficult one to the trade: the supplies have generally been in excess of the demand, and there has been *a steady but gradual decline throughout* in all but fine to finest kinds,—the only exception being some speculative purchases at the end of *May* and beginning of *June*, which ended very disastrously, showing in many cases 4d to 5d per lb loss. It is now evident that, owing to the comparatively low rate of duty, the bulk of the consumption is running on good and fine teas, from 1s 8d per lb upwards, and this should be borne in mind in purchases for this market, as in future we expect to see a wide difference in price between common to fair and good to fine sorts, the former being likely to prove in over supply, whilst the latter will scarcely meet the requirements of the trade. The system of public sales without reserve has been carried on to a large extent this year, it being difficult to quit certain classes of tea by private contract.

The *export trade* shows a very fair increase upon last year, amounting to 1,550,000 lbs. In addition to a steady increase to most parts of the world, a great stimulus was given in the early months to exports to America, owing to the anxiety of shippers to get their goods there before the increased duty should be imposed; but the shipments did not in many cases turn out profitably, and in some instances they were returned to this country. During the autumn months, there have been scarcely any fine teas shipped to Russia, other than those in transit, bought in China for that market, chiefly owing to the adverse state of the exchanges; but exporters have relieved us of large parcels of common to fair black leaf congous, for which there is scarcely any demand for home consumption, and, on the whole, we may consider the export trade for the year satisfactory.

The statistics for the United Kingdom show a considerable decrease in *imports*, the total being 122,687,000 lbs, against 136,123,500 lbs last year. The *deliveries* show an increase of 4,800,000 lbs, of which 3,250,000 lbs is in home consumption, and 1,550,000 lbs in export, the total being 116,800,000 lbs, against 112,000,000 lbs. The stock we estimate at 93,003,000 lbs, against 89,184,000 lbs, and the quantity afloat at 44,577,000 lbs, against 41,500,000 lbs last year.

Indian teas continue to be in great favour with the trade, owing to the great inferiority of the China crops, and the fine, strong, pungent kinds have sold dearer than ever, whilst the common, weak, and sour kinds have been generally difficult of sale, not being good enough for the purposes of admixture for which they are mostly used. It is quite evident that, if proper care in the cultivation and cure of Indian tea is taken, the result will prove a great success to all interested, as it only requires the superior strength and quality to be maintained to ensure a ready sale at remunerative prices.

Japan teas, as long as the demand for America lasted, sold very readily at full prices, but they do not meet with favour from the home trade, and since the export to America has ceased, they have been very difficult of sale. We fear that, unless they can be made to assimilate more to China teas, either black or green, they will be always uncertain of sale, as they are entirely dependant upon the American demand, which, in the present position of affairs, is liable to great fluctuations. The coloured kinds, early in the year, realised extreme prices.

Messrs Layton and Co. (London) report:—

Sugar.—The buoyant tone with which the market opened on the 5th January, 1864, was not of long duration; deliveries began to show a marked falling off, and speculation to any important extent ceased, the money market became stringent, prices began to take a downward tendency, and although there was no *pressure* to realise, quotations by the beginning of *February had declined* for all Muscovado descriptions 3s to 4s per cwt. At this reduction there was more disposition to purchase, both by the trade and speculators, resulting in an active market, and a decided upward tendency; prices recovered all they had lost, except for fine grocery and crystallised qualities, in which there was no quotable improvement. Although the market was rather quiet, these prices were maintained throughout *March*, the trade restricting their purchases within very narrow limits, and speculators turning their attention to floating cargoes, a considerable business in which was done at firm prices. At this time, in anticipation that the Chancellor's Budget would include some reduction of duty, deliveries as well as purchases became scanty; although, as had been expected, the previous surplus stock in the United Kingdom was now reduced to a comparative deficiency. On the announcement of the proposal, on the *7th April*, of a larger reduction than had been anticipated, an extensive speculative demand again set in, *and a further advance of 1s to 2s per cwt* resulted for parcels both on the spot and afloat. The activity thus imparted lasted but a few hours, as serious doubts began to be entertained whether the British refiner could successfully cope with his foreign competitor. These doubts have been fully justified by the result, for during the month of *May* alone the *duty paid* entries of foreign *refined* amounted to 8,300 tons, the importations being still greater. The continuance of the Prusso-Danish war, and the rapid rise of 2 per cent. in the Bank rate, also tended to cast a gloom over commercial matters, the market became extremely flat, some forced sales were made at a reduction of fully 2s per cwt, which thus left little, if any, benefit to holders from the reduced scale of duties. Prices partially recovered themselves on the announcement of a month's armistice between the belligerents, and refiners bought rather more freely. During *June*, however, the trade reduced their operations to the lowest pos-

Digitized by Google

sible limit, and notwithstanding that holders evinced great firmness, this was the commencement of *a downward tendency* which, in the end, resulted little short of the total advance which had taken place from the lowest point of 1863. The fall was greatly accelerated by the enhanced value of money, and the consequent mistrust engendered, as well as from unexpected supplies coming from America, thereby making imports in excess of those of 1863. This state of things continued until within a fortnight of the close of the market, with only occasional periods of steadiness, the value *of the article almost daily gave way*, and in *September* the stock of raw sugar reached an equality with that of 1863, while there was a large surplus of foreign refined in the bonded warehouses. Reports of injury to the growing beet-root crops failed to impart any strength to the market, or to check its downward course. In the early part of *December* the stock of raw at this port was 37,000 tons in excess of the previous year, and that of all kinds in the United Kingdom showed a surplus of 55,000 tons, while *prices had fallen from the highest point of the year* 11*s per cwt.* Clayed Manilla, which was worth 30s 6d in bond during the month of April, was sold in December at 19s 2d per cwt. This serious decline appears to have brought prices below those ruling on the Continent, and an export demand has lately sprung up, which has imparted a more cheerful aspect to the market, and prices rallied fully 1s per cwt previous to the Christmas holidays. The market re-opened on the 3rd January, 1865, at steady prices, with a firm aspect, but the demand for export must be *much enhanced* ere it relieves us of the present heavy surplus supply, and tends to any *material* improvement in the value of this important commodity. The sales of the latter part of this week, however, have gone off with less spirit, and a decline of 6d per cwt has been submitted to.

Estimate of Imports, Deliveries and Stock of SUGAR in the UNITED KINGDOM to the end of December, 1864, compared with 1863 and 1862.

Coffee.—A *further upward tendency* in prices continued to be the characteristic feature of this market during the *first three months* of 1864, notwithstanding that stocks were in excess of those of 1863. When, however, other colonial produce became greatly depressed, either by monetary or political complications, this article generally was less affected, *and the reduced value at no period exceeded* 10 *per cent.*, while the quotations of the day were at the worst of times obtainable. The healthier state of trade, and comparative ease in the money market, which supervened during the last eight weeks of the year, caused a favourable reaction, and prices rallied 5s to 7s per cwt; this establishes an average advance of quite 4s per cwt on the closing currency of 1863. The stock of Ceylon coffee is nearly on a par with that of this time last year, a large proportion of the heavy arrivals having been taken off by the greatly increased export demand. Native Ceylon has at times been rather unsaleable, owing to the increase in the supplies of native-grown Mysore and other common East India kinds, the extremely heavy arrivals of which, together with the various growths of plantation qualities from the same quarter, denote the greatly extended cultivation of the article. Native Mysore sold in August as low as 63s 6d; but after the reaction in November prices rapidly rose to 71s in December; this extreme quotation is, however, not now quite maintained. The business of the past year seems to favour the opinion *that the consumption of this article more than keeps pace with the increased produce*, especially as regards the better qualities. The future of the commoner descriptions of colonial greatly depends upon the demand for Brazil, the crop of which is said to be large.

Estimate of the IMPORTS, DELIVERIES and STOCKS of COFFEE in the UNITED KINGDOM, to the end of December, 1864, compared with the two previous years, with a comparison of the STOCKS at the close of the month.

Indian Tea.—It is satisfactory, that while, during the past year, the quotations of nearly every article of colonial produce have been low and depressed, prices of Indian tea have continued to improve, and looking to the active and increasing competition, there can be no doubt but that these descriptions are gradually, though surely, taking root with the tea trade of this country. In the twelve months just ended, the public sales (36,300 packages), have afforded a generally good assortment and if we except the common and broken-leaf kinds, prices wil

Messrs Jackson and Till (London) report:—

Rice.—Commencing with some slight animation during the first days of January, the progress of the rice market through the successive months of the past year has been continually subject to periods of depression. The prevalence of high rates of discount, involving at times extreme monetary pressure, has continued without intermission throughout, finally culminating during the last quarter of the year in a short but very sharp panic. Labouring under the effects of these influences from the first, the tendency *to lower rates was soon apparent;* from the end of January for the first six months, prices of rice in all positions *gradually receded;* the various phases of the Danish question occasionally influenced some slight fluctuations the first month or two, but upon our Government deciding early in the spring to leave the matter alone, the prospects of an European war became slight, and all buoyancy from that period till the summer entirely ceased. In *June and July* whilst the Conference upon the affairs of Denmark was sitting, a feeling of uncertainty as to its issue excited a few speculative purchases, but this speedily passed away. A relapse to inactivity shortly ensued. During *August and September* the great bulk of the season's shipments arrived off coast in rapid succession, and being offered freely for sale, caused a *further important decline,* but the supply proving still abundant, great difficulty was experienced in finding buyers at these reduced rates, and in the month of *October,* most notable of the twelve for the state of panic which pervaded all classes of commerce, and the numerous failures that occurred, many forced sales were made, *and the lowest point of the year was touched.* During the last three-named months the market for spot rice was influenced by the same causes, and a similar decline in prices was established. Towards the end of October, when matters began rather to mend, and the future was looked upon more hopefully, the low prices of Necrancie rice attracted some attention, and a fair speculative demand arose for this kind, it having previously suffered the greatest decline, and the market was soon cleared of all tempting parcels. The reduction of the Bank rate on the 24th Nov. gave a still further impetus to the trade, and concluding the worst had now passed, business for a time steadily improved, and prices gradually advanced. In reviewing the rice trade for the past year as a whole, we are constrained to describe it as an unprofitable one to the general class of operators. Exceptions as in every rule do doubtless exist, and such we must congatulate, but we have to regret that some of the largest houses engaged in the trade have been compelled to withdraw their support for a time. The stocks have fluctuated, but within the limits of moderation either way. Imports have rather exceeded those of last year, whereas deliveries are rather less.

With regard to the future, we venture to hazard an opinion, based upon a few prominent facts. The extensive requirements of the Chinese and Bombay markets, in consequence of the failure of the crops in those parts, and owing to the fact *that large tracts of land there, hitherto planted with rice, are now cultivated with cotton,* will absorb a very large proportion of the produce of the East Indies and Burmah. The severe losses experienced by those who sought to save last season by importing direct for their own requirements, especially by continental houses, and the retirement of other firms who were formerly large shippers, will also tend much to lessen shipments to Europe during the ensuing season, which we therefore estimate will be much under last year's. From Calcutta especially we expect very bare supplies, as the high prices paid by other markets, together with the local demand and partial failure of the crop, will preclude the probability of any important exports to Europe. Considering that the prices of rice on the spot are now comparatively low, the stocks very moderate, and the prospects that future supplies will be short, we do not hesitate to opine, and there is every reason to anticipate, a gradual and well-maintained advance in the value of all kinds of rice.

Messrs Horatio N. Davis and Co. (London) report:—

Tobacco.—The past year opened with the important subject of a probable taxation by the Federal Government on all tobaccos exported from ports under their jurisdiction. This point of interest deterred the market from receding, which would no doubt have been its fate in consequence of the unprecedented large crop of 1863, presumed at that period to have been harvested (and which has since been clearly demonstrated by the excessive receipts at New York), together with the knowledge that all tobacco-producing countries were making every effort to supply any future shortcoming in the production of the North American growths. Prices were slightly in favour of buyers during the early part and towards the spring, when it became known that, owing to the able efforts of planters and others interested in the article, Congress had decided not to levy an export, but simply a home consumption duty, a reduction of ½d per lb was established on the better class of Western strips, and 1d per lb on the medium and inferior, and Western leaf in like proportion. Operations in both leaf and strips in consequence ensued for trade and resale; holders, however, excepting when influenced by directions of consignors, were willing to meet the demand at the rates current before the transactions above-mentioned were entered into. In July, owing the advices of the forced daughting of the negroes by the Federals for military purposes, and hence curtailment of necessary labour for cultivating the growing crop, this market strengthened, and several interests were withdrawn from sale; no speculative feeling, however, arose, and the trade continued to purchase only when in want, and which appears to have been their chief subject throughout the year. Towards the autumn rumours were current of drought, and being confirmed, together with the scarcity of labour and the small crop planted out, caused the probable production to be rated at 60,000 hhds; but by the latest advices 80,000 hhds is the estimate put forward as the yield of Western tobacco for 1864, and the quality stated to be a decided improvement over that of 1863. These strong points in favour of holders were partly counterbalancad by rumours of peace and the uncertainty attending the Presidential election. It is deserving of notice that during the year, notwithstanding such important matters as the probability of an export duty being levied on all tobaccos leaving the Federal ports, seizure of negroes, drought, decidedly low estimate of crops, re-election of the the former President, prices fluctuated but little, and the year closes at the advance on the average of ½d to 1d per lb over the quotations of 1st January, 1864.

III.—WINE TRADE.

Messrs Matthew Clark and Sons (London) report:—

The trade in wines and spirits, which has gradually progressed since the reduction of duty, has made a most marked and decided step in 1864, and, while the imports have been somewhat excessive, and leave a heavy stock on hand at the present time, still the home consumption shows so great an increase as to justify the conclusion that the bonded stock is but little above the requirements of dealers, and may speedily be reduced, if importations are moderate, by the deliveries during the next two months. The total result of the 1864 trade in wines may be estimated as follows, the actual figures for previous years being also given, to facilitate comparison:—

Wines.

	Imports. pipes.	Home consumption. pipes.	Exports. pipes.	Stock, Dec. 31. pipes.
1861	103,294	101,852	18,000	105,800
1862	111,782	92,378	19,120	105,860
1863	132,637	98,346	21,543	118,000
Estimate for 1864	140,000	109,100	19,000	130,000

Brandy.

	Imports. puns.	Home consumption. puns.	Exports. puns.	Stock. Dec. 31. puns.
1861	18,250	14,000	4,650	25,350
1862	20,700	15,000	6,060	25,600
1863	27,240	16,665	7,500	27,600
Estimate for 1864	41,000	20,000	6,350	42,000

This shows that 1864 has been the largest in imports and deliveries that we have yet had, and, compared with the average rate of delivery under the old scale of duties, the home consumption of wine shows an *increase* of fully 66 per cent. This increase is the more remarkable, as it has been maintained throughout the year, in the face of monetary pressure and commercial disaster, added to the fact that several descriptions of wines have ranged considerably higher than formerly.

The wine market, at the commencement of the year 1864, showed considerable activity, and transactions on a very large scale were entered into during the first few months. The rapid increase in the bonded stocks, combined with a steady rise in the value of money, checked this buoyancy, and, as the season advanced, the favourable accounts from all wine-growing countries changed the whole aspect of the market. Large importations continued, which were immediately pressed for sale, or transferred for advances; and instead of a ready demand, at fair rates, it became at last impossible to sell, unless at a serious reduction from import cost. The result must have been very disastrous to many of the large operators, who were caught with

Digitized by Google

heavy engagements for goods at high prices; and, although the deliveries were large, still the demand was not sufficiently active to enable holders to operate at fair rates, and provide for their immediate wants. Several houses, whose means were quite inadequate to their scale of operations, had to succumb to this pressure, but we are glad to bear witness to the general solidity of the trade, no failure having occurred among the principal wholesale dealers.

The large purchases of sherry which commenced nearly three years ago, and continued during the whole of 1863, degenerated into excessive speculation in the early months of 1864; and this has produced the natural effect of inducing shippers to part with nearly all their old stock at the tempting prices offered, the result being that now, with some rare exceptions, they are actually unable to sustain quality, although the quotations for standard marks are nearly double what they formerly were; taking quality into account, we may safely affirm that really fine sherry, when to be had, will be found to be 200 per cent. dearer than it was before the reduction of duty in 1860. At present, this heightening of price and lowering of quality does not appear to have had any effect on consumption, for the home delivery in 1864 is estimated at 42,500 butts, being fully 3,500 butts above that of 1863.

In Port wines a good trade has been done, but the demand has ruled principally for light bodied wines fit for bottling. The great scarcity and high value of really old wine in Oporto, has rendered it very difficult for shippers to meet this demand at moderate rates, and consequently recourse has been had by some to white wines for blending. The home delivery for Portugal wines in 1864 is estimated at 25,000 pipes.

Spanish red wines have made progress and been in fair demand all the year, prices having been moderate and the quality good. The home consumption in 1864 is estimated at 3,650 pipes.

Madras also show a decided increase in demand from the same cause, fair quality at moderate price: the home consumption in 1864 may be estimated to have reached nearly 4,000 pipes.

In common low wines one feature has been the objection raised by the Customs to admit some of the compounds from Hamburg for home consumption as wine, an objection which appears to have been fully justified in many instances, some importations from that quarter showing little or no *vinous* character. The home delivery of this article does not show any very serious diminution: the total is estimated at 2,400 butts; but the imports have declined fully 40 per cent., which decline must be attributed to this action of the Cnstoms authorities.

The produce of wine last year in France is very highly estimated, the quality being fine and quantity large. In the Medoc, the vintage is considered the finest since 1848, and this opinion has been practically confirmed by purchases to a very large extent having been already made of every description; the first-growth wines realising 5,000f per tun (equal to 50*l* per hhd) on the lees, a price that will cause them to be very expensive before in a fit state for shipment.

In Spain, the vintage was good, both for white wines in Xeres and for red wines in the north and east.

In Portugal, the enrolment of Douro wines reached 66,000 pipes; the quality generally is not well spoken of. The wines of 1863 have been highly approved and freely ordered; the quality is such as seems likely to rank with some of the best wines of former years.

The supply of really fine matured wines has always been limited and barely sufficient to meet the English demand in former times. The incrased consumption coming after the vines had suffered so much from disease, has absorbed stocks of such descriptions both in Spain and Portugal, and nothing remains to shippers now but to substitute good young wine. The old class of English consumers whose standard has been formed on a high level of quality will now realise the fact, that in past years they had the advantage of obtaining the best wines that could be had at a comparatively moderate cost, and that this supply is now exhausted, or only obtainable in small quantities at very extravagant rates; happily for the trade, the produce of the last two years has been abundant, so that the extension of consumption in this country among a new class is likely to be materially aided and stimulated by cheap young wines being above the usual level of quality, and procurable at moderate rates.

In the wines taken for home consumption in 1864, the following are the estimated quantities at the various rates of duty:—About 1,510,000 gallons in cask, containing less than 26 degrees of proof spirit, admitted at 1s per gallon duty; about 9,000,000 gallons in cask, containing more than 26 degrees and less than 42 degrees of proof spirit, admitted at 2s 6d per gallon duty; about 35,500 gallons in cask, containing more than 26 degrees and less than 45 degrees of proof spirit, duty 2s 9d to 3s 3d per gallon; about 1,020,000 gallons in bottles, containing less than 42 degrees of proof spirit, admitted at 2s 6d per gallon duty.

The low strength wines in cask have increased about 240,000 gallons; strong wines, in cask, about 773,000 gallons; and wines in bottle, about 75,000. The light wines form about 13 per cent. of the total consumption—being ½ per cent. increase over last year the bottled wines 9 per cent., and the strong wines about 78 per cent. Importations of red wines in bottle have slightly decreased, but white (*principally sparkling wines we think*) have increased.

In the market for foreign and colonial spirits there has been no improvement of importance. Brandies have ruled steadily, and without any variation all the year. The quality of the 63 vintage has been much appreciated, and large stocks are held throughout the country. The produce of the last year is also highly spoken of; being very abundant, there is every prospect of the present rate of charges being continued; the quotations have not yet been fixed by the first houses, but they are expected to be about 10 francs lower than last year. The home consumption has felt the effect of low first cost, as the quantity cleared home in 1864 amounted to fully 20,000 puncheons, an increase of 3,200 puncheons over the previous year. The export has been but moderate, and much less than last year.

Rums have been fairly sustained in price during the year, and the decided falling off in imports, and increase of home consumption would warrant increased firmness in the article; but the low price of corn and Hambro' spirits checks the export, the delivery for this purpose showing a considerable decline compared with former years; while the export of mixed spirits, a portion only of which is rum, have much increased. The home delivery has improved, and amounted to 35,500 puncheons last year, an increase of 2,400 puncheons over 1863.

IV.—RAW MATERIALS.

WOOL, SILK, INDIGO, LEATHER, OILS, CHEMICALS, TIMBER, METALS.

(1) WOOL.

Messrs John L. Bowes Brothers (Liverpool) report:—

During the first half of 1864 the wool trade, and all manufacturing interests connected with it, were marked by *great activity, prosperity, and freedom from speculation*; as autumn approached, the benefits of a good harvest were counterbalanced by a want of confidence in monetary matters; rumours of peace in America drew attention to the inflated state of credit, and precipitated the collapse of a surplus of financial schemes and the break-down of excessive speculation in cotton, sugar, and other articles. Dear money, combined with these causes, gave a check to the consumption of wool, and manufacturers resolutely contracted operations, which has kept the trade in a sound state; we have since had a dull, dragging trade, and prices of most wools were in October and November 10 to 20 per cent. below those current during the summer. During the last fortnight we have had a better tone, with some increase in the demand, which may be expected to continue, as consumers are only moderately stocked. The value of sound staply kinds has a hardening tendency.

The great feature in the trade is the *increasing demand for long-stapled kinds*, suitable for worsted, particularly English wool and its imported substitutes, the demand for which is extending more rapidly than for short staples, while for the last twenty years by far the largest increase in the production has been, and still continues, in the fine short wool of Australia, Cape, and Buenos Ayres. The want of long wool was felt while cotton was at a normal price, but has been greatly enhanced since that staple quadrupled in value, and, no doubt, to dear cotton part of the advance in the value of worsted wool is due. The production of merino and mestizo wool appears to be fully up to the consumption, and is supplemented by an enormous increase in the consumption of rag wool, which is substituted for fine and coarse short staples.

The *import* of wool into England during the eleven months of the present year, as compared with the corresponding period of 1863, shows an *increase of* 28 *per cent.*, and the export a decrease of 14 per cent., the balance showing an increase of 40 millions of pounds retained for home consumption, assuming the growth of domestic to remain unaltered; but it will reduce the force of these per centage differences, if we remember that they are independent of the home-growth, supposed to be somewhere about equal to the quantity imported. Our exports of woollens, worsteds, yarns, &c., shows an increase of 25 per cent., chiefly in those kinds requiring long-stapled wool.

Reference to the following table shows that concurrently with dear cotton (comparing to-day's value with that of Christmas, 1860), prices of long-stapled wool (1) have risen 30 to 50 per cent., short coarse (2) has risen 20 to 30 per cent., short fine (3) has fallen 10 to 20 per cent.

The subjoined table shows the price of cotton and various kinds of wool on 31st Deecember of each year:—

Messrs Perkins and Robinson (Liverpool) report :—

Colonial Wools.—The first series of public sales, held in February, opened at a slight advance on November and December quotations, but the improvement was lost as the sales progressed. In May there was a very strong demand; stocks in consumers and dealers hands being quite exhausted, they bought freely at an advance of 1d to 2d per lb. The condition of the wools at this sale, however, was so very superior, that the advanced prices paid must in a great measure be attributed to this circumstance. The quantity brought forward in July was very heavy, and a decline of 2d to 3d per lb was submitted to. This sale being followed by another in November, also unusually large, and at a period of great depression, a further reduction of 2d to 3d per lb was established. The increase in the growth of colonial wools must tend to keep prices in check, if it continues in the same ratio as in the past two years. The quantities offered for sale this year at the four periodical sales have been 380,360 bales, against 320,852 bales in 1863. The total importations have been 371,218 bales, against 308,651 bales in 1863, 290,651 bales in 1862, and 268,639 bales in 1861.

River Plate wools commanded attention in spring and summer, particularly those kinds with length of staple. Cordova, Santiago, &c., sold very readily at high prices, and a considerable quantity went into consumption. Well-managed flocks of Monte Video and Entre Rios were also in favour at remunerating prices; but, unfortunately, a very large proportion of the clip proved more than usually burry and wasty, and the market became glutted with a heavy stock of unsaleable wasty wool. The growth of River Plate wools must in all probability increase every year, and it is much to be regretted that, whether from a want of facilities or other reasons, they are sent forward in such bad condition as regards waste and burr, as to create a prejudice against their use on the part of many English manufacturers. Throughout the year Peruvian wools have been in request, and the range of prices has been high; the demand has kept the stock in a very moderate compass until quite lately, so that importers have had pretty much their own way as regards prices. We have recently had arrivals on a rather larger scale, and buyers are now holding off in hopes of doing better. Fine Lima wools, in the grease, and fine scoured Chili wools maintain their position, and have been at all times in favour with consumers; larger supplies than have come forward could have been readily placed.

English and Irish.—English and fleece wools opened in January at 26d and 23½d per lb for bright-haired hogs and wethers respectively, and remained without much change in value until March, when some improvement took place. At the close of April the quotations were 31d and 26d per lb. From this period until about the end of July the markets were dull and heavy; but in August there was again a revival, and the highest prices of the year were made, viz., 32½d per lb for hogs, and 27½d per lb for wethers. For the next two months the trade was heavy at drooping prices, but the increasing scarcity has of late had its effect, and we close within a fraction of the highest rates paid. There probably never was a time when so little home-grown wool was left in the hands of producers, and there is every prospect that prices will be higher before next clip-time.

(2) SILK.

Messrs Durant and Co. (London) report :—

We beg to hand our annual statement of stock, import, and deliveries of silk. You will find, in China silk, a diminished import of 17,400 bales, and a diminished delivery of 9,300 bales; in Japan silk, a diminished import of 13,000 bales, and a diminished delivery of 1,300 bales; in Canton silk, a diminished import of 1,000 bales, and a diminished delivery of 1,450 bales; in Chinese thrown silk, a diminished import of 350 bales, and a diminished delivery of 400 bales; in Bengal silk, an increased import of 210 bales, and an increased delivery of 6,000 bales; in Persian silk an increased import of 900 ballots, and an increased delivery of 120 ballots; in Brutia silk, the imports and delivery same as last year; in Italian silk, a diminished import of 500 bales, and delivery same as last year.

Our figures include 1,700 bales China and Japan only now coming into the warehouse, and still they show, as compared with last year, a diminution in the imports and the stock of 40 and 45 per cent. respectively, and in the consumption of 12 per cent. A most miserable exhibition being an import scarcely more than one-half of our largest years, making it no matter for surprise that prices should be 20 per cent. in excess of last year. And withal such a disappointment, coming at a moment when our manufacturers were just emerging from a long period of depression—*four years of unprofitable trading*—and when there was all fair ground for hoping for further progressive improvement in the European crops, and also some recovery from the already small import of China silk. So universal, indeed, was the opinion of almost all concerned in the growth of silk in Europe as to the continued improvement, or at the worst in the maintenance of the point they had reached in the previous year, that it was not till the very last days in May that any serious doubts were made known up to that time that there was uninterrupted pressure upon the market, holders selling anxiously, not only the produce of the last crop, but also all that remained of previous years, so that all were found more or less with exhausted stocks. The whole thing came upon us like a thunder clap, too general to be ignored, but too surprising to be readily believed; still, prices immediately responded, first 5 to 7½ per cent., then 10 per cent., and then with a little hesitation 15 per cent., and in the early days of September, with the arrival of new silk from China, an advance of 20 per cent. was established, and there, with occasional fluctuation of feeling more than of prices, we have remained. We begin the year with a very firm, we might say buoyant market at the highest range of prices known since 1857. As is usual in such cases, there cannot be traced any cause for apprehending change; but it is a dizzy height, and the chapter of accidents is more or less largely against a high range. The greatest possible efforts are being made to remedy the sad malady in Europe. Mysterious and incomprehensible as it was in its origin so it remains, but as it came so it may pass away. The attempt to introduce seed from Japan, tried only to a small extent the last three years, and partially successfnl, is this year being pushed on on a much more extensive scale, and thus far with strong ground for hope of a successful issue. Although, after all, it will form but a comparatively small item in the total production of Europe, still it will be an item, and in such cases the smallest item is important, and success stimulates further and more earnest endeavours. From China, also, we may reasonably hope for increased supplies. The unhappy conflicts so long raging in the silk-producing districts have ceased, and the population are said to be returning to their old quarters, and we may fairly expect they will resume an occupation so profitable as the growth of silk. So that, miserable as is the present position of the silk manufacturer, both home and foreign, for sad experience has shown that he cannot live at these prices, brighter days may fairly be

Digitized by Google

expected; for the present, those only profit who have shown a courage which their less venturesome brethren were induced to look upon as rashness.

The retrospect of the year cannot be altogether unsatisfactory, for although the rise in prices was too rapid, and the long depression of trade too real for consumers to be other than very reluctant buyers, they cannot have failed to profit, to some extent, upon their stocks, and in the first five months of the year the moderate range of prices must have enabled them to obtain a living profit, except that the universal expectation of large supplies had made them always anxious sellers. The importation of foreign goods has not increased; indeed, in many cases, our manfacturers no longer fear foreign competition, but the export of raw silk continues the same as last year, so that the whole diminution in the deliveries has been in the home consumption, which had already reached an uncomfortably low point. Importers, too, have, we fear, done no great things. In all the early part of the year it was a question of more or less loss to them, and, as with consumers, the rise in the countries of production was too rapid, and the number of eager buyers too great, to allow of any great operations for profit. The one bright feature of the year, but that only affects a comparatively small class, is the altered position of Bengal silk; not only has it participated fully in the general improvement in prices, but it has entered far more largely into consumption. Thanks to the scarcity of other silk, the deliveries show an increase of 50 per cent., and stock, which had long been more than a year's consumption, is now comparatively light.

increased in proportion to that of refined; the manifest advantages enjoyed by the Americans in refining, enables them to produce a fine oil at a price quite disproportionate to that at which it can be manufactured here, that the British refiners have for the most part closed their works; the smallness of stocks, how-

Mr H. W. Eaton (London) reports:—

Annexed is the annual table of statistics of raw and thrown silk during the year 1864, compared with those of 1863.

*** Average net weight of a bale of Bengal, 150 lbs; small, 105 lbs—China raw, 102 lbs—Chinese thrown, 112 lbs—Canton, 110 lbs—Japan, 100 lbs—Patent Brutia, 175 lbs—Italian, 290 lbs—and a ballot of Persian, 75 lbs.

Details of the different descriptions affecting separate interests will be found in the above table, but the result of the comparison shows—A decrease in the total imports of 3,084,784 lbs, or 25 per cent.; a diminished consumption of 583,531 lbs, or 8 per cent.; and a decrease in the stocks of 1,913,959 lbs, or 44 per cent, with a considerably higher range of prices.

The export of raw and thrown silk again shows a falling off of 140,000 lbs as compared with 1863.

These figures it will be observed are the smallest seen for some years, but as consumption has to some extent accommodated itself to the reduced supplies, the greatest inconvenience has perhaps been felt from the unsatisfactory assortment and the extreme scarcity of good medium Taysaams, Cantons, and other coarse silk which the trade, to which these sorts are adapted, could have taken freely.

The course of the silk market during 1864 can hardly have been generally satisfactory, manufacturers whose success should always form the basis of the prosperity of a trade having, it is to be feared, done little good; while, as is always the case in a sluggish market, parcels of goods both at home and abroad have been sacrificed from time to time, either from actual failure or inability to hold,

(3) INDIGO.

Messrs Brown, Buckley and Co. report:—

This article has been of little interest during the past year, the high value of money, 6 to 9 per cent., has had the effect of almost entirely checking speculation, whilst the purchases for real wants have been confined to the narrowest hand-to-mouth requirements. Supplies have rather exceeded deliveries, and stocks are slightly increased. Much dullness prevailed at the commencement of the year, with scarcely any business, owing to the high value of money and the political relations of Germany; in the February sales 3,300 chests found buyers out of 9,000 brought forward at a decline of 3d to 4d per lb. There was subsequently an improved feeling, and a fair amount of business was done at some advance in prices, the rapid rise in the rate of discount to 9 per cent., however, checked operations, and in the May sales, 3,850 out of 9,350 chests found buyers at 3d to 6d advance on the rates of February. The market subsequently became very active, and about 3,000 chests were taken by French and German operators at an improvement varying from 3d to 9d per lb. The July sales scarcely supported the extreme advance previously established, but 5,800 chests found buyers out of 12,300, at a general advance of 3d to 4d per lb. Prices were fairly maintained after the sale, but the aspect of the money market induced much caution among buyers. In October, only 2,400 chests were purchased out of 13,200 offered, and the sale was virtually concluded in four days, prices showing a decline of 4d per lb; the business since has been unusually limited, but holders are very firm.

PRODUCTION of the BENGAL PRESIDENCY.

	Estimated. 1864. mds.	Actual. 1863. mds.	1862. mds.	1861. mds.	1860. mds.
Bengal	30,000	41,776	37,000	17,500	53,500
Tirhoot	46,000	33,590	42,500	15,500	34,500
Benares	13,000	10,554	10,000	15,500	12,000
Doab	12,000	7,880	20,500	19,500	13,500
Total crop	101,000	93,800	110,000	68,000	113,500

The import shows a decrease of 5,000 chests as compared with 1863, of which nearly 3,000 chests is Bengal; Madras shows an increase of 500 chests, being no less than 12,247 chests; the decrease in the supplies of Java, Manilla, and Bombay is considerable, 2,650 chests. The imports from Bombay have almost entirely ceased, the prices obtainable here being unsatisfactory. The imports of Java are also less.

The deliveries have been satisfactory, showing a decided improvement on those of 1863, the increase being nearly 5,000 chests; this evidence of recovery from the great depression of 1862 is highly gratifying, and as stocks of manufactured goods are everywhere reduced to the lowest ebb, we may confidently look forward to a still further increase in the consumption during the ensuing year. There can be little doubt that the supply of cotton, wool, &c., will be materially larger in 1865 than in 1864, or that the demand for manufactures will be more urgent, especially if assisted by a lower range of prices; it therefore becomes important to look to our future supplies of indigo.

(4) LEATHER.

Messrs Page and Welch (London) report :—

The leather trade of the past year has been *characterised by moderation and steadiness* both in supply and demand, as well as by unusually small fluctuations in prices of most descriptions of goods. The year opened with a fair business, the inquiry being chiefly directed to low-priced butts and offal, both of English and foreign. During the spring months moderate activity prevailed, dressing and shaved hides sharing in the demand, and commanding, in some cases, advancing prices. Towards the end of summer some animation was manifested, shoulders and bellies especially realising advanced rates; light English butts also improved in value, and calf skins commanded another rise in price. During the latter half of the year the changes have been very few and slight. The inquiry for sole leather has been to a great extent confined to light butts of medium and common tannage, but they have lost the advantage previously gained. Calf skins have also receded in value, and now stand in nearly the same position as at the commencement of the year. With regard to mixed tannages of South American butts, it has been difficult to move them in large quantities, and prices for all, except prime parcels of good growth, have shown a drooping tendency throughout the year, though our present quotations are still very little under those of twelve months ago.

It is evident, from *the fact that stocks of leather generally have remained* at a moderate point throughout the year, that, with a little increase in the demand, there would have been a general advance in price. But the season having been throughout unusually dry, while there has been no special foreign requirements, the consumption of leather has doubtless been less extensive than usual. *The largely-increased proportions of the manufacture of boots and shoes by machinery* has, no doubt, also exercised an influence on the demand. For this description of work light and low-priced leather is chiefly used. This can be more quickly replaced and in greater quantity than leather of better tannage and thicker pelt. To these causes may be traced in great measure the comparatively little inquiry for medium averages of English butts and also heavy foreign butts. At the same time, the great and frequent fluctuations in the value of money, the rate of discount at the Bank of England having been altered as often as fifteen times, whilst the average throughout the year has been considerably higher than ever before known, have caused the utmost care and circumspection on the part of buyers. There has thus been no speculation, and stocks in the hands of dealers must be in very limited compass.

It is worthy of note *that the leather trade was little, if at all, affected by the financial crisis of the autumn.* Notwithstanding the high rate of 9 per cent., which continued from Sept. 8th to Nov. 10th, the inquiry for leather remained throughout steady and regular; and it is matter for congratulation that, whilst failures of serious extent occurred about this period in many departments of business, our trade has been nearly exempt from such misfortunes. At the same time it must be admitted that the past year has not been one of great prosperity to manufacturers of leather, for whilst the prices of the raw material have kept on a par with, or shown a slight advance over those of the previous year, the value of both rough and dressed leather has in many instances declined, and the profits of manufacturing been correspondingly reduced.

A similar absence of fluctuation has prevailed in the *hide trade.* The South American hides in stock at the end of last year were gradually cleared at our January quotations. When the new imports arrived in the end of May, there were no hides left over in stock, and an advance of ½d per lb was demanded, and unwillingly given. A limited business was transacted until the end of autumn, when, under the influence of increasing stocks and monetary pressure, a slight decline in price was secured. The quotations, however, remain about ½d per lb higher than they were a year ago. In regard to Australian hides, which now assume an important place in our London imports, the present quotations are for light hides the same as at the beginning of the year, but fully ½d per lb lower for heavy. These hides are usually brought forward for sale directly on arrival, and sold at the market price of the day. This practice is not followed by importers of South American hides, who often hold their stock off the market, but rarely derive any benefit as the result. In East India kips there has been a remarkable falling off in the import, but the trade for them having been corresponding restricted both here and on the Continent, prices are generally lower than they were a year ago. For market hides the quotations are now nearly the same as those of last year, but they have been both higher and lower during the course of the year, the lowest point being about the middle of October, after which they advanced considerably, but have again declined to present rates.

While thus reviewing the past, we may derive some instruction for the future. Stocks of leather are now moderate; let tanners see that they remain so until a larger outlet, or a more remunerative price shall be reached. Supplies of hides continue on an ample scale. By a wise reserve in their purchases, they may be able to reduce the price, and at the same time diminish their manufacture until the demand shall have fully overtaken the supply, when their trade may be at length placed on a more remunerative basis than it has enjoyed for some years past.

(5) OIL TRADE.

Messrs Rose, Graham, and Wilson (London) report :—

The anticipations so generally entertained in January, 1864, in looking forward to a good and prosperous trade during the spring and summer were unfortunately but partially realised, and that only during the earlier months, our markets having, even then, to struggle against the stringent position and high rate of money, which checked speculative transactions, and induced consumers to purchase with caution; this was, perhaps, well, as it enabled solid mercantile firms the better to withstand the effects of the monetary crisis brought on in July and August, by reckless speculation in all sorts of schemes, most of them far from mercantile, the effects of which are still much felt, although gradually subsiding; should this continue, coupled with the prospect of a further reduction in the value of money, we cannot fail to have an improved trade in the produce with which we are connected, present prices, with very few exceptions, being very moderate.

Linseed.—The importation into London last year was the largest ever known; the consumption, however, fully kept pace with it, and the fluctuations in prices were unimportant; indeed, the tendency ruled upwards, taking Calcutta and Bombay as our standards :—

Linseed Oil.—The fluctuations in prices last year were unimportant, except during the months of April, May, June, and July, when large speculative transactions took place, which resulted adversely to the operators; since then prices have scarcely varied 3*l* per ton.

	£	s		£	s
January	35	10	July	38	10
February	34	15	August	36	10
March	36	–	September	34	10
April	40	–	October	34	10
May	39	15	November	33	10
June	38	10	December	33	5

To-day we quote it 33*l* 10s per ton here on the spot, and 35*l* for monthly deliveries up to June; in Hull, 33*l* to 33*l* 5s and 34*l* 10s.

Oil Cakes.—The use of this valuable feeding article continues to increase, and importations are in excess of 1863, particularly *cotton cake*, which is being very generally used; it has not, however, supplanted the use of linseed cake in any degree, for we find that at the present time it is exactly the same price as at this period last year, whereas linseed cakes in most instances, are 10 per cent. dearer; this may be accounted for by the large importation of cotton seed, which so much increased the home make of cotton cake. Our quotations for linseed cakes are from 10s to 20s higher than this date last year.

Rape and Oil Seeds.—Rape and other descriptions imported from the East Indies attracted very little interest during last year, 52s per quarter for Calcutta rape in February, and 59s in August being the extremes in prices, now 57s is the value; Bombay Guzerat, 66s; brown Ferozepore, 58s; yellow Scinde, 56s; white Gingelly, 60s; brown or mixed, 59s; poppy, 52s; Niger, 46s.

Rape and Seed Oils.—The consumption continues to be kept much in check through the substitution of petroleum and cotton oil for burning purposes. Prices of rape oil did not range widely last year, 41*l* 10s per ton being the minimum, and 46*l* 10s the maximum for refined.

Olive Oils.—There has been no interest in the market for months past, owing in some measure to the disparity between prices on the spot and those for spring shipments, inducing consumers to buy most sparingly. Gallipoli, which was worth 62*l* per tun in May, June, and July, may now be bought at 57*l*; Malaga, 53*l*; Seville, 52*l*; down to 48*l* for Mogadore.

Cocoa-nut Oil.—During the whole of last year (as was the case in 1863) the importation was much in excess of our home and export demand, resulting in a gradual decline in value :—

	Price of Cochin. s	d		Price of Ceylon. s	d

September	39	10		38	–
October	38	–		36	10
December	37	10		36	10

Digitized by Google

Notwithstanding, we begin the year with a stock the largest ever known, it is our opinion, looking at the relative value compared with other greases, a reaction must take place, especially should increased ease in monetary matters stimulate speculative demand, which is more than probable. The quantity afloat from Cochin and Ceylon by last advices was 3,041 tons, against 2,709 in 1864, and 2,836 in 1863.

Palm Oil.—In no former year can we remember the variation in prices to have been so trifling, the extremes being 35*l* per ton for fine Lagos in February and 36*l* 10s in September; the value to-day is 36*l*.

Tallow has attracted but litle attentien the last twelve months, and prices of P.Y.C., on the spot, have been very uniform throughout,; the highest reached was 42s in September, and lowest 40s in May and June; to-day we quote it 41s 3d on the spot, 42s 3d March, and 43s 6d October to December.

Fish Oils.—The continuance of the American war has for another year almost put a stop to business in sperm; most of the cotton mills working short time, *various substitutes have been employed*, and the decline during the year has been from 77*l* per tun for colonial, down to 65*l*, at which it now offers. In common fish oils, business has been on the most limited scale.

Whale Fins.—The consumption has been much checked in consequence of the use of substitutes, induced by the high prices ruling. Our entire importation into London last year was 40 tons, and 37 tons received at Scotch ports from our Greenland and Davis' Straits fisheries, the latter now the only desription offering. There are sellers at 500*l* per ton, and buyers at 480*l*. Our stock 28 tons, against 35 tons in 1864, and 50 tons in 1863.

Naval Stores.—The aspect of things is quite altered; instead of receiving spirits of turpentine from New York, shipments have been made thence, and our supplies consequently (with the exception of small parcels of pine spirits from the Baltic) have been received from France. The same will apply to rosin, and prices have ranged as follows:—

	French Spirits.		French Rosin, Brai Noir.	
	s	d	s	d
January	72	–	23	–
March	77	–	23	9
May	73	–	24	3
July	68	–	25	6
September	65	6	25	9
October	63	–	25	–
November	62	6	22	6
December	62	–	22	6

Petroleum.—The trade with America generally has increased in all branches during the past year; notwithstanding, the importation into London, Liverpool, and other parts of the United Kingdom, has fallen short, it will be seen from our statistics that *the actual export* from America to all parts has greatly increased; to this fact may be attributed the decrease of export from the United Kingdom to the various continental ports; on the other hand, however, the home consumption has steadily increased, *and is even now considered far short of what it will ultimately become*, the more so as genuine petroleum has been found to be but most slightly affected by the various coal oils that have been daily introduced, but has maintained its superiority in all particulars to a most marked degree. The fluctuations in price, as compared with last year, have been unimportant; still speculation has been carried on to an even greater extent than hitherto, and as the article is daily finding increased favour, operations of still larger magnitude may yet be expected. The market to-day is very firm, and the price of ordinary quality oil is fully 2s 1½d per gallon, whilst finer qualities, from their great scarcity, commands 2s 2d to 2s 2½d, and for fine white oil 2s 3d has in more than one instance been paid for small quantities. The home consumption of crude oil has not ever, causes firmness on the part of holders, and 17*l* per tun is the lowest at which purchases of crude Pennsylvanian can be made. Crude coal oils are abundant; that manufactured by the Coppa Oil Company is generally liked, and the price is 10*l* 10s ton of 20 cwt.

(6) CHEMICALS.

Mr W. Caudery (London) reports:—

The *commercial review* of the *past* year is decidedly more satisfactory than that of its predecessor, justifying the hopes entertained in my last annual circular.

Chiefly attributable again to an abundant harvest; the wisdom of our home Government in disposing of the political difficulties with which it was embarrassed last year; the sound judgment of the Bank directors, who, by advancing the rate of interest, effectually checked all speculation; and the grateful arrival of cotton from new sources, giving employment to the population of the manufacturing districts, may be enumerated amongst the instruments of our national prosperity.

Especially do these remarks apply to the *chemical trade*, which, notwithstanding the high rate of interest (the lowest being February, June, and December, *six* per cent., while in May and September *nine* per cent. was reached), has not only shown no falling off, but an extended business may safely be reported of a strictly *bonâ fide* nature.

But, while this satisfactory result applies to the commerce of this country *generally*, the effects of a tight *money market* fell heavily upon many houses who had already embarked in large transactions, chiefly of a speculative character, and the result to such has been deplorable, attended with heavy failures. Notwithstanding these misfortunes, the year opens with much of a hopeful prospect: with increasing products from the cotton fields of Asia and Africa; at peace with the world; and nothing of a political nature to deplore, but the unnatural contest in America; it is not venturing too far to expect as much and more for the year just opened, than was predicted for that which has closed.

Quicksilver opened at 7*l* 10s per bottle, and the transactions were extraordinarily large; during the first few months enhanced prices were rapidly obtained, till 9*l* 5s was realised in April. From this, many extraneous parcels being imported, it receded to 8*l* in August, at which it continues stationary. The *imports* into the United Kingdom during 1864 were nearly five millions lbs weight, *or about treble* that of the preceding year. The *exports* were nearly in the same proportion.

Saltpetre.—By advices from Calcutta to 16th November last, only about 300 tons are afloat to London, or about one-fourth of the usual quantity; there were *landed* during 1864, 13,403 tons, against 16,572 in 1863; while the *deliveries* were about the same, viz.:—13,152 tons last year, against 13,195 in 1863. The present *stock* is 7,464 tons, against 7,138 tons twelve months since. Calcutta 5 per cent. commanded in January last about 38s per cwt, but being in limited demand continued slowly to recede, and was sold in March at 36s, steadily declining till in July 32s was accepted, September 30s, and October 29s; when a reaction took place, consequent upon an inquiry having sprung up afresh, and 32s 6d was realised during November; common

Digitized by Google

Bengal, Madras, and Bombay sold at about the usual difference. The great fall in price on this raw article may be chiefly attributed to the introduction of muriate potash, which, in combination with nitrate soda, was occasionally found to be more advantageous in the production of *refined;* there was an expectation also of the removal of the 6s per cwt duty in India, which had, and has still the tendency of keeping prices down. There has been the usual demand for *refined*, commencing at 40s, gradually declining to 34s in October, and recovering in November and December to 35s for 1 cwt barrels.

Artificial Manures.—During the past year the demand for *Peruvian guano* has rather declined, and year by year is being superseded by the higher class of *manufactured* manures; this is not merely the result of the restrictions put upon the sale by the Peruvian Government, but attributable to the advanced intelligence of agriculturists, who have long since discovered that special manures carefully prepared consisting of a large quantity of soluble phosphates, and a smaller proportion of ammonia, are not only cheaper, but better for cereals and grasses; whereas for root crops it is now quite a settled point that good *snperphosphate of lime* containing its fair proportion of bone material is by far the most effective and economical manure that can be used; this article, therefore, has largely increased in consumption. *Bone ash* and other phosphate materials were in good supply, and prices for the most part moderate, but now exhibit an upward tendency. *Animal charcoal* experienced a large demand for export, and price in consequence ruled high, but having slackened, some cheap parcels may now be obtained.

Oil Seed Cakes.—*Linseed* up to the autumn of last year was in great request at fair prices, but the long period of drought during the latter part of summer forced up prices enormously, after which a reaction took place, partly in consequence of the later autumn rains, and the low prices of grain generally, so that a large quantity of the latter was used as a substitute in feeding; there is, however, a good consumption now going on at fair prices, and for *cotton-seed cake* also, which has come into most extensive use in some districts, and when used carefully is a very valuable and cheap food for stock generally.

(7) TIMBER.

Messrs Churchill and Sim (London) report:—

The importation of foreign and colonial wood for the United Kingdom during 1864 may be computed as equal to the great supply of 3¼ million loads in 1863, which had then increased above the average of 3 millions of loads imported in 1860, 1861, and 1862, and of about 2½ millions the average of seven years preceding 1860. No approximate estimate of the *annual consumption* of wood throughout the United Kingdom has been gathered from the returns of the Board of Trade since the bonding system and the differential import duties were superseded in 1860 by the uniform low rates now levied at the time of arrival; but as with large stocks and abundant supplies the inevitable consequence has been cheap wood, and then great consumption, so may it be concluded that the quantity imported, large as it was in 1863 and 1864, has not exceeded the annual wants of the country.

From the Board of Trade Returns.—Wood imported for the United Kingdom in the Years—

	1861.		1862.
Colonial deals (sawn wood)	849,888	.....	599,672
Timber (hewn)	627,713	.....	501,782
Foreign deals (sawn)	876,729	.....	963,338
Timber (hewn)	706,806	.....	821,320
Colonial and foreign staves	48,323	.....	51,738
Total, in loads	3,109,459	.....	2,937,850
	1863.		1864.
Colonial deals (sawn wood)	781,160	.....	793,000
Timber (hewn)	698,034	.....	695,000
Foreign deals (sawn)	1,121,752	.....	1,171,000
Timber (hewn)	778,794	.....	752,000
Colonial and foreign staves	58,179	.....	60,000
Total, in loads	3,437,919	.....	3,471,000

The London trade has increased in like proportion with that of the United Kingdom, From Sweden, Norway, and Russia there has been more tonnage of ships wood-laden; from the Prussian ports, though closed for several months, the average has been maintained but the imports from British America are *less* by 10 per cent., than the average of the five preceding years.

Estimated Consumption in London of Sawn Wood, or Deals, Battens, Boards and Ends.

	Pieces.
1860	7,125,000
1861	7,581,000
1862	8,436,000
1863	9,164,000
1864	9,635,000

Hewn Wood, or Timber, square and round.

	Loads.
1860	233,000
1861	221,000
1862	257,000
1863	264,000
1864	258,000

A review of our London trade in wood during 1864 now follows:—

Norway—Imported of	1862.	1863.	1864.
Battens and boards.....pieces	878,000 ...	1,276,000 ...	1,524,000
Deals	214,000 ...	227,000 ...	385,000
Balks	57,000 ...	47,000 ...	61,000
Spars	67,600 ...	56,000 ...	97,000
Firewood .....fathoms	18,000 ...	21,000 ...	22,000

The quantity of battens and boards was still greater than in 1863, and compared with 1861, when the imported quantity was 614,000 pieces, would seem to have overwhelmed the market; but a lower cost than square timber, both yellow and white battens have become available for building, ranging as they have done from 6*l* 10s to 9*l* per standard hundred, which is equivalent to 40s and up to 60s per load for builders' scantling. The enormous supply of 1864 has already passed from the importers to the trade. The importation of boards is yearly increasing, some being now prepared for flooring in Noway, though the greater part, converted from battens, into flooring in Scotland, are brought thence coastwise to the extent of 100,000 pieces monthly, so that this indirect supply, which exceeds a million pieces of flooring, is not included in the annual quantities imported from Norway, Sweden, or Russia; though in the general return of stock in the docks 700,000 boards are included in the total of 2,080,000 pieces of battens and boards. The value of deals has been fairly sustained for the prime qualities, 11*l* to 14*l* per Petersburgh standard being the extreme range of prices for the best white and yellow; but for all lower qualities the value of redwood depends on that of the overruling Swedish deals, and of white wood upon the comparative cost of American spruce.

Freight.—The opening rates from Quebec were about 30s per load for timber, and 90s standard for deals, advancing to 35s for timber and 105s for deals, and, as usual, closing at less to secure the fall voyages. From St John 60s were paid in the spring, and was nominally the rate at the close of the year; for Liverpool, 52s 6d, advancing to 67s 6d, and closing at 62s 6d standard. In the Baltic, from the Gulf ports of Sweden, 57s 6d up to 70s for standard; from Cronstadt, 42s 6d standard, the first quotation, soon rose to 45s for the return voyages of colliers, and continued rising, as there was a deficiency of tonnage, to 60s, and even as high as 70s, before the season closed. From Dantzic and Memel 11s per load was first fixed, then the ports were closed, and the rates on reopening rose from 19s to 22s in July, and in September to 25s, and, with a little reaction, closed at 21s per load. From Riga the rates were 22s at first, gradually advancing to 26s, and 27s for timber and deals. From Archangel and Onega the rates were at the opening 95s standard, sinking to 80s at the lowest, and advancing to 95s at the close of the season. From Moulmein 90s up to 102s 6d per load have been the rates payable on the general charters.

As the whole commerce of this country is affected at all times by the value of money, so will the operations of a trade like that in wood, dependent upon credit and bills, be the more depressed when rates of discount and interest range from 7 to 9 per cent. as during 1864. In this review of the trade it is therefore not unsatisfactory to observe that the importation and consumption of wood *has increased* 15 *to* 20 *per cent. since* 1862, with a most stringent money market during a great part of the time; the benefits of the abundance, and the consequent cheapness of timber and building wood, have been spread over the kingdom; high interest of money and high prices in the countries of production may have neutralised the profits of importing, though under these drawbacks the trade in wood is shown to have been greatly extended in the year 1864.

Mahogany.—Great activity has prevailed in the London market throughout the past year. The deliveries having exceeded the supplies, the stocks are now sensibly diminished. The demand continues good, and the prospects for this year are very encouraging. The following is a statement of the landings, deliveries, and stock remaining in the docks at the close of the past four years:—

	HONDURAS.		
	Landings.	Deliveries.	Stock.
	Logs.	Logs.	Logs.
1861	7,862	6,421	2,220
1862	11,904	9,278	4,846
1863	11,403	11,358	4,891
1864	12,177	14,471	2,597

Walnutwood.—Italian—The market has been well supplied during the past year, and although the demand has been good, prices have somewhat yielded, and the present stock is ample. American Black—The stock, as is usual at this period of the year, is increasing, and we may consequently look for a reduction in the high prices which have lately been paid. The demand, however, is still active for fresh sound parcels. Present quotations are from 3s to 3s 6d per foot cube.

(8) METALS.

Messrs Fallows, Stitt and Co. (Liverpool) report:—

With some slight exceptions, prices of metals have experienced *a continuous fall* during 1864. This has been caused partly by several causes, and also in consequence of the relatively high price of English iron, after the advance of last year. This no doubt led to a considerable falling off in the demand, whilst, at the same time, foreign manufacturers were enabled to compete with us on equal, if not better, terms in several markets. The result is shown in decreased shipments, which has been more manifest during the latter half of the year. The shipments to the United States in the first four or five months of 1864 were on a very large scale, but in consequence of the increased duties, coupled with severe fluctuations in exchange, the exports to that market fell off to a remarkable extent, as will be seen on reference to the table of shipments from Liverpool. If we take the Board of Trade returns of shipments to the United States during first five months of 1864, and compare them with the shipments from July 1 to November 30, the figures are as follows:—

	Jan. 1, to May 31.	July 1, to Nov. 39.
Bars, rods, &c. ..... tons	50,653	13,329
Hoops and sheets	13,020	3,179
Railway iron	70,237	20,831
Tin plates ..... boxes	346,350	95,348

No doubt the large portion of early shipments had been contracted for before prices had advanced to their highest, still the quantity which has been exported of late must be far short of their ordinary wants. The home trade during the year was good, and this in some measure compensated for the falling off in exports.

Staffordshire Iron.—The leading makers maintained the list prices, fixed in January, until the 14th July, when, in consequence of one or two of the largest makers having announced theirintention to reduce 20s per ton, this reduction was generally adopted. *During September a very extensive Strike* took place among the colliers, who resisted a proposed reduction of wages, and it was estimated that at one time 20,000 men were out of work. The resistance was unsuccessful, but it was not till the end of October that the strike could be said to have ended. Prices of iron during this period were firmer, in consequence of the make being materially reduced. At the quarterly meeting in October it was agreed to make no change. On the 22nd December a large meeting of ironmasters was convened, to consider the question of wages and prices for the ensuing quarter. It was then determined, that notice of a reduction of ten per cent. in the wages of the millmen, and 1s per ton for puddlers, should be given on the last day of the year, to take effect on the 14th January. As this reduction of wages was only corresponding to the fall of 20s on iron, announced in July, it was resolved to make no change in list prices, and this decision has been confirmed by the general meeting held December 12th, 1864. It remains to be seen whether the men will submit quietly to this reduction. In view of a strike, as is not improbable, a large number of the makers have agreed to a general "lock out," which would cause a considerable reduction in the make of the Staffordshire district.

Welsh Iron, which opened at 8*l* f. o. b. Wales in January, fell to 6*l* 15s to 7*l* in July. The price improved somewhat during August in consequence of a long drought, which considerably reduced the make. During the continuance of the colliers' strike in Staffordshire, large demands were made on Welsh makers, and they were enabled, during the months of September and October, to reach 7*l* 5s to 7*l* 10s in Wales, but from this point there has been a gradual decline, until we closed the year at 6*l* 15s to 7*l* 5s in Wales.

Rails have been in steady demand, and the price has very much followed that of common bars, beginning the year at 7*l* 10s to 7*l* 15s f. o. b. Wales, we close at 6*l* 15s to 7*l*.

Pig Iron.—Scotch has fluctuated between 67s and 49s 3d cash for g. m. b. warrants. The fall was gradual until October, but the severe monetary pressure then experienced had the effect of bringing large quantities on the market for realisation, and prices were forced down about 8s per ton; since then there has been no rally. Notwithstanding the large production, it is satisfactory to observe so slight an increase in the stock. At present low prices a larger consumption may be anticipated, and as the production is not likely to increase much at present rates, any great fall cannot be looked for, whilst, on the other hand, cheap money, coupled with any favourable change in American affairs, would most probably turn the current of speculation in the direction of pig iron.

Tin Plates has followed the downward course of iron, and even to a greater extent. Coke, which early in the year were 25s to 26s 6d, fell to 21s 6d to 22s 6d f. o. b. Liverpool at the close. Charcoal not being so much inquired for, the make has been reduced, and prices have fallen about 1s 6d per box, say from 27s 6d to 30s to 26s to 28s 6d. As tin plates are relatively cheaper than iron, and have touched the lowest point we have seen for some years, much lower prices can scarcely be expected; whilst, as the manufacture is unprofitable, we may look for a reduction of make in proportion to the demand.

Copper, which opened at 120*l* for manufactured, has declined to 100*l*, buyers offering 98*l*. **TIN.**—English block after being advanced in January to 116*l*, has been officially reduced at different times until it now stands at 97*l*. **LEAD**, on a good inquiry for America, pig advanced to 21*l* 10s, but has since declined to 19*l* 10s.

Messrs Dadelszen and North (London) report:—

Tin.—In reviewing the tin trade of the past year we felt bound to repeat again what we have so frequently expressed, that prices of this article mainly depend upon the prospective supply and demand. Any undue influence which may cause this old-established mercantile maxim to be disregarded must, sooner or later, recoil upon those who allow themselves to be led astray for a time. At the commencement of 1864, the price of tin was unduly advanced about 10*l* per ton, sales of Straits being made at 122*l*. As soon as this price was reached, free sellers came out, and by the end of February quotations had fallen fully 13*l* per ton. From this point various efforts were made to support the market, but the daily increasing supply both of Straits and Banca brought prices down; and at the time of the Dutch sale (June 28) the price was 104*l*, making a total fall of about 18*l* per ton during the first six months of this year. As usual the price realised in the Dutch sale was unsatisfactory to many of those connected with the trade, but speculators thought it moderate. Operators in England bought Banca to an enormous extent, and fully 1,000 tons were imported into this country. From the 1st of July up to the middle of December, *there has been a continued fall in tin, which we must attribute principally to the enormous supply, and not to the high rate of discount and the commercial crisis, as at the height of the monetary panic during October and November tin was fully 10l per ton higher than a fortnight ago.* The highest price touched during the year was 122*l* for Straits, and the lowest 87*l* per ton, and Banca, the highest 123*l*, and the lowest 90*l*. Our stock on the first of January 1864 stood at 2,612 tons, and, in spite of a fair average consumption, we have had to report an increase every month of the year, and we commence this year with a total of 3,650 tons. With respect to the future supply of the different qualities of tin, we do not anticipate any material falling off in that of foreign tin. On looking at the arrivals of Banca in Holland towards next sale, we find the quantity already in the hands of the Trading Company to be larger than for several years past, and further that the quantity now afloat is in excess of former years; in fact, there is every reason to believe that the *production* of Banca is gradually increasing from year to year, particularly as prime cost of the article to the Trading Company is understood to be at about 40*l* per ton, all charges included to Holland. That, under these circumstances, there is every inducement to produce as much as possible, is obvious to all; and this is beginning to show itself in the largely-increased arrivals of Billiton, the supply of which is beginning to tell already on the price of Banca. The high prices of Straits ruling in Europe during the last ten years have in an extraordinary degree stimulated the production of this tin, and in the absence of the usual American demand, and in the face of a large demand for India, China, and Japan, we have, during the present year, actually received from Penang and Singapore the enormous quantity of 82,000 slabs, and have still about 35,000 slabs afloat, or a total of 117,000 against 67,000 last year; consequently, there is an excess to this country of about 50,000 slabs of Straits alone. With respect to English tin, we have no positive information about its production, but have every reason to suppose there has been a falling off in the supply during the last three months. Our tin-producing mines have had a hard time during the last six months, and we believe that our smelters have only been able to work with a loss by a plentiful admixture of foreign tin. The comparative low price of foreign tin with English for the last two or three months must have caused an accumulation of stocks in the hands of smelters, so that we commence the present year with an average stock of refined and common.

As regards the consumption of all kinds of tin, we find, on looking at the Government returns for the last eleven months, that there has been an increase in the export of English of about 280 tons over last year; and the export of foreign tin during the eleven months of 1864 has been the same as that of 1863 and 1862. We must, however, not omit to mention that during December about 250 tons of foreign have been shipped to the Continent, which accounts for our decrease in stock. It is gratifying to note that our home consumption has been good during the past year, in spite of the unabated depression in the tin-plate trade.

V.—SHIPPING AND FREIGHTS.

Messrs Glover Brothers (London) report:—

The freight markets of the past year were, on the whole, steady and remunerative, and justified the anticipations of our last annual circular respecting them.

The navigation returns show that the entries and clearances of vessels laden with cargoes (excluding coasters, and computing for the last two months), amounted to 23,620,792 tons, against 23,025,163 tons for 1863. The increase of about 600,000 tons is rather less than the annual increase since 1860. The detailed comparison of 1864 with the years preceding is shown in the following table:—

	British. tons.	Foreign. tons.	Total. tons.
1860	12,119,454	8,718,464	20,837,918
1861	13,149,545	8,775,438	21,924,983
1862	13,992,108	8,458,549	22,450,657
1863	15,263,047	7,762,116	23,025,163
1864	16,489,664	7,131,128	23,620,792

	British. per cent.	Foreign. per cent.	Total. per cent.
1860	58.17	41.83	100.
1861	59.97	40.03	100.
1862	62.32	37.68	100.
1863	66.29	33.71	100.
1864	69.81	30.19	100.

Although the proportions of British and foreign tonnage in our trade increased and deceased in the same directions as in 1863, the extent of the respective increase and decrease is remarkable. Foreign tonnage *decreased* 630,988 tons; British tonnage *increased* nearly double the foreign decrease, viz., 1,226,617 tons. The one decreasd 8 per cent.; the other increased 8 per cent. The proportion of foreign tonnage in our trade has undergone the following fluctuations:—

PROPORTION of FOREIGN TRADE of the UNITED KINGDOM.

From 1834 to 1838 it was 28 pr cent				In 1861 it was 40.03 per cent.	
— 1844	1848	—	30	—	1862 — 37.68 —
— 1854	1858	—	41	—	1863 — 33.71 —
	1859	—	43	—	1864 — 30.19 —
	1860	—	41.83	—	

The great change in these proportions, between 1844-48 and 1854-58, resulting from the repeal of the Navigation Laws, *has thus already ceased*, the proportion of 1864 being nearly identical with that of the four years preceding the repeal, and very little greater than in the previous period 1834-38, under a highly protective tariff. It is highly satisfactory to observe that this change results rather from the increase of British tonnage than from the decrease of foreign. Between 1860 and 1864 the foreign decrease is 10 per cent. The British increase during the same period is 25 per cent. Both facts have their explanations. During the first ten months of 1860, American vessels entered and cleared at our ports with cargo to the extent of 2,296,011 tons; during the same period last year the amount was only 810,313 tons—a reduction of 64 per cent. The Dano-German war so affected the German flag in our trade, that it declined from 1,815,775 tons in the first ten months of 1863 to 1,076,219 tons in the same period of 1864, or 41 per cent. Danish tonnage during the same period of 1863 was 528,389 tons, and declined in 1864 to 473,922 tons, or 10 per cent. These facts explain the decrease of foreign tonnage. The British increase has analogous explanations. *The intensity of the foreign competition between* 1850 *and* 1860, *and the fears which were prevalent in the latter years of that decade, have both ceased. Great improvements have been effected in our ships; they sail faster, and carry larger cargoes in proportion to register measurement than formerly; and they consequently make profits now out of rates that formerly would have involved loss.* The

Digitized by Google

registered tonnage of sailing vessels belonging to the United Kingdom was rather more than four and a half million tons at the end of 1863, viz., 4,655,924 tons; in 1853 it was 3,780,092. *Steam tonnage* under the British flag shows a much larger increase. In 1853 it was 250,112 tons; in 1863 it had become 592,950 tons—an increase of 136 per cent. We have only to add to these figures—which speak for themselves in explanation of the increase in the proportion of British tonnage—that our flag has enjoyed the advantage of neutrality. Had the American and German flags not become belligerent, neither the decline in foreign tonnage nor the increase in British tonnage would have been so remarkable.

The trade accounts of the year show that the import of cotton was nearly 50 per cent. greater than in 1863, India and China and Egypt having about doubled their supply. Jute has also doubled in quantity since 1862. Wool largely increased in quantity. Wine shows about 2,000,000 gallons increase. Sugar and molasses show a slight decrease; rice also; and all breadstuffs show a considerable decline. Oats declined from 6,136,785 cwts in the first ten months of 1863 to 4,580,066 cwts in the same period of 1864; beans from 1,632,180 to 712,860 cwts in the same period; maize from 12,045,525 to 4,751,661 cwts. The guano import was only half that of 1863. Wood shows nearly the same quantity. The coal export was about 300,000 tons in excess of 1863.

The fluctuations in freight during 1864 were very moderate indeed. Coal freights to the East Indies were unusually steady; the changes to all ports having been within 5s per ton. Aden began at 34*l*, never exceeded it, and ends at 31*l*. Bombay was 20*l* to 22*l* throughout the year. Ceylon was 22*l* to 26*l*. Hong Kong varied between 35*l* and 40*l*, and Shanghai between 45*l* and 50*l*. Homeward India rates were affected by the changing prospects of the American war, and towards the end of the year by the decline in cotton, sugar, jute, &c., and the severe financial pressure from August to November. Calcutta ranged from 75s to 85s, Madras from 70s to 75s, the rice ports from 80s to 70s, and Ceylon from 75s to 80s. The only noticeable feature in West India freight quotations is the high rates that prevailed for coal during the summer. During the last two or three years these rates have been pressed so unreasonably low during the sugar shipping season that tonnage has not been obtained in adequate quantities, and hence very high coal rates out of season. The Havana rate was 15s 6d in January, 36s in July, and is now 15s. Other rates fluctuated less than this, but heavily. Homeward West India rates were slack all through the year, and dull. Mediterranean coal freights opened high, and all the changes were upward until June, from which time they declined. The Alexandria rate attained an extraordinary elevation as in 1863; in January it was 32*l*, and crept steadily up to 40*l* in June, at which a very large business was done; it gradually declined to 27*l*, and is now 29*l* to 30*l*. All Mediterranean coal freights were influenced by this. Constantinople began at 26*l*, went up to 32*l*, and closed at 24*l*. Malta improved from 26*l* to 30*l*, and closes at 21*l*. A large business was done in Black Sea grain freights; the Odessa rates did not vary more than 2s 6d per ton in the first half of the year, from 42s 6d to 46s; in July and August 47s 6d and 50s were paid, after which the market became weak. and gradually declined to 40s in December. Sulina began at 6s 9d, declined to 6s 6d in May and June, then touched 8s, and receded to 6s. Less business than usual was done here from the Azoff; 50s to 52s 6d was paid for the opening, 55s for June, and 60s for late shipments. The homeward Alexandria rate was low throughout the year; it was nominal at 3s until May, when it became 3s 9d. Very little business was done, and from July to October chartering ceased; in November and December it was resumed at 3s 6d to 4s. Egypt has changed corn-growing for cotton-growing, and, instead of having wheat and barley to send us, she has been importing both during 1864. All the cotton coming by steamers, cotton seed was the only article for which sailing tonnage was required; but of that article, so recently known to our commerce, she sent us 61,311 tons in the first ten months of 1864, against 55,861 for 1863, and 28,149 for 1862.

Wood freight from the Canadian and Baltic ports was profitable throughout 1864. On this side the Quebec rate was 32s to 33s the whole season through, and the lower Gulf ports equally steady at 82s 6d to 85s. Baltic business was very largely influenced by the Dano-German war, and rates rose with very little intermission from the beginning of the season to the end. Cronstadt, beginning at 3s wheat, and 42s 6d deals, advanced to 5s 6d and 75s; the last month of the season, however, witnessed a considerable reduction in these figures, and the early closing of the navigation unfortunately resulted in a large fleet of vessels being ice-bound at Cronstadt for the winter. The Sundswall rate began at 57s 6d, and went steadily up to 70s, at which it closed. An enormous business was done from Norway and Sweden, the quantity for the ten months of 1864 being 914,138 loads, against 619,756 loads for 1862—an increase of 47 per cent. This wood trade is less only than our Canadian, which amounted to 1,119,399 loads for the ten months of 1864. Prussian wood freights changed with the war changes; they began at 18s, and increased to 20s to 22s in July, and in August and September to 24s, afterwards declining to 21s.

The above record of the rates of 1864 shows that its trade was steady, that our tonnage was well distributed, and that employment was plentiful. Rates were high on some outward voyages, where the return freight was low, and they were low homewards, as in the Mediterranean, where the outward rates were high. The general result was satisfactory. Large profits were rare, so were losses; but moderate profits were generally realised.

The great increase for insurance facilities in England during the last two years has made it possible to insure first-class ships at rates very moderate compared with what many such vessels have had to pay under mutual insurance policies. In addition to very reasonable premiums, insurance here offers the further great advantages of exemption from the innumerable special conditions of the mutual policies, and of cash payments for all claims one month after the date on which they are passed. We commend these facts particularly to the owners of vessels in Southern trades, the premiums for which are exceedingly low.

THE SHIP-BUILDING TRADE.

Messrs J. I. Bennett and Wake (London) report:—

In our annual issue for January, 1864, we took occasion to notice the astonishing increase in ship-building during the previous twelve months. The past year has witnessed an expansion of the trade beyond precedent. Throughout the whole of 1864 our shipbuilders have had more work than they could execute, and many new yards have sprung up. The recent pressure on the money market and the fall in the price of iron, have caused a general decline in the value of shipping, and contracts can be made at this moment on very favourable terms. Steamers have been in great demand for every description of trade. Vessels of light draught, speed, and capacity are still inquired for, and may command good prices. Composite ships are getting into great favour, as they combine the quality of wood and iron ships, without the defects of either. So much, indeed, is this kind of vessel approved of, that many builders are making extensive additions to their yards for the immediate laying down of keels on the composite principle.

VI.—COTTON TRADE.

Messrs Ellison and Haywood (Liverpool) report:—

The market opened with spirit in *January*, and the fact that the declared stock showed an excess of only about 25,000 upon the previous estimates, caused an average advance of 1d per lb; but the improvement was only temporary, for with threatening news from Denmark, unfavourable accounts from India, and renewed stringency in the money market (the Bank rate being put up to 8 per cent. on the 20th), the demand fell off to something like 20,000 bales per week, and prices declined ½d to ¾d per lb. In Manchester the tone was still more desponding than in Liverpool. Yarns gave way 1d to 2d per lb, but piece goods were nominally unchanged. A less gloomy, but still very quiet, appearance characterised both markets in *February*. The actual outbreak of hostilities between Germany and Denmark was neutralised by the non-intervention tone of the Queen's speech; and the improved aspect of the home money market (rate reduced to 6 per cent.) acted as a good set-off to the bad news from the East. There was a slight reactionary movement in prices in the second week, but a relapse immediately followed, and the current rates at the close showed a fall of 1½d per lb in Egyptians, ½d to ¾d in American and Brazils, and short staples. Smyrnas being exceptionally scarce, advanced 1d per lb. Yarns depreciated 1d; good shirtings remained firm, but the inferior make fell 3d to 4½d per piece, and other goods 1½d to 3d per piece. *March* opened very gloomily, and a number of holders being so anxious to realise that purchases were made at as much as 2d per lb decline. This attracted the attention of speculators and a number of spinners who had for some time kept out of the market, much cotton was also withdrawn, and several of the previous anxious sellers suddenly became very active buyers. Hence the sales of the third week reached 76,000 bales, against only 27,000 bales in the second, and nearly the whole of the fall was recovered. A similar movement also transpired in the Manchester market. Discouraging accounts from India, however, and symptoms of a tighter money market, again arrested business, and produced a slight drooping in prices, so that at the close the rates current showed a net fall for the month of ¼d per lb in long staples and Surats, and 1d to 1¼d Bengal and China. In yarns the decline averaged 1d per lb, 7-lb to 8¼-lb shirtings fell 7½d to 10½d per piece: and other goods in proportion.

Thus far we have had to chronicle *an almost continuously dull market*, accompanied with a nearly uninterrupted decline in prices, but with the month of *April* we commence the history of a strongly reactionary period. The uneasiness arising out of the Dano-German struggle was being rapidly removed by the emphatic declarations of neutrality on the part of the British Government, while the Eastern accounts reported quickly improving markets there. The sales of the four weeks averaged over 77,000 bales, including more than 46,000 bales to the trade, the figures for the last week reaching 96,000 bales, and 53,000 respectively. Prices advanced 2d in Brazil and Egyptian, 1¼d

Digitized by Google

in American, 2d in Bengal and China, but Surats scarcely experienced any change except recovering a fractional decline submitted to in the opening week. The run was upon long stapled, as the stocks of those descriptions amounted to little more than half the quhntity held at the corresponding date of 1863, while the stocks of short staples were considerably in excess; moreover, the prospective supplies of long staples were no better than at the same time last year, while the actual average consumption was double. At first Manchester followed but feebly the upward movement in Liverpool; indeed, yarns and goods made from short-stapled cotton positively declined in price during the first week, but subsequently there was considerable animation, and the closing quotations of the month showed an advance of 1d to 2d in in yarns made from long cotton, ½d in those made from Surats. The better classes of piece goods gained 6d to 9d, and the inferior grades 3d to 4½d per piece. The strength of both markets was such that an import of 297,000 bales in the four weeks, and an advance in the Bank rate of discount to 7 per cent. on the 17th, produced little or no effect. During the month there was a very heavy speculative business done in cotton to arrive and forward delivery, as well as in cotton on the spot, the total transactions exceeding the entire speculative purchases of the previous three months. Parties to delivery contracts little dreamt of the trouble and anxiety they were laying up for themselves. *The seeds of mischief which brought ruin to hundreds in September and October, were sown during this and the subsequent three months. All sorts of people were allowed to speculate, and often to a large extent, without advancing one farthing of cash as security, and many of them far beyond their means.* No doubt the excited state of the market, and the strongly sanguine feeling which prevailed on 'Change allowed many transactions to pass current that would not have been tolerated in calmer times.

The market opened with considerable buoyancy in *May*, and a further advance of ½d per lb was attained in the course of the first day or two; but an advance in the Bank rate of discount from 7 to 8 per cent. on the 2nd, and from 8 to 9 per cent. on the 5th, led to a more cautious business and a reaction of about ¼d per lb; the conclusion of an armistice between the German and Danish armies, however, imparted renewed firmness to the market in the succeeding week, and the decline was more than recovered. The confidence of operators in the certainty of a further advance appeared to be unbounded, and buyers purchased eagerly for delivery in the autumn months, on the basis of 20d for China, 23d for Dhollera, and 29d for Egyptian. They were supported in this view of things by the heavy deliveries of cotton for home consumption and export, and by the strong advices received from the Eastern and other cotton goods markets, as well as by the small and rapidly declining stocks of raw and manufactured cotton at home and abroad, and the different accounts received from the chief producing countries as to the immediate and future supplies of the staple. But during the closing fortnight of the month, with uncomfortable rumours regarding continental politics, and renewed anxiety as to the upshot of the new campaign in Virginia, the above considerations lost their previous influence, and even the reduction in the rate of discount from 9 to 8 per cent. on the 18th, and from 8 to 7 per cent. on the 25th, did nothing more than moderate the declining tendency of prices. The result was that the final quotations showed a decline of about ¾d per lb from the currency of the first week, though a slight advance compared with the closing rates of April. In Manchester the net result of the month's fluctuations was a rise of 1d per lb in the most current descriptions of yarns and goods. *June* opened tamely, owing to the undecisive character of the of the American news, and the uncertainty hanging over continental affairs. Buyers operated with great caution, only a moderate business was done, and prices gave way about ¼d per lb in the first week. In the second week revived hopes of peace being maintained in Europe, and American accounts pointing to an indefinite continuance of the war between North and South, led to increased sales, and an advance of ¼d to ¾d per lb in long-stapled cotton, but short staples were comparatively neglected, owing to the circumstance that yarns made from them were actually declining in value, while those made from long staples were advancing. The reduction of the Bank rate to 6 per cent. on the 16th had been so generally anticipated, that it produced no appreciable effect upon the market. The unsuccessful conclusion of the Conference on the Dano-German dispute gave rise to some uneasiness in the third week, as strong fears were entertained that Great Britain would be drawn into war. The result was a curtailed business, and a fall of a ¼d per lb in prices; but confidence was again restored by the pacific tone of the Ministerial explanations made on the 23rd, and with a week's sales amounting to 86,000 bales, prices advanced quite ¾d per lb in American and Brazil, and about ½d in Egyptians and short staples. The demand for American cotton having been very good through the month, chiefly for export to New York, where prices had touched 3s 1d per lb, the rates current at the close showed an advance of 1½d per lb, while the rise in Brazil and Egyptian was only ½d, and that in Dhollera only ¼d; meanwhile, other East India and China had declined. Trade in Manchester was somewhat quiet throughout the month. Yarns made from American, Brazil, and Egyptian cotton gained about 1d per lb, but those spun from East Indian lost ½d to 1d per lb, and a similar movement took place in piece goods. The favourable combination of circumstances which caused the market to close so buoyantly in June, operated with redoubled force during the first fortnight of *July*, and in combination with accounts of brisk markets in the East. The sales in the two weeks showed a total of nearly 200,000 bales, and prices advanced 1½d to 2d per lb in long staples, 1¼d in good Surats, and ½d to 1d in in other kinds. The demand was particularly active for American, the stock of which had been reduced to a few thousand bales. We may state here also that the minimum stock of the year (184,000 bales) was recorded on the 22nd. A natural pause in the demand ensued in third week, but holders were very indifferent sellers, and prices in some cases showed a further fractional advance; but with an unfavourable turn in the money market, which compelled the Bank directors to advance the rate of discount to 7 per cent. on the 25th, and an import of nearly 100,000 bales, many sellers became rather anxious to realise, and buyers were able to purchase at a decline of ¼d to ½d per lb from the top prices of the month, which were also the *maximum prices of the year.* The net value as compared with the closing currency of June, was about 1½d in long staples, 1¼d to 2d in new Surats, ¾d to 1d in Madras and Bengal, and ½d in China. In Manchester medium yarns gained 1d to 1½d, and fine yarns 3d to 4d per lb; 8-lb shirtings rose 9d to 12d, and other kinds of goods in proportion, the highest prices of the year being quoted. A comparison of these with the rates current at other dates will be found below.

With *August commenced the reactionary movement, which became so headlong and disastrous in the subsequent two months.* Very little business was done during the first two weeks, especially after the advance in the Bank rate from 7 to 8 per cent. on the 4th, and prices declined about ¾d per pound all round, but with a more hopeful money market there was an improved demand in the third week, and a portion of the previous decline was recovered, but only to be again lost in the subsequent week, in consequence of peace rumours from America. The net fall of the month was about ¾d per lb, except for new Dhollerahs, which being scarce and in demand to fill maturing delivery contracts, commanded very fancy prices. The better kinds of yarns lost ½d, and the inferior sorts 1d per lb; 7-lb to 8-lb shirtings declined about 6d per piece. Taking all things into consideration the market was remarkably firm; but in *September* there was a sudden and great break down, owing partly to the prominence given to, and faith placed in, a remarkably plausibly written peace letter from the *Times* correspondent at Niagara, and partly to the gloomy state of the money market and the advance in the Bank rate to 9 per cent., with the threat of a still further immediate rise. The fact that the *Times* had all along been singularly ignorant in its comments upon American affairs, and as singularly astray in its notions about monetary matters went for nothing; every utterance it gave print to was implicitly believed and acted upon by its infatuated readers; and even its prophecy of 12 to 15 per cent. was accepted as oracular. No wonder, therefore, that a species of panic commenced its reign of terror in the cotton market. Business was at a complete standstill, both here and in Manchester; holders pressed their goods for sale, and the arrival of nearly 200,000 bales during the fortnight ending with 9th September led to still more eager realisations. The gloom was still further increased by the suspension of the Leeds Banking Company in the fourth week, and though the American news was less pacific in its character, the decline in prices continued, until on the 30th they showed a fall of about 4d per lb in American, 6d per lb in other long staples, 5d to 6d in East India, 8d in Smyrna, and 5d in China and Bengal, while in Manchester yarns fell 4d to 7d per lb, 8¼-lb shirtings 2s 6d per piece, the more so as several extensive failures here, in London, and the manufacturing districts had been announced. There were hopes of a revival during the first week of *October*, and a slightly increased business was done, but holders freely supplied the market, and prices again declined, though much less rapidly than in September. With the second week, however, came a rapid succession of mercantile suspensions, especially in the manufacturing districts. This reduced the demand, while the necessities of many holders led to compulsory sales at almost nominal prices. Many of the forced sales were of cotton tendered in fulfilment of delivery contracts made two or three months previously, and which the buyers were unable to pay for. Subsequently there was a slight reaction from the general fright, and prices became more regular, though still with a declining tendency, which was accelerated in the third week by the disheartening news received from Manchester, where the daily reports of fresh failures in some parts of the cotton districts, almost put an end to business. During this week *prices touched their minimum* point. Chinas once worth 20d sold at 11½d; Bengals, which brought 17½d to 18d in July, were sold at 8d; Dhollerah, which were quoted 24d in July and August, brought only 18½d; American sold at 22d against 31½d; Brazils at 22d, against 32d; Egyptians at 22d against 31d; yarns exhibited a fall of 10d per lb, and 8¼-lb shirtings a decline of 7s to 7s 6d per piece. No business at all was done in arrival cotton (except in the re-

Digitized by Google

purchase of contracts by the original sellers), in consequence of the difficulty experienced in the settlement of outstanding contracts, and it is not likely that this kind of business will again be so eagerly engaged in as was the case in the summer months. Speaking generally, the failures which had transpired in Liverpool and London were chiefly amongst speculators in cotton to arrive, as but little money had been lost in speculation in cotton on the spot.

The low level which prices had reached in the third week of October at last began to attract the attention of speculators, and during the last week of the month there was an extensive business done, and a rebound of 2d to 3d in prices. In the first week of *November* 89,000 bales of all kinds changed hands, and prices generally advanced 1½d per lb in long and ½d in short-stapled cotton, though Manchester responded but feebly to the improvement, owing to a further series of failures in the manufacturing districts. But in the second week both markets assumed a very vigorous appearance, owing to the reduction in the Bank rate to 8 per cent., and the receipts of American news which put aside all hopes and fears of peace. Cotton advanced 1d to 2d per lb, and yarns about the same. The activity continued with unabated vigour during the third and fourth weeks; being stimulated by the news of President Lincoln's re-election, the greatly improved feeling in the money market, and the prospect of an early reduction to 7 per cent. in the Bank rate. The sales in the two weeks reached 207,000 bales, and prices advanced 2d to 3d. But as the advance was not adequately responded to in Manchester, business there was comparatively tame in the closing week, which circumstance, together with rumours from America of President Lincoln's intention to make some kind of peace propositions to the South, caused a reactionary movement of 1d to 1½d per lb in raw cotton, making the net rise of the month about 2½d in American, Brazil, and Smyrna, 4d in Egyptian, 2d in Surats and China, and 1¼d in Bengal. Yarns showed a rise of 2d to 3d for common, and 3d to 4d for the better classes, and India shirtings 2s 6d to 3s per piece. *December* opened with a renewed general demand, and prices recovered one-half of the decline submitted to in the previous week. In the second week there was a pause again, pending the arrival of President Lincoln's message, and the reduction in the Bank rate to 6 per cent. passed almost unnoticed. The message proving more warlike than had generally been anticipated, there was subsequently a very strong, and one or two days very buoyant market, and prices more than recovered the temporary decline of the previous three weeks, and closed on the 29th ½d to 1d in long staples, and ½d to 1d in Surats dearer than a month ago; but since then, with the discovery of an error of nearly 115,000 bales in the stock estimates, there has been a decidedly dull feeling and a very small demand, so that prices have lost ½d to 1d in low short staples, and ¼d ½d in other kinds since Thursday last.

The fluctuations in prices throughout the year have been most incessant, not a week passing without some change transpiring in the value of one or more of the various descriptions of cotton, but there are four grand movements which stand out prominently from the rest: first, a gradual decline from January to April; second, a steady advance to the close of July; third, a rapid fall to the middle of October; and, finally, a considerable rebound to the end of December. These extreme variations are set forth in the following table, which gives also the fluctuations in yarn and cloth:—

COTTON.

	Prices Current. Jan. 1. per lb.	April 1. per lb.	July 31. per lb.	Oct. 22. per lb.	Dec. 31. per lb.

Nearly the whole of the decline which occurred between the close of July and the third week of October, took place in the latter half of the period. The average fall in long staples was about 30 per cent., in Smyrna 47 per cent., in Dhollera and China 43, and in Bengal 50 per cent. The present rates show a decline from the extreme prices in *July* of 14 per cent. of American, 17 per cent. in Brazils, 9 per cent. in Egyptian, 21 per cent. in Smyrna, 16 per cent. in Dhollerah, 18 per cent. in China, and and rather more than 24 per cent. in Bengal. The rebound in Egyptian has been less than in other long staples, owing to the increased supplies. Taking the average prices of 1864 and 1863 we have the following result:—

	Average, 1864.	Average, 1865.	Advance per lb.	Advance per cent.
Orleans	27¾	24	3¾	13.5
Pernam	28⅜	24¼	4¼	15.6
Egypt	27⅞	23⅝	4¼	15.2
Smyrna	20⅞	19¼	1½	7.7
Dhollera	21½	19¼	2¼	10.5
Bengal	14⅜	14¼	⅛	4.3
China	17½	17½	—	—

Bengals had been run up to much above their comparative intrinsic value during the closing months of 1863, and they therefore show only a slight average advance on the year. Moreover, out of an import of 182,000 bales, only 117,000 bales, or about two-thirds, have been taken into consumption; leaving 95,000 bales in stock against 27,000 bales in December 1863. This fact shows how unsuitabie the staple is for the requirements of our own and continental spinners. China has also been unduly inflated, while its value has besides been greatly depreciated in consequence of the water-packed and unmerchantable condition in which much of the imports have been received. The advance in Surat, Madras, and Turkish is about 2 per cent., but in long staples the rise is fully 4 per cent., in consequence of the much greater proportion of the latter descriptions taken by consumers this year than last, the per centage of long staples to the total consumption being 42 for 1864, against only 34 for 1863. This difference has been brought about by the more ready sale, and better comparative prices received for yarns and goods made from the superior classes of cotton.

The fall in the prices of yarns and piece goods during the panic was quite as extensive as the average decline in the raw material. Printers gave way nearly 30 per cent., shirtings rather over 30 per cent., domestics 30 to 32 per cent., and yarns 33 to 35 per cent., but there has been a more marked recovery from the lowest point than in cotton, and consumers are just now doing a more profitable business than at any period during the year, and the error discovered in the stock estimate will be strongly in their favour for a little while to come.

We have now to draw attention to the tables appended to this report. The *import* of the year amounts to 2,587,000 bales, averaging 247 lbs per package, and reaching 896,772,000 lbs. These figures are considerably *below* the current estimate of twelve months ago, and in many ways are very disappointing. The increase upon the receipt of 1863 is 654,000 bales, or 204,925,000 lbs, which figure is only equal to 48,000 bales of the average weight of 1860. The average price we estimate at 22½d per lb, and the total value at 84,000,000*l*, against 20½d, and 59,000,000*l* in 1863. The increase in weight is rather over 22 per cent., against an increase of 30 per cent. in 1863 over 1862. Compared with our estimate of January last, there is a deficiency of a little over 8 per cent. *America*, contrary to expectations, has sent us 197,000 bales, or 66,000 bales more than last year: the whole of this increase was received during the first half of the year, since which the blockade-running business has been more seriously interfered with by the United States squadron. *Brazil* has forwarded the liberal supply of 212,000 bales, an excess of 74,000 bales. *Egypt* has not come up the early expectations, sending us only 257,000, against 204,000 bales, or 13,000 bales below our estimate, which was the lowest published—the principal authorities looking for 300,000 to 325,000 bales. The loss of cattle, owing to the murrain which raged during and just before the sowing season; and the deficiency of water in consequence of the Nile flow being lower than ussual, were the causes of the small increase in the crop. The receipts from *Turkey* have also been much less than the estimates, in consequence of the partial failure of the crops through bad weather, and the ravages committed by insects. The import is nearly 62,000 bales, against 44,000 bales in 1863. From the *West India and miscellaneous* sources 59,000 bales have arrived, against 23,000 bales last year; including 27,000 bales, against 13,000 bales from *Peru*. *India* sends the insignificant addition of 170,000 to her previous supply: the total figures being 1,399,000 bales, against 1,299,000 bales. Of this increase Bombay has furnished 145,000 bales, and Bengal 29,000 bales, while Madras sends 4,000 bales less than last year. Twelve months ago the estimates varied between 1,500,000 and 1,800,000—what were deemed the most authoritative being nearer the larger than the smaller figure. The deficiency is attributed partly to unfavourable weather during the growing season, and partly to the retention of a considerable quantity of cotton in the interior during the depression of the market early in the year, and which will not arrive here until the spring of '65; but it is plain enough that the crop itself has been greatly over-estimated, for at the outside not more than 100,000 bales can have been detained on the plantations. *China* has exceeded the most sanguine guesses of a year ago, by supplying us with nearly 400,000 bales, of 240 lbs each, against barely 162,000 bales, of 200 lbs each.

Turning to the figures relating to *home consumption*, the most remarkable circumstance that strikes us is the small increase

Digitized by Google

upon last year. Some 1,606,000 bales have been taken from the ports, but we estimate that not more than 1,560,000 bales have been converted into yarn, as spinners hold at least 40,000 bales more than they held at the close of 1863. Our conclusion is arrived at thus:—

	Bales.		Lbs.
Stocks in the ports, Jan. 1	327,500	.....	119,667,000
Do in hands of the trade Jan. 1	50,000	.....	18,000,000
Import during the year	2,587,100	.....	896,773,000
Total supply	2,964,600	.....	1,034,440,000
Export during the year	732,500	.....	245,928,000
Stock in the ports, 31st Dec	575,700	.....	194,482,000
Do in the hands of the trade	90,000	.....	32,550,000
Total deduction	1,398,200	.....	472,960,000
Leaving for actual Consumption	1,566,400	.....	561,480,000

which compares as follows with the figures of the preceding nine years:—

	Bales.	Lbs.		Bales.	Lbs.
1864	1,566,400	561,480,000	1859	2,296,700	976,000,000
1863	1,377,600	508,400,000	1858	2,174,500	905,600,000
1862	1,185,500	451,700,000	1857	2,031,400	826,500,000
1861	2,363,600	1,007,400,000	1856	2,183,300	891,400,000
1860	2,523,200	1,083,600,000	1855	2,101,000	839,100,000

The increase over last year is about 10 per cent., against more than 12 per cent. last year over 1862. Taking into account the extra amount of waste on spinning India cotton as compared with the loss in American, the production of yarn is still less than one-half the average turn out of 1859, 1860, and 1861. This fact was of course less apparent before stock-taking than it is now, for consumers were debited with 115,000 bales more than they had used, but it accounts for the general firmness of the Manchester market, and the smallness of the stocks of cotton goods in the warehouses. The weekly deliveries to the trade for the year have averaged 30,890 bales; but the actual consumption has not exceeded 30,120 bales. A reference to our table on page 8 will show that the figures never exceeded 33,000 bales on the average for a month (including 1,500 bales of cotton taken from London), and yet in the same table it will be seen that the trade for four months in succession were represented as taking 29,000 bales per week out of Liverpool alone, this quite accounts for the error in the stock estimate. We estimate the average consumption out of Liverpool of the past five weeks at 28,000 bales per week, at present it is about 32,000 to 33,000 bales, against 27,000 to 28,000 bales a year ago, and 18,000 to 19,000 bales at the close of 1862. The total cost of cotton consumed we estimate at 53,800,000*l*, or 23d per lb, against 44,480,000*l*, or 21d per lb in 1863.

The total *export* has exceed that of last year by about 71,000 bales; being 732,000 bales against 661,000 bales. The weekly average has been rather over 14,000 bales, against 12,700 bales in 1863, and 10,860 bales in 1862. The total weight we estimate at 245,928,000 lbs, against 228,979,000 last year; and the value at 22,000,000*l*, against 18,000,000*l*. The total *consumption of the Continent* we estimate at about the same as last year, the extra supply being still in stock, making the total quantity on hand about 70,000 bales, against only 37,000 bales at the close of 1863.

In consequence of an error in the previous estimates of the *stock* of cotton in this port, it appears that there are some 114,000 bales more on hand than had been calculated upon. The total in the kingdom is officially declared to be 595,700 bales, of which 466,300 were in Liverpool. The error arose partly from the arrival of a considerable quantity of cotton by rail from London, of which no account has been kept, and partly as original parcels returned as trade purchases, and which ought to have been reported as bought on speculation. The increase consists entirely of short-stapled cotton, there being a decrease in the total of long staples, as is apparent in the following statement:—

Stock in Liverpool 30th December, 1864.

	Estimated.		Actual.
Amercian	10,500	.....	23,200
Brazil	29,400	.....	16,100
Egyptian	36,800	.....	22,700
Smyrna	7,300	.....	6,400
West India, &c	7,100	.....	4,300
Total long staple	91,100	.....	72,700
East India	218,000	.....	315,200
China	43,100	.....	78,400
Grand total	352,200	.....	466,300

If to these figures we add the stock in London and other parts —102,000, and the stock in the hands of the spinners—90,000 bales—we have a total of 665,100 bales unconsumed in the kingdom, against only 377,500 bales at the close of December 1863, or an increase of 288,200, of which 220,000 consist of East India—including 70,000 Bengals, or 40,000 bales more than the additional imports received from Calcutta this year! The remaining 60,000 are Chinas. It is probable that three-fourths of the excess consists of the merest rubbish, and which, if converted into yarn, would lose from 40 to 50 per cent. in weight during the process. The following analysis shows the quantity of long and short-stapled cotton consumed in the kingdom:—

Cotton Unconsumed December 31.

	In the Ports.		Held by Spinners.		Total.	
	1864.	1863.	1864.	1863.	1864.	1863.
American, Brazil, Egypt, &c.	73,800	75,500	16,300	15,600	89,800	91,100
East Indian	407,900	219,000	60,000	32,400	467,900	251,400
China, &c.	94,000	33,000	14,000	2,000	108,000	35,000
Total	575,700	327,500	90,000	50,000	665,700	377,500

This year's stock, including that held by the trade, is worth about 17,000,000*l*. The value of last year's was about 12,000,000*l*.

Though the consumption of cotton shows an excess of 10 per cent. for the year, the *export of cotton goods and yarn* have improved only about 4¼ and 2¼ per cent. respectively, the balance of the extra production being taken for domestic consumption. The increase in the shipments of piece goods is about 80,000,000 yards; but there is a decrease of 57,000,000 yards to India—leaving a total excess of 137,000,000 yards for the rest of the world. Of this sum the Brazils take 45,000,000; other South American States, 30,000,000: China and Hong-Kong, 23,000,000; and the West Indies and Central America, 23,000,000—all returning payment in cotton. There is a considerable decrease in the exports of yarn to India, but this is more than counterbalanced by increased shipments to Germany. The monthly exports showed a tolerably steady progress up to July and August, but have greatly fallen off since. The shipments of yarn in July touched 8,300,000 lbs; in October only 4,100,000. In August 181,000,000 yards of piece goods were exported; but in October only 139,000,000; and in November only 130,000,000 yards. So much for the panic.

As regards the *condition of the cotton districts*, the public have the exceedingly luminous and most valuable returns compiled by J. W. Maclure, Esq., the Hon. Secretary of the Central Relief Committee. It will be noticed that the number of applicants for relief, which was 183,000 in January, slightly increased in February, but rapidly decreased thence to August, when the figures fell to 83,000. Then came the financial crisis, which forced employers to curtail their operations to such an extent as to swell the numbers to 92,000, 136,000, and 149,000 in September, October, and November respectively. During these three months, observes Mr Maclure, no fewer than 120 manufacturers and spinners, chiefly the former, suspended payment; their liabilities being estimated at about 750,000*l*, and whereby nearly 24,000 operatives were thrown out of employment. Another authority estimates the number of failures at from 120 to 130, and the liabilities at from 1,300,000*l* to 1,500,000*l*. During December matters have rapidly improved; and the prospects of the new year point to a continuous amelioration. Two years ago nearly *one-fourth* of the people in the cotton districts were in receipt of charitable relief, thence to October, '63, there was a decrease to 8.3 per cent.; then an increase to 10.9 per cent. in '64; then, again, a decline to 4.2 per cent. in August; then an advance to 7.2 per cent. in November; and finally a fall to about 5 per cent. in December. Our last table shows the incidence of the distress in each of the twenty-eight unions in the cotton districts. The total expenditure and the rate in the pound on assessment is given for the four years ending Lady-day, 1864. The excess of expenditure in 1862, 1863, and 1864, over the ordinary guardian expenditure of 1861, amounted to the enormous sum of 2,277,000*l*. Since March last a further sum 350,000*l* has been distributed, and in addition to these items, "it is estimated that no less a sum than "220,000*l* has been locally distributed in private charity, beyond "the large amount voluntarily remitted by manufacturers and "property owners of cottage-rent." Aside from rent remission, the above figures make a total of 2,847,000*l*, of which about one-half has been raised by voluntary contribution.

The question of *future supply* is not being so prominently discussed just now as at this time last year. Experience has made our prophetic statisticians much more cautious, and considerably less sanguine than they were. The merciless and thorough going manner in which time has upset the most careful and apparently most reliable calculations, has caused all estimates to be looked upon with doubt and suspicion, if not with something akin to contempt.

The unanimously glowing account of the crops received from Western *India* at the close of 1863, quite justified the anticipations of an import into this country from Bombay of from 1,300,000 to 1,500,00 bales in 1864; but the result shows that the cotton-producing capacity of the country had been greatly exaggerated; and it would now appear that we can henceforward expect but slight annual increase in the growth. Neither can we look for any important addition to the late supplies from the southern and eastern districts of the Empire. The imports from Bombay amounted to 1,043,000 in 1864, but might have reached 1,100,000 bales, or thereabouts, had it not been for the detention of an unusually large stock in the interior until after the monsoon. This year we may receive from 1,150,000 to 1,200,000 bales. From Bengal and Madras the receipts make up a total of 356,000 bales, against our estimate of 350,000 bales; this

Digitized by Google

year we may get 400,000 to 420,000 bales, making the aggregate supply from India 1,550,000 to 1,620,000 bales, against 1,399,000 bales in 1864. Respecting *China*, we are almost as much in the dark as we were twelve months ago. Contrary to expectation, the Celestial Empire shipped more than double the estimates: judging from the facts contained in the latest advices, it seems probable that she will repeat the operation in 1865. An increase of 50 per cent., however, will not be considered an extravagant figure. This would give us 600,000 bales, against 400,000 last year. To be inside the mark, let us say 500,000 to 600,000 bales of last year's average weight. From *Egypt* our next largest source of supply, the crop accounts are very favourable, and a yield amounting to from 20 to 25 per cent. more than last season is looked for. Assuming Great Britain to get her usual proportion of the crop—our import will be about 315,000 to 325,000 bales. The *Brazil* crop is also reported to promise a large excess. An average increase of 20 per cent. on 212,000 bales, the amount of the last year's import into the kingdom, would give us 250,000 bales for 1865. The supply from *Turkey* cannot greatly exceed that of last year, as the crops there have again experienced partial failure, in consequence of uncongenial weather, and the ravages of locusts and bollworms. The import of the past year was only 60,000; and we cannot with confidence look for more than 70,000 to 80,000 bales in 1865, while it would not surprise us if it did not reach the lower figure. From *miscellaneous* sources we may reckon upon an increase of 25 to 30 per cent.—say a total of 75,000 to 80,000 bales, against 61,000 bales.

We now turn to *America*, whence, we regret to state, it is more probable that our imports for 1865 will be under than over the receipts of 1864. To all appearance peace is as far off as ever. On the whole, the position of the South is less favourable than it was a year ago; but the determination of the Southern people to continue the war seems to be as strong as ever. A few months ago there were apparent signs of giving way to the North, but the re-election of President Lincoln by an overwhelming majority and the recent success of the Federal armies have given quite another complexion to affairs. The resources of the combatants will enable them to carry on the war for years to come, if they are so inclined; for though the South has been greatly crippled, they have still the arming of the slaves as a last resort. After this has been done, and the effect realised, it may be possible to assign some reasonable limit to the duration of the war. But then, alas! peace will be of little importance to Lancashire, as the cotton fields of the South will have been overrun, and the means of cultivation so far reduced as to require years of industry for their recuperation. As it is, the extra vigilance at present, and of several months past, displayed by the blockading squadron will materially diminish our already small supply of American cotton. The import of last year showed an excess of 66,000 bales over 1863; but it is a remarkable fact that the whole of this increase was received during the first five months: thus—

	1864. bales.		1863. bales.
Imports—January to May	88,000	.....	20,000
— June to December	109,000	.....	111,000
Total	197,000	.....	131,000

The total import of the past three months was rather less than 38,000 bales, or 12,600 bales per month; a similar average for twelve months would give 151,200, and on this ground we estimate the supply for 1865 at 150,000 bales.

A recapitulation of the above gives the following total as the estimate for 1865:—

	bales.		bales.
India ..... say	1,590,000	to	1,620,000
China	500,000		600,000
Egypt	315,000		320,000
Brazil	240,000		250,000
Turkey	70,000		80,000
America	150,000		150,000
Miscellaneous	75,000		80,000
Total	2,900,000		3,100,000

These figures give an average increase of 350,000 bales upon the import of 1864; in addition to which the stock in hand shows an excess of nearly 150,000 bales—raising the total increase to 600,000 bales. It is only natural to suppose that this augmented supply will have a gradual depressing influence upon prices in the course of the year; but we don't look for any very extensive decline. There will be considerable fluctuations from time to time, as there have been since the fall of Fort Sumpter; but the average decline will most probably not exceed the amount of the advance of last year. We do not look for much change during the spring; indeed, it is not unlikely that we shall witness much firmness, if not an advance in the better class of cotton, owing to their comparative scarcity; for, while the present stock of all kinds exceeds that in the ports in December, '63, by about 248,000 bales, the stock of long staples is only 73,000 bales, against 75,500 bales last year. Moreover, the stock of short staples includes a large per centage of inferior and unsaleable cotton. But as the year advances, and the supplies of new cotton come forward, a decline in prices will be inevitable.

No doubt the market will often be disturbed by the occasional wafting of peace rumours from America; but aside from these disturbing causes, the year opens with much better and more cheerful prospects than did 1863. General trade is in a sounder condition, and the experience of last autumn will curb speculation. Money is cheaper, and politics more settled. The Bank rate is at 6 per cent., against 7, with the tendency downwards, instead of the reverse; while we have neither the Dano-German nor any other continental "question" to disquiet us. We shall have to find an enormous amount of cash to pay for our cotton imports; but provided we are blessed with a bountiful home harvest, there need be no financial embarrassment. We cannot expect a lower rate of interest than 5 per cent. at any time during the year, while the average of the whole will probably exceed that figure. There is room for caution, but none for alarm; and with ordinary prudence and foresight, judiciously exercised, there is reasonable ground for expecting that the trade results of the new year will in every way be an improvement upon those of the old.

EXPORTS of PIECE GOODS and YARN to the Chief Districts of the World, during the Year ending with November, 1864, and the corresponding totals for the four previous years, ending with 31st December. (The figures represent millions and tenths, viz.:—44.9 yards equal 44,900,000 yards, and so on.)

PIECE GOODS.	Year ended Nov. 30 1864.	Years ended December 31. 1863	1862	1861	1860

* Figures for December not yet published.

We present the following facts and observations on the trade of Continental Europe. The total import of cotton into *all Europe* in 1864 amounted to 3,008,000 bales, of which 2,586,000 bales were received into British, and 421,000 bales into continental ports. Of the 2,587,000 bales imported into Great Britain, 691,000 bales were *re-exported* to the Continent, and 41,000 bales to the United States, raising the total supply of Foreign Europe to 1,112,000 bales, and leaving 1,855,000 bales for British consumption. The stocks at the close of the year showed an increase of 284,000 bales, as compared with those of twelve months previously, so that the deliveries reached only 2,624,000 bales, of which 1,606,000 bales were to English, 1,077,000 bales to continental, and 41,000 bales to American spinners. The following is a statement of the supply to Europe in 1864, with the deliveries in 1864, 1863, 1862, 1861, and 1860, *in* 1,000's of bales:—

	American.	Brazil.	Egypt, W. I., &c.	E. I. & China.	Total.
Import into G. Britain less re-export to the Continent	144	163	289	1,209	1,855
Export from G. Britain to the Continent	54	49	30	589	732
Direct import into the Continent	22	48	233	99	421
Total import in 1864	220	260	552	1,897	3,008
Stock, 1st Jan., 1864	42	10	33	278	364
Total supply for 1864	262	270	585	2,175	3,372
Stock, 31st Dec., 1864	24	19	43	556	648
Total deliveries, 1864	238	251	542	1,619	2,724
— 1863	195	178	440	1,518	2,362
— 1862	440	135	216	1,131	1,962
— 1861	2,864	88	177	794	3,963
— 1860	3,481	125	145	524	4,321

These deliveries were as follows:—

* In consequence of an error of 74,000 bales in the export figures of 1863, the consumption of Great Britain was called 1,378,000 bales, instead of only 1,304,000 bales. The error was caused by the omission of the shipments from the outports.

2. Weekly Average Consumption in Bales.

	1864.	1863.	1862.	1861	1860.
Great Britain	30,885	25,067	22,035	43,332	50,633

*** The figures in the above three tables are gleaned from the very valuable Annual Reports published by Messrs Stilterfoht, Sons, and Co.

As the bales imported into the different ports vary greatly in weight, and in aggregate average much less per package than in 1860 and 1861, the foregoing figures, though useful in other respects, give but an inadequate idea of the quantity of cotton consumed; we have, therefore, in the subjoined table reduced the whole to pounds weight.

WEIGHT of COTTON DELIVERED to EUROPEAN SPINNERS, in Millions and Tenths of Pounds Weight.

	1864.	1863.	1862.	1861.	1860,
Great Britain	574.2	470.2	429.2	956.1	1,126.9
France	143.2	130.5	127.0	250.8	269.7
Holland	36.2	48.8	29.7	76.7	48.3
Belgium	7.5	13.1	7.0	20.5	26.5
Germany	57.9	54.8	38.3	135.9	127.1
Trieste	10.9	11.3	14.7	28.5	31.7
Genoa	5.7	8.3	5.2	21.3	31.0
Spain	28.2	39.4	31.9	48.2	46.4
Russia, &c.	78.1	66.2	47.6	143.9	137.1
Total	941.9	842.6	730.6	1,681.9	1,844.7
United States (exported from Great Britain)	14.3	13.3	19.9	...	...
Total	956.2	855.9	750.5	1,681.9	1,844.7

The preceding figures give the amount of cotton taken by consumers from the ports. The real consumption we estimate as follows:—

	1864.	1863.	1862.	1861.	1860.
Great Britain	561.2	470.2	451.7	1,007.4	1,083.6
Continent	367.7	372.4	325.2	700.0	717.8
Total	928.9	842.6	776.9	1,707.4	1,801.4
Per centage consumed by Great Britain	60.42	55.81	58.15	59.00	66.27
By the Continent	39.58	44.19	41.85	41.00	33.73

In the subjoined tables we give the weight and value of each kind of cotton imported into and consumed by Great Britain; and the total weight and value of cotton consumed on the Continent in the years 1864 and 1860—the year when the trade attained its maximum proportions. It will be seen that in 1864 the spinners of Europe paid *about twice as much money* as they did in 1860 for about half of the amount of cotton consumed in that year:—

VII.—LINEN TRADE.

DUNDEE AND ULSTER.

Messrs Geo. Armitstead and Co. (Dundee) report:—

In reviewing the progress of the trade of Dundee during 1864, the chief feature that presents itself *is the unexampled activity* which has prevailed continuously in almost all branches of our local industry, notwithstanding the extreme tightness of the money market, and the unprecedentedly high rates of interest that have been current nearly throughout the year. Although the derangement in the money market was attended by numerous failures in various quarters, affecting the general trade of the country, *our local trade has not suffered in any appreciable degree*; on the contrary, it would seem that the great depreciation of most articles of produce, caused by the high rates of interest that have ruled, has been rather in favour of our manufacturing interest, by enabling spinners to obtain their supplies of raw material at moderate prices, while the constant demand for yarns and linens, for which spinners and manufacturers have generally held orders for weeks in advance, has enabled them to keep up their prices, and thus in a great measure to reap the benefit of the decline in prices of flax and jute.

The demand for linens and jute manufactures, although very extensive, has been rather less steady than that for yarns, and has been more subject to short periods of dulness as the different markets for such got supplied. *The trade, however, seems to be experiencing more and more the development of the substitution of linen for cotton goods*; and as there appears little or no prospect as yet of matters settling in America, so as to allow the importation of cheap cotton to be resumed for a long time to come, there is every reason to expect that the same cause will continue to exercise an influence in increasing the demands for linens. The means of production have been greatly increased during the past year, and large additions to the machinery presently in motion are still in progress. So far the increase has been greater in the means of *weaving* than of spinning, and this may partly account for the comparative steadiness in the demand for yarns.

The chief outlet for our manufactures has, as formerly, *been the American markets*, and particularly so in the early part of the year. Latterly, the imposition of additional duties in the Northern States, and the restrictions imposed on the trade in that quarter, combined with the unfavourable returns resulting from the high rate of exchange, have curtailed that branch of our trade, so that it has been rather dull for some time past; but as there are various articles of our manufacture which it is believed

Digitized by Google

must be had in America (especially if the war continues), an improvement is expected to take place in the demand for these articles in anticipation of the spring trade. The trade with *Germany* was also interrupted in the early part of the season by the Danish war, so that the exportation to that quarter was considerably reduced. Other markets, however, have taken freely of our manufactures, so that our total exportation has been considerably greater than ever it was known to be before; and as it seems to be the effect of a legitimate and widely-spread demand, there is every reason to believe that our trade is in a very healthy condition, and that a continuance of prosperity may reasonably be looked for, should no presently unforeseen change take place.

While prices of yarns and linens have been maintained with comparatively little fluctuation throughout the whole season, the general *tendency of all kinds of raw material has been downwards.* Our flax market was rendered very dull in the beginning of the year by the simultaneous arrival in January of many vessels that should have arrived in the two preceding months, but which were detained by contrary winds. The effect of these heavy arrivals had scarcely time to wear off before the rate of interest (which receded somewhat in February) began again to advance, and that in such a degree as not only to induce unusual caution on the part of buyers, but also to cause holders to push sales in order to save the heavy loss of interest. We consequently find that by the end of May prices of medium qualities of flax are quoted 4*l* to 5*l* per ton, and inferior sorts, such as common Petersburg flax, 6*l* to 8*l* per ton, *under those current at the beginning of the year.* This great decline in the quotations of Petersburg flax is doubtless attributable in a great degree to the unsatisfactory nature of the quality of the ordinary goods from thence, which has not experienced much, if any, improvement in the present year's supplies. Since the end of August, however, the prospect of abundant supplies, conjoined with a rather less active state of trade, and the uncertainty as to how matters might turn in America after the Presidential election, caused prices to experience a farther decline, so that our present quotations are, with some special exceptions, lower than they were at this time last year by 8*l* to 10*l* per ton on flax, 5*l* to 6*l* per ton on fine tow and codillas, and 9*l* to 12*l* per ton on common codillas and jute.

The prospects for future supplies of flax are very favourable in respect of *quantity*, but in general the quality of what will be received next year is not highly spoken of. The last crop in *Ireland*, although probably over-estimated, has no doubt been very large, and the quantities that have been coming from thence already have contributed greatly to the depression of prices. The quality of this year's growth of Irish flax is, however, not at all satisfactory, being harsh and dry, so that it can only be used in a small proportion along with other kinds possessing finer quality. The fresh Riga flax gives indication of a very abundant crop, but the quality is also complained as as being rather harsh and dry, although giving a good yield on the hackle.

The consumption of *jute* continues to increase, and the evidences of this were so apparent in the early part of the year as to attract the attention of speculators, and to cause considerable speculation in the article, in expectation that the high rates then prevalent would not only be maintained, but that even a considerable advance might be expected, especially on fine qualities, which appeared to be getting scarce. The liberal shipments from Calcutta, however, prevented consumers from entertaining any such apprehension, so that they carefully abstained from encouraging the speculative movement by only buying what was sufficient to supply their actual wants. The consequence of this was that stocks soon began to accumulate in the London and Liverpool markets, while the effects of the sluggishness in the demand from here shortly became aggravated by consumers receiving their supplies direct from Calcutta. These depressing influences were crowned by the excitement that arose in the money market about the month of September, so that about that time prices of jute fell in the space of a few weeks full 7*l* to 10*l* per ton on medium and low qualities, and 3*l* to 4*l* per ton on the finer sorts. In consequence of this great decline and want of sales, several large failures took place of parties interested in the article, which only made matters worse, and produced a further decline. Prices have since rallied a little from their lowest point for the better kinds, but common and inferior jute is still very unsaleable, even at low rates, whilst fine qualities being comparatively scarce, their prices will likely be maintained above their usual proportion until liberal supplies of the fresh jute come to hand. These fresh supplies will probably be somewhat interrupted by the disastrous effects of the October cyclone at Calcutta, but not likely to such an extent as to materially affect the market. The quality of the new jute arrived so far is very favourably spoken of. An important feature in the jute trade during the past year has been the large importations we have had, no less than 12,173 tons having been brought direct from *Calcutta* to this port.

The year closes with a brisk demand for flax, tow, and jute *yarns*, and as spinners generally have orders in hand for some time to come, they are in a position to insist on full prices. The demand for *linens* is also good, and although some of the descriptions which are most largely produced in this locality, such as canvas and jute Hessians, are rather dull for the present, an improvement is confidently looked for after the turn of the year. It is difficult to predict what the future course of our trade will be, as much depends on the aspect which politics may assume. With a continuance of the American war, it is likely that the demand for our manufactures will rather increase than diminish; and some even think that the depressing effect caused by a sudden cessation of the war would only be temporary, and not so prejudicial as might be apprehended, as the competing article with the linen trade, viz., cotton, is not likely to be so cheap again as it has been for a long time to come. Meantime, it is satisfactory to think that our trade is at present on a more solid basis than it has almost ever been in consequence of its recent prosperity, and that there are various elements that may lead to a reasonable expectation of a continuance of prosperity, the chief of which are the prospect of an easier state of the money market, abundant and cheap raw material, and the encouraging prospect of a steady and extensive consumptive demand for our staple articles of manufacture.

The "Linen Trade Circular" (Ireland) reports:—

In despite of the adverse tendency of circumstances, the Irish linen trade has been decidedly prosperous, of the truth of which no more convincing proof could be rendered than the existence of the facts that at no previous period in its history have stocks been less abundant, and orders for forward delivery more numerous or extensive, than these were during 1864.

It would be a very great omission indeed if the fact were not noted that during the year not a single failure of any importance has taken place in any department of the trade, notwithstanding the crisis in commercial matters in England.

In no department of trade or commerce have revolutions been more decided than in that of the *linen trade*. The distaff gave way to the now obsolete wheel, while the latter, in its turn, was superseded by the spinning frame. The difficulties attendant upon the adaptation of the *power-loom* to the manufacture of linens were—and at the time apparently not without reason—deemed to be all but insuperable. These difficulties have been effectually overcome; the exercise of great talent, with lengthened perseverance, has been signally triumphant. From the power-loom now proceed, with almost equal facility, the broad and heavy sheeting, as well as all descriptions of serviceable linens in general use; it has likewise been adapted to the manufacture of the coarser descriptions of damasks and cambrics. Already the hand-loom is being rapidly superseded, save in the production of very fine fabrics. Power-loom factories are now being erected in many country districts; this circumstance forms an important and interesting feature in the history of the trade.

Flax.—The total average under flax in 1864 was 301,942 acres, against 214,092 acres in 1863, showing an increase in the cultivation in the year just closed of 87,850 acres. Owing to the dry season, which was unfavourable for steeping, and to injudicious handling and imperfect scutching, it is exceedingly doubtful if the value of the crop of 1864 shall much exceed that of the preceding year, although the weight of fibre was considerably greater. Taking the value of the crop at a low estimate, the amount to be realised by sale of flax will be exceedingly large. A sum say 4,500,000*l* distributed in payment of this one article of agricultural produce, is unquestionably a matter pregnant with importance. Farmers cannot remain much longer unconscious of the reality that, even when prices rule low, the flax

Digitized by Google

crop will often be found the most remunerative that they could select.

The supplies in the various markets of the province of Ulster, during the year now ended, have been unprecedentedly large. In one locality,—that of Cookstown,—240 tons were reported as on sale on one day in November; no record exists of an equally large supply having ever before appeared at one market.

Yarns.—In point of successful operations, this department of the trade should take precedence over any other. Many spinners, throughout the year, were employed in the fulfilment of orders for forward delivery. Stocks were of necessity confined within a limited compass.

It is well worthy of observation that, when yarns had attained their maximum figure,—say in August last,—a complete cessation from business may be said to have taken place; the high—as some deemed, the extravagant—figures then ruling checking the usual and legitimate consumption, and, until yarns had again fallen very considerably, confidence was not restored.

The return of flax spinning mills in Ireland, as prepared in May last, is published herewith.

The element of *joint stock companies with limited liability* has latterly been introduced in this department of the trade. For some months past, the largest spinning establishment in Ireland has been conducted on this principle. Some factories are in the act or are on the eve of erection, under a similar proprietary.

Declared value of linen yarn exported from the United Kingdom during eleven months ending Nov. 30:—1861, 1,455,094*l*; 1862, 1,706,698*l*; 1863, 2,276,932*l*; 1864, 2,821,913*l*.

Linens.—As already indicated, the production of hand-loom goods is gradually but most decidedly decreasing. The wages rendered to the hand-loom weaver have become inadequate to his support; his only alternative would seem to be the adoption of another and more lucrative industrial occupation. The hand-loom, however, will for some time longer continue to be useful in the production of the finer description of goods.

Keeping in view the comparatively limited production, it is scarcely necessary to record the fact that hand-loom goods have not at any period of the year been abundant in stock.

The increase in the production of linens by *power* is steadily and rapidly advancing. Goods so manufactured meet with increased favour, both in home and foreign markets. The certainty which can now be attained regarding the period when orders of immense magnitude can be completed gives this mode of manufacture another and most material advantage over its comparatively antiquated competitor, the hand-loom.

Throughout the year, power-loom goods were in active request, and very generally manufacturers found themselves abundantly supplied with forward orders.

The large wholesale houses of the province have been doing an extended and satisfactory trade. In addition to a great extension of the home trade, of which no correct statistical table can be furnished, *an addition of* 32 *per cent.* in exports of linen piece goods. United Kingdom, has taken place, comparing value of exports eleven months ended Nov. 30, 1864, with corresponding period of 1863.

VIII.—IRON DISTRICTS OF SCOTLAND, YORKSHIRE, AND STAFFORDSHIRE.

Messrs M'Ewen, Bryson and Co. (Glasgow and Middlesborough-on-Tees) report:—

The collection of information has this year, for the first time, been taken in hand by a committee of the trade, and it is gratifying to state that, with one exception, the makers and consumers of iron have willingly given the returns desired, thus rendering our estimate of the position of the trade much more reliable than heretofore.

It appears that in previous years, especially 1863, the production and local consumption have been over-estimated; the reduced figures under these heads for 1864 are, therefore, merely corrections, and do not imply any real falling off. On the contrary, there can be no doubt that the production, at least, was considerably greater in 1864 than in 1863. The shipments and quantity forwarded by rail show a further increase of nearly ten per cent. over the preceding year; but on the other hand an increased quantity has been imported from England, amounting this year to 30,000 tons.

The final result of the operations of 1864 has been a further slight increase of stock, making the *eighth consecutive* year of accumulating stock, and bringing up the total reserve to 760,000 tons, from 120,000 tons in the beginning of 1857. The continued excess of supply this year, although slight, is extremely disappointing from the fact of its occurrence during a period of unquestionably great activity in the iron trade, thus falsifying the expectations of those speculative investors who looked forward, not unreasonably, to similar results from the renewed activity in the trade, to those which produced the high prices in 1853 and 1857—namely, large and continued abstractions from the stock. At the present moment we find speculation exhausted by the failure of many houses, whose operations in the article were of very great magnitude, and by the heavy losses and complete discouragement of the ordinary outside operators; and this adverse state of matters does not find us, as in 1857, with a triding stock of warrants—then amounting to only 40,000 tons—but with the enormous amount of 400,000 tons in store, being 100,000 tons more than existed twelve months ago, when speculation was at its height. In addition, the attention of speculators in iron has to some extent been diverted to the Middlesborough district, where the warrant system has been introduced during this year, and where some 40,000 tons are now held by speculators in store, while large contracts for forward delivery have been made with the makers.

At present, and for some time past, there has been *a decided diminution of activity in the manufactured iron trade.* In *iron shipbuilding*, which has been extremely prosperous during the year, new orders are now scarce. America, which took very large quantities of English iron in the first six months of the year, shows no signs of any renewed demand, the high price of iron in "greenbacks" greatly favouring the home producer.

The great and rapidly increasing importance of the *Yorkshire iron trade*, and its influence on the price of Scotch pig-iron, have not yet been sufficiently appreciated; but a production of 900,000 tons per annum, with furnaces building which will bring up the make to a par with that of Scotland, must finally be recognised; and there can be no question now that to the competition of this district must be mainly attributed the failure of our recent hopes of a new period of high prices for Scotch pig iron. It should, however, be mentioned that the competition of continental production was also considerably felt during the recent high prices, and that the extraordinary circumstances of sales of Belgian and French plates for delivery in England, and even shipments of Belgian pig iron to Wales, were noticed during the year.

Taking all circumstances into account, we cannot look very hopefully on the chance of a rise in price for some time to come; and, while admitting that 49s 6d for Scotch, and 45s 6d for Middlesborough warrants are low prices, we fear that until some considerable inroads are made on the enormous stocks in store, a further moderate yielding in price is by no means improbable. At the same time it must not be forgotten that these low prices tend to bring about a healthier condition of the trade, by checking production, and improving our position for competition with other countries, so that should trade revive during the year, the desired reduction of stock may in time be brought about.

Mr Samuel Griffifths (Wolverhampton) reports:—

1864 was ushered in under the most favourable auspices for the iron trade of South Staffordshire.

In the month of August, 1863, the demand increased, and iron was advanced from 7*l* to 7*l* 10s per ton.

On the 8th of September, 1863, some of the leading firms, by circular, refused further orders, except at the approaching quarter-day's prices. The preliminary meeting of the same month fixed the price of common bars at 8*l* 10s, being a further advance of 1*l* per ton.

A well-known firm at Wolverhampton issued a circular on the 3rd of December following, refusing further orders for most kinds, except at the ruling price of iron, when they were able to execute new orders.

On Thursday, December 31, 1863, a meeting of the iron trade was held at the Swan Hotel, Wolverhampton, which was largely attended by the heads of the trade (the late Mr Williams and Mr W. O. Foster were present), at which a resolution was passed advancing the price of iron 1*l* per ton, which left common bars on the last day of 1863 at 9*l* 10s per ton. The late Mr Phillip Williams on this occasion objected to this advance, and stated his opinion that the 1*l* now imposed would have to be taken off again before the end of 1864. We are thus explicit in reminding the trade of the circumstances under which the last 1*l* per ton was imposed, the more because we endorse the very general opinion entertained in the trade, that this last advance was a great mistake, exposing, as it did, the iron trade of England to the competition of Belgium and France, both of which countries

Digitized by Google

readily availed themselves of the favourable opportunity thus afforded to undersell us in their own markets, and follow us as successful competitors in the general markets of America and the continent of Europe.

The result of foreign competition was so injurious to the trade, that by the end of January, 1864, the demand for iron had seen its best, and although great expectations were entertained in regard to the future, in the month of February the leading manufacturers found that the immense December accumulation of orders on their books had considerably diminished, and, with their usual caution, avoided, to some extent, the pig market. During these months all the works in these districts were in full activity, but the best-informed people now began to perceive that a further advance in March was not so likely to take place, as it appeared in the early weeks in January. During these first two months of the year, native pigs sustained their position tolerably well in the market.

In January, 1864, the price demanded for such brands as "Wards" and the "Union" was 4*l* 15s, but by the end of February the nominal price certainly continued unchanged, at the same time heavy transactions were avoided by manufacturers.

During the month of March orders came to hand, tolerably steady to the leading houses, particularly from New York and India, although the second and third-rate houses began to feel the effects of South Welch and Middlesborough competition. The preliminary meeting held at the close of this month confirmed the 9*l* 10s, and the general expectation was that the advent of spring would be the harbinger of more extended demand and better trade, particularly as regarded America.

At the April quarter-day, however, the Liverpool merchants were by no means as anxious to effect purchases as they were in January, and although London, Manchester, and Bristol gave out their orders to the leading firms here, the pause so perceptible in the operations of the Liverpool houses perplexed the mannfacturers, and on this account the transactions in pig iron were of a comparatively trifling character.

During this period the makers of native pig iron continued firm in price, alleging that the pause in the trade was of a temporary character, and warranted a stacking of their produce until the advent of better times, which were no doubt near at hand.

At this time the excessive American tariff came into operation, which virtually closed the Northern ports to Staffordshire iron.

By the end of April the demand for bars, nail rods, and hoops had diminished considerably, and the second and third-rate houses were selling these sorts at 10s per ton under the list price.

In the month of May, Mr Lincoln's restrictive tariff on iron had a most injurious effect on the trade of the district; indeed, the country in general; for although the requirements for boiler plates were very good, and sheets for galvanising purposes in excessive demand, small rounds and squares, hoops, nail rods, and nail sheets were in very slow request.

This state of things continued until the middle of the month of June, *when a difficulty arose in respect to wages;* the pig makers having given notice in the early part of the month to reduce the furnace men 10 per cent.

During this month the latter struck for wages, more especially in the Dudley district, and Mr W. O. Foster, at the Shutt End Works, Messrs Cochrane, at the Woodside Works, Messrs Hall, Holdcroft and Pearson, at Brittle Lane, and the Level Works, Messrs Grazebrook, of Netherton, Mr William Mathews, of Corbyns Hall, and others, were compelled to blow out furnaces in consequence of the strike.

The reduction of the wages having been forced upon the masters by the declining condition of the trade, they of necessity adhered to their resolution, and after a very short suspense, the furnace-men, acknowledging the necessities of the trade, returned to work,—the furnaces having sustained but little damage by the short suspension which had taken place.

The preliminary meeting held at the close of this month, decided by a very slender majority, to keep the price of common bars 9*l* 10s per ton, but this decision was reversed at the quarter-day held on the 14th, at Birmingham, when iron was reduced 1*l* per ton, leaving common bars 8*l* 10s, at which figure they have stood up to the present time.

At this quarter-day, pig iron of all kinds gave way considerably. Schneider, Hannay and Co., and the Lilleshall Company readily acknowledged the logic of accomplished facts; the former selling their hæmatite largely at 3*l* 10s, and the latter at 4*l* 5s, —native mine pigs, and indeed all other sorts of pigs, except some brands of hæmatites, following the inclination of the market.

The falling price being unexpected at the July quarter-day, took the pig makers by surprise, and as they generally were unprepared to acknowledge to the full extent the consequent depreciation of their property, very little business was done in native pigs. This remark, however, must be more especially applied to the best brands of Staffordshire pig iron.

On the 15th or 16th of this month, news arrived that Mr Lincoln's sixty days' impost on iron had lapsed on the 30th June, by effluxion of time, notwithstanding the demand for New York was languid, and during the months of July and August, the American demand continued feeble and inanimate.

The colliers' strike commenced in August, and continued until the end of November. The trade here were placed in trying circumstances for want of coal, which was supplied by rail from North Wales, Derbyshire, Yorkshire, Cannock Chase, Shropshire, and other districts, which during the seventeen weeks that the strike continued, seriously taxed the profits of the manufacturers.

During the months of September, October, and November, the stringency of the money market, the enhanced value of fuel, and the torpid state of the pig market, very seriously hampered the pig makers, who must have been working for a mere fraction, if indeed they realised any profit at all. Prices, during these months, gave way very considerably, and the leading manufacturers, as a class, avoided the market, being intent upon working up old stocks: shunning heavy engagements in face of the difficulties which appeared to assail the money market both at home and abroad. Orders for most kinds of iron now became scarce. Nail sheets were sold as much as 1*l* per ton below the list price: a perceptible falling off was observed in boat plates, the demand for which had for months previously been very good.

The second and third-class houses, by the beginning of Decembe, had become unable, for the want of orders, to keep their mills in full operation, and, with the exception of nail rods, wire rods, galvanising sheets, and boiler plates, all kinds of iron had become much less in request, and the trade had undergone a decided change for the worse.

As the month of December progressed, it became evident that puddlers' and mill-men's wages must be reduced. An aggregate meeting of the trade was held at "Nock's Hotel," Birmingham, on the 22nd of December, Mr George Barker in chair, when it was unanimously resolved to reduce the puddlers one shilling per ton, mill-men, engineers, and all other hands employed in the works 10 per cent.

During the whole of the month of December, the demand for nail rods and boiler plates was tolerably good. The leading houses were, in some instances during the month under review, well off for orders for best bars, angles, and some special kinds of iron, but the prospects of the trade, on the whole, are far less encouraging than they were at the same period in 1863. The unfavourable action of the money market during the past year has had a chilling effect on the iron trade, and no doubt contributed materially to its altered position. The official changes by the Bank of England during the year under review have been very frequent. It will be observed that these frequent changes, continually oscillating into higher values for money, must have operated most unfavourably on a trade in which such heavy amounts are turned over as the iron trade.

Failures.—The failures this year have been fewer in number, and decidedly less important in amounts, than for several years past; they comprise S. H. Blackwell, Russell's Hall; Mr Lucas Silvester, of Providence Works, Spon lane; John Hartland, of the Green Lanes and Toll End Works; and Wright and Preston, of the Stonefield Furnace, Bilston. All these failures have been caused by the colliers' strike, and the unfavourable state of the trade, brought about by one cause or other.

IX.—YORKSHIRE MANUFACTURING DISTRICT.

Burn's Monthly Colonial Circular reports:—

BRADFORD TRADE.

Yarns.—Business in home yarns was very active until September, and spinners were kept exceedingly busy, realising profitable prices. The same untoward cause which paralysed trade generally led, of course, to a stoppage of operations in this branch, and during the last four months of the year transactions have been of a very unsatisfactory nature, and anything but remunerative. In the former part of 1864, lustre, demi-lustre, and coloured yarns were all largely taken, and a good consumptive demand existed for alpaca and mohair sorts, particularly the latter. Botany and mottled yarns were steady, but business in the last-named of these was not nearly so large as in the preceding year. Two-folds for camblets have had a most extraordinary run, and, the export demand being also large, prices reached a tremendous point, and were exceedingly gratifying to spinners engaged on this description. The trade for Lancashire has not, on the whole, been large,—certainly much less than in 1863. Quotations advanced rapidly until the end of August, and attained perhaps 15 per cent. above the opening prices of the year; since then the opening prices have been considerable, but the year closed with rates averaging about 5 to 10 per cent. higher than in January last. In December, rather more business was transacted, and spinners are now better occupied than six weeks ago. The export yarn trade was in a very prosperous condition up to the end of August, the demand during that time being in some respects of a most extraordinary character, certain descriptions appearing to have no limit except that of supply.

The *export yarn trade* shared the same fate as all the other

Digitized by Google

branches of this district; business was very large indeed until the end of August, and it then received a complete check; since then but little business has been done, and, although a few orders were received at the beginning of December, the resumption was only very partial, and the year closed very quietly. One thing which may tend to curtail the German demand at present is the impending treaty of commerce between that country and France, as it is expected that a suspension of business will take place until the final arrangements have been made. Speculation has to a large extent presided over the great export trade of 1864, and the market has been more regulated by speculative purchases than by anything else. Large numbers of re-sales were made here, yarn being sold three or four times over, and prices were run up to a high point. Stocks are estimated as pretty extensive on this side, in spite of the absence of purchases since August, though, undoubtedly, they are much less than in the middle of November. France, so far, has not done much for us as a consumer of yarns, the manufacturers there alleging that our productions do not suit them so well as those of their own spinners.

Piece Goods.—In the foreign branch our merchants report a very good and extensive business until the end of August, and ever since then an almost obliterated demand. The spring trade was most active, particularly in fancies, which, in neat styles, were very largely taken, as were also figured Orleans. Alpacas, Orleans, lastings, and serges, also met with considerable consumption, and orders generally were satisfactory. Glancing over the various markets we find that France has settled down into a regular steady customer, and a good business has resulted during the year, more especially in plain goods and light fancy fabrics for spring, the orders for lenos having been very large indeed, and keeping a considerable portion of our machinery running during a very slack time. The reduction of the tariff, which came into operation in October, caused an influx of orders to be placed for delivery in that month, but since then the lower rate of duties has not operated so much as was anticipated. France, however, has been, like England, under the pressure of a severe financial derangement, and therefore the quietness which has lately reigned is only natural. The large useless stocks of unsuitable goods which crippled business for such a length of time are now cleared off, and a healthy basis is established for future operations.

The trade with *Spain* has not been so good as usual, owing to the dislocation of its monetary matters, and *Italy* has scarcely sent us an average business, but the *German* demand in the first eight or nine months of the year far exceeded the customary amount. Other markets have taken our commodities in about average quantities, with the exception of China and Japan, the features presented in the business for these countries being most striking, and exercising a wonderful effect on our manufacturers and spinners here. The demand for China camblets and figures has been so great as to affect materially the prices of some classes of wools and yarns, and the immense orders placed have caused the deficiencies of the American trade to be less felt than they would have been; machinery has been kept running which otherwise would have had to stand, and the operations of the year may justly be said to have exerted a widespread and marked influence on the market generally. Shipments to China have been very great. It is apprehended that the stocks there may be too large in camblets, but the Japanese trade appears healthy, notwithstanding the internal dissensions which are interfering with its development, and extensive orders were placed here for that country at the commencement of December. The China and Japan trade takes a stand now as one of the first in the new branches of the Bradford district.

The *American* trade of 1864 has, on the whole, been extremely unsatisfactory. The fluctuations in gold, varying as they have even to 100 per cent. at one period, and the high import duties, equivalent to about 50 per cent. in gold, have combined to restrict business operations materially, and to render this trade very trifling in amount, and markedly different to former years.

The *home* trade shows the same main charecteristics as alluded to in the former portion of this report, viz., in the first three quarters, a business of almost *unparalleled prosperity*, and then a sudden reverse. The fine summer weather was so continuous as to enable merchants successfully to clear off the whole of the large quantities of light goods provided for this part of the season, and the spring tide was perhaps unprecedented in amount and very profitable in its character. Large preparations were also made for autumn, and extensive orders were placed in May and June for heavy fabrics, such as winceys, knickerbockers, and Roubaix cloths, and until September a satisfactory business ensued. The check then came in the shape of dear money markets, failures, and general distrust, stocks accumulated, prices rebounded, and a long period of suspension followed, during which transactions were wholly arrested, and the depression was, like the inflation, perhaps never equalled, certainly never surpassed in its extent. Since an improvement took place and confidence was restored, there has been more doing, but the recovery was too late to benefit business to any extent in 1864, and merchants report considerable stocks on hand, though not so large as might reasonably be supposed to exist. The provisions for next spring, so far, is very slight indeed, few orders are placed, and buyers appear to rely more on supplying their wants from stocks than making any systematic provision for the future.

LEEDS CLOTH TRADE.

During the earlier months of 1864, there was a brisk demand for all kinds of seasonable goods, and merchants and manufacturers largely benefited, for the time, by the impetus thus given to the trade. But it soon became evident that this prosperity was only of a fictitious character, for the drapers became overstocked, and they were obliged to cease buying until they could manage to dispose of the parcels lying idly on their shelves. During April, the representatives of large wholesale houses only purchased sparingly, owing to the advanced state of the season for spring goods,—the articles principally in demand being good unions, black superfines, and blue and black unions, for the American trade. The inquiry fluctuated a great deal during May. In the early part of the month, very little business was done, owing to the unfavourable accounts received from London, but later on there was more speculative disposition manifest, the buyers principally operating in black cloths, and low and medium priced blue and black unions. A few parcels of witneys, in plain and fancy colours, low pilots, and fancy coatings, were also transferred at this time. In June, the representatives of London and provincial houses again put in an appearance in the town, and they purchased on a satisfactory scale, principally in the direction of plain cloths, meltons, and fancy coatings, low and medium qualities and black unions, and witneys, pilots, and ordinary winter fabrics. The Canadian buyers also reported favourably of their prospects, and purchased pretty freely for the fall trade. Fancy sattaras were in demand, in addition to heavy goods. During July and August, the principal business transacted was in winter fabrics, fine union cloths, and low sealskins,—most of the latter description of articles being entirely cleared out of stock. A considerable shipping trade was transacted during the latter month, principally with the Continent and our colonies, the American demand being only of a nominal character.

The unexpected failure of the Leeds Banking Company, on the 17th September, had a most disastrous influence upon the trade of the district, and from that time up to the present the commercial operations of our commercial community have been more or less restricted by that untoward event.

LEEDS FLAX TRADE.

During the earlier months of the year, there was rather more inquiry for Baltic flax, and in June, prices of Riga were so firm that 52 roubles were paid for F.P.K. mark, a large business being transacted. In August, bag flaxes were principally inquired after, at full rates, other sorts being quiet at late quotations. During October and November, trade was rather more active, in consequence of the flush in the cotton market, but, although a large business was being transacted, rates had not undergone any material alteration. Riga flaxes, except the finest qualities, were at this season comparatively neglected; but tows of a good fine description were in fair demand, at full rates, whilst low kinds and codillas were sluggish. In December, the flax trade was heavy in tone, and a very limited amount of business was done. At present, the depression is mainly upon the Friesland, Riga, and English flaxes. There is a prospect of a very large flax-sowing in the spring, both in England and Ireland; and, as last year's English linseed was very fine, it is expected that large quantities of it will be taken for sowing purposes. Yarns and threads have been subject to many variations in prices and demand during the year, but, speaking generally, the spinners have done a fair amount of business, at moderate rates, the inquiry for threads having uniformly been good.

THE HUDDERSFIELD TRADE.

The year opened rather unfavourably, and for some weeks the expectations of a good spring trade which had generally been indulged in were not realised; but, a little later on, a very good demand sprung up, and the stocks held by manufacturers were very soon lowered, and, owing to the very fine spring and summer, the demand for light goods continued much later than usual, and a great many repeat orders were received late in the season.

In the Cloth Hall a very large business has been done, particularly in medium goods, such as sataras, diagonals, and twists; and low doeskins have also been in good demand. The makers of Bedford cords have been remarkably busy during the whole year, and have not been able to keep pace with the increasing demand, which has caused other manufacturers to turn their attention to them. For black doeskins there has also been a most unusual demand, particularly in medium prices. The makers of fancy vestings and shirtings have been exceedingly flat throughout the whole year, and the workpeople have had to find employment in other branches of manufacture. Good novelties for mantles have been produced in the neighbourhood, one called snow flakes, which has had a tremendous run for London, and also a curled cloth, which may be seen everywhere.

Digitized by Google

The suspension of the Leeds Banking Banking Company in September, and the failure of several large houses in which the Huddersfield district was deeply interested, followed by many failures in London, caused an almost entire cessation of trade; and since the end of September there has been scarcely any business done, and the present prospect is far from cheering. The Canadians, who are usually purchasing largely at this season, are not doing anything, as they purchased freely in June last, and the market is rather overstocked, so that we can only expect a limited business from that quarter.

In the shipping trade to the Continent and United States perhaps at no time, not even in the panic of 1857, has less business been done. The American houses have been almost at a standstill, with the exception of some blankets which have been sent out for the American army.

On the whole, in a commercial point of view, Huddersfield has stood as well, or even better than most towns, and we have, had only one failure of any importance.

X.—RAILWAY TRAFFIC (UNITED KINGDOM), 1864, AND SIX PRECEDING YEARS.

We again obtain from *Herapath's Journal* the following excellent summary of railway traffic:—

TRAFFIC RETURNS of RAILWAYS in the UNITED KINGDOM, for Seven Years ending 31st December, 1864

TOTAL RECEIPTS.

	January to March.	April to June.	July to September.	October to December.	Total for the Year.
	£	£	£	£	£
1864	7,199,403	8,268,447	9,184,304	8,220,543	32,867,697
1863	6,521,881	7,422,218	8,331,376	7,678,486	29,953,961
1862	6,070,618	7,014,569	8,108,671	7,127,224	28,321,082
1861	6,206,646	7,024,760	7,581,136	6,881,730	27,694,274
1860	5,935,869	6,841,568	7,469,851	6,778,595	27,025,883
1859	5,496,134	6,248,963	6,986,430	6,374,590	25,106,117
1858	5,061,679	5,798,526	6,551,079	5,909,681	23,320,964

AVERAGE TRAFFIC per Mile per Week.

1864	642	732	801	702	2,877
1863	609	686	760	690	2,740
1862	602	686	773	672	2,733
1861	634	709	763	689	2,795
1860	633	730	782	702	2,847
1859	608	683	758	684	2,733
1858	580	657	735	659	2,631

MILEAGE over which the TRAFFIC was carried.

	January to March.	April to June.	July to September.	October to December.
1864	11,230	11,353	11,631	11,818
1863	10,768	10,795	10,993	11,194
1862	10,183	10,304	10,593	10,679
1861	9,837	9,921	9,927	10,041
1860	9,371	9,422	9,650	9,662
1859	9,086	9,219	9,273	9,363
1858	8,750	8,836	8,838	9,016

This tabular statement of the traffic returns of railways in the United Kingdom, published weekly for the year 1864, is by far the most satisfactory of such returns published in any previous year since 1847. The total receipts for the past year amount to 32,867,697*l*, being an *increase* of 2,913,736*l* over the published weekly returns for the year 1863. The *increase* in the receipts during the past year is *about double* the average yearly increase since 1848. Notwithstanding the great depression in the cotton trade, the result of the year's working shows that a great increase must have taken place in the general traffic of the country, both in passengers and goods. It would appear that the recent policy of affording mutual facilities for the interchange of traffic between the great companies, and the desire for utilising each other's lines as much as possible, instead of carrying out, as formerly, the old policy of block lines and obstructions to the natural flow of traffic from one place to another, must have had a material effect in increasing the gross traffic and probably in reducing expenditure. Judging from the numerous applications to Parliament in the last session for power to make short lines, junctions, spurs, branches, and extensions to other lines for the alleged object of more completely facilitating the interchange of traffic between the various great systems of railways in the country and between various towns, it would appear for the present that the more railway communication was extended over the country the greater would be felt the want of further railway accommodation in places not yet supplied with railways. Parliament in the last session, to meet those requirements, passed 270 railway bills, of which 207 were for old companies, and 63 for the incorporation of new companies, involving, in the aggregate, the construction of 1,321½ miles of railway, at an estimated cost of 47,587,500*l*, which was authorised to be raised as share capital, and also the usual powers for borrowing one-third, or 15,862,500*l*—together 63,450,000*l*. Notwithstanding those additional powers for the construction of railways and the further expenditure of capital, a still greater number of bills (400 in all) have been deposited for a like purpose in the ensuing session, many of them asking for powers to authorise deviations from, and abandonment of, lines sanctioned in the last session. This is a bad feature.

Of the 32,867,697*l* received during the past year, the following fourteen companies received 26,370,186*l*, against 24,258,817*l* in 1863, showing an increase of 2,111,469*l*, leaving 6,497,411*l* for other lines in the United Kingdom, against 5,695,144*l*, showing an increase of 802,367*l*.

The following table shows the gross traffic receipts of the great companies as compiled from the weekly returns; but it must be borne in mind that these are not all the receipts of these companies. There are tolls, interest on cash deposited in the banks, dividends from investments in other railways, rents, and so forth:—

	Receipts 1864	Receipts 1863	Increase.
	£	£	£
Caledonian	984,382	883,619	100,763
Great Eastern	1,655,462	1,546,661	108,801
Great Northern	1,754,670	1,552,863	201,807
Great Southern and Western	436,233	427,244	8,989
Great Western	3,151,546	2,941,643	209,903
Lancashire and Yorkshire	2,014,327	1,822,992	191,335
London and North-Western	5,438,505	4,988,888	449,617
London, Brighton, & S. Coast	1,013,633	980,793	32,840
London and South-Western	1,210,264	1,148,419	61,845
Manchester, Sheff., & Lincoln	916,921	832,065	84,856
Midland	2,424,847	2,187,583	237,264
North British & Edin. & Glas.	1,080,024	1,017,820	62,204
North-Eastern	3,099,868	2,790,269	309,599
South-Eastern	1,189,504	1,137,958	51,646
	26,370,186	24,258,817	2,111,469

This increase of 2,111,469*l* is a most important result for the above companies, and indicates the scope that exists under judicious and liberal management for the further development of the districts through which they pass, or claim to belong to them.

In addition to the receipts of 32,867,697*l*, there are receipts on inferior lines, the traffic of which is neither published weekly nor monthly, and which, as far as can be ascertained or estimated, amount to 314,800*l* on 764 miles of railway, the cost being comparatively low—about 7,150,000*l*. This, added to 384,246,680*l* expended on the railways of which the aggregate weekly returns appear in the first table, makes the total expenditure on the whole of the railways referred to 391,396,680*l*, the whole of the receipts 33,182,497*l*, and the mileage in operation 12,582 miles.

The following table speaks for itself, and exhibits at a glance the total capital expenditure, the gross revenue, working expenses, and other particulars of these wonderful and valuable undertakings in the United Kingdom for the past 23 years:—

Year.	Capital Expended on Railways open for Traffic.	Average Cost per mile.	Total Traffic Receipts.	Average Receipts per mile for the Year.
	£	£	£	£
1842	54,380,100	33, 62	4,470,700	2,743
1843	60,637,100	34,929	5,022,650	2,895
1844	66,882,100	34,290	5,814,980	2,982
1845	75,646,100	33,726	6,909,270	3,080
1846	87,765,100	30,903	7,945,870	2,797
1847	114,728,000	30,924	9,277,670	2,501
1848	154,200,000	33,333	10,445,100	2,258
1849	197,000,000	33,110	11,683,800	2,000
1850	230,522,730	34,236	13,142,235	1,944
1851	236,841,420	34,186	14,987,310	2,163
1852	248,093,520	33,816	15,543,610	2,118
1853	263,636,320	33,912	17,920,530	2,305
1854	273,860,000	34,113	20,000,000	2,491
1855	291,903,000	35,425	21,123,315	2,567
1856	298,946,260	34,122	22,995,500	2,625
1857	307,153,670	33,492	24,162,465	2,634
1858	315,950,000	33,000	23,763,764	2,484
1859	322,219,100	32,603	25,570,100	2,588
1860	329,827,200	32,106	27,576,783	2,685
1861	342,386,100	31,633	28,263,374	2,614
1862	355,107,280	31,118	28,850,612	2,532
1863	373,107,280	31,354	30,498,660	2,562
1864	391,396,680	31,209	33,182,497	2,646

Year.	Working Expenses, Rates and Taxes. Per cent.	Length of Line open at end of Year Miles.	Per Centage of Traffic to Receipts on Capital Expended. Per cent.	Per Centage of Profits on Capital Expended. Per cent.
1842	40	1,630	8.22	4.93
1843	40	1,730	8.28	4.94

XI.—EFFECT IN WESTERN INDIA OF THE SUDDEN EUROPEAN DEMAND FOR COTTON.

The following letter from the Bombay correspondent of the *Times* was dated Bombay, 30th December, 1864. It appeared in the *Times* of 24th Jan., 1865. It describes in the main truly, but with some of the superfluous emphasis of such communications, the remarkable social changes produced in Bombay by the sudden increase in value of the produce of its cotton cultivation:—

I question if any city or community in the world has ever presented so extraordinary an aspect as Bombay during the commercial and social revolution through which it is now passing. The suddenly discovered gold did far less for Melbourne than that deluge of silver which has for the past four years, 1861-4, flowed over Bombay with so mighty a current. The social anomalies and, I fear, also, the general demoralisation were less marked in the English colony than in this Indian city, which a sudden, and probably temporary tide of prosperity has caused to aspire to be the Liverpool of the East.

The *rise of prices* which during the past 15 years has taken place all over the world has been especially marked in India. No country with a similar trade and revenue had so contracted a currency, but the effect on prices was not felt till the influx of English soldiers and settlers which followed the mutiny. There was no corresponding increase in the necessaries of life consumed by Englishmen in India, while the natives themselves, as they grew in wealth, developed new wants. It is my experience that in Calcutta during the last ten years prices have just doubled. The rise was felt most severely there by the large class with fixed incomes, because Calcutta was the base of the mutiny campaigns. In the single matter of house rents, it was met partly by an extension of the American system of living in clubs and boarding houses, and partly by the erection of some new squares and streets of European houses. Not till the outbreak of the American war was the rise felt in all its intensity in Bombay. The community there was limited and had been very "slow." But in proportion to the delay of the tide of increase in reaching Bombay has been its violence, so that the western city now far exceeds Calcutta in the expense, discomforts, and even positive hardship of living. Up to 1860 the sum paid by Europe for the whole cotton export of India was not above 7 millions sterling annually. In 1860-61 the import of bullion into Bombay alone, chiefly in payment for cotton, was only 6½ millions sterling. But in the three years since that time official returns state the import of gold and silver into Bombay alone at upwards of 40 millions sterling, and if we add the imports of the year just closed, we have a sum of not less than 60 millions sterling poured in hard cash into one city. If we take all India, we find that Europe now pays her nearly 40 millions sterling a year, of which more than one-half is in bullion, for cotton, which five years ago sold at not more than seven or eight. What is the result of this in the city of Bombay? In Calcutta the trade is almost entirely in the hands of Europeans, and the Bengalees play but a subordinate part. Hence there is a wider social gap and less friendly intercourse between the two classes. But in Bombay, owing chiefly to the presence of a casteless race like the Parsees and to the physical advantages of the island, the lion's share of the trade is in the hands of natives, and they associate with English gentlemen on terms of more pleasing equality than is the case with their more refined but less wealthy countrymen in Bengal. Hence many Parsee and Hindoo, and a smaller number of English (or rather Scotch), merchants find themselves possessed of sums which are reckoned by millions, and speak with contempt of so petty an amount as a lac of rupees, or 10,000*l*. Hindoos and Parsees, who were a year or two ago petty brokers or miserable shopkeepers, are now millionnaires. The most remarkable instance of this is a Hindoo named Premchund Roychund, lately a subordinate clerk in an English house, on 30*l* a year. By daring speculation, he has amassed about two millions sterling. Again, Rustonjee, the second and ablest son of the first baronet, Sir Jamsetjee Jejeebhoy, has become the millionnaire of Bombay, though his ancestral fortune was not large, his capital being reckoned at 2½ millions sterling, and, if the present price of cotton continue for two years, there is every likelihood of this sum being doubled. These are only two out of twenty whom I might name. The same is true on a smaller scale, because the partners are honourable men in the English sense, of such Scotch houses as Messrs Nicol and Co. and Ritchie, Stewart, and Co. These are the great merchant princes, but *all* the subordinate commercial houses and traders have their share. Nor is the wealth confined to the merchant who acts as middleman between the peasant grower of cotton and the Liverpool buyer. Next to those of Madras, the ryots of the Bombay Presidency were the most miserable in India, burdened with a weight of hereditary debt to which each generation added, and the veriest bond slaves of the native usurer, who bought their crops at his own price. Now, the mass of the peasants are rolling, comparatively, in wealth, and the occupation of the usurer is gone. Except that vile hereditary debt, the fruit of superstition, to set a limit to which a wise Insolvent Act will soon be passed in the ryots' favour, the agricultural class here, in point of comfort, put ours in England to shame. While all are, according to their ideas, comfortably clothed, housed, and fed to the full, the majority indulge in the most whimsical tastes, one priding himself on his fine breed of bullocks, for which he has paid five times the old price, another rejoicing in his riding horse, and a third—this is really the case—having no better means of displaying his wealth than by making the tires of his cart-wheels of the silver England finds such difficulty in sending to us. So far has this gone that in a festive idolatrous procession lately, a worthy farmer—he can no longer be called a peasant—thought he could not better show his wealth than by carrying enormous bags of rupees at the end of poles. In this Presidency, once so waste, and yielding comparatively so little to the revenue, there is not now an acre of culturable soil unemployed. Even in Kandeish, the only country which has not recovered from the blighting effects of Mahratta devastations, I have just witnessed the spectacle in an obscure village of a crowd of peasants squatting around two agents from Bombay, one with 40,000 rupees and the other with 30,000, paying for the growing crop at enormously high rates.

What has been the effect of this wealth? How have the educated classes used it? Neither the Parsees nor Hindoos have forgotten that Her Majesty recognised the splendid liberalities of the late Jamsetjee Jejeebhoy by creating him a baronet, and so the *nouveaux riches* are in the habit of lavishing lacs of rupees on public objects. Premchund Roychund, for instance, has given, I believe, at least a tithe of his two millions in donations to the University, the Cyclone Fund, and several Hindoo charities. Indeed, if we do not inquire into motives too narrowly, we cannot withhold the tribute of our admiration for such princely generosity as that of which Bombay has been and is still the scene. It is well—and on this principle Governor Sir Bartle Frere most wisely acts in his laudations of the givers—that wealth so suddenly and almost without effort acquired should pay its quota for the good of the public. Is it not calculated that the combined wealth of all the rich men of Bombay is little under 80 millions sterling, and that in an island with only a fourth of the population of London (816,000)? Hence Bombay, which as a city is little better than Madras, being contemptible when compared with Calcutta, bids fair to be changed into a great commercial capital, into a real Liverpool. Never were English merchants so public-spirited in reclaiming land, building docks, wharves, piers, warehouses, and saw-mills, and in furnishing all the appliances of a great port; never were Asiatic millionnaires so lavish. Sir Bartle Frere is quite equal to the occasion; he is the Louis Napoleon and M. Haussman of Bombay and Poonah in one. So great is the demand for ground in the business part of the city—land selling at 30*l* to 50*l* a square foot, as if the Chatham and Dover Railway were the purchasers—that Sir B. Frere has demolised the useless ramparts of the old fort. As Bombay has not a public office or a public edifice worthy the name, except the Town hall, he is about to commence on some of the sites thus gained a series of great public offices, with new streets, hotels, a university, hospital, and a great palace of justice, the whole of which will cost some two millions sterling, and occupy from seven to ten years in building; and this will not cost the Imperial Treasury a penny, for the sale of public lands in the island will realise a much larger sum. So at Poonah. That the old capital of the Mahrattas, 120 miles off, will never grow to be the capital of India, in spite of Mr Grant Duff's threatened annual motion on the subject, the first glance at its barren expanse and some experience of its heat in December convinced me. But it is intended to be the great military capital of the Deccan and the Western Presidency. On the site of the old Kirkee village, which overlooks more than one battle-field famous in history, a great fort will soon rear its head, with all such departments attached as the arsenal, gunpowder, and gun-carriage factories. Below lies the artillery cantonment of Kirkee, with the Governor of Bombay's new palace rising far beyond. Four miles to the South is the Poonah camp, and between cantonments and camp is a high piece of ground where the Deccan College is being built, to tempt the caste-bound youth of the Mahratta country to board, as in Oxford, in one place, if not to use one hall, and where, too, it is hoped by too sanguine Bombayites the Viceroy will build himself a residence. No one who has seen all the Presidencies as I have done can believe that Calcutta, commanding the Ganges and Brahmapootra valleys, with undeveloped Assam and Burmah to the East, will ever cease to be both the political and commercial capital of India which it has *grown* to be; but it is high time, for its own sake, that Bombay should be cleared of its miserable hovels and bungalows; its filthy streets and dreadful consequences; its scandalous hotels, and utter absence of the comforts of civilisation, and made worthy of its rising trade and enormous wealth. This Sir Bartle Frere is doing with all his might, and with much wisdom. Ten years hence it will be impossible to recognise the place.

I am in duty bound to allude to the *dark side* of the social and commercial revolution which is going on with such rapid strides in Bombay. There are two results—while the rich are becoming richer, the poor and the class with fixed incomes are

Digitized by Google

daily becoming poorer; and the rich are becoming fast demoralised by unhealthy speculation, so that there is good reason to fear a terrible retribution. It should be known in England that it is impossible for a married man to live in Bombay on a thousand a year; that Englishmen are separating themselves from their wives and families for years because they cannot afford to keep them in Bombay; that there are many subalterns, and even captains, of Her Majesty's army, who, like poor curates, in a country where so to live is death, who, in sober truth, cannot afford to have butcher's meat on their tables more frequently than once a week. If it took ten years for prices to double in Calcutta, in Bombay they have quadrupled in four years. The non-producing poorer class cannot get grain. Last year (1863-4) a new trade sprang up between Calcutta and Bombay, the latter taking nearly a million sterling's worth of grain from Bengal. Yet the Bombay Commissioner of Customs states the alarming fact that while "the importations of grain into Bombay have been 32 *per cent. in quantity below* the importations of the preceding year, they have exceeded the latter *in value* by 200 per cent. Everywhere along the north-eastern division of the Great India Peninsula Railway I have seen grain waiting for transit to Bombay, but the single line of rail is as unequal to the traffic here as it is in the case of cotton on the south-eastern branch. And even if this grain were sent it would be as a drop in the ocean, while its despatch causes famine prices in the interior. It is the official class, however, which suffers most. I have spoken of military officers, but the political danger from the poverty of civilians is greater, for their reduced status brings them into contempt with the natives, who once looked upon them with awe. It induces the younger and abler to leave the service for merchandise, and it tempts those who remain to dabble unworthily in the share market. Would you believe it, that several of the rich natives of Bombay lately, in the simplicity of their hearts, proposed (indirectly) to Government not only to memorialise the Governor-General on the subject, but to help to abate the evil out of their own pockets? Hence the cry now to keep the income tax, which Sir C. Trevelyan is determined to abolish, substituting local imposts that will fall mainly on the poor. The best men are tempted away from official employment till the uncovenanted service is deserted. It is the ablest and youngest who go, but even those whose pensions would otherwise keep them are induced to leave. One doctor lately declined a tempting offer on this ground. "What is the value of your pension capitalised?" he was asked. On naming the sum it was given him ten times over by the simple addition of a cypher, and he ceased to be a Government servant. On his own responsibility, Sir B. Frere added to the salaries of the menial servants of the State an increase proportionate to the price of grain, on the same principle which is adopted with our sepoys. But he has hitherto failed to induce the supreme Government to sanction an increase to the higher branches of the service, for it would amount to more than half a million sterling in Bombay alone. Nor can we wonder at this refusal, for any increase must be general all over India, and we can only hope Sir C. Trevelyan will sacrifice vanity to justice, and give at least some relief, otherwise administration in India will come to a dead lock. What with the rise of prices, and the unnecessary irritation caused by the mode of carrying out the military and medical amalgamations, the discontent of all classes of officials in India, has reached a dangerous height, and the effect of a knowledge of this on the natives is deplorable.

The other evil result of this sudden wealth is unhealthy speculation. I enclose a Bombay share list, and would especially direct your attention to the thirty banks, land reclamation, and financial companies, the fruit of the past year, chiefly. Every day a new company enters the market, and there is a rush for shares, with endless heartburnings and counter-accusations. Hardly one of these companies has paid a dividend, yet the shares sell at premiums which the maddest speculators never dreamt of and which can never make a return to the victims who will be caught in the reaction that is impending. The best, and to my mind almost the only hopeful, scheme is the Elphinstone Land and Press Company, established long before the present mania, by Messrs Nicol and Co. Its object is to reclaim 1,200,000 square yards of fore-shore at the busiest part of the harbour, and on the ground, after giving a large part to Government to accommodate the railway, to build presses, wharves, docks, and warehouses, like those of Liverpool. To reclaim each square yard costs from 16s to 20s: but each yard already reclaimed lets on an annual lease at from 10s to 14s. Hence a dividend of 7 per cent. on even 14,800*l*, the fabulous premium to which each 1,000*l* share has risen. Need we wonder that a scheme which proves such a mine of wealth has imitators, both bad and good? The slightest knowledge of arithmetic would prove, if men were not corrupted by the hope of sudden gain, that most of the other companies' shares, at their present premium, will involve a terrible loss; but at present men in Bombay do not think of such contemptible things as dividends. They buy shares cheap to sell them dear; they too often lend their good names to plans which are hollow, and make use of their knowledge to get out of the showy edifice they have erected before it falls and engulfs others in its ruin. The demand for ground in Bombay is so great, and the fact that it will soon be the railway focus of India is so favourable to it, that most of these land reclamation schemes would be blessings to the island if they were conducted in a healthy and honourable market. As it is, I have seen no sadder sight than the *al fresco* Bombay share market under a tropical sun. It is far worse than the London betting circles, watched by policemen, "behind the brewery," and elsewhere.

XII.—ENGLISH MONEY MARKET, 1864.

There were fifteen alterations in 1864 of the minimum rate of discount at the Bank of England. In Table D, full details are given of the weekly Bank return, but the following abstract will show the condition of the Bank at the several dates when the rate was altered:—

BANK OF ENGLAND, 1864.—ALTERATION OF RATE OF DISCOUNT.
The 0,000's at unit end are omitted—thus, £14,22=£14,220,000.

Dates. 1863-4-5.	Bank of England Minimum Rate of Discount.	Total Bullion.	Banking Reserve.	Circulation. including Bank Post Bills.	Private Securities.	Consols.
	Per cent. per annum	Mlns. £	Mlns. £	Mlns. £	Mlns. £

The following details are given in the circular of Hughes and Peevor (London):—

The prominent features of 1864 have been the continuance, during the first four months, of the formation of *new companies* for the furtherance of objects of every description, of which we had such an abundance in 1863; the conversion of many private trading firms into public companies, with limited liability; the high rate of interest which has ruled throughout, 6 per cent. being the lowest, and 9 per cent. the highest; the issue of several foreign loans; the arrangement, in April, of the Mexican debt; and the fusion of two old-established private banks with joint stock banks of high repute, viz., Masterman and Co. with Agra Bank, and Jones Loyd and Co. with London and Westminster Bank.

Up to the end of *April*, a large business was done in the shares of all the new companies, but the rise in the rate of discount to 9 per cent. early in May operated as a check to transactions, and since then the miscellaneous market has presented a dull appearance, pending the absorption by the public of the better classes of these securities. At the same time, the more speculative foreign stocks also received a check to the prices they had attained; they recovered, however, in the autumn months.

Digitized by Google

The foreign loans raised during the year were—for

			£	pr cnt.	Issued at
1864—Jan.	12	—Denmark	1,200,000	... 5 ...	93
March	17	—Bolivia	1,000,000	... 7 ...	88
April	4	—Venezuela	1,500,000	... 6 ...	60
„	17	—Anglo-Dutch Russian (raised jointly in England and Holland)	6,000,000	... 5 ...	85
„	11	—Sweden	2,223,000	... 4½ ...	92½
Nov.	15	—Egypt	5,704,200	... 7 ...	93
„	25	—Danubian Principalities	916,000	... 7 ...	86
„	28	—Denmark	728,000	... 5 ...	94½
Dec.	12	—Monte Video	1,000,000	... 6 ...	60

English railway stocks, owing to the greatly increased traffic receipts that most of them show, are gradually re-establishing themselves in the favour of investors; some of the principal lines are quite 10 per cent. higher in price than they were at the beginning of the year, and, with returning expansion of trade generally, we should not be surprised to see a still further rise in prices; but it should not be overlooked that increased traffic receipts do not always result in increased dividends, nor that, in the case of the London and North-Western Railway, 1,300,000*l* more capital will have to share in the January dividend, and a further 1,300,000*l* in the July dividend of next year.

Another feature of the year has been the increase in the values of the *old-established joint stock banks*, notwithstanding the rapid multiplication of banks with limited liability; we append a list of a few for comparison :—

	January, 1864.	Highest during the year.	December, 1864.
London Joint Stock Bank	39	52½	51½
London and Westminster	80	102	99½
London and County	59	82	83½
Union of London	41	59½	58½
City	115	145	127
Bank of London	154	181	158

The banks connected with India and China have also risen considerably in value.

It is worthy of notice that our *English funds* appear to have lost their popularity as a means of investment, and that the Savings Bank returns exhibit withdrawals on a considerable scale; the highest prices of Consols during the last six years have been—

1864	92	1862	94⅜	1860	95⅝
1863	94	1861	94¼	1859	97⅜

These circumstances, coupled with the demand for single 50*l* and 100*l* bonds of new issues of *foreign stocks*, and of *Indian railway and colonial Government debentures*, which pay higher rates of interest to investors, with the punctuality of the funds, have, we believe, tended to the depression in the value of Government securities, and show that the public are looking for more lucrative investments.

In table (A) is given a classified list of the 282 new companies advertised in 1864. This table is founded on the list prepared by Messrs Spackman and Sons (London) for the *Times*, and published by it on 31st Dec., 1864, with the following introductory remarks and summary :—

The total capital thus offered for subscription has been 106,523,000*l*, but some considerable proportion of the proposals proved abortive, and in other instances the process of winding up voluntarily or otherwise has already been commenced. Last year the number of companies brought out was 263, and the amount of capital offered was 78,135,000*l*.

Messrs Spackman and Sons report :—

The capital authorised in 1864 amounts to 155,887,500*l*, the capital offered to the public to 106,523,000*l*, and the deposits thereon to 12,545,800*l*. These figures, as compared with those for the year 1863, give the following results :—

	Companies.	Capital Authorised. £	Capital Offered. £	Deposits. £
1864	282	155,887,500	106,523,000	12,545,800
1863	263	100,053,000	78,135,000	8,875,550
Increase over 1863.	19	55,834,500	28,388,000	3,670,250
Total for two years —1863 and 1864.	545	255,940,500	184,658,000	21,421,350

The universality of the adoption of the principle of limited liability is again illustrated by the fact that only one of the 282 companies named is unlimited :—

	Companies.	Capital Authorised. £	Capital Offered. £	Deposits. £
Companies limited	279	153,357,500	103,993,000	12,278,300
Companies in which the liability is limited by special Act of Parliament or Royal Charter	2	2,500,000	2,500,000	237,500
Company unlimited	1	30,000	30,000	30,000
Total	282	155,887,500	106,523,000	12,545,800

In addition to the capital required for new companies a large amount of new capital has been issued by *existing companies* during 1864, an account of which is also annexed, amounting to capital offered 35,315,000*l* :—

	£	£
Capital called up	7,844,000	
Premiums	3,839,833	
		11,683,833

The totals for *new companies* and *new issues by old companies* will therefore be :—

	Capital Authorised. £	Capital Offered. £	Deposits. £	Premiums. £
New Companies	155,887,500	106,523,000	12,545,800	...
New issues by old companies	...	35,315,000	7,844,000	3,839,833
	155,887,500	141,838,000	20,389,800	3,839,833
			24,229,633	

AMOUNT "CALLED UP" for DEPOSITS and PREMIUMS in NEW and OLD COMPANIES, 1864.

Companies.	New. £	Old. £	Total. £
Banking	1,585,000	8,733,333	10,318,333
Finance and Discount	2,213,750	2,000,000	4,213,750
Manufacturing & Trading.	3,608,500	135,000	3,743,500
Railway	848,000	250,000	1,098,000
Insurance	585,000	268,500	853,500
Shipping	997,500	187,500	1,185,000
Hotel	397,700	7,500	405,200
Mining	775,250	...	775,250
Gas	179,000	20,000	199,000
Miscellaneous	1,356,100	82,000	1,438,100
	12,545,800	11,683,333	24,229,633

The following table presents in total results the operation of the Limited Liabilty Law since its adoption in 1855 to May, 1864—that is, in about nine years :—

COMPANIES REGISTERED &c., 1855—1864.

Particulars.	England. No.	England. Capital	Scotland. No.	Scotland. Capital	Ireland. No.	Ireland. Capital	Total. No.	Total. Capital
		Mlns. £		Mlns. £		Mlns. £		Mlns. £
Formed	3,763	490.6	142	2.9	177	2.9	4,082	496.5
Dissolved	986	—	26	—	31	—	1,043	—
Leaving	2,777		116		146		3,039	

The yearly progress of the formation of companies in *England* has been as under—stating the amount of nominal capital registered in each year at the office of Joint Stock Companies :—

Year.	Mlns. £	Year.	Mlns. £
1856	14.0	1862	40.0
1857	20.3	1863	135.3
1858	29.0	1864	145.0
1859	13.3		
1860	17.3		
1861	18.0		
Average	18.6	Average	106.0

The formation of companies registered with *unlimited* liability is under 10 per cent. of the whole. The registration of a company at the Joint Stock office is, of course, a very different matter from the successful formation of it, and hence the preceding figures of nominal capital are indications only of the degree of activity in the projection of companies.

The last and really effectual amendment of the Limited Liability Law was by means of the Companies Act, 1862, which came into operation at the end of last year.

It would appear that about *one-fourth*—say 1,043 out of 4,082—of the companies registered since 1855 have been already formally dissolved; and it is probable that a large per centage of the remaining three-fourths are not in active or profitable operation. It is said, indeed, by high legal authorities, that a certain class of practitioners of the law find lucrative occupation in promoting the setting up of companies, in order that after a short fictitious existence they may pass into the winding-up process.

1845	4,522	1865	33,442

NOTE ON THE TABLES SUBJOINED.

Table A.—*List of Companies Formed in* 1864.—This table is compiled from the alphabetical list of companies furnished to the *Times* by Messrs Spackman. But, for our present purpose, the companies have been re-classified under the several heads of "Banking," "Credit," "Insurance," &c., and columns have been added of the market prices of the shares at 31st December, 1864.

Table B.—*Wholesale Prices of Commodities*—1845-50, 1851-63, and 1864.—We have followed in this table the arrangement and method adopted by Mr Tooke and Mr Newmarch in the History of Prices (V. and VI.), and continued by Mr Newmarch in the *Statistical Journal* for 1859-60 and 1861. The average prices of the six years 1845-50 were first given by Mr Newmarch in the *Statistical Journal* for March, 1860, and were then described as compiled from the weekly prices given in the Economist. All the other prices in (B) are obtained from the same source. The table, therefore, possesses at least the advantage of being derived from first to last from the same authority.

Table Q.—*Wholesale Prices—Proportionate Results.*—The construction of this table is explained in the note which is given at the foot of it. It is formed upon the example first given by Mr Newmarch in the *Statistical Journal* of 1859, and since followed by Mr Jevons in his recent very able pamphlet on the Effects of the New Gold.

The rest of the tables explain themselves.

1863	.55	.8	.18	,,	,, ⅜
1864	.70	.8¾	.12½	25½	,, ⅜
Average	25.58¾	13.8⅜	12.0	23¾	61

The Foreign Exchanges of the five years 1851-55 were so constantly disturbed by the operations arising out of the Russian war, that it is necessary to exclude them from a comparison of the rates of exchange before and subsequent to 1850. The comparison would then be made between the ten years 1841-50, and the nine years 1856-64, and the following are the figures:—

Years.	Paris.	Hamburg.	Amsterdam.	Calcutta.	Standard Silver.
1841–50	25.76	13.12¼	12.4½	23	59½
1856–64	25.54⅜	13.7⅝	12.1	24½	61¼
Difference	21⅝	4⅝	3½	1½	1¾
Equal per cent.	9/10	3⅝	3⅓	6½	2½

According to these results, a comparison, extended over extensive groups of years, between the *Silver* currencies of Paris, Hamburg, and Amsterdam, and the *Gold* currency of the United Kingdom, show a difference of about 2 per cent. in favour of *Silver;* with Paris the difference is only 9-10ths per cent. The rise in the London price of standard silver also exhibits a difference in favour of silver of 2½ per cent. With Calcutta the difference is, say 6½ per cent., but several special circumstances have contributed to that result.

As regards the table of IMPORTS, the striking features, on comparing the figures for last year with those for 1863, are the large decrease in the arrivals of gold from the Australian colonies, the increase of nearly one million sterling in the receipts of gold from the United States, the largely augmented import both as regards gold and silver from California and the West, Indies, and the large arrival of silver from France, Belgium, Holland, and the Hanse Towns. The decrease in the shipments from Australia is caused in a great measure by the augmented export from that colony to India.

In the EXPORT table, the increase of 4,400,000*l* in the shipment of gold to France, and the decrease of 4,000,000*l* in that of the same metal to Belgium, Holland, and the Hanse Towns, stand prominently forward. As regards silver, the total export in 1864 was about one million sterling less than in 1863, the shipments to the Continent having augmented whilst to the East they show a decrease.

The large shipments of gold to France, last year, were made, in a considerable degree, for the purpose of buying silver for transmission to the East to pay for cotton. The shipments of silver from Marseilles by the steamers of the Messageries Imperiales amounted to 3,043,300*l*, or about one million and a half sterling in excess of 1863; consequently, as a good proportion of this amount was shipped on English account, the actual decrease in the export of silver to the East for the past year shows but a moderate decrease, when compared with the preceding twelve months. The official statement showing the export of silver from the United Kingdom to India and China shows a diminution in 1864, as compared with 1863, of about 2,300,000*l*.

The IMPORT table shows a large arrival of gold from the West Indies, caused by the extensive shipments made from California direct to Great Britain on new York account.

The total IMPORT of gold and silver last year was 27,621,000*l*, against 29,870,000*l*; and the total export 23,155,000*l* against 26,461,000*l* in 1863.

(G) EXPORTS OF GOLD AND SILVER in Millions Sterling from the United Kingdom—Official Returns, 1859-64.

[Unit 000's omitted—thus £3,321 = £3,321,000.]

Alexandria.	Bombay.	Madras.	Calcutta.	China.	Straits.	Sundry.	Total.
5,90 ...	1,07 ...	,18 ...	,11 ...	,05 ...	— ...	,25 ...	7,56

SILVER.—Mln £.

,15 ...	9,04 ...	,79 ...	3,56 ...	2,14 ...	,96 ...	,11 ...	16,75

Our Paris Correspondent (ECONOMIST, Feb. 11, 1865), gives the following statement, from French official sources, of the Imports and Exports of Gold and Silver into and from *France* from all quarters in the three years 1862-4.

FRANCE, 1862-4.

GOLD—IMPORTED and EXPORTED.—25f=£.

[00,000's at unit end omitted—thus, £4.4=£4,400,000.]

Year.	Imported.			Exported.			Difference.	
	Bullion	Coin.	Total.	Bullion	Coin.	Total.	Imports. More.	Imports. Less.
	Mln. £	Mln. £	Mln. £	Mln. £	Mln. £	Mln. £	Mln. £	Mln. £
1864	4.4	14.2	18.6	1.3	12.4	13.7	4.9	...
1863	3.3	11.5	14.8	3.4	10.8	14.2	.6	...
1862	5.8	11.3	17.1	1.6	8.0	9.6	7.5	...
Average	4.4	12.3	16.8	2.1	10.4	12.5	3.3	...

SILVER—IMPORTED and EXPORTED.

Years.	Imported.			Exported.			Difference.	
	Bullion	Coin.	Total.	Bullion	Coin.	Total.	Imports. More.	Imports. Less.
	Mln. £	Mln. £	Mln. £	Mln. £	Mln. £	Mln. £	Mln. £	Mln. £
1864	2.5	8.2	10.7	5.4	7.0	12.4	...	1.7
1863	1.1	5.4	6.5	5.0	4.1	9.1	...	2.6
1862	1.1	4.2	5.3	4.6	4.1	8.7	...	3.4
Average	1.6	5.9	7.5	5.0	5.1	5.1	...	2.6

The curious feature of this table is the result, that the *excess* of the imports of gold are almost exactly neutralised by the exports of *silver*,—in other words, while in 1862-4 3,300,000*l* were added in gold, 2,600,000*l* were deducted in silver.

(P).—PRICES OF GRAIN—ENGLAND AND WALES. CALENDAR YEAR.

Averages of the Weekly Official *Gazette* Returns per Imperial Quarter.

Average.	Wheat. s	d	Barley. s	d	Oats. s	d	Rye. s	d	Beans. s	d	Peas. s	d
5 yrs, 1840-4	57	10	31	11	21	3	34	3	35	10	36	–
5 yrs, 1845-9	54	–	34	5	23	4	33	9	38	9	39	9
5 yrs, 1850-4	48	9	29	–	20	6	31	8	35	–	33	9
5 yrs, 1855-9	57	8	36	11	25	5	38	9	43	6	41	10
1860	53	3	36	7	24	5	36	3	44	8	40	6
1861	55	4	36	1	23	9	35	9	42	5	41	2
1862	55	5	35	1	22	7	36	4	39	11	40	2
1863	44	9	33	11	21	2	32	5	37	5	36	–
1864	40	2	29	11	20	–	30	10	36	1	34	7
Average.....	49	9	34	4	22	4	34	4	40	1	38	6

Comparing the average of the ten years 1840-9 with the average of the ten years 1855-64, the difference in the value of wheat is but 3s 8d per quarter. Barley, taking the average, was 2s 5d; oats, 1s 7d; rye, 2s 6d; and beans, 4s 5d per quarter dearer in the ten years, from 1855 to 1864, than in the ten years from 1840 to 1849. The comparison of the price of peas in the same periods shows a balance of 2s 8d per quarter in favour of 1840-9. The comparison stands thus:—

Years.	Wheat. s	d	Barley. s	d	Oats. s	d	Rye. s	d	Beans. s	d	Peas. s	d
1840-9.....	56	–	33	2	22	3	34	–	37	4	37	10
1855-64 ...	53	8	35	7	23	10	36	6	41	9	35	2
Inc. per ct.	$4\frac{1}{8}$		$6\frac{1}{8}$		$6\frac{5}{8}$		$6\frac{3}{4}$		10		7

(R).—MERCANTILE FAILURES 1864.

We obtain, from the *Standard* newspaper of December 31, 1864, the following list of the principal mercantile suspensions in 1864. It will be noticed that it comprises a number of respectable houses, several of which were brought down through the severity of the pressure in September and October. Cotton, sugar, jute, rice, and fruit have been the articles which have the most seriously compromised holders, the depreciation in these having been very extensive:—

January, 1864.
J. P. Moll, Old Broad street, silk broker.
W. Chappell and Son, Coventry, silkmen.
W. Perkins, Coventry, ribbon manufacturer.
E. S. Ratliff, Brandon, silk throwster.

February.
Orchard and Co., Regent street, drapery trade.
Langton and Robinson, London, timber trade.
D. and J. Birkett, Corn Exchange, corn dealers.

March.
Bakewell and Sons, London, commission merchants.
Yeoman and Son, London, gun and export trade.
G. and H. Deckker, Amsterdam, seed trade.

April.
Thomas Freeman, Bermondsey, timber merchant.

May.
J. B. and W. Nevill and Co., London, warehousemen.
James Hurst and Co., London and Mauritius, merchants.

June.
Favenc, Gwyn, and Co., London, Australian trade.
Lawrence and Fry, London, timber brokers and railway contractors.

July.
John Place and Co., Over Darwen, cotton manufacturers.
J. Mirfin and Co., Leeds, general shippers.
The East of England Bank, Norwich, and other places.

August.
Corpi, Braggiotti, and Co., London, Greek trade.
Newby, Carson, and Co., London, India and China trade.
Ferdinand Frankenheim, London, merchant.
G. E. Balleras and Co., London, Spanish trade.
Woodward and Podmore, London, wholesale grocers.
Ford, Curtis, and Curtis, London, provision trade.
Gunther, Muller, and Co., London, oil and seed trade.

September.
Born and Co., London, cotton and rice trade.
Palmer and Co., Cullum street, East India and general commission agents.
Croskey and Co., Cornhill, railway contractors.
Manual and Brillman, London, diamond merchants and jewellers.
Lewine and Morris, London, American agents and shippers.
The Leeds Banking Company, Leeds, bankers.
Dawson, Graham, and Pugh, Mincing lane, wholesale grocers.
Saalfeld Brothers, Leeds, export woollen trade.
J. Abrahams, London, woollen trade.
M. Dose, Havre and London, cotton trade.
Oelrichs and Co., Mark lane, cotton trade.
P. Walker and Son, Radcliffe, smallware trade.
J. W. Marsden, Leeds and London, ironfounder.
Charles Turner, Holbeck, cloth manufacturer.
William Turner, Leeds, cloth manufacturer.
David Johnson, Leeds, cloth manufacturer.
Teale and Co., Leeds, woollen cloth merchants.
Turck, Barclay, and Co., London, merchants.
F. Yagues, London, Spanish trade.
Francis Clough, cotton trade.
Ogle and Co., London, East India merchants.
Early and Smith, London, export clothiers.
Hall and Jones, Liverpool, sugar trade.

October.
Walker, Cotesworth, and Co., Liverpool, cotton trade.
Julius Mendel, London, commission agent.
Aaron Salomons, London, drapery trade.
John Gladstone and Co., London, American and Australian trade.
John Catto, London, foreign paper trade.
Patrick Thomson, London, ship and insurance broker.
E. Lazard, London, exchange broker.
Weber, Biddulph, and Co., London, continental trade.
Louis Speltz, Liverpool, cotton trade.
G. P. Lascaridi, London, merchant.
Glavcopidi Brothers and Co., London, merchants.
John Mavragordato, London, glove importer.
Bendin and Co., London, corn merchants.
Henry Ledgard, London, drapery trade.
E. Coombe, London, Spanish trade.
Brown, Buckley, and Co., London, East India brokers.
A. Drosten and Co., London, corn trade.

October—Continued.
Maxwell, Wright, and Co., New York, South American trade.
Monninger and Denninghoff, London, commission merchants.
Cuadra, Enciso, and Co., London, Spanish trade.
Rudge, Moreira Brothers, and Co., London, Brazilian trade.
Paul Joske and Co., London, wine trade.
Bullock and Fernyhough, London, colonial brokers.
Manning and Collyer, London, hemp and jute brokers.
Galbraith, Bigland, and Co,, London, china trade.
Simpson and Co., London, merchants and insurance brokers.
Hale and Greere, London, Russia brokers.
Duckworth and Co., London, wine trade.
J. Piddington, London, commercial agent.
T. Bradley and Co., London, wine trade.
De Wolff, Schuck, and Co., London, merchants.
A. Lamb, London, wine trade.
T. R. Schweitzer, and Co., London, bill brokers.
W. Vilches, London, merchant.
J. W. Morgan and Co., London, cotton trade.
Jasper Brothers, Preston, manufacturers.
N. B. Williams, Manchester, manufacturer.
John Fletcher and Co., Manchester, manufacturers.
Barrett and Wilson, Manchester, calico printers.
John Clapham, Leeds, hosiery manufacturer.
Truman and Johnson, Leeds, cloth manufacturers.
Elijah Pryce and Co., Liverpool, merchants.
Thomas and Oldfield, Liverpool, merchants.
Hime, Milnes, and Co., Liverpool, brokers.
F. Giles & Co., Sydney, merchants.
Souto and Co., Rio de Janeiro, bankers.
Gomez and Sons, Rio de Janeiro, bankers.
Montenegro and Lima, Rio de Janeiro, bankers.
Oliveira and Bello, Rio de Janeiro, bankers.
Morina, Irmao, and Campbell, Rio de Janeiro, merchants.
Last and Co., Rio de Janeiro, merchants.
Rocha, Lopez, and Leite, Rio de Janeiro, merchants.
J. Freeman, Rio de Janeiro, merchant.
Callings, Sharp, and Co., Rio de Janeiro, merchants.
George Rudge and Co., Rio de Janeiro, merchants.
Aranajo, Filho, and Co., Rio de Janeiro, merchants.
Mendes, Irmao, and Sernas, Rio de Janeiro, merchants.
Costa, Furriera, Paiva, and Co., Rio de Janeiro, merchants.
C. J. Alves, Penheiro, Rio de Janeiro, merchant.
Joseph Faro, Rio de Janeiro, merchant.
Petty Brothers and Co., Rio de Janeiro, merchants.
W. J. Morgan and Co., London, cotton trade.
John C. Cole and Co., London, Spanish trade.

November.
Arthur Hoare and Co., London, woollen trade.
John Leisk and Co., London, merchants.
Dovey, Benjamin, and Co., London, Brazilian trade.
Darby and Co., London, merchants.
Rougemont, De Lowenberg, and Co., Paris, bankers.
Caspari and Co., London, Hamburgh and Spanish trades.
C. Wilson, London, importer of silks.
E. Caralambi, London, fruit trade.
Butterworth and Sons, Huddersfield, woollen trade.
Halliday, Fox, and Co., London, East India trade.
Evans and Lewis, London, fancy goods manufacturers.
H. Powell and Sons, London, provision trade.
Elliot and Co., London, china trade.
Robin and Co., Paris, bankers.
Platmann, Berry, and Co., Lyons, North American trade.
J. Lourie and Co., London, merchants.

December.
Wilson, Bowles, and Co., London, East India merchants.
Eyles, Evans, and Co,. London, silk trade.
Hutter, Droughet, and Co.. London, merchants.
Sterling, Gordon, and Co., Glasgow, merchants.
Berger Brothers, London, metal brokers.
Henry Gurney, Birmingham, timber dealer.
E. Lloyd, Birmingham, foreign timber trade.
Hill and Weguelin, London, Russian merchants.
Edward De Coster and Co., London, Brazilian trade.
Grundler, Ormond, and Co., London, Italian and Spanish trades.
Perry and Waagen, London, commission agents.
J. Holm, Stockholm, shipowners and merchants.

1865—1 Jan.	129	97	93	131	101	95	115	115	325	323	252	97

The construction of this Table will be easily understood. For example—the Col. *Wheat*, represents the fluctuations in the Gazette price of Wheat, according to the actual prices given in (B.) Col. 9. The price of *Wheat*, 1845-50, is represented in (F.) by 100—and the prices of the 13 subsequent dates by corresponding additions to or abatements from 100. Thus, at 1st July, '57, the 100 had become 118. To arrive at the *per centage* variation from year to year, it is obvious that the *differences* must be measured, not against 100, but against the number placed against the first of the years compared. Thus, the *fall* in the prices of Wheat between 1st July, '57, and 1st Jan. '58, was not 28 per cent.—but 22 per cent.—or the proportion borne by 118 to a fall of 28.

PROPRIETARY SCHOOL,
GRAVESEND.

Head Master, Mr M. GUTTERIDGE, B.A.

The course of study combines the main features of the best middle schools with the distinctive characteristics of our ancient classical schools, and is such as to fit a boy either for business or professional life. It includes the Classics and Mathematics; History, General and Sacred; Geography, Physical and Political; English Grammar and Composition, Spelling and Arithmetic, Drawing and French and the practice of good Handwriting.

Pupils are prepared for the Civil Service Examinations, for the Oxford and Cambridge University Local Examinations, and for Matriculation at the London University.

For terms and prospectuses, apply at the School.

NUNN'S MARSALA OR BRONTE
WINE, 25s per dozen, £7 4s per six dozen, £12 15s per quarter-cask. Rail paid to any station in England. This wine will be found of superior quality, is soft and old, and, though full flavoured, entirely free from heat or the slightest approach to acidity.—THOS. NUNN and SONS, Wine, Spirit, and Liqueur Merchants, 21 Lamb's Conduit street, W.C. Price lists on application Established 1801

WESTERN GRAMMAR SCHOOL,
Brompton, S.W., in union with King's College, London.—The system pursued at this school is eminently practical, and calculated to prepare pupils for the competitive examinations and the various pursuits of life. Three pupils successfully passed the Oxford Local Examinations this year. The Head Master takes a few boarders.—For terms and prospectus apply at the school.

DR DE JONGH'S
(Knight of the Order of Leopold of Belgium)

LIGHT-BROWN COD LIVER OIL,
Prescribed by the most Eminent Medical Men as the safest, speediest and most effectual remedy for CONSUMPTION, CHRONIC BRONCHITIS, ASTHMA, COUGHS, RHEUMATISM, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS,
Is incomparably superior to every other kind.

SELECT MEDICAL OPINIONS.

Sir HENRY MARSH, Bart., M.D., Physician in Ordinary to the Queen in Ireland.—"I consider Dr de Jongh's Light-Brown Cod Liver Oil to be a very pure Oil, not likely to create disgust, and a therapeutic agent of great value."

Dr LANKESTER, F.R.S., Scientific Superintendent, South Kensington Museum.—"I consider the Cod Liver Oil sold under Dr de Jongh's guarantee to be preferable to any other kind as regard genuineness and medicinal efficacy.

DR GRANVILLE, F.R.S., Author of the "Spas of Germany."—"Dr Granville has found that Dr de Jongh's Light-Brown Cod Liver Oil produces the desired effect in a shorter time than other kinds, and that it does not cause the nausea and indigestion too often consequent on the administration of the Pale Oil."

Dr LAWRANCE, Physician to H.R.H. the Duke of Saxe-Coburg and Gotha.—"I invariably prescribe Dr de Jongh's Cod Liver Oil in preference to any other, feeling assured that I am recommending a genuine article, and not a manufactured compound in which the efficacy of this invaluable medicine is destroyed."

Dr de Jongh's Light-Brown Cod Liver Oil is sold only in IMPERIAL Half-Pints, 2s 6d; Pints, 4s 9d; Quarts, 9s; capsuled, and labelled with his stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists and Druggists.
SOLE CONSIGNEES:
ANSAR, HARFORD, and CO., 77 Strand, London, W.C.

CAUTION.—Beware of Proposed Substitutions.

THE PHOSPHROISED NERVINE
TONIC.—The NEW CHEMICAL COMBINATION of PHOSPHATIC SALTS, QUININE, IRON, &c., containing all the Essential Constituents of the Blood, Brain, and Nerve Substance. Great philosophical and chemical research has led to the discovery of this invaluable remedy in its present perfect state, agreeable to the palate and innocent in its action, still preserving its wonderful properties, affording immediate relief, and permanently curing all who suffer from Wasting and Withering of Nervous and Muscular Tissues, total and partial prostration, and every other exhaustive derangement of the system. It regenerates all the important elements of the human frame. "As phosphorus in a state of nature illumines the darkness, so the exhausted frame revives when impregnated with its electrical properties."

Prices: 11s per bottle, or four 11s bottles in one, 33s; and in cases containing three 33s bottles, £5, which saves £1 12s, packed securely and sent to all parts of the world.

NOTHING IMPOSSIBLE.—
The greatest and most useful invention of the day, AGUA AMARELLA.—Messrs JOHN GOSNELL and CO., Three King court, Lombard street, perfumers to Her Majesty, respectfully offer to the public this truly marvellous fluid, which gradually restores the human hair to its pristine hue—no matter at what age. The Agua Amarella has none of the properties of dyes; it on the contrary, is beneficial to the system, and when the hair is once restored one application per month will keep it in perfect colour. Price one guinea per bottle; half bottles, 10s 6d. Testimonials from artistes of the highest order, and from individuals of undoubted respectability may be inspected. Messrs Jno. Gosnell and Co. have been appointed perfumers to H.R.H. the Princess of Wales.

CAUTION—"In Chancery."

CHLORODYNE.

VICE-CHANCELLOR WOOD stated that Dr J. Collis Browne was undoubtedly the Inventor of Chlorodyne. Eminent Hospital Physicians of London stated that Dr J. Collis Browne was the discoverer of Chlorodyne; that they prescribe it largely, and mean no other than Dr Browne's.—See TIMES, July 13, 1864. The Public, therefore, are cautioned against using any other than DR J. COLLIS BROWNE'S CHLORODYNE.

This Invaluable Remedy produces quiet refreshing sleep—relieves pain, calms the system, restores the deranged functions, and stimulates healthy action of the secretion of the body.

From J. M'Grigor Croft, M.D., M.R.C., Physician, London, late Staff Surgeon to H.M.F. "After prescribing Dr J. Collis Browne's Chlorodyne for the last three years, in severe cases of Neuralgia and Tic-Doloreux, I feel that I am in a position to testify to its valuable effects. Really in some cases it acted as a charm, when all other means had failed." No home should be without it. Sold in bottles, 2s 9d and 4s 6d. Sent free on receipt of stamps, by J. Davenport, 33 Great Russell street, W.C., Sole Manufacturer.

Observe particularly, none genuine without the words "Dr J. Collis Browne's Chlorodyne" on the Government stamp.

TO GENTLEMEN SEEKING

EDUCATION IN GERMANY.—

ANGLO-GERMAN ESTABLISHMENT, Bonn-on-the-Rhine, founded in 1847.—Herr THOMAS prepares Young Gentlemen for the Army, Navy, Civil Service, and Mercantile pursuits. German and French only are spoken in the establishment, where the Pupils enjoy all the comforts of an English home. The highest references given.—For particulars, apply to the Director, THEODORE THOMAS, Baumschule Allée, Bonn.

THE PERFECT SUBSTITUTE FOR

SILVER.—The real NICKEL SILVER, introduced more than thirty years ago by WILLIAM S. BURTON, when plated by the patent process of Messrs Elkington and Co., is beyond all comparison the very best article next to sterling silver that can be employed as such, either usefully or ornamentally, as by no possible test can it be distinguished from real silver.

A small useful set, guaranteed of first quality for finish and durability, as follows:—

	Fiddle or Old Silver Pattern.	Bead Pattern	Thread Pattern	King's or Shell and Thread
	£ s d	£ s d	£ s d	£ s d

ESTABLISHED 1840.

CHURCH OF ENGLAND LIFE AND FIRE ASSURANCE INSTITUTION.

Head Office, 9 and 10 King street, Cheapside, London.
Empowered by Special Act of Parliament, 4 and 5 Vic., cap. XCII.
Subscribed Capital, One Million.
(A List of the Proprietors periodically Enrolled in the High Court of Chancery.)

LIFE DEPARTMENT.

This Institution adopts both the Proprietary and Mutual systems of Life Assurance, and the Policy-holders in both branches are fully protected by the large subscribed capital of the Company.

In the Proprietary branch, Assurances are granted at the lowest rates of premium consistent with the security of the Establishment. Such assurances may be effected in a great variety of ways, to suit the circumstances and conveniences of the assured. Among others, where the policy is made payable "on the assured attaining any given age, or at death, if that event should happen previously," is particularly deserving of attention.

In the Mutual branch of this Institution, the policy-holders are entitled to the entire profits of the branch, which are divided at the expiration of every fifth year. These profits may be applied either in additions to the sums assured, or in temporary allowances upon the yearly premiums payable until the ensuing period of division.

Prospective bonuses are at each division set apart for those policy-holders who are not immediately entitled to participate in the profits, but who will have paid five yearly premiums before the next ensuing division; thus affording to the assured all the advantages of an annual division of profits.

FIRE.

Premiums for assurance against fire are charged at the usual moderate rates, with a reduction of £10 per cent. on the residences and furniture of Clergymen, and the buildings and contents of Churches and Church Schools.

Detailed prospectuses, with the names of the Trustees and Directors,—full tables of life premiums,—the necessary forms of proposal,—and every requisite information as to the mode of effecting assurances, may be obtained on application at the head office, as above.

WM. EMMENS, Manager.

*** All applications for Agencies in those places where the Company have not yet appointed Agents, to be addressed to the Manager.

CLERICAL, MEDICAL, AND GENERAL LIFE ASSURANCE SOCIETY.

13 St James's square, London, S.W.
Established 1824.

PRESIDENT.—The Archbishop of Canterbury.
CHAIRMAN.—Right Hon. John Robert Mowbray, M.P.
DEPUTY-CHAIRMEN. William Bowman, Esq., F.R.S. Sir Charles Locock, Bart., F.R.S.

FINANCIAL RESULTS OF THE SOCIETY'S OPERATIONS.

The annual income exceeds	£201,000
The assurance fund safely invested is over	1,446,000
The new policies in the last year were 466, assuring	271,440
The bonus added to policies at the last division was	275,077
The total claims by death paid amount to	1,962,629

The following are among the distinctive features of the Society:—

Credit System.—On any policy for the whole of life, where the age does not exceed 60, one-half of the annual premiums during the first five years may remain on credit, and may either continue as a debt on the policy, or be paid off at any time.

Low Rates of Premium for Young Lives, with early participation in profits.

Endowment Assurances may be effected, without profits, by which the sum assured becomes payable on the attainment of a specified age, or at death, whichever event shall first happen.

Invalid Lives may be assured at rates proportioned to the increased risk.

Prompt Settlement of Claims.—Claims paid thirty days after proof of death.

The reversionary bonus at the Quinquennial division in 1862 averaged 48 per cent., and the cash bonus 28 per cent., on the premiums paid in the 5 years.

The next division of profits will take place in January, 1867, and persons who effect new policies before the end of June next, will be entitled at that division to one year's additional share of profits over later entrants.

Tables of rates and forms of proposal can be obtained of any of the society's agents, or of

Solicitors—Messrs WILDE, 21 College hill, London.

JOHN MINET LAURIE, Esq., in the Chair.

REPORT.

The Directors have the pleasure to submit for the consideration of the shareholders the 31st annual report, for they are ending 31st December last.

The year 1863 opened with improved prospects of trade in the manufacturing districts. The reduced production of the cotton manufacture in the year 1862, owing to the diminished supply of the raw material, led to an exhaustion of stocks, and a corresponding enhancement of price in the markets of the world, which gave a general impetus to manufacturing activity, and proved a material abatement of the Lancashire distress. The encouragement thus afforded has been found effective in stimulating the productive energies of other countries in furnishing a better supply of cotton.

The abundant harvest which supervened in the autumn increased the accumulation of capital and gave additional prosperity to the home trade, leading also to the formation of a variety of new schemes, financial and otherwise, for developing the resources of the country.

The value of money at the commencement of the year was 3 per cent., and rapidly rose in the month of January to 5, but descended again by the end of April to 3 per cent.; a reaction ensued by the end of May to 4 per cent., at which rate it remained until November, when it gradually rose to 8 per cent., giving, upon the whole, a fair average for the year, and thereby enabling the Directors to submit the following very favourable statement of accounts, which they trust the proprietors will deem highly satisfactory.

The result of the year's operations is as follow:—

1863.	£	s	d
Jan. 1.—Rest or undivided profits at 31st December, 1862, as exhibited at Annual Meeting in May, 1863	181,764	1	2
